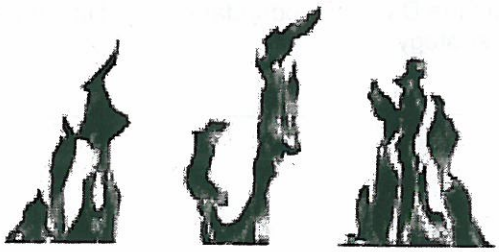
24 HOUR INCIDENT ACTION PLAN



DAY / NIGHT SHIFT

AUGUST 25, 2014 0600 – 1800

AUGUST 25-26,2014 1800-0600

Incident Objectives	1. Incident Name	2. Date Prepared	3. Time Prepared
	HAPPY CAMP COMPLEX	08/24/14	1900

4. Operational Period

08/25/14 Monday Day Shift 0600 - 1800

5. General Control Objectives for the incident (include alternatives)

Firefighter and public safety is our core value. All identified hazards will be mitigated or avoided.

MANAGEMENT OBJECTIVES:

1. Manage costs commensurate with values at risk.
2. Minimize damage to natural and cultural resources caused by fire suppression actions.

CONTROL OBJECTIVES:

1. Provide Structure Defense within the Division 2 boundary of the Happy Camp Oak Knoll Ranger District and along Scott River.
2. Manage and coordinate all new fires within the Division 2 boundary of the Happy Camp Oak Knoll Ranger District.
3. Manage all fires under a full suppression strategy.

6. Weather Forecast for Period

Happy Camp Complex Weather Forecast

FORECAST NO: 12 D
PREDICTION FOR: Monday Day Shift
SHIFT DATE: August 25, 2014
FORECAST ISSUED: 1900 August 24, 2014

NAME OF FIRE: Happy Camp Complex
UNIT: KNF / SoCal 3
Incident Meteorologist: Jeff Tonkin

WEATHER DISCUSSION: A ridge of high pressure will build off the north coast of CA gradually shifting east over the fire area on Tuesday. This will bring a warming and drying trend through Friday...along with light east and northeast winds. Expect subtle changes each day in RH with the hottest and driest days being Tuesday and Wednesday. A thermal trough may migrate westward over the west coast which could enhance the easterly wind speeds during the middle of next week.

WEATHER FORECAST TODAY (MONDAY DAY SHIFT):

WEATHER: Smoke....inversions breaking around 1300 PDT on East Perimeter...1500 West side.
MAX TEMPERATURES: Valleys (1,200 ft) 94 – 98 F, Ridges (4,000 ft) 81 – 86 F
MIN HUMIDITY: Valleys (1,200 ft) 13 – 17%, Ridges (4,000 ft) 16 – 21%
WINDS (EYE LEVEL):
Drainages – Up slope / up valley 2 – 4 mph.
Ridges – East and northeast 6 – 9 mph with gusts to 15 mph until 1000 PDT then diminishing to East and northeast 3 to 6 mph...and maybe light and variable at times through early evening.
LAL: 1 **CWR:** 0% **HAINES:** 3-4
STABILITY / INVERSION: Multiple Inversions lifting between 1300 and 1500 PDT.
SMOKE TRANSPORT: Northwest 10-15 mph.

WEATHER FORECAST MONDAY NIGHT:

WEATHER: Mostly clear, abundant smoke.
MIN TEMPERATURES: 54 – 59 F
MAX HUMIDITY: Valleys (1,200 ft) 70 – 75%F, Ridges (4,000 ft) 45 – 50%
WINDS (EYE LEVEL): Valleys – NE or down slope / down valley 0 – 3 mph
Ridges – NE 3 – 6 mph gusts 10 mph

OUTLOOK FOR TUESDAY (4500 FT): Clear but abundant smoke. Max Temps: 86 to 91. Min RH: 13 - 17%. Ridge Wind: East and Northeast 3 – 4 mph gusts 6 – 8 mph. LAL 1. CWR 0%. Haines 3.

THREE DAY EXTENDED DAYTIME (WEDNESDAY – FRIDAY 4500 FT)

	Max T	Min RH	Max RH	Ridge Winds	LAL	WX	
WED	90 – 94	16%	40%	SW 3 - 4 mph	1		SMK
THU	90 – 94	20%	65%	W/SW 4 – 7 mph	1		SMK
FRI	86 – 90	18%	55%	W 4 – 7 mph	1		SMK

Observations from Sunday Afternoon:

	Max Temp	Min RH	Wind Dir	Wind Spd	WX
KNF92 (1,161 ft)	97	18%	WNW	3 mph gust 10	SMOKE
Dutch – Indy (2,281 ft)	91	20%	NW	5 mph gust 10	
Grider Ridge (4,621 ft)	79	22%	NW	3 mph gust 8	SMOKE

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 021	**TYPE OF FIRE: Wildfire**
FIRE NAME: Happy Camp Complex	**OPERATIONAL PERIOD: 8/25/14 0600 to 8/26/14 0600**
DATE ISSUED: 8/24/14	**TIME ISSUED: 2000 hrs**
UNIT: Klamath National Forest	**SIGNED: FBAN,**

INPUTS

WEATHER SUMMARY:

See Weather Forecast for specific information

Sky: Mostly Sunny…Smoke clearing around 1600 … Temps Max 90° Min 55°…RH Min 15-20% Max 50%
Daytime Winds…Valley: up slope/up valley 3-6mph…Ridge: NE 4-7mph G-15
Nighttime Winds…Valley: down slope/valley 0-3mph…Ridge: NE 3-6 G10
LAL 1… Haines 3…Inversion lifting between 1300-1500 setting back in at midnight

OUTPUTS

GENERAL FIRE BEHAVIOR:

The fire environment will be under the influence of a strengthening high pressure system with stable conditions and little wind influence. Surface and ground fire will remain active under the inversion due to the prolonged drying of fuels and continued hot and dry weather. Backing and roll-out under the inversion will position heat into the bottom of drainages. Expect to see a noticeable difference in those areas when the inversions lift.

Local threshold for large growth: 20' winds over 4 mph, RH less than 40%, Temps over 75*, 1000 hr FM less than 13% (refer to Pocket Card in IAP).

Scattered Tree Mortality is under 5%.

Spotting potential is high during the peak of the day(PIG >85%) and low for night operations(PIG <20%)

SPECIFIC

All Divisions:

The Fires will continue to display ability for moderate surface fire ROS and intensity. Fire will move uphill between10-12ch/hr. if aligned with slope and wind. The potential for single/group tree torching will remain a threat due to ladder fuels. Roll-out of burning material remains a high concern and is a main factor in fire growth..

Frying Pan Fire: Wind conditions are favorable for holding fire along Grider Ridge. The fire spread will continue to slowly push out to the east, burning up to Grider Ridge and continue to NE up into China Creek and Wolf Creek. Easterly winds should limit spread over the ridgeline.

Div. T: Heavy fuels and the influence of a NE wind will allow for persistent backing down to Elk Creek.

Div. O: N/NE winds may be adverse for firing operations. Evening RH and nighttime temps will allow for opportunity for firing up to around midnight.

Falkstein Fire: Expect fire behavior to increase from the limited growth exhibited during the past week. Fire spread should be uphill towards Huckleberry Mnt. and into Clift Valley to the NW.

AIR OPERATIONS:

Light winds will allow for good flying conditions once the inversion breaks. Expect the southern portion of the fire to remain hampered by smoke throughout the day, especially in deep drainages.

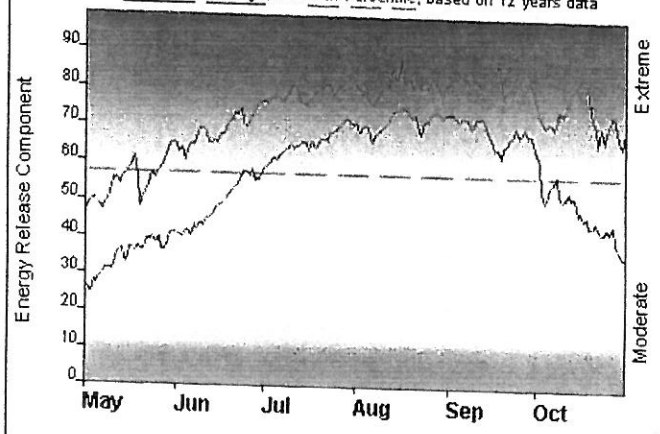
SAFETY

Do not be lulled into complacency. Heavy inversion will mask fire behavior. Be mindful of working in areas with unburned fuel between you and the fire.

Be vigilant to ensure you have lookouts that can maintain visibility of your area.

FIRE DANGER -- West Side KNF

Maximum, Average, and 43th Percentile, based on 12 years data



Fire Danger Area:

- 200, 202, 204, 208
- CA280 & CA281
- See below

* Meets NWCG Wx Station Standards

Fire Danger Interpretation:

EXTREME -- Use extreme caution

-- Watch for change

Moderate -- Lower Potential, but always be aware

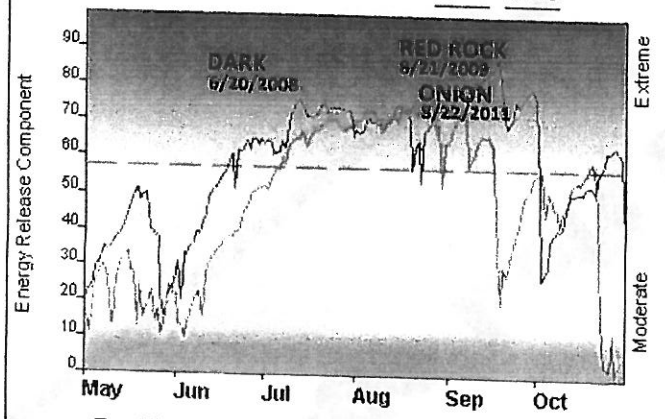
Maximum -- Highest Energy Release Component by day for 2000 - 2011

Average -- shows peak fire season over 12 years (2204 observations)

43th Percentile -- Only 43% of the 2204 days from 2000 - 2011 had an Energy Release Component below 57

Local Thresholds - Watch out: Combinations of any of these factors can greatly increase fire behavior: 20' Wind Speed over 4 mph, RH less than 40%, Temperature over 75, 1000-Hour Fuel Moisture less than 13

Years to Remember: 2008 2010



Fuel Model: G - Short-Needle (Heavy Dead)

Remember what Fire Danger tells you:

- ✓ Energy Release Component gives seasonal trends calculated from 2 pm temperature, humidity, daily temperature & rh ranges, and precip duration.
- ✓ Wind is NOT part of ERC calculation.
- ✓ Watch local conditions and variations across the landscape -- Fuel, Weather, Topography.
- ✓ Listen to weather forecasts -- especially WIND.

Past Experience:

Large fires (>50ac) occur more frequently when BI exceed 58. Fires 50 acres and larger can readily increase in complexity

Multiple lightning ignitions can overwhelm suppression resources. 2008 was an active fire year. 2010 was quiet.

Sawyers Bar, Somes Bar, Slater Butte, Blue Ridge, Oak Knoll, Slater Butte, Collins Baldy, Quartz Hill, Callahan #2, and Dutch-Indy RAWS data was used.

Responsible Agency: Klamath National Forest

FF+4.1 Beta 11/08/2012-13:38 (FAKNF_period of record_v25jun12)

AIR OPERATIONS SUMMARY

PREPARED BY: H. Reimer **PREPARED DATE/TIME: 08/24/14 1700**

1. INCIDENT NAME: Happy Camp Comp.	2. OPERATIONAL PERIOD DATE: 08/25/14	START TIME: 0700 END TIME: 2000 SUNRISE:0632 SUNSET:1959

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.)
Thunderstorms, erratic winds. Low wires and cables
Numerous aircraft in confined areas. MTR's & MOA's near fire area.
Flight following procedures at Cave Helibase will be done with Cave Tower, 125.725

Track all retardant usage, location & gallons.
Helispots; H-1 41 38.84 123 13.423 H-41 37.756 123 12.460

Note: Cave Helibase at Illinois Valley airport now has a Temporary Tower, "Cave Tower" 125.725

4.
MEDEVAC A/C:
408 @ Scott Valley,
503 litter capable at Happy
510 litter capable at Cave

SAFETY MESSAGE

8/25/2014 0600 – 08/26/14 0600

Theme for the day: The fire is again in transition. Very shortly there will be additional changes to the fire from a management perspective. The teams are going to do everything possible to make it as seamless as possible for you and your coworkers. Through this transition, there will be personnel reassignments and new overhead. Please be flexible and make sure you understand your new assignment and who you will be reporting to.

PPE's: Continue to remain 100% compliant with the use of your PPE's. We have had several instances on this fire of serious injury being averted through their use. Poison Oak is becoming more of a problem. Make sure you take care of exposed PPE's to prevent additional contamination.

Stumpholes and root systems remain compromised resulting in a greater chance for a fall or burn injury.

Briefings: We need to remain on point with our crew briefings. Many crews are being shifted between divisions as the workflow allows. This is extremely important if you are moving to a piece of line or area you have not worked or are not familiar with.

Hazards: Steep Terrain is the prevalent feature for the area. Heavy fuel continuity and horrible footing provides extra hazards to you.

Danger Trees are everywhere.

Working in or around the roadway is also extremely hazardous. Use markers, roadmarks and signaling devices as necessary to control civilian traffic.

Environmental: There have been several incidents involving wildlife, including a vehicle striking a bear cub. Please slow driving to what is necessary and be alert. In addition, Marijuana groves are possible in the area. If you see something that doesn't fit the area, back out and contact law enforcement through your chain of command.

8. MEDICAL EMERGENCY PROCEDURES

In the event of a medical emergency provide the following information to your Division or Happy Camp Communications on Command.

1. Declare the nature of the emergency.
   a. Medical injury/illness?
   b. Is injury/illness life threatening?
2. If life threatening, then request that the designated frequency be cleared for emergency traffic.
3. Identify the on-scene Point of Contact (POC) by resource and last name (i.e POC is TFLD Smith).
4. Identify nature of incident, number injured, patient assessment(s) and location (geographic and GPS coordinates).
5. Identify on-scene medical personnel by position and name (i.e EMT Jones).
6. Identify preferred method of patient transport.
7. Request any additional resources and/or equipment needed
8. Document all information received and transmitted on the radio or phone.
9. Identify any changes in the on-scene Point of Contact or medical personnel as they occur.

To expedite processing, please avoid waiting until the day of demob to process a claim.

CACHE ITEM CLAIMS

Individuals responsible for or assigned government property are responsible to document loss or damage on the Property Loss or Damage Report, OF-289. The individual, supervisor and a witness must document facts and circumstances on the form in order to gain approval to repair or replace damaged property.

The Supply Unit Leader (SPUL) or Incident Agency Representative approves replacement requests for expendable cache items. If this equipment or supply is not available at the incident AND the requesting resource is being demobilized, an OF-315 Incident Replacement Requisition is completed and signed by the SPUL. An "S" number will be assigned by the incident to be used by the home unit.

NON CACHE ITEM CLAIMS

All non-cache items available through the cache (e.g. sleeping bags, tents, tools, sleeping pads) will be replaced with cache equivalent items. Replacement for normal wear and tear is through home unit project funds. Specialized equipment (non-cache and non-expendable) shall be documented on a resource order and must be appropriate to the incident position. For replacement with incident funds, the item must have been clearly damaged or destroyed on the incident.

The OF-289 will be used to request consideration for replacement or repair of these items. Once approved, the OF-289 will be used by the incident to issue an "S" number to be used by the home unit.

CLAIMS PROCESSING

The incident agency will review all potential claims for accuracy and completeness and forward to the appropriate adjudicating official. This includes forwarding employee claims to the employee's home unit, if different than the incident agency.

Protocol for Encountering Cultural Resources

Happy Camp Complex
Klamath National Forest
August 25th, 2014

The Happy Camp Complex is located in a part of the Klamath National Forest that contains many types of cultural resources. As a result, there is a high potential that undocumented prehistoric and historic cultural sites will be encountered while fighting fire. Information on how to identify and report such sites will be discussed in the following text:

Prehistoric sites related to Native use and occupation of the land for thousands of years will vary in appearance and location on the landscape.

- The presence of obsidian (volcanic glass), shaped and ground stone tools on the surface, piles of rocks that appear to be out of place, as well as river cobbles located a significant distance from water should all be noted and reported.
- It is important to remember that sites related to Native occupation and use is culturally sensitive and need to be addressed accordingly.

Historic sites related to mining are cultural resources that also might be encountered.

- Linear ditch features are common across the landscape, but are also important to the history of the area. These usually run horizontally across slopes and sometimes tie into streams nearby.
- Prospecting pits are also another common mining feature and are usually easy to spot.
- Cabins and refuse scatters including rusted cans may also be encountered and need to be reported.
- Large cut bank scars that look like stream bank erosion are historic features from the gold rush era and must be considered during suppression tactics.

Sensitive Cultural Areas will be difficult to identify so consultation with the resource advisors and Karuk heritage consultants is critical.

- Proposed areas of activity need to be discussed with resource advisors.
- Resource damage is usually caused by a critical failure in communication.
- Just because you do not observe any cultural resources does not mean that they are not present in the area. Many sacred areas are not quantifiable.

It is important when a potential cultural resource is encountered that they are not disturbed in any manner.

- Artifacts are not to be touched or collected; leave them in place.
- If at all possible record their location with a GPS device and take an overview photo.

- When reporting a cultural resource the chain of command is as follows: All encounters with a potential cultural resource are to be personally communicated to the resource advisor in the field and not via radio communication. The resource advisor will then notify the heritage resource advisor and a plan will be implemented to address the potential resource.
- Known resources will be flagged with orange and white striped flagging tape with the date, initials, and the term "Resource Avoidance" clearly labeled for visibility.
- Please note that the Karuk Heritage Consultants will be communicating any Karuk heritage resource concerns to the Heritage Resource Advisor for guidance.
- **Any decisions** regarding relevance or significance of any cultural site is the sole responsibility of the Heritage Resource Advisor. Please collect any pertinent data and relay it to the resource advisors.

Prepared by: Zachariah C. Rodriguez, Heritage Resource Advisor

Backcountry Spike/Coyote Camps for the Klamath

- Making a functional camp will help contain impacts to the camp area. Get it right the first time to avoid wasting time and energy, and damaging resources.
- When there is a small group (a single crew), disperse use. In the case of larger camps (more than one crew), concentrate, mitigate, and rehabilitate.
- Consider utilizing pack animals to bring in supplies. They don't require the kind of visibility that aircraft do.

Campsites

- Use already-impacted sites whenever practical. If existing campsites are unavailable, select impact-resistant sites like rocky or sandy soil, or duff. Avoid camping in meadows and along streams or shores.
- Do not level uneven ground, avoid moving rocks or disturbing vegetation.
- Avoid building campfires.

Washing up

- Designate a common area for hand- and dish-washing. Provide water, biodegradable soap, and a catch basin for waste water.
- Dispose of waste water in a "sump" (i.e., hole sufficiently deep to hold wastewater and allow infiltration) at least 200 feet (i.e,. 50 paces or 100 steps) from water sources.

Human Waste

- For less than 30 "user days" (# people x days out) in one place, catholes work best. For 30+ user days, using a portable toilet is more appropriate. All toilet sites should be 200 feet from water sources. Hand sanitizer or a hand wash station should be available at the toilet site.
    - **Portable toilets** (aka "rocket boxes") will accommodate approximately 60 uses per box. They are designed to be packed out.
    - **Cat holes** are small single-use holes. They should be dug 6-8 inches deep and filled back in after use. TP can be packed out – provide all personnel a ziplock for this purpose.

Food, water, and garbage

- Drinking water:
    - For smaller crews, hand pump filters, iodine, or Aquamira water treatment may be sufficient
    - Gravity filtration systems are often practical for larger crews (e.g., Platypus Gravityworks)
    - Cubies can be flown in by helicopter or packed in on stock.
- Store food and any fragrant toiletries so that they are not accessible to wildlife, away from camp, and in **animal resistant containers**. On the Klamath, a lockable cooler, truck box, or ammo can is usually sufficient. A "bear hang" is not practical given the time it takes and the lack of appropriate branches.
- Do not let garbage and food scraps accumulate in camp. Food scraps can be disposed of in a HOT fire or packed out. Garbage should be crushed, stored in the same way as described for food, and packed out.

Prepared by Laura Shaffer, Resource Advisor trainee and Happy Camp/Oak Knoll District Recreation Officer.

Human Resource Message

STEPS TO EFFECTIVE PROBLEM RESOLUTION

Effective interpersonal relationships include the ability to effectively resolve issues, problems, or concerns, either between two individuals or between groups of individuals. There are identifiable steps that , when followed, can lead to effective resolution and improved communications. These include:

- Letting each party involved in the resolution talk and listen
- Staying focused on the present and future, not in the past
- Sticking to the topic at hand
- Avoiding put-downs or cross-complaining
- Looking for and capitalizing on areas of agreement
- Taking a break if needed
- Restating what you have said in different ways if there is misunderstanding, working continuously for mutual understanding, not necessarily agreement.
- Watching what you say and how you say it, so that you don't give mixed messages and create an atmosphere of distrust

The Human Resources Specialist is a trained facilitator and can help the parties achieve effective resolution by helping with these steps.

The single most important thing in communication is to hear what isn't being said.

-Peter Drucker

Jan Cawthon, Human Resources Specialist, 909-553-2829

CODE OF CONDUCT
INCIDENT PERSONNEL

Each individual on this incident is responsible for:

- Being *ready and able* to perform their assigned duties effectively
- Conducting themselves in a manner that treats people with dignity, equity, courtesy, and respect
- Abiding by agency ethics and conduct regulations
- Reporting any harassment or other inappropriate behavior

Each individual on this incident has the right to:

- Work in an environment characterized by safe work practices
- Work in a fair and harassment free environment
- Say "No" to unwelcome advances or requests for favors
- File complaints or grievances through appropriate avenues

There is zero tolerance for inappropriate behavior while assigned to the incident, including

- Illegal drug use
- Alcohol use
- Unsafe work practices and activities
- Discrimination
- Sexual harassment
- Fighting, threatening and abusive behaviors
- Using social media and electronic communication devices for personal business while engaged in fire assignment duties
- Other violations of USDA and Forest Service standards of conduct

Failure to adhere to the Code of Conduct could result in dismissal from the incident, with notification to your home unit.

The public expects our best efforts; they see us as professionals in what we say and do. Let's continue to show them we are!

ATTENTION FEDERAL TRAINEE'S

Are you going to be recommended for certification on this incident?

Or

Have you already been recommended for certification but still have your taskbook with you at this incident?

Your FQRC needs your taskbook with all the proper documentation so they can review it and submit it to the certifying official.

September 5 is the deadline for submitting applications to the R5 Fall Fire Hire

If you have worked hard all summer for an incident qualification that will get you to that next level, don't wait and miss your opportunity.

Come by and see me and I will get your completed taskbook back to your FQRC.
