Anglers WILDLAND FIRE SAFETY TIPS

During periods of dangerous fire conditions, it is important to understand fire safe fundamentals that should be applied when enjoying your fishing experience. When these fire conditions exist, it is extremely important to check with local fire agencies because fire restrictions may be different at your fishing destination. The following are fire safety tips to help you enjoy your sporting activity and protect our natural resources.

Camp or Warming Fires: If allowed, do the following:

- ▲ Keep camp or warming fires small
- ▲ Build camp or warming fires away from overhanging branches, steep slopes, dry grass, logs, rotten stumps
- ▲ Never leave a camp or warming fire unattended
- ▲ Drown and stir the fire with water until dead out
- ▲ When finished with charcoal briquettes, dunk them
- ▲ Camp or warming fires — just because there is no smoke does not mean the fire is out.

Smoking: If allowed, do the following:

- ▲ When smoking is permitted outdoors, safe practices require at least a 3 foot clearing around the smoker
- ▲ Crush smokes, dead out
- ▲ In a vehicle, use your ashtray

Equipment: If allowed, do the following:

- ▲ Internal combustion equipment requires a spark arrester, check with your local dealer or fire agency to make sure you are legal
- ▲ Don't park your vehicle on dry grass
