SOBERANES FIRE

CORRECTED

COREY 1300

CA-BEU-003422

OPERATIONAL PERIOD

FRIDAY AUGUST 12TH 0700

to

SATURDAY AUGUST 13TH 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Soberanes	2. Operational Period: Date From: 8/12/16 Time From: 0700	Date To: 8/13/16 Time To: 0700

3. Objective(s):

Management Objectives

- Provide for and maintain public and first responder safety by utilizing the incident safety analysis process.
- Protect all critical assets at risk to include the redwoods, historical assets within the affected area, infrastructure and improvements, watershed, and transmission lines.
- Utilize tactics that promote protection of sensitive natural and cultural resources in the Ventana Wilderness.
- It is the Unified Incident Commanders' Leader's Intent to ensure collaboration at all levels of the incident.
- Be financially responsible for all management and fire suppression tactics.
- Foster and enhance community and political relationships.
- All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Monterey County.

Control Objectives

- Keep the fire inside the current perimeter in the Carmel Zone
- Keep the fire North of the Nacimiento-Fergusson Rd
- Keep the fire West of Carmel Valley and Reliz Canyon
- Keep the fire East of Hwy 1

4. Operational Period Command Emphasis:

Perimeter Control , Structure Defense, Improve Contingency Lines, Hold and Improve Existing Control Lines

General Situational Awareness

S. T. O. P. Stop Think Organize Proceed

5. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Soberanes Fire Weather Forecast

FORECAST NO: 20

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Fri- 0700 Sat

UNIT: CA-BEU/LPF

SHIFT DATE: 8/12-8/13

SIGNED: Matt Mehle

TIME AND DATE FORECAST ISSUED: 1900 8/11/16

Incident Meteorologist- Matt Mehle
NWS-Bay Area

WEATHER DISCUSSION: The warming and drying observed on Thursday will continue today as high pressure builds. The most notable change will occur away from the immediate coast/Hwy 1 and over higher elevations. Relatively light southerly flow will prevail during the morning becoming more northerly by the afternoon, especially Sur Zone. The marine layer will move inland again tonight, but recoveries over higher elevations will be poor.

WEATHER FORECAST FOR FRIDAY:

WEATHER: Clouds and coastal drizzle...pulling back to the coast 10-11 am. Clouds will linger along Sur Zone with possible clearing late afternoon. Lack of strong transport winds will make for lingering smoke through the day.

TEMPERATURES: 83-91 interior/ridges 76-83 lower slopes and coast. **24 HR Trend** (up 3-5 deg)

HUMIDITY:. 15-25% interior. Above 2000 feet and coast 20-30%. **24 HR Trend** (down 5%)

20 FT WINDS:

RIDGETOP - *Sur Zone* – South -Southeast 2-4 mph gusts 7 mph becoming northerly during the afternoon 5-10 mph gusts to 20 mph . *Seco Zone* –southeast 1-3 mph in the morning becoming northeast to north 3-6 with gusts 10 mph in the afternoon

SLOPE/VALLEY - Downslope/downcanyon 3-6 in the morning becoming ...Seabreeze and upcanyon 1400-2000 hours 4-8 mph gusts 10-12 mph.
Sur Zone/hwy 1 – light southerly in the morning switching northwest and gusty

Marine Layer: 1300-1600 feet.

WEATHER FORECAST FOR FRIDAY NIGHT:

WEATHER: Becoming mostly cloudy below 1500 feet. Smoke settling over lower elevations.

TEMPERATURES: 60-68 above 2000 feet. 51-58 along Hwy 1 and up Carmel Valley.

HUMIDITY: Good recovery below 2000 feet 80-90%...25-35% above 2000 feet. Peaks may recover early then dry through sunrise.

20 FT WINDS:

RIDGETOP – *Sur Zone* – Northerly 3-6 mph gusts 8 mph. Gusts to 20 mph in evening *Seco Zone* –north-northeast 3-6 with gusts 8 mph.

SLOPE/VALLEY – Evening upcanyons 4-7 mph...becoming downcanyon 2-4 mph overnight.

Marine Layer: 1200-1500 feet.

Extended Forecast: The warming and drying trend will continue into the weekend. Areas removed from the marine layer will likely see the hottest conditions since last week. Overnight humidity recoveries will be poor over the upper slopes and ridges.

Portable RAWS 163.350 Tone 0032 for H3,Tone 0033 Piney Creek, Tone 0029 for Blue Rock, Tone 0038 Chews Ridge, Tassajara 0039, Tone 0031 Memorial.

INPUTS

WEATHER SUMMARY **Slightly warmer and drier than yesterday.**
PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

Today, we are back into a warming and drying trend as high pressure continues to build. We will see fire conditions that are continue to move faster and slightly more intense above the marine layer (1300'). More fuel, at lower elevations will be available to burn earlier with the lower marine layer. Fire below the marine layer (1300') will be very similar as it has been the past few days; low rates of spread and low intensities. Terrain and fuels are the primary driver of the fire as winds will be light and terrain driven except for along the ridge lines and on the western slope of the coastal range. Fuels along the immediate coast line have been carrying fire with RH's above 80% at slow rates of spread. As the marine layer lifts fire activity will increase. Areas above the marine layer have been experiencing very poor fuel moisture recoveries for the past week, expect 10 hour and heavier fuels to be available to burn. Fire activity will primarily be backing down slopes at low intensity with potential for short intense uphill runs when there is a slope reversal. A second burn period is anticipated, due to a drop in RH's above 1300' in the pre-dawn hours. If the fire crosses Ventana Creek, Big Sur River (Branch 8), or Carmel River (Branch 3) the fire will run. We will see a significant increase in rates of spread than we have been seeing over the past few days. ERCs are approaching the 90th percentile. The fire is burning in a mix of brush, grass and oak understory.

Probability of Ignition = 88% **Spotting Distance**= up to 1/2 mile ROS 53-138 ch/h for uphill runs
Fine Dead Fuel Moisture = 3% **10hr Fuels**= 6% BI 122 ERC 69 2-3 ch/hr for backing

SPECIFIC

Carmel Zone BRANCH I, II, IX

No forward fire progression is expected. Interior islands and heavier fuels will continue to burn out.

Seco Zone BRANCH III, IV, V

Haze and smoke will linger in the Seco Zone and Carmel River drainage again today. The fire continues to flank and back down Elephant Mt. into Carmel River. Should rollout occur expect short upslope pulses as the fire burns back into itself. Should the fire spot or cross the Carmel River it has potential to align and make a push toward Blue Rock and Hennicksons Ridge in Divisions J & K. Expect moderate rates of spread of ½ - 1 mph with flame length of 5-10 ft in the oak fuel types and 15-20 ft in the brush. The Carmel River drainage terrain is extremely steep and complex. Be aware of winds eddying in this terrain with sudden changes in speed and direction. Backing rates of spread in slopes > 60% will be about 100-200 feet per hour.

Sur Zone BRANCH VII, VIII

The main fire will continue to back to the south into the Big Sur and Ventana drainages, as well as to the west towards Highway 1. Expect increased ROS in backing and flanking fire compared to the last several days. Upslope runs will occur where fuels and slope are in alignment. If the fire crosses Ventana Creek or Big Sur River slope reversal will increase spread rates. Rollout will continue to challenge containment efforts. Fire activity along the burn-out in the H-3 area will moderate as it moves through the marine layer, but will increase again below the cloud cover. Expect smoke and potential of spotting across the line in the afternoon as winds increase and shift northeast. Unburnt islands in DIV P will continue to consume, but should not present holding concerns. Humidity recovery tonight below the marine layer will hamper fire spread and intensity. Fire will remain active within the thermal belt.

AIR OPERATIONS

Expect the smoke and marine layer to lift around late-morning.

SAFETY

Watch for wind shifts in the afternoon and after sundown especially along the coast.

SAFETY MESSAGE

SOBERANES

16-CA-BEU-003422 – August 12, 2016 – 0700 TO 0700

SAFETY SAFETY SAFETY

EVERYONES RESPONSIBILITY

FATIGUE

CREWS ON THE ROAD and FIRELINE

Watch Out

- Impacts situational awareness
- Impacts safety and work performance
- Traveling within the incident

Mitigation

- Brief crews specific to the special instructions in 204 to divisional assignment
- Implement the buddy system for monitoring
- Schedule work/rest cycle based on workload and weather, maintain Hydration and Food
- Reduce speed, utilize headlights at all times, watch for wildlife and civilians

HEAVY EQUIPMENT

DOZERS and MASTICATORS are ASSIGNED TO MUTIPLE DIVISIONS

Watch Out

- Operators may have limited visibility
- Operations may cause rock and bolder roll out –Watch out!
- Maintain appropriate working distance

Mitigation

- Make sure that you have eye contact with operator before you approach.
- Maintain high levels of situational awareness when working around heavy equipment
- Post lookouts and spotters as appropriate

ROCKS AND BOULDERS

WE HAVE HAD SEVERAL NEAR SERIOUS ACCIDENTS

Watch Out

- Rocks may roll for great distances down slope
- Large rocks in roadways can get caught between 'duals'
- Lose gravel, rocks and boulders may end up in roadways

Mitigation

- Watch out in areas with steep slopes
- Stop and check for rocks between dual tires before traveling on the highway
- Listen for rolling rocks and boulders and 'yell out' to others around you

Prepared By (Communications Unit)
Austin L. Browne(COML)

Incident Location
5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: CALCORD

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

INCIDENT BASE EMERGENCY:
Contact Communications on Assigned CMD channel with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
  1. Medical Unit
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

DEMOB

SOBERANES INCIDENT
CA – BEU – 003422

- Resources must Check-In prior to the Demob process.

- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.

- ***Please return all supplies and equipment, either at ICP-Toro Park or the camp assigned to, prior to reporting to Demob (ICP – Toro Park)***

- **Strike Team Leaders and/or Overhead personnel** report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader. After receiving the #221, the STEN will report to ground inspection.

  *Engines will report to ground support (Fort Ord) at the times posted. The engines will go through vehicle inspection and **weed wash** then wait for their STEN to meet up with them at Fort Ord.

- When the strike team and leaders are completed with ground support, the strike team will report back to ICP – (Toro Park) to finish their #221.

- Resources will get signatures from the following units:
  - Motels
  - Supply
  - Ground Support
  - Weed Wash
  - Training (If they have a trainee)
  - Communications
  - Documentation
  - Time
  - Demob
  -
- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.
- Air Travel: For Federal resources, provide a #213 to the Demob Unit with the following information:
  - Full Name: (As it appears on Drivers License)
  - Date of Birth
  - Destination jet port and departure jet port.
  - Phone Number and Email
  - Date of Travel

FIRE SUPPRESSION REPAIR PLAN
SOBERANES FIRE: CA-BEU-003422

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

Archaeological or Historic Sites

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE:	Yellow and black stripped & Orange and black stripped
U.S.F.S.	Yellow and black stripped tied with blue
Santa Lucia Preserve:	White and blue tied together & Yellow and black stripped

Waterbreaks/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12"berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

Archaeological and Historical Sites
Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.

2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.

3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.

4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.

5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.

6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Forest Service Wilderness and California State Parks Special Instructions – Resource Advisor

DOZER LINES - DIVISIONS K, M, P, and CONTINGENCY LINES

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.
- Avoid archeological sites flagged with black/yellow and blue ribbon

Wilderness Minimum Impact Suppression Tactics (MIST)

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

FIRELINE CONSTRUCTION PHASE:

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

HELISPOT CONSTRUCTION:

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

EMERGENCY SHIFT TICKET and EVALUATION FORM

The responsible Government Officer will complete this form each shift

Contractor Name	WATER HAULERS
Incident or Project Name	SOBERANES
Incident Number	CABEU 003422
Request Number	E-64
Operator #1	SEAN RODGERS

CAL FIRE
INCIDENT MANAGEMENT TEAM
WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- ☐ Objectives
- ☐ Conditions (fire environment)
- ☐ Resource assignments identified
  - ☐ Firing personnel
  - ☐ Holding forces
  - ☐ Lookouts
- ☐ Ignition plan/sequence
- ☐ Communication Plan
- ☐ Contingency Plan
- ☐ Safety issues

2. Go / No-Go

- ☐ All personnel briefed
- ☐ Weather forecast reviewed
- ☐ Resources in place
- ☐ Lookouts posted as needed
- ☐ Anchor and termination firing points identified
- ☐ Communications systems in place
- ☐ Fire behavior forecast reviewed
- ☐ Escape routes and safety zones established and made known
- ☐ Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- ☐ Division Supervisor
- ☐ Branch Director
- ☐ Operations

4. Other Notifications

- ☐ Other: _____
- ☐ Other: _____

Attach Firing Operations Checklist to ICS-214

Human Resource Message

Our time is getting shorter…
How about our Tempers???

We can see the end in sight, although this has been an uncertainty for a while. Some are ready to leave; some are wishing it was longer.

With the hard work and especially the changes taking place, it is easy to get on edge and "on the edge" with each other. Let's guard against that, and try to help each other out.
Take care and be safe.

A quick temper will make a fool of you soon enough.
~Bruce Lee

HR OFFICE is located in the Quonset Hut (tent) #15 at ICP
Human Resource Specialist (HRSP) Janine Summy (509) 429-1206
Human Resource Specialist (HRSP-T) Frances Lindquist (530) 605-6313
Human Resource Specialist (HRSP-T) Todd Morrow (707) 373-0204

The HRSP Staff is collecting non-perishable food for the local community.
Please drop off any non-perishable food in the centrally located collection boxes.
Collection boxes are located at the HRSP tent, the morning/evening Briefing tent and the Federal Pay Trailer. The non-perishable food will be collected daily in the early evening and will be distributed once a week to a collection point in the local community. If you have any questions, please feel free to contact: **Fran Lindquist at (530) 605-6313 or ANY HRSP. Thank you for your support to the local community**

Directions to Sleeping Trailers from Toro Camp

- HEAD EAST ON HIGHWAY 68 TOWARDS SALINAS
- EXIT RESERVATION ROAD AND MAKE A LEFT
- TAKE RESERVATION ROAD TO INTER-GARRISON RD AND MAKE A LEFT
- AT THE END OFF THE ROAD CONTINUE ON INTER-GARRISON RD (RIGHT TURN)
- TAKE INTER-GARRISON RD TO GENERAL JIM MOORE BLVD AND MAKE A RIGHT
- AT THE END OF THE ROAD THE SLEEPER TRAILERS WILL BE ON THE RIGHT HAND PARKING WILL BE IN THE PARKING LOT ON THE LEFT

This will be the only route to the sleeper trailers due to the car show traffic. Please do not deviate from the traffic plan

Staging is located at Inter-Garrison Rd and 7th
