THIS PAGE

INTENTIONALLY

LEFT BLANK

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: LOWELL INCIDENT CA-NEU-017851	2. Operational Period: Date From: 07/30/2015 Time From: 0700 hours	Date To: 07/31/2015 Time To: 0700 hours

3. Objective(s):

Management Objectives

- Provide for public and emergency personnel safety at all times
- Provide for timely and accurate release of incident information to the public, media, first responders and cooperators
- Protect and defend structures and improvements in the fire area
- Protect natural and cultural resources in the fire area
- Provide a process to manage emergency resources efficiently
- Ensure costs are minimized appropriately for values at risk
- Ensure coordination and communication with stakeholders and cooperating agencies

Control Objectives

- NORTH of: Interstate 80
- SOUTH of: Buckeye Ridge
- EAST of: Highway 174
- WEST of: McGuire Mountain

4. General Weather Conditions:

SEE ATTACHED

General Situational Awareness and Safety:

- MAINTAIN L.C.E.S. AT ALL TIMES. Safety zones and escape routes are mandatory
- Ensure all personnel maintain situational awareness
- Rolling material and steep terrain. Remember to maintain good footing
- Keep your hydration up by drinking water and electrolyte beverages. Avoid energy drinks
- Maintain good communications with your supervisors, adjacent forces and crew members
- Guard against complacency.

5. Site Safety Plan Required? Yes ☐ No ☒ **Approved Site Safety Plan(s) Located at:**

Lowell Fire Weather Forecast

FORECAST NO: 3

NAME OF FIRE: Lowell

PREDICTION FOR: Thursday July 30th

UNIT: NEU-Calfire

SHIFT DATE: 0700 Thu-0700 Fri

SIGNED: Ryan Walbrun

TIME AND DATE FORECAST ISSUED: 1900 July 29th

Incident Meteorologist Ryan Walbrun

WEATHER DISCUSSION: Another very hot and dry day over the Lowell Fire. Highs will be in the upper 90s to around 100 degrees. Humidity values will remain extremely dry between 9-18%. These type of temperatures are near daily records for the end of July so were dealing with near record heat and dryness on the heels of the long term drought. Light down-canyon winds will end by 10 am and then remain light through early afternoon. By about 2 pm the afternoon up-canyons will begin but continue to be light. The night shift can expect another warm and dry night with lows in the 70s and poor humidity recovery of only around 25-35%. Winds may shift to a more southerly direction as the flow aloft begins to change.

WEATHER FORECAST For Thursday:

WEATHER: Sunny with near record heat today combined with very low humidity readings.

TEMPERATURES: Highs 97-102.

HUMIDITY: Afternoon minimum 9-18%

20 FT WINDS:

RIDGETOP - Easterly 2 to 5 mph til 10 am then light through midday before turning Southwest 4-8 mph during the afternoon and early evening hours.

SLOPE/VALLEY - Downcanyon 2-5 mph through 10 am then afternoon upcanyon 4-7 mph gusts 10 mph through 8 pm.

HAINES INDEX: 4

STABILITY/INVERSION: Weak to moderate Inversion lifting by 1100

WEATHER FORECAST For Thursday Night:

WEATHER: Clear skies. Poor humidity recovery with thermal belts developing between 2500 and 4000 feet.

TEMPERATURES: Mild with overnight lows in the 70s.

HUMIDITY: Poor recovery 25-35% most of the night…locally 45% where water drops have occurred.

20 FT WINDS:

RIDGETOP - Evening Southwesterly 4-8 mph…strongest evening hours.

SLOPE/VALLEY - Downcanyon 2-5 mph setting up overnight.

EXTENDED FORECAST: Slight cooling on Friday with increasing monsoonal moisture that will be watched into the weekend. Highs still in the 90s with humidity in the teens.

EXTRA INFORMATION: Observed weather on Wednesday was high of 99-102 with RH 11-15%

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 4	**TYPE OF FIRE: Wildfire**
FIRE NAME: Lowell	**OPERATIONAL PERIOD: 7/30-31/15 0700-0700**
DATE ISSUED: 7/29/15	**TIME ISSUED: 1900**
UNIT: NEU – Nevada Yuba Placer Unit	**SIGNED:**
	Typed/printed: Don Watt FBAN(T)

INPUTS

WEATHER SUMMARY:

The weather will be clear, with high temperature, low humidity, and poor humidity recovery over the nighttime hours. High temperatures 97-102 degrees, minimum RH 9-18% with ridgetop winds from the east 2-5 mph in the morning, changing to southwest 4-8 mph in the afternoon. Valley and slope winds will be downcanyon 2-5 mph until 1000 changing to upcanyon 4-7 mph with gust to 10 mph in the afternoon. Tonight temperatures will be in the 70's with the RH 25-35%. The wind on the ridges will be southwest 4-8 mph. The slope and valley winds will be downcanyon 2-5 mph.

Probability of Ignition: 90-100% during the day, 80 – 90% during the night

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Minimal RH recovery and a thermal belt in the fire area will lead to fire behavior increasing earlier in the morning. Pockets of unburned fuel will be active in the afternoon. The fuels in the burned area which received heavy water drops and retardant will continue to dry out and may start to smolder. The ground cover has a moderate load of 10 and 100 hour fuels in the older stands of timber. These fuels continue to continue to dry with the poor humidity recovery and will burn more readily. The weather will continue to be hot and dry with the diurnal winds have the most effect on the fire. Torching and crown fires will produce short range spotting.

SPECIFIC:

Branch I: The fire has had little activity in the past several days, but there is still the possibility of single tree torching and short runs in any remaining fuels.

Branch III & IV: The fire activity will be most active after 1400 when the upslope winds increase. The areas in Division D, E and W were aircraft support was used, the fuels will continue to dry over the next several days. As these fuels dry out the fire activity could pick up in these unburned islands. Short range spotting can be expected from torching trees.

AIR OPERATIONS:

A weak to moderate inversion will be over the fire area until 1100, which may limit early morning air operations.

SAFETY

Make sure lookouts are posted were they can see the fire activity in the bottom of the canyon, especially as crews start to work farther down slope into the drainage.

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name: Lowell	2. Operational Period:	Date From: 7/30/2015	Date To: 7/31/2015
		Time From: 0700	Time To: 0700

3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

Major Hazards/Risks

Maintain Situational Awareness: Keep crews engaged and on task. Limit exposure to hazardous areas and rehab outside these boundaries.

Hydration/Nutrition/Fatigue: Hydration and nutrition starts prior to getting to the line, ensure your personnel are prepared for the shift. Continuously monitor your people.

Driving Hazards: Utilize caution and reduce speed, congestion will be encountered in camp and on the line. Utilize proper spacing and speed when traveling on dusty and narrow roads.

Hazardous Trees/Snags: Identify, communicate and flag, Fall hazardous trees with qualified personnel.

Stump Holes: Identify, flag and ensure personnel are aware of hazard

Heavy Equipment: Stay visible, stay in communication and watch out for debris fallout.

Powerlines: Use caution when working under and around powerlines. Consider all lines are energized until proven otherwise.

Rolling Rock/Debris: Utilize good spacing, post lookouts in hazardous areas.

Wildlife: Numerous sightings in and around fire perimeter, communicate to all crews.

Accountability: Maintain crew integrity and discourage freelancing. Identify life hazard zones and post life hazard look outs as needed.

Public in Area: Communicate closures, traffic routes. PIO Accountability

Empower your people and encourage small unit leadership

"Never tell people how to do things. Tell them what to do and they will surprise you with their ingenuity".

George Patton

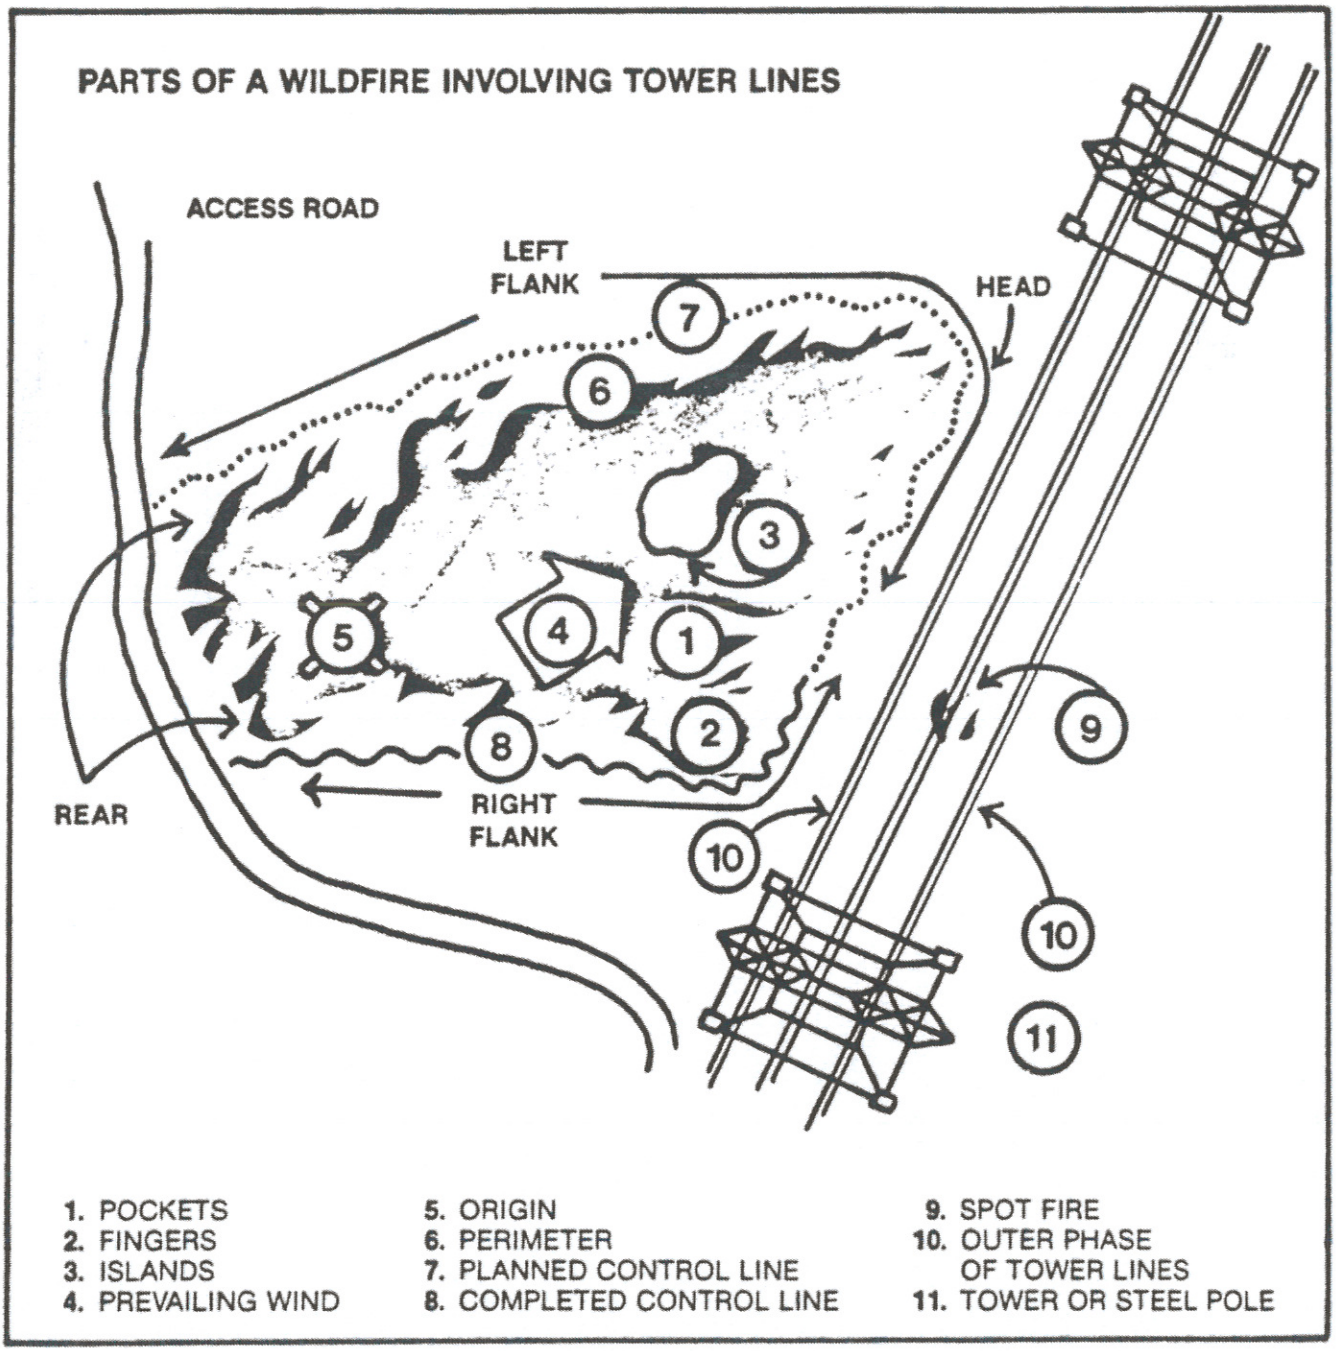
WILDFIRE FIGHTING NEAR HIGH-VOLTAGE ELECTRIC TRANSMISSION LINES

OWNED By PACIFIC GAS and ELECTRIC

The purpose of this document is to provide safety guidelines to agencies involved in wildfire fighting near high-voltage electric transmission lines owned and operated by PG&E. Wildfire fighting activities will usually begin before PG&E staff can assist fire fighting personnel. Application of these guidelines will guard agency personnel from electrical hazards associated with fighting grass or brush fires near overhead transmission lines.

FIGURE 1



- Tactics should consider transmission lines to be an exposure requiring protection when threatened by fire. When possible, establish a Control Line to prevent the spread of fire into the area within 100 feet of and parallel to the edge of the outer most phase conductor.
- Smoke, ash, and incidental mist from fire fighting operations can contaminate the insulators on transmission structures. This contamination may cause a short-circuit to occur at the structure, creating an electrical hazard.
- Spot fires that may occur beneath the tower lines, normally do not generate enough smoke to create an electric safety hazard. Spotters should be able to safely work under the tower lines when spot fires are controlled quickly and are at least 100 feet from the main smoke plume passing though the tower lines.
- Small burning trees under the tower or steel pole lines that exceed the height of an individual present a real threat of creating a phase-to-ground short. Maintain clearance between the trees and fire fighting operations.
- The incidental light-colored smoke that has cooled and dropped from the heavy smoke plume represents no threat of being involved in a phase-to-ground short.
- When fighting a fire near high-voltage transmission lines, one should never direct the hose stream:
  - At wires or raise the hose stream above the height of an individual.
  - Into the heavy plume of smoke that is within 100 feet of the outside conductor.
  - At burning trees under the lines.
- Aerial drops of chemical fire retardant onto electric transmission lines should be avoided. This retardant can contaminate the insulators on a line, leading to arcing and short-circuits.
- Aerial dropping of water does not normally have negative effects on energized lines as long a sufficient amount of water hits the conductors. Mist or light water trailing from water drops when mixed with smoke residue on insulators can cause arcing or short-circuiting of the line.
- The first PG&E representative on the scene after being notified of the fire will normally be a Troubleman, a Lineman, or a Supervisor.
- The central alarm person who initially contacts PG&E should provide an accurate location of the fire and as to where the PG&E representative will meet Fire Department personnel.

PG&E

AIR OPERATIONS SUMMARY

PREPARED BY: David A. Lopez **PREPARED DATE/TIME:** 7/29/15 19:00

1. INCIDENT NAME: Lowell

2. OPERATIONAL PERIOD DATE: 7/30/15 **START TIME:** 07:00 **END TIME:** 21:00 **SUNRISE:** 06:02 **SUNSET:** 20:18

3. REMARKS (Safety Notes, Hazards, and Air Operations Special Equipment, etc.):
* All GPS data to be collected (Degree ,Decimal, Minutes)
* Avoid aerial application of retardant or foam within 300' of waterways, bodies of water. If dropped in these areas, notify AOBD with Lat/Long, and estimate of gallons.
* Power Lines in the Area
* Track dip sites/ quantity taken/ and drop location* *Track retardant drop location*
* Nevada County Airport (Grass Valley) Lat/Long N39° 13' 26.5" X W121° 00' 11.1" **KGOO**
* Blue Canyon Helibase Lat/ Long N39° 16' 29" X W120° 42' 35.1" **KBLU**

20	Emergency	**Air Guard**	All Divisions	168.6250	N		168.6250	N	110.9 (1)		EMERGENCIES ONLY

Prepared By (Communications Unit)	Incident Location
Tom Webb COML IMT #1	County Nevada State-CA Latitude N Longitude W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

MEDICAL PLAN (ICS 206)

1. Incident Name: LOWELL

2. Operational Period: Date From: 7-30-15 Date To: 7-31-15
Time From: 07:00 Time To: 07:00

3. Medical Aid Stations:

Name	Location	Contact Number(s)/Frequency	Paramedics on Site?
MERT (RN/MD)	BASE CAMP NEAR POND IN PARKING	(530) 310-4511	No

4. Transportation (indicate air or ground):

Ambulance Service	Location	Contact Number(s)/Frequency	Level of Service
SIERRA NEVADA AMB	155 GLASSON WY, GRASS VALLEY	(530) 477-5761	ALS
AMR	451 GRASS VALLEY HWY, AUBURN	(916) 563-0910	ALS
AIR AMUBLANCE	GRASS VALLEY ECC AIR AMBULANCE CORDINATION	(888) 692-6692	ALS

5. Hospitals:

Hospital Name	Address, Latitude & Longitude if Helipad	Contact Number(s)/ Frequency	Travel Time		Trauma Center	Burn Center	Helipad
			Air	Ground			
SIERRA NEVADA MEMORIAL	155 GLASSON WAY, GRASS VALLEY N 39 13.36.75 W 121 02 85	530-274-6001	5	15	NO Level:_____	NO	YES
AUBURN FAITH	11815 EDUCATION ST, AUBURN,	(530) 888-4562		30	NO Level:_____	NO	NO
SUTTER ROSEVILLE	1 MEDICAL PLAZA ROSEVILLE, CA N 38 44.89 W 121 15.00	(916)786-3033	16	45	YES Level: 2	NO	YES
UC DAVIS	2315 STOCKTON BLVD SACRAMENTO N 38 33.20 W 121 27.10	(916) 734-3790	23	60	YES Level: 1	YES	YES

6. Special Medical Emergency Procedures:

LINE EMERGENCY:

Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
  1. Line EMT at nearest Drop Point
  2. Communications Unit
- Communications Unit contacts:
  1. Ground EMS resource on Fire Line
  2. Operations
  3. Safety
  4. Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency utilizing *CALCORD* for IWI and only for duration needed.
- Communication Unit will clear command channel for emergency traffic as needed and only for time needed.

BASE CAMP EMERGENCY

Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
  1. Communications
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

INJURY REPORTING PROCEDURES

CHIEF COMPLAINT_____
LOCATION OF PATIENT_____
TRANSPORT REQUEST BY: AIR___ GROUND__
DIVISION_____CREW_____
POINT OF PICKUP_____
LAT _____ LONG _____
IS EMT WITH THE PATIENT: YES _____ NO_____

FROM THE DESK OF DOCUMENTATION

Lowell Incident
7-30-15

Who needs to turn in what?

Unit Logs (ICS 214's) are required by Strike Team Leaders and above. However, Crews, Engines and possibly other contractors working on the line or in camp, may be asked to fill them out, especially if there has been a significant event that may need to be documented, or if requested by your Supervisor. Ensure they are signed and dated and include operational period if applicable.

Copies of the Crew (ICS 224's) and Personnel (ICS 225's) Evaluations are sent to your home unit or business office. Therefore, it is imperative to provide the home unit or business name and address on the evaluation form.

Thanks for your help and cooperation.

Instructions for Use of CDF 101
Property Certification of Location or Damage

Document Number: for use as a local number system or when attached to a FC-40 document.
Location / Incident Name: **Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.**
Incident Number: **Enter the appropriate incident number**
Unit: **Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.**
Region: **Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.**
Date: **Enter the date the P.L.or D. was completed.**
The following items were: **Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property. Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.**
Date of Occurrence: **Enter the date the property was broken, left on line or damaged.**
Quantity: **Enter the quantity for the line item.**
Unit of Measure: **Enter the unit of measure for the line item (example ea = each).**
CDF Stock Number: **Enter the PIN or stock number.**
Description: **Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.**
Property Number: **Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.**
Location of Items: **Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.**
Remarks: **Enter specific remarks here, how was the property damaged, what specifically is wrong with it.**

Signature of Person Certifying Occurrence as Described:

Signature: **The CDF Employee certifying the occurrence must sign.**
Printed Name: **Enter the printed name of the signature.**
Title: **Enter the title of the signature.**
Date: **Enter the date of the signature.**

Unit Supervisors Approval:

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.
If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.
Comments: **Supervisors may enter comments of approval or disapproval.**
Signature of Unit Administrator: **Signature of Unit Supervisor reviewing the certification described.**
Title: **Title of the signature.**
Date: **Date of the signature.**
Notes:
This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.
This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to you local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.
