SOBERANES FIRE

CORRECTED

CA-BEU-003422

Corey 1145

OPERATIONAL PERIOD

FRIDAY AUGUST 5TH 0700

to

SATURDAY AUGUST 6TH 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Soberanes	2. Operational Period: Date From: 8/5/16 Time From: 0700	Date To: 8/6/16 Time To: 0700

3. Objective(s):

Management Objectives

- Provide for and maintain public and first responder safety by utilizing the incident safety analysis process.
- Protect all critical assets at risk to include the redwoods, historical assets within the affected area, infrastructure and improvements, watershed, and transmission lines.
- Utilize tactics that promote protection of sensitive natural and cultural resources in the Ventana Wilderness.
- It is the Unified Incident Commander's Leader's Intent to ensure collaboration at all levels of the incident.
- Be financially responsible for all management and fire suppression tactics.
- Foster and enhance community and political relationships.
- All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Monterey County.

Control Objectives

- Keep the fire North of the Nacimiento-Fergusson Rd
- Keep the fire South of Huckleberry Hill
- Keep the fire West of Carmel Valley and Reliz Canyon
- Keep the fire East of Hwy 1 in the North and the Coast Ridge in the South

4. Operational Period Command Emphasis:

Perimeter Control , Structure Defense, Improve Contingency Lines, Hold and Improve Existing Control Lines

General Situational Awareness

S. T. O. P. Stop Think Organize Proceed

5. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Soberanes Fire Weather Forecast

'ORECAST NO: 13

'REDICTION FOR: 0700 Fri-0700 Sat

;HIFT DATE: 8/5-8/6

'IME AND DATE
OREcAST ISSUED: 1900 8/4/16

NAME OF FIRE: Soberanes

UNIT: CA-BEU/LPF

SIGNED:

Incident Meteorologist- Ryan Walbrun
NWS-Bay Area

VEATHER DISCUSSION: Marine layer will continue to be deep today, at least 2500 feet and locally as igh as 3000 feet. This will bring cooler temperatures and higher humidity readings to nearly all areas of the re. Morning clouds in Carmel Valley will slowly pull back to the coast by late morning. Earlier sunshine is kely south of Pt Sur in the Sur Zone. The afternoon burn period will likely be shorter than previous days ith the cooler temperatures and higher humidity. In addition the afternoon seabreeze will initiate earlier and ring low clouds and higher humidity air back inland by evening. Expect good humidity recovery tonight for ıe first night since the fire has started. Another reinforcing shot of cool air and high humidity on Saturday s another weak weather system moves through the region.

VEATHER FORECAST FOR Friday:

'EATHER: Cooler with higher humidity. Clouds and drizzle in the morning pulling back to the coast by late orning. Becoming sunny Carmel and Sur Zone with smoke over the Seco zone.

EMPERATURES: 2-5 degrees cooler. 72-82 above 3000 feet. 60s lower slopes and Highway 1.

UMIDITY: 5-10% wetter. 25-40% above 2500 feet. 55-70% coast.

) FT WINDS:
RIDGETOP - West to Northwest 5-10 mph afternoon gusts 15 mph.

SLOPE/VALLEY - Seabreeze and upcanyon 1400-2000 hours 4-8 mph gusts 10-12 mph.

arine Layer: 2500 feet

EATHER FORECAST FOR Friday Night:

EATHER: Becoming mostly cloudy below 2500 feet. Smoke over the Seco Zone.

:MPERATURES: 62-72 above 2500 feet. 51-58 along Hwy 1 and up Carmel Valley.

JMIDITY: Good recovery below 2500 feet 70-90%...35-50% above 2500 feet.

FT WINDS:
RIDGETOP – Northwest 5-10 mph til sunset...then 5 mph overnight.

SLOPE/VALLEY – Evening upcanyons 4-7 mph...becoming downcanyon 1-3 mph overnight.

ırine Layer: Deepening 2500 to 3000 feet overnight into Saturday morning.

---

tended Forecast: Cooling trend continues into Saturday with highs upper 60s and 70s. Still good humidity recovery. Ridge winds West 5 to 10 mph. Lows in the 50s. Weak ridge builds Sunday leading to slightly warmer and drier conditions with marine layer 2000 feet. Long range trends keep temperatures below normal next week.

rtable RAWS 163.350 Tone 0032 for H3,Tone 0034 Pinyon Peak, Tone 0035 White Rock, Tone 0029 for Blue Rock, Tone 0038 Chews Ridge, Tassajara Hot Springs 0039.

INPUTS

WEATHER SUMMARY **Cooler with higher humidity.**
PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

Overall fire activity is likely to decrease a bit as the higher humidity conditions move into the area. Fire activity above the marine layer (3000ft) will continue to be more active than the lower elevations. Fire movement below the marine layer (3000ft) will be less with more of an understory burn with low to moderate intensity. Monitor the moving marine layer and how it will affect your fire behavior in relation to your elevation. The fire is burning into the Basin Fire scar (2008) but fuel loading is supporting critical rates of spread and mid range spotting. **ERC continues to be in the 97th percentile.** The fire is burning in a mix of brush, grass and timber understory; fuels will vary by slope and aspect and proximity to the coast. During the nighttime RH recovery will be better than previously seen and will not support active fire after midnight. Look for shifting winds at the confluence of creeks and drainages.
Probability of Ignition =65% Spotting Distance= 1/4 mile ROS in Brush 30 ch/h ROS in Timber Understory 10 ch/h
Fine Dead Fuel Moisture = 5-11% Predicted BI 125 Predicted ERC 80

SPECIFIC

Carmel Zone BRANCH I
Fire activity should be low. As you engage in mop-up watch for snags, fire weakened trees, stump holes, and dirty burn areas that have re-burn potential.

Carmel Zone BRANCH II
The fire will continue to burn interior islands between the main fire and the back fire. The N-NW winds will continue to cause smoke to shadow the branch. As a backing fire moves from Rock Ridge down to Los Padres Reservoir there could be short lived up hill runs from roll out. Should a spot fire across Los Podres reservoir and Carmel River, expect to have upslope runs as the fire will be in alignment with slope and heavy dead fuels from the Basin Fire (2008). Fire activity at night will be dependent on the position of the marine layer but the RH recovery will be better than the last week with POI less than 20%. Watch out working on indirect line and know what the fire is doing on neighboring branches at all times.

Carmel Zone BRANCH IX
Fire activity should be low. As you engage in mop-up watch for snags, fire weakened trees, stump holes, and dirty burn areas that have re-burn potential. Under the marine layer there is still potential for active burning. Fuels in this branch have been burning with low intensity even in relatively high humidity.

Seco Zone BRANCH III, IV, V
Smoke is expected to shadow the area again today making visibility difficult in some areas and may need multiple lookouts to know the exact location of the main fire edge. The daily progression of the fire should not impact this branch but escape routes must be identified and revaluated as the operational period moves into prime burn windows.

Sur Zone BRANCH VII, VIII
Fire activity is expected to be minimal however, there is potential for slope reversal should the fire cross S.Fork Little Sur below Cabezo Prieto (north H2). Should the fire cross, expect very high to extreme fire behavior and intensities with rapid rates of spread. Despite being in the footprint of the Basin Fire (2008) the fuel loading is enough to continue progression to the South. Under the marine layer there is still potential for active burning. Fuels in this branch have been burning with low intensity even in relatively high humidity. Fire activity at night will be dependent on the position of the marine layer but the RH recovery will be better than it has been in the past week with POI less than 20%.

AIR OPERATIONS
Smoke and fog could make visibility difficult throughout the incident. Fire Behavior can change rapidly don't rely on air craft for your plan

SAFETY

- Indirect line construction, burning operations, fog or smoky conditions may make it difficult to see the main fire and reaction time to escape routes must be planned accordingly.
- Dead trees could fall and cut off escape routes.

SAFETY MESSAGE
SOBERANES

16-CA-BEU-003422 – August 5, 2016 – 0700 TO 0700

SAFETY

FIRE BEHAVIOR

Watch Out

- Fuels are dry from being drought stricken and are receptive to fire spread
- Inconsistent weather pattern alters the relative humidity's and winds
- Firing operations are occurring in some divisions

Mitigation

- Know the weather forecast and review with your crews / Plan accordingly
- Take weather reading throughout your shift
- Look-Outs, Communications, Escape Routes, Safety Zones (LCES)

SAFETY

VEHICLE STAGING

HOT EMBERS CAN DAMAGE TIRES AND CAUSE THEM TO CATCH FIRE

Watch Out

- Caution when operating in locations previously burned
- When staging apparatus and smaller vehicles in burned areas
- STUMPHOLES; Retain a significant amount of heat

Mitigation

- Avoid staging vehicles in recently burned areas
- Thoroughly water down areas recently burned prior to staging vehicles
- LOOKOUT for areas tree roots have burnt out and developed STUMPHOLES

SAFETY

DEMOB

ACCIDENTS CAN HAPPEN DURING DEMOB

Watch Out

- Vehicles will be moving in tight areas around Ground Support and parking areas
- There will be an increase in backing and maneuvering of vehicles in tight spots
- Crews may be in a hurry to leave the incident due to reassignment

Mitigation

- Provide back-up and spotter personnel - more than one may be required
- Drive safely and be on the lookout for ICP/camp and demob pedestrian traffic
- Drive safely and monitor fatigue when traveling to home unit or new incident

EVERYONES RESPONSIBILITY

Jack Piccinini
TEAM SAFETY OFFICER

POSION OAK: Take quick preventative measures once exposed

AIR OPERATIONS SUMMARY ICS-220

Prepared By (Communications Unit)

Austin L. Browne(COML)

Incident Location

5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: CALCORD

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

INCIDENT BASE EMERGENCY:
Contact Communications on CALCORD with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
  1. Medical Unit
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

PUBLIC INFORMATION SECTION

Incident Information Line: (831) 204-0446 or 211

Incident Media Line: (831) 647-6257

STATUS	
Incident Start Date: 07/22/2016	**Incident Start Time: 8:48 am**
Incident Type: Wildland	**Cause:**
Incident Location: Soberanes Creek, Garrapata State Park, Palo Colorado, north of Big Sur	**Total Personnel:**
Acreage:	**Containment:**

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=409-420.1

CAL FIRE SOCIAL MEDIA POLICY – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email Soberanesfire2016@gmail.com

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.

CAL FIRE
INCIDENT MANAGEMENT TEAM
WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

Information:_____.

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

IMT 1 version 1

DEMOB

SOBERANES INCIDENT
CA – BEU – 003422

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- ***Please return all supplies and equipment, either at ICP-Toro Park or the camp assigned to, prior to reporting to Demob (ICP – Toro Park)***
- **Strike Team Leaders and/or Overhead personnel** report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader. After receiving the #221, the STEN will report to ground inspection.

  *Engines will report to ground support (Fort Ord) at the times posted. The engines will go through vehicle inspection and **weed wash** then wait for their STEN to meet up with them at Fort Ord.

- When the strike team and leaders are completed with ground support, the strike team will report back to ICP – (Toro Park) to finish their #221.
- Resources will get signatures from the following units:
  - Motels
  - Supply
  - Ground Support
  - Weed Wash
  - Training (If they have a trainee)
  - Communications
  - Documentation
  - Time
  - Demob

- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.

FIRE SUPPRESSION REPAIR PLAN
SOBERANES FIRE: CA-BEU-003422

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

Archaeological or Historic Sites

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE:	Yellow and black stripped & Orange and black stripped
U.S.F.S.	Yellow and black stripped tied with blue
Santa Lucia Preserve:	White and blue tied together & Yellow and black stripped

Waterbreaks/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12"berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

INCIDENT TRAINING MESSAGE

ALL ASSIGNED TRAINEES

Working on position task books will need to register with the Incident Training Specialist in order to receive documented credit for your assignment.

https://goo.gl/jT5BaF

To register scan the QR Code or type in the link Form drop boxes are also located @ Pfeiffer, Patriot & Carmel Camp, & Toro ICP

TNSP Location: Toro ICP next to Check- In and Documentation

Human Resource Message
Soberanes Fire—8/5/2016

Each of us comes with our own expectations of what life in the fire camp should be. When our experience in the camp doesn't meet our expectations of the camp, we tend to blame others for any issues, and say things we know we shouldn't.

"Assume good intentions."
Todd Derum, Unified Incident Commander,
Soberanes Fire

REMEMBER to cut your fellow team member some slack. We're all on the same team, working to put an end to the fire. Let's support each other all we can.

If you have issues, report them to your supervisor. If you need additional help, contact Mary or Tosha.

HR Office is located in the Quonset Hut (tent) #15 at ICP
HR (Fire) SPECIALIST: Mary McDonough-(559) 593-3905
HR (Fire) SPECIALIST (T): Tosha Coney-(209) 213-9323

Archaeological and Historical Sites
Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.

2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.

3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.

4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.

5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.

6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Wilderness Special Instructions – Resource Advisor

DOZER LINES - DIVISIONS K, M, & P

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.

Wilderness Minimum Impact Suppression Tactics (MIST)

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

FIRELINE CONSTRUCTION PHASE:

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

HELISPOT CONSTRUCTION:

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor_____

1. **Personnel Briefing**

   - ☐ Objectives
   - ☐ Conditions (fire environment)
   - ☐ Resource assignments identified
     - ☐ Firing personnel
