OUTPUTS

FIRE BEHAVIOR**GENERAL:**

The weather system over the fire remains unchanged. Fire behavior under smokey skies will be limited to slow surface spread with occasional torching group torching. On aspects with clear skies, expect active fire behavior in the afternoon. Clear to mostly clear skies will produce high instability. Single and group tree torching will be common during the afternoon. Active crown fire will require alignment of fuel, slope and wind. Running crown fire and group torching in timber fuels have produced spotting out to 1/2 mile. Southeasterly winds in the morning will be favorable for holding burnout operations from the previous day shift. The *east and south flanks* of the fire may be clear in the morning due to the overnight east-southeasterly winds.

Probability of Ignition 90% unshaded 70% shaded

Combinations of any of these factors can greatly increase fire behavior:

20' winds over 5 mph, **RH** less than 20%, **Temp** over 73°, **ERC** above 62, **10HR** less than 5

SPECIFIC:

Blue and Barker Fires: Minimal fire activity is anticipated.

Division I: Potential spotfires possible from night shift firing. Southeast and local winds will be favorable for firing and holding throughout the shift until around 1600 when winds turn from the northwest. High instability could result in a large column that could increase spotting potential.

Division O: Fire will continue to back downslope and cross-slope in available fuel. Heavy fuels will continue to burn out in the Division.

Division M/N: Heavy fuels will continue to burnout throughout the Division. Rolling material could cross containment line into the green.

Division Q/T: The fire will continue to back eastward.

AIR OPERATIONS:

Smoke inversion could continue to limit air operations on most portions of the fire agin today.

SAFETY

Backfiring or burnout operations must not jeopardize the safety of personnel or equipment or compromise suppression actions on adjacent portions of the fireline.

- Remember the speed limit in school zones is 25 mph.
- Always stop and let the pedestrian traffic cross the road.

Hazard Trees

Situational Awareness: Survey your work area for hazard trees (green or black) early in the shift. The longer an area has been burned, increases probability for undermined trees.

Flag, Avoid and Notify: Flag any identified hazard trees and notify your supervisor and any potentially impacted fire personnel.

Be alert: The fire has been burning for over two weeks. There is still a lot of snags out there on the fireline; so do not let your guard down.

- Don't use high beams in the smoke.
- **Stay as far to the right of the road as is safely possible.**
- Drive defensively! Expect the unexpected around every curve.
- Watch for and anticipate civilian traffic.
- Watch out for debris and wildlife on the roads.
- Don't tail gate.
- Always fasten your seat belt before the vehicle is set into motion.
- Use a "Backer" when backing your vehicle.
- **Slow down, slow down, and slow down!**

Mine Shafts and Adits

- Scout areas for mining signs or mining activity before starting any type of line construction.
- Look for flat surfaces with depressions in the ground.
- Be alert for mine shafts, etc. in the fire area. They may not be identified on maps. They have been found and flagged in M/N.
- If found, flag area, obtain GPS coordinates and notify SITL.
- Notify all line personnel in the area, Division, and Line Safety.
- Do not enter any mine shaft or cave.

Appendix A

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on firelines.

Fireline slope %	Maximum Distance Apart (feet)
1-5	200
6-20	125
21-40	60
41-60	40
>60	25

Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.
