INCIDENT ACTION PLAN

SOBERANES

CA-BEU-003422 PNKG7Z (1502)

Wednesday

OPERATIONAL PERIOD

TUESDAY-WEDNESDAY, SEPTEMBER 20-21, 2016
0700-0700 HOURS

Tuesday

Maps **Fire weather** **RAWS**

INCIDENT OBJECTIVES	1. Incident Name **Soberanes**	2. Date **09/19/2016**	3. Time **2200**

4. Operational Period

DAY / NIGHT September 20-21, 2016 **0700 - 0700 Hours**

5. General Control Objectives for the Incident (include alternatives)

Management Objectives

- Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations.
- Reduce firefighter exposure by only engaging fire assignments with the highest probability of success.
- Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests.
- Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations.
- Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information.
- Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy.
- Manage incident costs effectively for the values at risk through regular and ongoing cost analysis.

Control Objectives

Keep Fire

- East of the Coast Ridge Road.
- North of Nacimiento-Fergusson Road.
- West of Carmel Valley and Reliz Canyon.
- South of current containment lines in Branches I, II and IX.

6. Weather Forecast for Operational Period

- Winds shift to a new direction again today as low pressure starts approaching from the Pacific Northwest. Weather will still be warmer and drier than normal after another night of poor humidity recovery.

7. General Safety Message

- The weather and the winds are changing. You need to stay the course.
- Know the plan, brief the plan, and execute the plan. Staying focused on your assignment is most critical; not only to you, but for those you supervise and those you are working with.

ICS 203

Soberanes Fire Weather Forecast
East Operational Area

Forecast Info

FORECAST NO: 59

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Tue. - 0700 Wed.

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Tuesday, Sept 20th, 2016

SIGNED: Jon Bonk / Julia Ruthford
Incident Meteorologists
Jon's Cell (Hunter-Liggett): (240)778-5287
Julia's Cell (Toro): (971) 221-6728

TIME AND DATE FORECAST ISSUED: 2000 hrs. 9/19/16

***** Minor wind shift again today *****

WEATHER DISCUSSION: Winds shift to a new direction again today as low pressure starts approaching from the Pacific Northwest. Weather will still be warmer and drier than normal after another night of poor humidity recovery. Areas of intense burning could produce a shallow pyrocumulus cap but don't expect it will pose a problem.

WEATHER FORECAST For Today:

WEATHER: Mostly sunny. Some shallow mid-level cumulus. Smoke layer around 4000 feet lifting around 1200 hrs.

TEMPERATURES: Highs 85-92 in the active fire area. (2-4 degrees cooler)

HUMIDITY: 19-24%. (up 4-7%)

20 FT WINDS:
RIDGETOP / UPPER SLOPE – Variable 0-4 mph becoming West to northwest 5-8 mph with gusts12-15 mph around 1400 hrs.
LOWER SLOPE / VALLEY – Upslope/upvalley 3-7 mph. Gusts up to 15 mph in the afternoon.

Inland Marine Layer: Less than 1500 feet…little impact. **Haines:** 4

WEATHER FORECAST For Tonight:

WEATHER: Mostly clear after a few shallow cumulus in the early evening.

TEMPERATURES: Lows 48-52 in the valleys. Ridges/Thermal Belt 68-72 through the night. (No change).

HUMIDITY: Valley bottoms: Max 50-55%. Ridges/Thermal Belt: rising to 35-40% by 2000 then falling to 20-25% around 0200.

20 FT WINDS:
RIDGETOP – Northwest 5-8 mph with gusts to 15 mph easing to west 3-6 mph around 2100.
SLOPE/VALLEY – Down canyon 2-4 mph below the inversion/thermal belt.

Marine Layer: Less than 1500 feet…little impact. **Thermal Belt:** Around 4000 feet

---

EXTENDED FORECAST: The upper low will approach and brush northeast of the incident Wednesday through Friday. A cold front crosses late Wednesday afternoon /early Thursday evening. Expect gusty west winds Wednesday afternoon (10-15 g25 mph) followed by northwest winds (10-15 g25 mph) in the evening. Then expect stronger northwest winds (20-25 g35-40 mph) Thursday as the low moves east and high pressure builds to the west.

EAST FIRE BEHAVIOR FORECAST EAST

FORECAST NUMBER: 59	**TYPE OF FIRE** Wildfire
FIRE NAME: Soberanes East Operational Area	**OPERATIONAL PERIOD** 9-20-2016 24 HOUR SHIFT
DATE ISSUED 9-19-2016	**TIME ISSUED** 2030 HOURS
UNIT CA-BEU-003422	**SIGNED** Mike Crook \\s\\ FBAN

INPUTS

***** Wind Summary *****

DAY: RIDGETOP: 0600 W to NW 5-8mph G15 SLOPE/VALLEY: 0600-0900 Down-valley 2-5mph... 0900-1900 Upslope/Up-valley 3-7mph G15

NIGHT: RIDGETOP: 1800 NW then W 5-8mph G15 SLOPE/VALLEY: 1900-0600 Down-canyon 2-4mph below The thermal belt.

FIRE BEHAVIOR

GENERAL

LOCAL THRESHOLDS – WATCH OUTS

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
Forecasted	**Ridges**	5-8mph	20-24%	85°	3-6%
	Valleys	3-7mph	15-19%	92°	3-4%

Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant.

Probability of ignition : **Day:** Shaded 60% Unshaded 90%

Night: 60%

SPECIFIC

BRANCH III, IV, VI

The weather is beginning its transition today with gusty winds and a change in direction. Expect valleys and drainages that align with the general winds to have stronger gusts. With all the fuels available to burn, any time there is a concentration of heat and fuels align the fire has the capability to make significant runs both upslope and down slope with long range spotting potential (¼ mile or greater).

Fire behavior will begin moderating around 1900 as the humidity increases. The potential for upslope runs will be present where the intensity and continuous fuels exist. By 2200 winds should calm and humidity values will be high enough to make rapid fire spread difficult. Expect creeping and smoldering with an occasional flare up for the rest of the night.

AIR OPERATIONS

A shallow inversion is possible but should have little effect on air operations. Smoke from firing operations will reduce visibility within the fire area. Smoke is settling up to 4000 ft and should lift out by 1200. VFR conditions expected through the operational period.

SAFETY

Watch Out Situation 15 is emphasized today: **Wind increases and/or changes direction.** Expect increasing winds today, and changing wind direction tonight. Make a plan on how to deal with this situation, as it affects your piece of ground

Soberanes Fire Weather Forecast
West Operational Area

FORECAST NO: 59

NAME OF FIRE: Soberanes

Forecast Info

PREDICTION FOR: 0700 Tue- 0700 Wed

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Tuesday Sept 20th, 2016

SIGNED: Jason Clapp

TIME AND DATE
FORECAST ISSUED: 2000 9/19/16

Incident Meteorologist
Jason Clapp – Cell 530-383-4839 (West-Molera)

WEATHER DISCUSSION: ***** Strong NW Winds Late Wed and Thu *****

An upper low to south will stream some mid level clouds over fire area today before the low will move to east tonight. Then the frontal system over the Pacific NW will impact the fire with increasing WNW winds Wed, becoming strong Wed night/Thu, and transitioning winds from NE by Fri. These NW ridge winds will likely increase down Higgins Creek and pull any fire downcanyon. Marine layer stratus will thicken Wed/Thu, but should remain around 2000 feet.

WEATHER FORECAST For Today:

WEATHER: Marine layer will impact aviation resources on coast (H-70 & H-71)…H-70 (Island Dip) may become partly cloudy by late morning. Cooling and increased humidity today with breezy SW winds expected ahead of the frontal system, together with some mid cloudiness that may act as shading. WSW ridge winds will help keep fire activity within Higgins drainage.

TEMPERATURES: Highs 77-82…highest on lower slopes. (Down 4-6 degrees)

HUMIDITY: 15-20% (Up 2-4%).

20 FT WINDS:
RIDGETOP – SSW 5-7 gusting 10 mph…after 1200 WSW 12-14 mph, gusting 20 mph.
SLOPE/VALLEY – Downvalley 2-5 mph through 0900, then upvalley/upslope 5-8 mph.
Gusts 10-13 mph in the afternoon.

Marine Layer Top: Around 1000 feet Above Sea Level. **Haines:** 4

WEATHER FORECAST For Tonight:

WEATHER: Marine layer stratus will thicken overnight to near 1500 ft. Ridge winds will shift more NW and enhance any downcanyon winds within Higgins canyon.

TEMPERATURES: Lows 56-59 in the valleys. 60-63 ridges. (Down 5-6%).

HUMIDITY: Lowering overnight 30-35% in Higgins drainage…25% thermal belt/ridges.

20 FT WINDS:
RIDGETOP – Becoming WNW 9-12 mph gusting to 17 mph.
SLOPE/VALLEY – Downcanyon 4-8 mph with gusts 12 mph down Higgins Creek.

Marine Layer: 1500 feet impacting Highway 1.

EXTENDED FORECAST:
W-NW will increase Wed due to approaching frontal system. The approaching front will increase the marine layer to near 2000 feet Wed and Thu. Strong winds impact the fire area (25 g35 mph) and Molera Camp (20 g30 mph) Thu as frontal system moves through area. Then NE winds return Friday behind frontal system followed by high pressure with dry, but weaker, NE winds dominating into the weekend.

WEST FIRE BEHAVIOR FORECAST WEST

FORECAST NUMBER: 59	**TYPE OF FIRE:** Wildfire
FIRE NAME: Soberanes West Operational Area	**OPERATIONAL PERIOD:** Tuesday, 9/20/2016 24 Hour Shift
DATE ISSUED: September 19, 2016	**TIME ISSUED:** 2000

INPUTS

WEATHER SUMMARY: (See Weather Forecast)

*****Wind Summary*****

Day- Ridge Top: Morning S/SW 5-7 mph, Gusting 10 mph. After 1200 shifting SW 12-14 mph, gusting 20 mph

Slope/Valley: Down valley 2-5 mph through 0900 then up valley/upslope 5-8 mph gusting 10-13 mph afternoon.

Night- Ridge Top: Becoming WNW 9-12 mph Gusting 15 mph

Slope/Valley: Down Canyon 4-8 mph gusting to 12 down Higgins Creek

Haines Index: 4 Low

OUTPUTS

FIRE BEHAVIOR

GENERAL:

*****Local Thresholds- Watch Outs*****

Combinations of any of these threshold factors may greatly increase fire behavior.

Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
Forecast	Ridges	12-14mph	15-20%	79-82°	4-6%
	Valleys	5-8mph	13-16%	81-85°	3-5%

Probability of Ignition: Day: 65-75%, Night: 35-45%
NFDRS Indices: Projected Hastings ERC 75, Arroyo Seco BI 143

Coastal Sage shrub fuel moisture, primarily chamise and button brush are running below seasonal averages. Abundant dead fuels remain from the 1999 Kirk and 2008 Basin fires. Many drainage bottoms did not burn during these previous fires and contain deep duff under timber and brush. These fuels can hold heat for many days and under the right conditions initiate fire spread.

SPECIFIC:

Branch VII: Winds will fan hot spots in the Higgins Creek drainage area. If any of this heat gets established in unburned fuels suppression will become a challenge.

AIR OPERATIONS:

Marine layer may hamper visibility in the morning particularly along the coast H-70 & H-71 dip sites.

SAFETY:

Many serous injuries on fires have happened during mop-up operations. In the case of our current mop-up operations you have the added complexity of very steep brush covered terrain with lots of unburned fuels. While thorough mop-up is critical to our mission, make a thoughtful plan for each hot spot mission and be deliberate about executing each mission. Lookouts will even be necessary.

All my life, I always wanted to be somebody. Now I see that I should have been more specific.
Jane Wagner

AIR OPERATIONS SUMMARY
ICS 220

Prepared By: Ty Miller AOBD **Prepared Date: 09/19/2016** **Prepared Time: 2000**

1. INCIDENT NAME: Soberanes Fire	2. OPS PERIOD DATE: 09/20/2016	START TIME: 0700	END TIME: 2100	SUNRISE: 0653	SUNSET: 1905

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): Track all dipsite locations/number of dips/gallons taken. Track all drop locations/number of drops/gallons dropped.
All GPS data to be collected in **DEGREES, DECIMAL MINUTES** format.
AVOID Aerial Application of Retardant/Foam/Agent within 300' of Waterways, Bodies of Water, etc.
If Retardant/Foam/Agent is dropped within these areas immediately notify the AOBD and provide the following information: Lat/Long, estimated number of gallons and a map detailing the area.
Helitorch Module is located at Tassajara Torch Base.
Fly with Transponder 1255.

Air Attack Briefing 132.0250 AM **AIR/AIR Firing 135.3250 AM**

For scheduling recon flights contact Ranch HB communications @ 831-659-0220

All rotor wing aircraft will be on the ground at 1900.

TUSI Advisory 126.200 for restricted airspace.

Soberanes Fire – Safety Message

INCIDENT #**CA-BEU-003422**	DATE:**09-20/21-16** TIME: **0700-0700** **Day/Night Shift**

Subjective Vs. Objective Hazards

All line going personnel are faced with two types of hazards in the wildland fire environment, subjective and objective.

- Subjective hazards; one which has direct control over these types of hazards.
  - Conditions of equipment
  - Working below a dozer
  - Tree felling techniques
- Objective hazards; part of the natural environment and cannot be eliminated.
  - Lightning
  - Fire weakened trees
  - Rolling rocks
  - Weather

In the wildland fire environment we can control the subjective hazards but not the objective hazards. The best way to minimize exposure to any type of hazards we face; we must adhere to safe procedures and maintain LCES to help reduce our exposure.

Operational Leadership

- **TAKE CHARGE** of your assigned resources.
- **MOTIVATE** firefighters with a "can do Safely" attitude.
- **DEMONSTRATE INITIATIVE** by taking action in the absence of orders.
- **COMMUNICATE** by giving specific instructions and asking for feedback.
- **SUPERVISE** at the scene of action.

HUMAN FACTOR BARRIERS TO SITUATIONAL AWARENESS

- Fatigue
  - Carbon Monoxide
  - Dehydration
  - Heat Stress
  - Fitness Level
  - 24-hrs awake affects your decision making like 0.1 blood alcohol content
- Hazardous Attitude
  - Invulnerability
  - Anti-Authority
  - Impulsive
  - Over confident
  - Complacent
  - Resigned
  - Afraid to speak up, or disagree

Individual Accountability

- Know where your crewmembers are at all times.
- Never allow anyone to work alone, have crewmembers work in pairs.
- Inform Division or your Supervisor if you are changing locations.
- Review radio procedures, and ensure your radio is properly cloned.
- Check **IN** with the Division Supervisor on site if not assigned there.
- Check **OUT** with your supervisor (or Division) at the end of shift.
- Notify Branch or Communications when all personnel are safely off the line.

Prepared by:

The Team 4 Safety Group

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE BEHAVIOR AND WEATHER	• The weather is becoming hotter and drier. • Beware of increasing fire activity. • Watch out for increasing winds in the afternoon hours. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points. • **Historical trends indicate changes in the fire environment support large fire growth.**
ALL	MOP-UP	• Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue, shorten shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area; what hazards exist, and how can we mitigate those hazards.
ALL	TRAFFIC HAZARDS AND DRIVING	• Use caution while driving on all incident roads. • Heavy local traffic on Highway 1 & Carmel Valley roads during shift changes. • Drive defensively! Expect the unexpected around every curve. • Watch for other vehicles, rocks and debris on the roadway. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers when available. • Roads are narrow with steep drop-offs, were not in a hurry. • **Know that the flagging on the side of Coast Ridge road indicates a false berm/soft shoulder created by a dozer.**
ALL	COMMUNICATIONS	• Share your Situational Awareness with those who also have a need. • **Radio Communications may be poor in some areas. Use human repeaters.** • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 3 different groups, ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and through briefing.
ALL	FATIGUE & DEHYDRATION	• Be alert for signs of fatigue and take breaks as necessary. • Get adequate rest, follow the 2:1 work/rest guidelines. • Monitor ALL resources for level of fatigue. • Drink plenty of water at and maintain a 3:1 ratio of water to Gatorade. • Monitor employees for signs of dehydration and heat related illness. • Maintain good hydration and a healthy food intake. • "Camp Crud" may predispose a firefighter to dehydration.
ALL	AVIATION OPERATIONS	• Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical freq. when assigned a specific aircraft. • Use air to ground command freq. to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Maintain good separation between ground forces & water/retardant drops. • Review and Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute here on the Soberanes Fire.
ALL	STRUCTURE PROTECTION	• Review Structure Protection; IRPG pages 12-16. • Do not commit to stay at a structure unless the area around the structure represents an adequate safety zone. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials.
ALL	ENVIRONMENTAL HAZARDS	• Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Ensure all personnel can identify Poison Oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
ALL	HEAVY EQUIPMENT OPERATIONS	• Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber increase distance to 2.5 times the height of the tress. • Never work below or behind heavy equipment.

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.

Division Supervisor/Operations contacts Communication:

- Division Supervisor/Operations to use **"injury or incident communication protocol"** on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications will contact the Medical Unit Leader on Command channel.
- Medical Unit Leader will:
  1. Have communications dispatch ground/air transport resources
  2. Notify receiving hospital of injury status.
  3. Develop primary and contingency transport plan
  4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

Contact Communications with patient complaint/condition and location, via LOGs Net

- Medical Unit contacts:
  - Safety
  - Logistics
  - Operations
- Medical Unit Leader will:
  1. Contact Communications to dispatch ground/air transport resources
  2. Notify receiving hospital of injury status
  3. Develop primary and contingency transport plan

206 ICS	9. PREPARED BY: (Medical Unit Leader) Doug Stuart (MEDL) Eric Williams (MEDL)	10. REVIEWED BY: (Safety Officer) CIIMT 4 Safety Officer (SOF1) SOF 1 (T)

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long)_____

Situation_____

Any special equipment required_____

Number of injured _____ Type of injuries_____

Closest pick up point (DP, Helispot)_____

Level of consciousness _____Resp._____ Pulse _ BP _____Weight _
(alert & oriented x 1-4)

Injury_____Agency (No Names)_____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	*Transport to Med Unit*
Mechanism	*Hit by a falling tree or large branch* *Fall of 10' or more* Insect bite with shortness of breath *Signs of heat stroke (hot, dry, disoriented)* Burn Injury greater than 1% body area	*Minor dehydration* Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	*Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis* *Any Arm or Leg fracture above the Joint*	*Minor blunt trauma* Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	*Disoriented* *Chest Pain or Shortness of Breath* Weak or absent radial pulse Pale, cold and sweating	*Alert and oriented* No shortness of breath Good pulses

If air or ground ambulance is DELAYED:
Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.
The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

Prepared By (Communications Unit)	Incident Location
Sal Bonilla Jr. / Chris Baker COML 4 Ph 831-484-9674	5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

AD Casuals – Interim Payments Yearend Closing 9/23/16

AD Casuals – Interim Payment Yearend Closing

If you would like a partial payment processed before yearend closing please contact us. The last day we can submit partial payments is September 23rd. They will start disbursing payments again on or after October 3rd.

On-Shift Time

On-shift time includes a combination of actual work, ordered standby, and compensable travel. On-shift time has a specific start and ending time and is recorded as clock hours. Each resource is responsible for ensuring they are meeting their 2/1 Work Rest Ratio and/or getting approval in advance from their supervisor and completing a Work Rest/Mitigation form to be approved by IC if working excessive hours. Submit the finalized document to Finance.

If you have any questions for Finance please call:

Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites***. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.

2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.

3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.

4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.

5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph***. Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.

6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.
