SUNDAY

DAY SHIFT

SUNDAY, AUGUST 16, 2015

0600 – 1800 Hours

INCIDENT OBJECTIVES	1. Incident Name	2. Date Prepared	3. Time Prepared		
ICS 202	Fork Complex	08/15/2015	2000		
4. Operational Period					
August 16, 2015		DAY OPERATIONAL PERIOD 0600-1800			
5. General Control Objectives for the Incident (include alternatives)					
<p>Leaders Intent</p> <p>Task:</p> <ul style="list-style-type: none"> • Contain the Fork Complex of fires where the probability of success is the highest, utilizing the planned and contingency firelines. • Utilize MIST in wilderness and inventoried road less areas. • Engage cooperators and stakeholders in jointly providing for the defense of communities, infrastructure and other economic interests. • Initiate suppression repair actions and communicate incident information. <p>Purpose:</p> <ul style="list-style-type: none"> • To protect and minimize fire effects to private inholdings, communities, infrastructure and natural resources commensurate with values at risk. <p>END State:</p> <ul style="list-style-type: none"> • Everyone goes HOME – while achieving the goals of the Shasta-Trinity National Forest and Shasta Trinity Unit. 					
6. General Weather					
Mostly sunny with few high clouds. Smokey. Unstable conditions if we get any clear air.					
7. General Safety Message					
Drive defensively; expect the unexpected around every curve. Stay away from soft shoulders on the downhill side of roads.

Fork Complex Fire Weather Forecast

FORECAST NO: 27
PREDICTION FOR: Sunday Day Shift
SHIFT DATE: Aug 16, 2015
TIME AND DATE
FORECAST ISSUED: Aug 15, 2015 @ 2000 PDT

NAME OF FIRE: Fork Complex
UNIT: Shasta-Trinity National Forest
SIGNED: Alex Hoon
Incident Meteorologist

WEATHER DISCUSSION: ...WEATHER BECOMING HOTTER AND DRIER...

High pressure over Northern California will continue to increase temperatures across the region with very dry conditions. Light winds today will have trouble mixing out any smoke, but if you get any clear air be aware of unstable conditions aloft. Upvalley winds will be strongest late in the afternoon.

Forecast for Sunday: ... HOTTER AND DRIER... HAINES 5...LIGHT WINDS...

Weather: Mostly sunny with few high clouds. Smokey. Unstable conditions if we get any clear air.
High Temperature... 86-96°F if clear.....76-86 if smokey. (up 5 degrees)
Min RH..... 12-18% if clear.....20-30% if smokey. (down 5%)
20-FOOT WINDS:
Ridgetop..... Northeast to West-Northwest 4-8 mph after 1600.
Slope/Valley..... Upslope/upcanyon 4-8 mph.

Outlook for Sunday Night: ...POOR RECOVERY IN THERMAL BELT ...

Weather: Clear. Smokey.
Low Temperature... 73° above 4000 feet.....60° valley bottom
Max RH..... 25-35% above 4000 feet.....65% valley bottom
20-FOOT WINDS:
Ridgetop..... North 4-8 mph becoming East to Southeast after midnight.
Slope/Valley..... Downslope/Downcanyon 2-4 mph.

Outlook for Monday: ...HOT AND DRY...HAINES 5...LIGHT WINDS...

Weather: Mostly sunny with few high clouds. Smokey. Unstable conditions if we get any clear air.
High Temperature... 86-96°F if clear.....76-86 if smokey.
Min RH..... 12-18% if clear.....20-30% if smokey.
20-FOOT WINDS:
Ridgetop..... Light and variable.
Slope/Valley..... Upslope/upcanyon 4-8 mph.

Outlook for Monday Night: ...POOR RECOVERY IN THERMAL BELT ...

Weather: Clear. Smokey.
Low Temperature... 73° above 4000 feet.....60° valley bottom
Max RH..... 25-35% above 4000 feet.....65% valley bottom
20-FOOT WINDS:
Ridgetop..... North 4-8 mph becoming Southeast after midnight.
Slope/Valley..... Downslope/Downcanyon 2-4 mph.

EXTENDED OUTLOOK for Tuesday through Thursday:

High pressure remains over the region with very hot, dry, and unstable conditions. Abundant smoke cover may inhibit instability, but clear air will be unstable. Poor recoveries will occur in the thermal belts overnight.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 027	TYPE OF FIRE: Wildland
FIRE NAME: Fork Complex	OPERATIONAL PERIOD: Day Shift Sunday 8/16/2015
DATE ISSUED: 08/15/2015	TIME ISSUED: 2130
UNIT: CA-SHF-002067	SIGNED: Bob Patton , FBAN 

INPUTS

WEATHER SUMMARY:

Hotter and Drier with a Haines Index 5

High pressure will continue to build into Northern California bringing very dry conditions. Light winds will have trouble mixing out smoke, however if any smoke does clear out be aware of unstable conditions aloft.

(See attached weather forecast)

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Dry air associated with high pressure has moved into the fire area and is responsible for poor overnight recoveries above 3500 feet. Fuels above 3500 feet will be available to burn earlier today if the smoke mixes out today. Smoke and haze over the fire will limit solar heating which will limit instability and fire behavior under the smoke. Fire behavior under smoky skies will be limited to slow surface spread with occasional torching. Although the eastern flank of the fire may be clear in the morning due to the overnight northeasterly winds, smoke will probably pour into the southerly and easterly portions of the fire as the winds switch *from* the north and the northwest. On aspects with clear skies, expect active fire behavior in the afternoon. Clear to mostly clear skies will produce the Haines 5 instability. Single and group tree torching will be common during the afternoon. Active crown fire will require alignment of fuel, slope and wind. Drought mortality has added a significant amount of heavy dead fuel loading to the timber fuels. These heavy dead fuels are contributing to higher fire intensity. Running crown fire and group torching in timber fuels have produced spotting out to 1/2 mile. The same alignment of wind and slope in a clear, unstable environment will also produce active running fire in the mixed brush fuels commonly found in the old burn scars. Rate of spread up to 12 ch/hr has been observed in the brush on 45% slopes.

Combinations of any of these factors can greatly increase fire behavior:

20' winds over 5 mph, **RH** less than 20%, **Temp** over 73°, **ERC** above 62, **10HR** less than 5

Forecast today **20' winds** NE-W-NW 4-8 **RH** 12-30% **Temp** 76-96° **ERC** 56 **10HR** 4-6
Then N after 1600

Probability of Ignition: **90% unshaded** **60-80% shaded**

SPECIFIC:

Branch IV: N-NW winds and up valley winds will align with Tule creek drainage in Division Oscar. This wind alignment could push smoke out of the drainage to the south and southeast that would result in fire behavior to steadily increasing in the afternoon at the slopover

Branch II: Smoke from north and northwest portion of the fire will likely cover November. Residual fire from burnout operations will move under the smoke but fire behavior should be limited. Quebec and Lima could also become smoky in the afternoon limiting fire behavior.

AIR OPERATIONS:

Smoke inversion likely could limit air operations on most portions of the fire today.

SAFETY

As the smoke inversion lifts, expect a gradual increase in fire behavior.

6. Control Operations/Work Assignments:							
Div M – Continue to secure and mop up 100'. Patrol all areas where mop up is complete. Finish falling all hazard trees on the Wildwood Rd.							
Div N – Finish prepping indirect dozer line. Initiate burning of indirect line after approval from Operations. Initiate mop up once firing has sufficiently moved off the line.

Forks Complex

August 16th, 2015 Day Shift

USE **L**OOKOUTS, **C**OMMUNICATIONS, **E**SCAPE ROUTES, **S**AFETY ZONE
LCES IN PLACE EVERY TIME

Transition Day

- CIIMT 1 Assuming Command of Fire today.
- Know who you are working for and your chain of command.
- If you are confused about anything, speak up.
- Things might have changed, so make sure you know where you are going to be working.

Hydration

- Drink one quart of water per hour, even if you are not working.
- Monitor each other for signs of dehydration.
- Take time to drink plenty of water after the shift to re hydrate
- Recognize the signs of Heat Related Illness.

Accountability:

- Never work alone, always work in pairs.
- Inform your Division or supervisor if you change locations.
- Check IN with the division supervisor on site if not assigned.
- Check OUT with your supervisor at the end of shift.

Driving:

- **With Highway 3 open now, and it is the weekend, there is a lot more traffic. Make sure to obey the temporary speed limit of 35 MPH.**
- Drive defensively; expect the unexpected around every curve.
- Stay away from soft shoulders on the downhill side of roads.
- Watch out for debris and wildlife in the roadway.
- Increase your following distance between vehicles in dusty or smoky areas.

INCIDENT RISK ANALYSIS FORK COMPLEX CA-SHF-002067 (ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Conduct thorough assessments before starting work. • Ensure LCES is in place. • Provide briefing emphasis on drought related fire behavior (IRPG p 3&4.) • Increase the level of SA. • Provide additional briefing for new resources and maintain communications.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your SA (hazards, changes, etc.) with those who also have a need. • Radio Communications may be poor in some areas use human repeaters as needed. • Ensure that critical communications are broadcast over the radio. • Be brief and concise in your radio communications to reduce radio traffic. • Ensure all personnel are familiar with the incident and IA communications plans.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even large green trees.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Roads are narrow and mid slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing, or turning around. • Practice "Defensive Driving" techniques. Traffic volume is increasing. • Always use headlights. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits. • Use chock blocks, turn wheels into hill. • Be alert for cattle and wildlife.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> • Drink 2 to 1 water to sports drinks. • Take frequent breaks, minimum of 10 minutes every hour. • Recognize symptoms of HEAT RELATED ILLNESS which include lack of energy, headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating. • Drink fluids throughout operational period, up to 1.5 gallons per shift.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor ALL resources for level of fatigue. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps to maintain situational awareness for the duration of the incident.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Don't work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
E,G,H, I,J,K,O, P,R,S	MOP-UP OPERATIONS	<ul style="list-style-type: none"> • Balance the risk of exposure to hazards against the mop up objective achieved. • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; take breaks to increase rest where appropriate. • Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4).
I,N,O, Q	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-150' exclusion area around equipment. • In timber increase safety distance to 2 ½ times canopy height.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Don't plan on air resources for tactical support or medical transportation. • Refer to page 57, IRPG for directing bucket drops. • Ensure positive communication with all air resources. • Get out of the area where aircraft are dropping.
J,K,M,N P,S,T	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Review Structure Protection; IRPG pages 12-16. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials. • Avoid power lines and underground gas lines in all areas. • Be alert for and avoid guard dogs. • Avoid hostile confrontations with land owners.
L,Q	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG) • Ensure LCES in place prior to engagement (IRPG p. 7). • Establish adequate safety zones (IRPG p.8). • Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4).

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.
*****Designate a point of contact who shall remain with the patient for direct link information*****

- Division Supervisor/Operations contacts Communication:
- Division Supervisor/Operations to use "**injury or incident communication protocol**" on next page
 - Division Supervisor/Operations will run medical emergency on command channel
 - Communications will contact the Medical Unit Leader on LOGs Net, Command Channel or (949)812-8761
 - Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan
 4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

Contact Communications with patient complaint/condition and location on LOGs Net, Command Channel or (530)628-5816
*****Designate a point of contact who shall remain with the patient for direct link information*****

- Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
- Medical Unit Leader will:
 1. Contact Communications to dispatch ground/air transport resources
 2. Notify receiving hospital of injury status
 3. Develop primary and contingency transport plan

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long) _____

GPS Format: WGS84 Degrees, Decimal, Minutes

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

Level of consciousness _____ Resp. _____ Pulse _____ BP _____ Weight _____
 (alert & oriented x 1-4)

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area	Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint	Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	Disoriented Chest Pain <u>or</u> Shortness of Breath Weak or absent radial pulse Pale, cold and sweating	Alert and oriented No shortness of breath Good pulses

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response. The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

City: _____ State: _____ Zip Code: _____ Phone: _____

Trainee Prerequisites

1. Possesses valid Red Card or agency certification card? ___ Yes ___ No

2. Trainee has current position task book issued by home unit? ___ Yes ___ No

Current Task Book Progress Completed (Circle) 0% 25% 50% 75% 90%

What do you need/want to accomplish on this incident?

Trainer/Evaluator Data

Trainer / Evaluator Name: _____ ICS position on fire: _____

Home Unit: _____

City: _____ State: _____

Cell # While on Incident: _____

Appendix A

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on firelines.

Fireline slope %	Maximum Distance Apart (feet)
1-5	200
6-20	125
21-40	60
41-60	40
>60	25

Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.
