ALASKA INCIDENT MANAGEMENT TEAM

SOBERANES FIRE

CA-BEU-003422

PNKG7Z Override Code USFS 1502

OPERATIONAL PERIOD

Sunday AUGUST 28th 0700

to

Monday AUGUST 29th 0700

If you have an equipment Resource Number less than 10,000 please stop by Plans Check-in at your earliest opportunity.

INCIDENT OBJECTIVES	1. Incident Name **Soberanes**	2. Date Prepared 08/27/16	3. Time Prepared 1900

4. Operational Period – 08/28/16

Management Objectives:

- Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.
- Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed.
- Ensure cost containment measures are identified and applied.
- Enhance community relations and political relationships through timely information exchange.
- Provide for initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.
- Demonstrate principles of respect and dignity.

Control Objectives:

- Complete suppression repair activities at the north end of the fire in Branches I, II, and IX.
- Protect private property, surrounding communities, and values at risk by keeping the fire:
  - North of Nacimiento-Ferguson Road to limit fire growth toward values to the south.
  - West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation.
  - East of Highway 1 to protect the visual corridor of this National Scenic Byway.
- When possible, minimize adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST). Where opportunities exist, use natural features and preexisting containment lines. Consult with Resource Advisers to ensure tactics are compatible with social, economic, and environmental values.

Command Emphasis:

Protect values at risk by using a combination of direct and indirect tactics to suppress the fire. A key element of the strategy is to apply the right resources, to the right task, at the right time, for the right duration in order to achieve objectives with minimum firefighter exposure.

Situational Awareness:

Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.

Stop, think, talk… then act in response to any situation that may represent unnecessary exposure.

Soberanes Fire Weather Forecast

FORECAST NO: 36

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Sun - 0700 Mon

UNIT: CA-BEU/LPF

SHIFT DATE: 8/28-8/29

SIGNED: Ryan Walbrun

TIME AND DATE FORECAST ISSUED: 1900 8/27/2016

Incident Meteorologist

WEATHER DISCUSSION: High pressure will build over the region today. This will compress the marine layer to at least 2000 feet and even as low as 1500 feet in some locations. Under this pattern nearly all active areas of the fire will see a warming and drying trend as well as areas where most people are working on indirect fire lines. The general winds will remain Southwest on most ridges with light southerly smoke transport winds. Temperatures will trend warmer as well especially across southern portions of the fire. Smoke from the Chimney fire is not expected to be as prevalent today. Further drying is forecast tonight as the ridge continues to strengthen with very low humidity forecast during the overnight hours for divisions above 2000 feet.

WEATHER FORECAST FOR SUNDAY:

WEATHER: Morning fog and drizzle likely as the marine layer compresses. Otherwise clear with interior smoke.

TEMPERATURES: 85-95 interior/ridges…74-83 lower slopes… 65-73 along Hwy 1. **24 HR Trend** (up 2 to 5)

HUMIDITY: 12-22% interior above 2000 feet. 50-60% coast. **24 HR Trend** (down 3 to 6%)

20 FT WINDS:

RIDGETOP - Light then Southwest 4-8 mph afternoon gusts 12-15 mph coastal ridge and higher peaks.
SLOPE/VALLEY – Morning downcanyon becoming upslope/upcanyon 4-7 mph valley gusts 10-12 mph.

Marine Layer: Compressing to around 2000 feet.

WEATHER FORECAST FOR SUNDAY NIGHT:

WEATHER: Becoming cloudy below 2000 feet with late night fog and drizzle. Otherwise clear with interior smoke.

TEMPERATURES: 67-75 above 2000 feet. 53-61 in the marine layer.

HUMIDITY: Full recovery below 2000 feet 80-100%...18-28% above 2000 feet and locally 7 to 15% after midnight.

20 FT WINDS:

RIDGETOP – Southwest 5-10 mph gusts 12 mph early becoming 2-5 mph overnight.
SLOPE/VALLEY – Evening upcanyon 4-7 mph…becoming downcanyon 1-3 mph overnight.

Marine Layer: Around 2000 feet…may compress to 1500 feet by Monday morning.

Extended Forecast: High pressure holds at least through Monday with warm and dry conditions above the marine inversion layer which should set up between 1500-2000 feet. Winds to remain West to Southwest 5-10 mph. Humidity values 15-25% both day and night above the inversion. A trough arrives late Monday Night into Tuesday with ***increasing ridge top winds from the Northwest at 10-20 mph above Big Sur and along Chews Ridge***. Behind the trough the marine layer will deepen with slight cooling/moistening trend.

SAFETY MESSAGE: Stay current with your weather. Know your elevation and take observations.

INPUTS

WEATHER SUMMARY *****Morning fog and drizzle likely below 2000'. Otherwise clear skies with areas of smoke*****
Temps: Highs 85-95 interior, 74-83 on lower slopes and 65-73 along the coast. Lows: 67-75 above the marine layer.
RH: Above 2000' 12-22%, coast 50-60% Night: 18-28% above 2000' and locally 7-15%; 80-100% below 2000'.
Winds: Ridges SW 4-8mph. Interior slope winds upslope 4-7 mph day. Gusts 10-12mph. Downslope 1-3 mph at night.

ERC 75 1hr 3-5% Pig 80% Rate of spread head fire in brush 60-80cph Spotting up to ½ mile

OUTPUTS

FIRE BEHAVIOR

GENERAL

All classes of fuels are critically dry. Heavier fuels at the bottom of moist drainages will slow the progression of the fire into and across creeks. The fire is now burning primarily in a mix of brush and oak burned in the 2008 Basin Fire. Snags, skeleton brush and heavy downed fuels are abundant and will increase the fire line intensity. Aspect is playing an active role in fire behavior, with more intense and complete consumption of fuels on south and west aspects. Local upslope and up-drainage winds can push fires on those favorable aspects. Flanking and backing fire is producing a mosaic and a potential for reburn.

In the old burn scars, shrub fuels are not burning aggressively unless sun, aspect, and slope drainage winds align to produce headfire runs. 10 -20' flame lengths in brush fuels should be expected. SW wind at the ridges is not much of a factor for active fireline below the high ridges. None of these runs will impact existing containment lines during the burn period. No active fire behavior is expected below 2000' throughout the period.

SPECIFIC

BRANCH I, II, IX
No forward fire progression is expected.

BRANCH III, IV, V

Fire has established itself in the Carmel River drainage above the Los Padres Reservoir. Moist drainage bottoms will limit fire spread. On Miller Mountain and above the English Cabin fire spread will continue to moderate due to north aspects, downslope alignments, and lower fuel loading. This will limit the potential impact to indirect lines in these branches during the forecast period.

Fire will continue to slowly fill in the unburned pocket north and east of Double Cone.

Branch VIII

DIV O/P – In patrol status. No forward fire progression expected.

DIV N - The fire is progressing southeast on the south facing ridge above the South Fork of Big Sur River. Anticipate the fire getting established on the south side of the South Fork, further encouraging spread up the drainage. Fire is also backing into Mocho Creek. Otherwise, north aspects and downslope alignments should continue to limit overall spread to the southeast. Threat to the control line is not expected during this burn period.

Branch VII

DIV UU – Fire is not expected to reach the division in this burn period.

AIR OPERATIONS
Expect the marine layer to lift around noon. Smoke likely to linger in the interior again.

SAFETY

Interior burning continues to occur. Pay attention to where fire activity is occurring relative to your work area.
Incomplete burns means there is a high potential for reburn.

Division/Group Assignment List (ICS 204 WF)

1. Incident Name:	3.	
SOBERANES	Branch: I,II,IX	Division/Group: SUPP REPAIR 1

2. Operational Period:	
Date/Time From: 08/28/2016 0700 SUN	Date/Time To: 08/29/2016 0700 MON

6. Control Operations/Work Assignments:

TASK: Complete suppression rehab per rehab guidelines.
PURPOSE: Repair suppression damage and minimize potential for negative post fire effects.
END STATE: Resources, lands, and facilities in this geographic area which have been damaged by fire management activities have been returned to pre-management condition to the extent practical.

7. Special Instructions:

Resources dispatched to a division from staging are required to receive a briefing specific to their assignment.
The Communications Plan is complex; please review the ICS 205 with all division personnel.
Use headlights. Slow down. Assume there is a vehicle around each corner. LOOK UP. Be aware of hazard trees.
DIVS, TFL, and HEQB must account for and certify all hired equipment shift tickets during the operational period.
Division Supervisors: Please report to Fire Apportionment to validate the previous day's ICS-204s.

6. Control Operations/Work Assignments:

TASK: Develop structure protection plan.
PURPOSE: Ensure adequate resources and an appropriate strategy is identified to protect structures.
END STATE: Resource and Equipment needs are identified and MAPs that allow for successful protection of values at risk.

7. Special Instructions:

The Communications Plan is complex; please review the ICS 205 with all Division personnel.
DIVS, TFL, and HEQB must account for & certify all hired equipment shift tickets during the operational period.
Division Supervisors: Please report to Fire Apportionment to validate the previous day's ICS-204s.
Use headlights. Slow down. Assume there is a vehicle around each corner.

6. Control Operations/Work Assignments:

TASK: Monitor fire activity in assigned area.
PURPOSE: To ensure adequate resources are allocated to protect values at risk.
END STATE: Changes in fire location and potential are identified and communicated.

7. Special Instructions:

Please keep all Dozer lines out of Highway 1 viewshed.
Use headlights. Slow down. Assume there is a vehicle around each corner. LOOK UP, be aware of hazard trees.
Fire Plans: Ensure all line personnel in the division are notified and that the GO No GO checklist is utilized.
The Communications Plan is complex. Please review the ICS 205 with all Division personnel.
DIVS, TFLD, and HEQB must account for & certify all hired equipment shift tickets during the operational period.
Please follow medical plan for medical emergencies. H-407 is available for night hoist operations.
Division Supervisors: Please report to Fire Apportionment to validate the previous day's ICS-204s.
At 0001 hrs. all Divisions will contact DIVS N/O/P Murrin for any Branch needs.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

HEALTH AND SAFETY MESSAGE

SAFETY starts with ***YOU***

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Soberanes	DATE: 8/28/16 Oper. Period: Day

Major Hazards and Risks:

Aviation Operations
Hazard Trees
Narrow and windy roads
Lack of patience

Fire Order of the Day – ***I***nitiate all actions based on current weather and expected fire behavior

Narrative: The weather is expected to get hotter and drier through the weekend. The marine layer is shallower and breaking up earlier in the day. Keep an eye out for subtle indicators of increasing fire behavior and act accordingly.

Watch Out Situation of the Day

11. UNBURNED FUEL BETWEEN YOU AND THE FIRE

Look Up, Look Down, Look Around

***Look Up:** Check the sky for any weather changes such as building or approaching thunderstorms, wind shifts or increasing in speed. Watch for air operations and water drops. Look for snags.

***Look Down:** Watch your footing. Keep an eye out for snakes, bees nests and observe fine fuels on the ground.

* **Look Around** Check fuel loading in the area, general terrain, current fire behavior and ladder fuels. Keep an eye on fellow firefighters for signs of heat stress and smoke inhalation.

Incident Safety Officer:___AK IMT 1 Safety Team_____

Medical Information

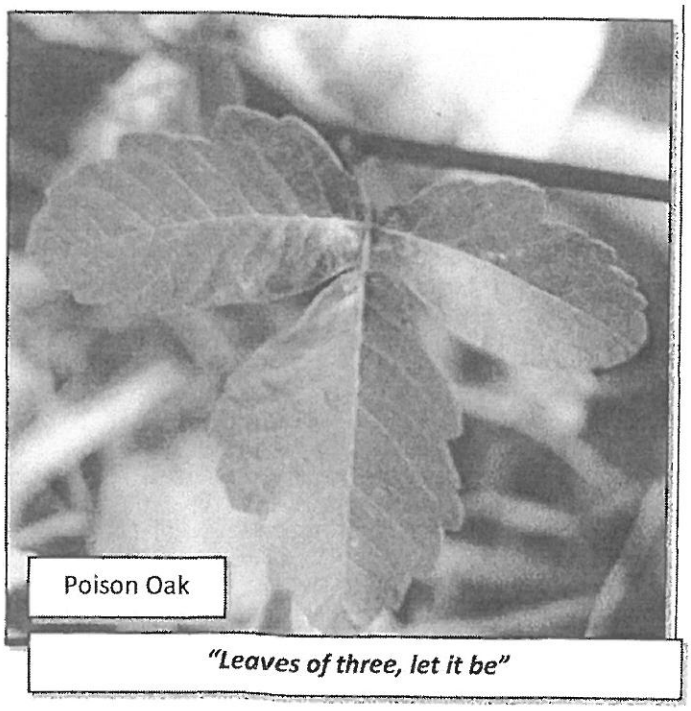
Poison Oak * Symptoms, and Treatment

What Happens When You Get It:

Once urushiol touches the skin, it begins to penetrate in minutes. It is completely bound to the skin within 8 hours. Urushiol is the oil inside the plant that caused the allergic reaction to 70% of the population

You may develop any or all of the following:

- Red Rash
- Blisters
- Swelling



What To Do When You Get It:

Stop the symptoms before they start. If you know you've been exposed, cleanse the area immediately with plain soap and water to remove urushiol before it has a chance to bind to the skin. To remove the oil from your skin, scrub the area for several minutes, but do not break the skin, then rinse with cool water for several minutes. Once the area has been cleansed you may need to apply a topic ointment or further medical treatment.

Time of Washing After Exposure	Extent of Removal of Poison Ivy Oil (%)
Immediately	100
10 min	50
15 min	25
30 min	10
60 min	None

Be sure to wash all clothing that you were wearing at time of exposure. Wash any bedding that you may have slept on as you can spread the oil from your skin or clothing to other parts of your body or to others.

Products That Help Remove Urushiol From the Skin:

Tecnu
Tecnu Extreme
Zanfel
Poison Oak Soap
Cortaid Poison Cleanser
Dawn Dishwashing Liquid

Oral medications that provide relief include:

Benadryl (causes drowsiness)
Claritin
Chlorapheneramine (causes drowsiness)

Topical treatments for the rash include:

RhuliGel
Cortaid
Hydrocortisone Cream or Gel
Calamine Lotion
Caladryl Lotion
Benadryl Cream

ICP Clinic (Provided by Big Sur Medical Clinic)

Exam and if indicated:
Oral Medication (Prednisone)
Antihistamines
Injected Medication (Depo-Medrol)

Human Resource Message

Leaders who Motivate

Leading others effectively encourages those we lead to do great things. Let's remember the value of our leadership while we continue to do the important work we are doing here.

Leaders Who Motivate People

- Know their job;
- Know the jobs of those they supervise; Keep it simple and keep it real
- Set the direction; Take responsibility
- Make a difference whenever and wherever they can
- Make the team stronger by pulling from everyone
- Give people the chance to succeed or fail
- Work with reality and current conditions
- Enjoy their work and provide a positive work environment

In a learning organization, leaders treat honest mistakes as opportunities to do better next time. Understanding that failure is a part of learning, they establish command climates in which leaders are motivated by desire to succeed rather than fear of failure. - **Leading in the Wildland Fire Service, Page 42-**

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH
Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: *Provide incident summary and command structure.*

Nature of Injury/Illness		*Describe the injury (Ex: Broken leg with bleeding)*
Incident Name		*Geographic Name + "Medical" (Ex: Trout Meadow Medical)*
Incident Commander		*Name of IC*
Patient Care		*Name of Care Provider (Ex: EMT Smith)*

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.*

Number of Patients:	Male / Female	Age	Weight:

Conscious? ☐ YES ☐**NO = MEDEVAC!**

Breathing? ☐ YES ☐ **NO = MEDEVAC!**

Mechanism of Injury: *What caused the injury?*	
Lat/Long (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24'	

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
☐ **URGENT-RED Life threatening injury or illness.** *Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.*	Ambulance or MEDEVAC helicopter. Evacuation need is **IMMEDIATE.**
☐ **PRIORITY-YELLOW Serious Injury or illness.** *Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.*	Ambulance or consider air transport if at remote location. Evacuation may be **DELAYED.**
☐ **ROUTINE-GREEN** Not a life threatening injury or illness. *Ex: Sprains, strains, minor heat-related illness.*	Non-Emergency. Evacuation considered **Routine of Convenience.**

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

☐ Helispot	☐ Short-haul/Hoist	☐ Life Flight	☐ Other

Ground Transport: Click here to enter text.

☐ Self-Extract	☐ Carry-Out	☐ Ambulance	☐ Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

☐ Paramedic/EMT(s)	☐ Crew(s)	☐ SKED/Backboard/C-Collar
☐ Burn Sheet(s)	☐ Oxygen	☐ Trauma Bag
☐ Medication(s)	☐ IV/Fluid(s)	☐ Cardiac Monitor/AED

☐ Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
Ex: Command	*Forest Rpt, Ch. 2*	*168.3250*	*110.9*	*171.4325*	*110.9*
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) *EX: N 40 42.45' x W 123 03.24'*	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: ***If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...***

REMEMBER: Confirm ETA's of resources ordered
Act according to your level of training
Be Alert. Keep Calm. Think Clearly. Act Decisively.
