Map Produced By: Alaska Type 1 IMT Situation Unit & NorthTree Fire International, Mobile Mapping Services

DISCLAIMER: Fire perimeter locations are developed using a variety of methods and under varying conditions. Due to the inherent difficulty in collecting this data under the extreme conditions of a large fire event, and Positive Fire Identification Interpretation techniques, the locations are provided as a general reference only. Acreages are approximate. The USDA Forest Service makes no map quality declaration.

New fire perimeter from aerial and ground observations, 8/25/2006 - 2100hours. Please use WGS 84 datum for GPS mapping on this incident.

0 0.5 1 2 Miles

Scale 1:100,000 at 8.5"x11"
