INCIDENT ACTION PLAN

SOUTHEAST TEXAS FIRE COMPLEX

TEXAS FOREST SERVICE
The Texas A&M University System

CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4

SEPTEMBER 20, 2011

0800-2030 HOURS

TX-TXS-12009

Tuesday

ICS Form 202

INCIDENT OBJECTIVES	1. INCIDENT NAME **Southeast Texas Fire Complex**	2. DATE **9/19/11**	3. TIME **2200**

4. OPERATIONAL PERIOD (DATE/TIME)

Day Operations – September 20, 2011 – 0800 to 2030

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Management Objectives:

- Provide the **LEADERSHIP** necessary to ensure firefighter and public safety.
- Build and maintain the **COMMON OPERATING PICTURE** (COP) with resources assigned to your incident, other incidents in the complex and Lone Star ICP.
- Establish and maintain **ACCOUNTABILITY** of all personnel assigned to the Southeast Texas Fire Complex.
- On the fire ground; **BRIEF, ANCHOR** and **FLANK** following the NWCG guidelines and principles.
- Establish and maintain **EFFECTIVE RELATIONS** with communities, cooperating agencies and political entities.
- Fight fire aggressively having provided for **SAFETY** first.
- Ensure that all Incident Management actions are consistent with principles of **RESPONSIBLE FISCAL** management.

Fire Weather Forecast

FORECAST NO: 15

PREDICTION FOR: TODAY/TONIGHT

SHIFT DATE: Tuesday, September 20, 2011

TIME/DATE ISSUED: 2000 hrs, September 19, 2011

NAME OF FIRE: SOUTHEAST TEXAS FIRE COMPLEX

UNIT: Texas Forest Service

SIGNED: _____

Thomas A. Bird
Incident Meteorologist
(240) 778-5276

WEATHER DISCUSSION for SOUTHEAST TEXAS:

LIGHT NORTH WINDS MOVE DRIER AIR OVER THE COMPLEX

A relatively weak cool front sagged south across southeast Texas yesterday and stalled over the SE TX Complex last night. Light northerly winds at the surface, and aloft, behind the front have introduced drier air back over all but the coastal and extreme SE area of the complex. Most of the area will see sunny skies with some afternoon fair weather cumulus south and coastal. To the south a few isolated storms may form near the coast. With almost no pressure gradient, due to the stalled and washed out front, winds will be light and generally variable today. Temperatures will warm back to seasonal averages today and Wednesday. Changes are on the horizon as a cold fronts move through the region THU. Significant cooling and some drying with stronger northerly winds are expected FRI.

TODAY/TONIGHT for SOUTHEAST TEXAS:

Mostly sunny to sunny. Scattered fair weather cumulus field in the afternoon. More clouds south than north. A slight chance of an isolated shower or thunderstorm near the coast. Temperatures slightly warmer with light winds. RH will be noticeably lower this afternoon.

MAX TEMPS: 95 NW to **88** SE / **MIN TEMPS: 65** N to **75** S.
MIN RH: 25% NW to **45**% SE / **MAX RH: 65-70 %** N to **90-100%** S.
WINDS: Generally light northerly through the morning…then light (2-5 mph) and variable in the afternoon. Coastal winds will turn SE at 5-10 mph in the afternoon.
LAL: 1
CHANCE OF SHOWERS & THUNDERSTORMS: 0% North & Central. **5-10%** Coastal areas.

***WEDNESDAY / THURSDAY OUTLOOK for SOUTHEAST TEXAS*:**

Mostly sunny early…then partly cloudy and seasonally warm in the afternoon. Seasonally warm and dry with low afternoon RH. A few Isolated afternoon showers and thunderstorms possible both days. Better morning RH recoveries. Moderately light east and southeast winds area wide…and coastal breezes. A cold front will approach Thursday afternoon turning winds northerly.

Winds fairly light to moderate…favoring east to southeast Wednesday…turning north and increasing a bit over the northern portions of the complex Thursday.

MAX TEMPS: 93 W to **88** E / **MIN TEMPS: 65** N to **75** S.
MIN RH: 25% N…**30%** Central…4**0%** coastal / **MAX RH: 75%** N to **95%** S.
WINDS: Generally east to southeasterly 4-8 mph…afternoon coastal gust to 12 mph. Winds shifting north late Thursday north of a Huntville-Jasper line.
LAL: 1
CHANCE OF SHOWERS & THUNDERSTORMS: 20% afternoons. Best chances S, Central, E.

#851 (RILEY ROAD FIRE)
***WEATHER FORECAST*:**
Sunny to mostly sunny with a scattered fair weather cumulus field in the afternoon. Temperatures warmer. RH will be noticeably lower this afternoon. Winds remain generally light and favoring north. A very slight chance of an afternoon buildup leading to a shower or thunderstorm.

TIME	TEMPS	RH	WIND
0600hrs	66	75%	NNW 2-4 mph
0900hrs	74	60%	NNW 2-5 mph
1200hrs	85	35%	N 2-5 mph
1500hrs	92	25%	VRB 3-6 mph
1800hrs	88	30%	VRB 3-6 mph
2100hrs	79	40%	VRB 3-6 mph
0000hrs	74	60%	SE 3-6 mph
0300hrs	70	75%	SSE 4-7 mph
0600hrs	67	95%	SSE 4-7 mph

Max/Min TEMP: 93/66 deg Min/Max RH: 25/95% CHANCE OF RAIN: 5-10%

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #16	**TYPE OF FIRE: Wildland**
FIRE NAME: Southeast Texas Fire Complex	**OPERATIONAL PERIOD: 09/20 0800-2400 9/21 0001-0759 2011**
DATE ISSUED: 09/19/2011	**TIME ISSUED: 1700**
UNIT: Texas Forest Service	**SIGNED: Craig Carter, FBAN**

FUEL ASSUMPTIONS: The major fuel types, found in the SE Texas Complex are fuel model TU3 (moderate timber understory) or Fire Behavior Prediction System Fuel model 9. High risk fuels include pine plantations and southern rough brush with yaupon underneath a mature pine canopy.

WEATHER SUMMARY

See Individual incident fire behavior forecasts and the fire weather forecast for detailed information.

SE Texas Complex General Forecast: Expect low to moderate fire behavior in all fuels. Fuels greater than one inch are still very dry and will consume. Relative humidity will continue to be high enough to dampen the fire behavior in most areas, especially at night. The fine fuels have enough moisture that they are not likely to support rapid spread early. If they drop to 6% isolated areas may see 2-5 foot flames depending on fuels. Probability of ignition will range from 40-50%. Direct attack with hand tools should be effective on all fires. Mop-up is very important to keep the fire from escaping the control lines. Large dead fuels will continue to burn for extended periods and will burn deep underground. Leaf litter and needle cast continues to provide the fuels necessary to support a re burn. The effect of the recent rains will diminish with time due to their short duration.

Critical fire behavior thresholds pine/hardwood mixed timber **(temp >90°, RH < 35%, winds > 10 mph).**

Flame Length: Timber litter – 2'- 5'; Grass – 3' – 5',
Rate of Spread: Timber litter – 7-9 feet/min; Grass – 70-94 feet/min
Spotting Distance: =0.1
Forecast: BI 27 □4**; IC** 11 □6; **ERC** 42 □7 (Conroe RAWS 415109)

Fire Suppression Interpretations

Flame Length	Interpretation
0-4'	Direct attack handline should hold fire.
4-8'	Fire too intense for direct attack on head with hand tools. Equipment can be effective.
8-11'	Fire may present serious control problems: Torching, crowning, & spotting

RH	FFM	PI	Fire Behavior Interpretation Reference: page 78 IRPG, NFES 1077
>60%	>20%	<10%	Very Little ignition; some spotting may occur with winds above 9 miles an hour
45-60%	15-19%	10-20%	Low ignition hazard; campfires become dangerous; glowing brands cause ignition when relative humidity is less than 50%
30-45%	11-14%	20-30%	Medium ignition hazard; matches become dangerous; "easy" burning conditions.
26-40%	8-10%	30-50%	High ignition hazard; occasional crowning, spotting caused by gusty winds; "medium" burning Conditions.
15-30%	5-7%	50-70%	Quick ignition; rapid buildup; extensive crowning; fire moves up aerial fuels; long distance Spotting in pine stands; "dangerous burning conditions.
<15%	<5%	80-100%	Aggressive burning; spot fires occur often and spread rapidly; extreme fire behavior probable; "critical" burning conditions.

AIR OPERATIONS: CVU. Sunrise: 07:09 Sunset:19:21 (-2 minutes since yesterday)

FIRE BEHAVIOR SAFETY

Situational Awareness:

- *Expect spotting distances up to 0.1 mi. Detection is very difficult in brushy or tree covered flat terrain.*
- *Spotting is prolific when PIG's are above 70%.*
- *Live fuel moistures are extremely low. In brush and timber fuels torching is almost guaranteed, crowning runs are highly likely with winds above 15 mph.*
- *Use direct attack when safe to do so.*
- *Mop up must be aggressive and thorough, large fuels and soil organics are holding fire. Many fires have re-kindled days after control.*

INDIVIDUAL INCIDENT FIRE BEHAVIOR FORECAST	
FORECAST NUMBER: #16	**TYPE OF FIRE: Wildland**
FIRE NAME: Southeast Texas Fire Complex	**OPERATIONAL PERIOD: 09/20 0800-2400; 09/21 0001-0759 2011**
DATE ISSUED: 09/19/2011	**TIME ISSUED: 1700**
UNIT: Texas Forest Service	**SIGNED: Craig Carter, FBAN**

#851 Riley Road

Max Temp Day 91° Min RH 28% Wind Direction & Speed: NW 3-7mph, Gusts 10 mph

Fine Fuel Moisture; Unshaded 6% Shaded 9%, Probability of Ignition; Unshaded 50%, Shaded 30%.
See IRPG, page 78 for Fire Behavior Interpretation related to RH and fuel moisture content; page 82 for Fine Fuel Moisture and Probability of Ignition tables.

Smoldering will continue with a reburn threat where needle and leaf litter exist.

Initial Attack Fires

Max Temp Day: 94° Min RH:35%, Wind Direction & Speed: NE or SE 3-5mph.
Fine Fuel Moisture; Unshaded 6% Shaded 9%, Probability of Ignition; Unshaded 60%, Shaded 30%.
See IRPG, page 78 for Fire Behavior Interpretation related to RH and fuel moisture content; page 82 for Fine Fuel Moisture and Probability of Ignition tables.

Smoldering will continue with a reburn threat where needle and leaf litter exist.
Slight chance of thunderstorms along the coast and Louisiana boarder.

Direct attack with hand crews can be successful when flame lengths are 0-4'. If they are greater than 4' request assistance from engines, dozers, and aircraft to be successful. Expect troublesome spotting a couple hundred feet from the fire. Watch for occasional spotting up to .1 miles. Fires will move to the NW or SW depending upon location. Fires are expected to actively burn between 1200 and 2000.

SAFETY MESSAGE	INCIDENT NAME **South East Texas Complex**	Operational Period **Day**	DATE/TIME **9/20/11 0800-2030**

Look for Opportunity

Yield to other motorists, nobody ever yielded their way into a collision!

Reduce your speed. Higher speeds reduce reaction time, and magnify the consequences of a collision!

Take care of your vehicle and it will take care of you. Do P&M checks!

Don't run red! Slow at the yellow, and don't anticipate the green!

Be Alert to Your Surroundings

Review Power line Safety on page 22 of the IRPG.

Review First Aid Guidelines and procedures on pages 41-48 of the IRPG.

Prepared By: Sam Wilbanks SOF1	Approved By:

PIPELINE AWARENESS

Please follow these general awareness principles were developed by CIIMT 4 Safety Officer in consultation with on site industry representatives.

- Watch for cleared Right-of Ways, 30-60 feet wide. Pipelines will be in the middle of the cleared Right-of-Way and may be found exposed on the surface or buried one to five feet underground.

- Pipeline location markings are approximately 1,000 feet apart and 3 to 6 feet high and can be located near roads, railroads, fences and along the actual pipeline location.

- Signs may include information such as material transported in the pipeline, name of pipeline operator, and a telephone number where the operator can be reached in the event of an emergency.

- Do not continually cross heavy machinery in the same spot across buried pipelines. Vary the location, or cross at a road junction.

- If there is a suspected breach, look for a pool of liquid, a sheen or fog in the area. There may be a hissing or roaring noise or an unusual chemical odor. If any of these indicators are found, evacuate the area immediately and contact your immediate supervisor with the location of the breach and call 911 or your local emergency response number.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whetherthe frequency is narrow or wide band. LAST CLONE:

ICS 205

Working with TIMO/Timber Company Firefighters on the Fireline
Standard Operating Guidelines

1. **FIRE NOTIFICATION**

The TIMO/Timber Company (TTC) will provide updated ownership shape files and contact lists to the TFS, East Texas GIS Coordinator, on a quarterly basis to ensure that all TFS dispatch offices have updated spatial and contact data. The TFS dispatchers will use the shape files to help determine when fires are on TTC property and, to the extent possible, will make immediate notification to the TTC representative.

1. **RESPONSE PLANNING**

Once contacted, the TTC representative and the TFS representative will determine if TTC firefighters (employees or contractors) are needed on a fire and, if needed, the type and amount of TTC firefighting equipment needed. If needed, the TTC representative will dispatch TTC firefighters to the fire.

1.1. TTC firefighters are paid by TTC and are not under the control of the Texas Forest Service. Because of this they are not to be "staged". They are either used or not used.

1.2. The TTC representative makes the final determination on use of TTC firefighters. When planning please consider that due to land ownership changes it is likely that TTC firefighters will be limited to working certain parts of the fire.

1.3. The TFS representative has exclusive right to reject or curtail the use of TTC firefighter assistance on a wildfire based on safety concerns, lack of need, improper equipment configuration, or failure to properly execute suppression activities. Rejection or curtailment of TTC firefighter use on a wildfire will be communicated by the TFS representative to the onsite TTC representative.

1.4. As with any firefighter, TTC firefighters and representatives have the right to refuse assignment if it is unsafe or if it exceeds their qualifications or equipment capabilities.

Working with TIMO/Timber Company Firefighters on the Fireline Standard Operating Guidelines

2. DISPATCH AND RESPONSE

TFS will not directly dispatch TTC firefighters. All dispatching and fire line communications related to TTC firefighters must go through the TTC representative.

2.1. Once dispatched, TTC firefighters are not to be deployed to the fire line without a TTC representative on location.

2.2. Use of TTC firefighters should be limited to mop-up. If necessary to use for initial attack, TTC firefighters, along with the TTC representative, should work in tandem with a TFS dozer or TFS line supervisor. Initial attack operations for TTC firefighters should be limited to working heal and flanks of fire.

2.3. TTC firefighters are being paid by the TTC, and they are not a State of Texas resource, therefore they are not to receive “free” TXDOT fuel when available.

2.4. Release of TTC contractors during or following suppression activities will be the responsibility of the TTC representative, working closely with the TFS representative to ensure effective control of the fire, while also minimizing the cost of the TTC firefighting resource.

3. REQUIRED EQUIPMENT

TTC firefighters and representatives are required to have radio communications with TFS tactical frequencies, and all necessary personal protective equipment including nomex clothing, hardhat, and fire shelter. Additionally firefighting dozers are required to have lights for night operations.

4. REQUIRED TRAINING

Prior to being on the fire line, TTC firefighters and representatives must attend the TFS wildfire training course (1-day). Additionally, within the previous twelve months, TTC firefighters and representatives must have attended a 1-day wildfire refresher course. Wildfire training and refresher courses in other states can be substituted for this requirement. It is the responsibility of the TTC to ensure its firefighters meet these training requirements.

PLEASE COMPLETE ACCURATELY AND BREAKOUT THE FIRES.
IF YOU DON'T RESPOND TO A FIRE THEN YOUR CHARGED TO THE COMPLEX ONLY.

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY

In the event of an Emergency, Call 911 and advise condition and location of patient. Once 911 system has been activated, go through proper channels listed below.

- Supervisor will contact Lone Star Communications, **936-442-7713**, with Patient information pertaining to transporting location. IE: Which Hospital
- Lone Star Communications Unit will contact Medical Unit Leader, Safety Officer, and Operations Section Chief.
- **Do not give out name or other personal information over Radio Communications.**

FIELD MEDICAL EVACUATION PLAN

Zone:	**Incident:**	**Division:**
Date:		**Plan Prepared By:**

Qualified First Responders or the most qualified medical provider will provide patient assessment and first aid. Evacuation of serious injuries will be implemented folowing the "Medical Emergency" procedures on the Medical Plan / 206. Minor injuries will be treated and may be transported by vehicle to a medical facility as necessary. Notify Lone Star Communications on patient condition and transport destination as soon as possible for support needs.
