SAFETY MESSAGE

KING FIRE September 15th, 2014

The major concerns remain **LCES, Situational Awareness and Driving!**

- **Extreme Fire Behavior is to be Expected!** Maintain awareness of alignment factors.

- **Escape Routes and Safety zones.** The burned and unburned areas have numerous **SNAGS** and jack pots of dead and down fuels. Know where the safest and fastest route to your safety zone is at all times. Be aware of fire activity, post lookouts.

- **Situational Awareness.** Be aware of your surroundings in everything you do: driving, hiking, chain saw use, mop-up, rehabbing. Lack of focus can lead to an injury or accident. Stay well-rested and alert. Take breaks if you become drowsy.

- **Footing.** Watch out for loose slippery rocks and the drop offs into steep drainages. Watch where you step. There are rocks and staubs.

- **Driving.** Be careful on roads, drive slow, take your time, be courteous, drive defensively, use headlights, spotters, and turn outs.

- **EVERYONE** is responsible for personal safety – individuals and supervisors. If you see an unsafe situation, make it known to others.

AND Remember to Watch for Snags and Broken Limbs !

-Look Up ! Look Down ! Look Around ! It's a team effort !

Safety Officer: John Wagner

Incident Location
County El Dorado State CA Latitude 38 46 55 N Longitude 120 36 12 W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
