Central Coast
Incident Management Team

FOREST SERVICE
U S
DEPARTMENT OF AGRICULTURE

OPERATIONAL PERIOD

MONDAY, OCTOBER 3, 2016

0700-1900 HOURS

Maps **Fire weather** **RAWS**

INCIDENT OBJECTIVES	1. Incident Name **Soberanes**	2. Date **10/2/2016**	3. Time **2200**

4. Operational Period

MONDAY October 03, 2016 0700 - 1900 Hours

5. General Control Objectives for the Incident (include alternatives)

Management Objectives

- Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations.
- Reduce firefighter exposure by only engaging fire assignments with the highest probability of success.
- Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests.
- Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations.
- Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information.
- Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy.
- Manage incident costs effectively for the values at risk through regular and ongoing cost analysis.

Control Objectives

Keep the fire;

- East of Coast Ridge Road.
- North of Nacimiento-Fergusson Road.
- West of Carmel Valley and Reliz Canyon.
- South of Carmel Valley Road.

6. Weather Forecast for Operational Period

Soberanes Fire Weather Forecast

Forecast Information & SPOT Forecasts

FORECAST NO: 72

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Mon - 0700 Tue
SHIFT DATE: Monday Oct 3, 2016

UNIT: CA-BEU/LPF MRD
SIGNED: Jason Clapp

TIME AND DATE FORECAST ISSUED: 1900 10/2/16

Incident Meteorologists
Kurt Van Speybroeck (Rana Camp) – 831-659-0290
Shawn Weagle (Rana Camp)
Jason Clapp (Toro ICP) - Cell 530-383-4839

Weather Discussion: Cool and moist air behind yesterday's front will generate morning cloudiness over ridges before breaking up in the afternoon. Winds will be breezy in the afternoon, especially with more sunshine. Mid level cloudiness will move into region late in the day ahead of a weaker frontal system and lower clouds overnight. Winds should be fairly weak overnight with some breeziness over ridges. The up-slope clouds that form along ridges overnight may generate some mist or light drizzle, but accumulating measurable precipitation unlikely.

WEATHER FORECAST for Today:

	Coastal Valleys / Lower Slopes	Ridgetops / Upper Slope	Inland Valleys / Lower Slopes
Weather	Clouds early, then breaking up before increasing by evening	Mostly cloudy with breaks mid-day & increasing by evening.	Clouds early, then breaking up before increasing by evening.
Highs	In the mid 60s	Upper 50s - lower 60s	Lower 70s
Min RHs	40 - 50%	Around 70%	35 to 40%
20 ft Winds	N-NE 12-15 mph with gusts to 20 mph in morning becoming NW 12 to 20 mph in the afternoon.	N-NE wind 10-13 mph with gusts to 18 mph in the morning becoming NW 12-20 mph in the afternoon.	Upslope winds 3-5 mph becoming up-valley 5-8 mph with afternoon gusts 10-15 mph. E-NE winds 10-15 mph lower elevations in Arroyo Seco and Willow Creek. ***NW winds 10-15 mph in NW-SE drainages (Miller Canyon, Pine Valley & Tassajara) increasing to 20 mph in afternoon.***

Marine Layer: Cooler and moister throughout, but no well-defined marine layer. **Haines:** 3

WEATHER FORECAST for Tonight: Increasing cloudiness with upslope flow causing clouds to form along ridges, and somewhat warmer due to cloud cover. Lows in mid-30s ridges and lower to mid-40s valleys. Max RHs 80% to 90% valleys and near 100% ridges. W-NW winds 10-15 mph with gusts 20 mph in evening, gradually diminishing overnight. Potential mist and light drizzle along ridges & coastal slopes, but no accumulating precipitation is expected over fire area.

OUTLOOK for Tuesday: Winds increase again out of N to NW Tuesday behind the weak front that passes through Monday night. Lingering moisture and upslope flow will likely keep clouds present over ridges, and then break up somewhat in the afternoon with warming temperatures and lowering RH. Any morning precipitation will be in form of mist and drizzle. N winds 10 mph with gusts 15 mph in the morning will turn NW-W in the afternoon and increase to 15-20 mph with gusts 25-30 mph, then decreasing in the evening and overnight. Highs mid-upper 60s ridges to upper-70s valleys. Minimum RHs 25 to 30%. Lows in the upper 30s on ridges to mid-upper 40s in valleys. Nighttime RHs 70-80%.

EXTENDED FORECAST for Wednesday through Saturday: Ridging builds over the area with N-NE winds Wednesday with warming and drying into the weekend…RH could get back into upper teens or lower 20s. Thursday and beyond lighter ridge winds will shift SW in afternoon over coastal ridge (West Repair).

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 71	**TYPE OF FIRE** Wildfire
FIRE NAME: Soberanes Fire	**OPERATIONAL PERIOD** 10-3-2016 24 HOUR SHIFT
DATE ISSUED 10-2-2016	**TIME ISSUED** 1700HOURS
UNIT CA-BEU-003422	**SIGNED** Josh Eichamer FBAN (t)

INPUTS

******Review Weather Forecast for details******

Gusty northerly winds expected throughout the day. Predicted RH values between 35% and 60%.

FIRE BEHAVIOR

GENERAL

Increasing cooler temperatures and higher RH values will assist in reinforcing control lines. Live fuel moistures remain extremely low due to drought conditions and will take time to fully recover. The probability of active fire spread will diminish with increased RH values.

Optimal Alignment - Peak Burning Conditions

POI = 70 - 80% **Spotting Distance**= up to 1/2 Mi. **ROS** 125 ch/h **Fine Dead Fuel Moisture** = 5%

LOCAL THRESHOLDS – WATCH OUTS

Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:	20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%

SPECIFIC

- Some creeping and smoldering in the duff and leaf litter along unlined portions of the fire. Heavy fuels will retain heat and may be problematic where close to the fires edge.
- Specific areas of concern include Ventanta Cone, Miller, Pine, and Tassajara canyons due to lack of containment.

AIR OPERATIONS

Expect morning clouds forming on ridges, breaking up in the afternoon, and reforming Monday evening. Gusty afternoon winds expected.

SAFETY

Remember, you are the primary value at risk on this fire.

6. Control Operations/Work Assignments:

- Assess & implement fire suppression repair as directed by Resource Advisers.
- Patrol & mop-up to prevent the fire from escaping containment lines.
- If found, assist in the back haul of excess equipment & trash.

7. Special Instructions:

- REMS #2 (w/ FEMP's Smith and Giacomini) are assigned to Divisions CC, GG, J/K/L, M/AA, Road Group East and North Repair.
- Please be mindful of your driving habits, other drivers, and road conditions. We've had several incidents and near misses along our routes and roadways.
- Division/Group Supervisors to record location and condition of all UTV's and report to Logistics.
- Division Group Supervisors must validate cost apportionment on 204's at the end of each shift. Contact Finance Section Chief for questions.
- All resources utilizing water in excess of 100 gal must document water usage on the enclosed Water Usage Log. Submit with your time.
- If you open a gate close the gate!!!
- SOFR Linda Ferguson is assigned to Divisions J/K/L and Road Group East
- Rana Safety Officer (SOF2) Kenneth Rogers (208) 940-2921 / Rana Safety Trailer (831) 659-0460.

ICS 220	AOBD		

1. INCIDENT NAME: Soberanes Fire	2. OPS PERIOD DATE: 10/03/2016	START TIME: 0700	END TIME: 2100	SUNRISE: 0704	SUNSET: 1849

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): Track all dipsite locations/number of dips/gallons taken. Track all drop locations/number of drops/gallons dropped.
All GPS data to be collected in **DEGREES, DECIMAL MINUTES** format.
AVOID Aerial Application of Retardant/Foam/Agent within 300' of Waterways, Bodies of Water, etc.
If Retardant/Foam/Agent is dropped within these areas immediately notify the AOBD and provide the following information: Lat/Long, estimated number of gallons and a map detailing the area.

Fly with Transponder 1255.

Air Attack Briefing 132.0250 AM (A-10002)

For scheduling recon flights contact Ranch HB communications @ 925-407-6353

All rotor wing aircraft will be on the ground at 1900.

Soberanes Fire – Safety Message

INCIDENT #CA-BEU-003422	DATE:**10.3.16**	TIME: **0700-1900**

Major Hazards

- ***Traffic Hazards and Driving***
- ***Weather and Fire Behavior***
- ***Line Construction in Tassajara/Div.CC***
- ***Hazard Trees in Fire area and Weakened Trees in both Toro and Rana camps***
- ***Hydration and Fatigue:*** Hydration starts PRIOR to the beginning of shift, drink a 2:1 ratio of water to sports drinks. Monitor fatigue levels, and do not exceed the 2:1 work rest ratio.
- ***Working around Heavy Equipment in the suppression repair groups***

How do I get this injured firefighter off the line?

There is no hard and fast answer to this. Your preparation means everything to the outcome of any line emergency. Getting your fellow injured firefighter off the mountain will probably be one of the most important tasks you will ever be charged with. To do this you need to plan accordingly through out the day. Know your resource's capabilities and don't expect the REM Team or a helicopter to be available. Train for it and make sure the other resources are in the loop if they are in your plan.

Think about it

Yes you may have been raised on motorcycles and ATV's \ UTV's but these incidents are called accidents for a reason. Please take extra caution if you are using one of these vehicles and use your experience to keep you safe and not overconfident.

Rick Bertram SOF2 805-471-8076

Tom Zeulner SOF2 805-440-5252

Curt Schwarm SOF2 t 805-620-2561

ATV \ UTV

California Vehicle Code Section 38601

» A person shall not operate, or allow a passenger in, a recreational off-highway vehicle unless the person and the passenger are wearing safety helmets meeting the requirements established for motorcycles and motorized bicycles pursuant to Section 27802. - See more at: http://codes.findlaw.com/ca/vehicle-code/veh-sect-38601.

There is still concern that unauthorized personnel are using the incident ATV's \ UTV's. To use them you must be qualified and wear the proper helmet at all times when operating the vehicle. Your wildland helmet does not meet the requirements for use on one of these vehicles.

Central Coast

Incident Management Team

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	• Use caution while driving on all incident roads, nightly moisture\fog may create slick roads • **Drive defensively!** Expect the unexpected around every curve. • Watch for other vehicles, distracted drivers, rocks and debris on the roadway. • Beware of heavy local traffic on Carmel Valley Road, Hwy. 68 and Hwy. 1. • **Roads are narrow with steep drop-offs.** • Flagging on the side of North Coast Ridge road indicates a false berm or soft shoulder created by heavy equipment.
ALL	WEATHER AND FIRE BEHAVIOR	• **With the increasing winds there is potential for Extreme Fire Behavior.** • **Winds will test weakened trees, stay alert around snags** • **Stay hydrated. Monitor resources for heat related illness.** • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points. • Expect the unexpected with drought stricken fuels at critically low fuel moistures. • **Historical trends indicate changes in the fire environment support large fire growth.**
Tassajara CC	LINE CONSTRUCTION	• Conduct thorough briefings for all personnel involved (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 7). • Establish adequate safety zones (IRPG p.8) and escape routes. • Use Downhill Line Checklist (IRPG p. 9). • Use "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4) • Utilize Risk Management Process (IRPG p.1).
ALL	MOP-UP	• Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; adjust shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area. Assess the hazards and implement appropriate mitigations.
ALL	COMMUNICATIONS	• Share your Situational Awareness with those who also have a need. • **Radio Communications may be poor in some areas. Use human repeaters.** • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing. • Know who you are working for.
ALL	AVIATION OPERATIONS	• Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical frequency when assigned a specific aircraft. • Use air to ground command frequency to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Review and follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute.
ALL	HEAVY EQUIPMENT OPERATIONS	• Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber, increase distance to 2.5 times the height of the tress. • Never work below or behind heavy equipment.
ALL	ENVIRONMENTAL HAZARDS	• Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Ensure all personnel can identify poison oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
ALL	Spike Camps	• Watch for dead or drought damaged trees in sleeping areas • Maintain hygiene to avoid camp crud • Sleep only in designated areas • Drive slowly and watch for fellow firefighters while driving (5mph in camp). • Ensure you get a full briefing daily • Check in when off the line to maintain accountability

IINCIDENT NAME:

Soberanes Fire

Central Coast Incident Management Team

Operational Period: 0700-1900

October 3, 2016

DATE AND TIME PREPARED:

October 2, 2016 1400 hours

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY DAY PLAN:

Crew Supervisor to contact Division Supervisor/Operations with patient complaint, condition and location.

Division Supervisor/Operations contacts Communications:

- Division Supervisor or *POC to use **"Medical Incident Report"** worksheet on next page
- Division Supervisor or *POC will run medical emergency on the command channel
- Communications contacts Medical Unit Leader on Command channel or (cell phone, list number)
- Medical Unit Leader position is responsible for:
  1. Go to incident Communications location.
  2. Ensure Communications dispatches appropriate ground/air transport resources.
  3. Notify receiving hospital of injury status.
  4. Develop primary and contingency transport plan
  5. Notify Safety, Logistics, Operations

CAMP MEDICAL EMERGENCY 24 HOUR PLAN

Contact incident Communications with patient complaint, condition and location, via LOGs Net or Command frequency as needed.

- Medical Unit Leader will ensure contacts made to:
  - Safety, Logistics, Operations
- Medical Unit Leader will:
  1. Contact incident Communications to dispatch ground / air transport resources.
  2. Notify receiving hospital of injury status.
  3. Develop primary and contingency transport plan.

*POC (Point of Contact)and Operations

ICS 206	9. PREPARED BY: (Medical Unit Leader) Devon Haggie MEDL	10. REVIEWED BY: (Safety Officer) Rick Bertram SOF2

Medical Radio Report Worksheet (for IAP-Appendix B)

Medical Incident Report

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"
Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: *Provide incident summary and command structure.*

- **Nature of Injury/Illness** *Describe the injury (Ex: Broken leg with bleeding)* _____
- **Incident Name** *Geographic Name + "Medical" (Ex: Trout Meadow Medical)* _____
- **Incident Commander (Division Sup. or designee)** *Name of IC* _____
- **Patient Care** *Name of Care Provider (Ex: EMT Smith)* _____

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each pt. This is only a brief, initial assessment. Provide additional pt. info after completing this report.*

- **Number of Patients:**_____ - **Male / Female**:_____ - **Age:** _____ - **Weight:**_____

- **Conscious?** ☐ **YES** ☐ **NO = MEDEVAC!** - **Breathing?** ☐ **YES** ☐ **NO = MEDEVAC!**

- **Mechanism of Injury** *What caused the injury?* _____

- **Location, Lat/Long** (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24' _____

4. SEVERITY OF EMERGENCY: TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
☐ **URGENT-RED Life threatening injury or illness.** *Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.*	Ambulance or MEDEVAC helicopter. Evacuation need is **IMMEDIATE.**
☐ **PRIORITY-YELLOW Serious Injury or illness.** *Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.*	Ambulance or consider air transport if at remote location. Evacuation may be **DELAYED.**
☐ **ROUTINE-GREEN** Not a life threatening injury or illness. *Ex: Sprains, strains, minor heat-related illness.*	Non-Emergency. Evacuation considered **Route of Convenience.**

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

☐ Helispot ☐ Short-haul/Hoist ☐ Life Flight ☐ Other

Ground Transport:

☐ Self-Extract ☐ Carry-Out ☐ Ambulance ☐ Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

☐ Paramedic/EMT(s) ☐ SKED/Backboard/C-Collar ☐ Crew(s) ☐ Burn Supplies ☐ Oxygen
☐ Trauma Bag ☐ Medication(s) ☐ IV/Fluid(s) ☐ Cardiac Monitor/AED
☐ Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

- **Run Medical Emergency on Command** - **Coordinate with air ambulance on CALCORD tone 6**

8. EVACUATION LOCATION:

- **Lat/Long** (Datum WGS84) *EX: N 40 42.45' x W 123 03.24* '_____
- **Patient's ETA to Evacuation Location:** _____

Helispot/Extraction Size and Hazards: _____

9. CONTINGENCY: ***If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...***

_____

_____

REMEMBER: **-Confirm ETA's of resources ordered** **-Act according to your level of training**
- If air or ground ambulance is DELAYED: Package and transport patient to rendezvous with incoming Ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

Prepared By (Communications Unit)

David Paschke Kevin Harper COML Ph 831-484-9674

Incident Location

5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

Soberanes Fire
Human Resource Message
October 3, 2016

BE CONSIDERATE OF OTHERS

Being considerate is **being** polite and caring.

People like it when you're **considerate** of their feelings.

We could all probably be more **considerate of others**: this word means you're thinking of other people — considering them — and then treating them decently and with respect.

Some examples of being considerate:

- ✓ Being quiet in sleeping areas.
- ✓ Driving the slow speed limit while in fire camp.
- ✓ Having good hygiene when shaking hands.
- ✓ Being cognizant of the length of your shower when there is a line.

~~~

Soberanes Fire
Trainee/Trainer Data Form

Training Specialists: Robert Rivelle – 707.498.1761
Dennis Martin - 707.479.8421

- All Incident trainees, including those on Firefighting Modules, at your earliest opportunity complete this form and see the Training Specialist. Bring your taskbook and qualification card. One Training Specialist is covering Rana and Molera Camp and a drop box has been set up for Data Form drop off. These Camps will forward your Trainee Data Form to Toro ICP.

- You will meet with the Training Specialist and receive your training package as you go through DEMOB at Toro ICP, To close your training package, bring to the Training Specialist at Toro ICP your:
  1) A performance rating from your trainer. (ICS 225)
  2) Your task book that has as many entries as possible by your Trainer.

Trainee Data

Trainee Name: _____ ICS Trainee Position: _____

Request Number (O, C, E):_____ Agency Designator (Example: CA-ANF):_____

Cell # While on Incident: _____ Date Assigned: _____

Training Records Mailed To: (Fire Chief, Training Officer)

Name: _____ Title_____

Name of Agency/Unit: _____

Agency/Unit Address: _____

City: _____ State: _____ Zip Code: _____ Phone: _____

Trainee Prerequisites

1. Possesses valid Red Card or agency certification card? ___Yes ___No

2. Trainee has current position task book issued by home unit? ___Yes ___No

---

Trainer/Evaluator Data

Trainer / Evaluator Name: _____ ICS position on fire: _____

Home Unit:_____

City: _____ State:_____

Cell # While on Incident: _____

What do you need/want to accomplish on this incident:
