Corrected

DAY INCIDENT

CA-LMU-003472

OPERATIONAL PERIOD

August 4 - 5, 2014

0700 - 0700

INCIDENT OBJECTIVES	1. INCIDENT NAME DAY	2. DATE 8/3/14	3. TIME 1900

4. OPERATIONAL PERIOD (DATE/TIME)
8/4/14 - 8/5/14 0700 – 0700

5. MANAGEMENT OBJECTIVES

- Provide for firefighter and public safety.
- Establish and maintain positive relationships with cooperating agencies and the public.
- Provide timely and accurate incident information.
- Protect economic and watershed values with safe and aggressive firefighting efforts.
- Keep costs commensurate with values at risk.

6. GENERAL CONTROL OBJECTIVES

- Keep the fire:
  - North of County Road 94 and Widow Valley
  - East of Day Road
  - West of County Road 91
  - South of County Road 95

7. WEATHER FORECAST FOR OPERATIONAL PERIOD

A low pressure area will bring plenty of moisture and instability to northern California today. Thunderstorms will approach the fire area around noon, becoming widespread by mid-afternoon. These storms may start out dry but will become progressively wet with potential for moderate to heavy downpour along with gusty and erratic winds.

8. GENERAL SAFETY MESSAGE

RED FLAG WARNING through the evening. Thunder and lightning over the fire will increase the fire activity, maintain your situational awareness.
Watch speed when traveling to and from the line.

INCIDENT Weather Forecast

FORECAST NO:

NAME OF FIRE: 3-7 Day

PREDICTION FOR: DAY and NIGHT **SHIFT**

UNIT:

SHIFT DATE: Monday Aug 4, 2014

SIGNED: Frederic Bunnag
Incident Meteorologist

TIME AND DATE FORECAST ISSUED: Aug 3, 2014 1900 PDT

WEATHER DISCUSSION: **...RED FLAG WARNING FOR THUNDERSTORMS ON TODAY...**
A large area of low pressure will bring moisture and instability to the fire area today. Temperatures will be about 10 degrees cooler than yesterday with much higher humidity. Winds will also be quite variable especially at the upper slopes and ridges. Thunderstorms will move into the area from late morning, becoming widespread in coverage by early afternoon. These storms will be wet with potential for moderate to heavy downpour toward the evening hours. Storms will continue into the night with a decreasing trend on Tuesday.

WEATHER FORECAST: DAY SHIFT

WEATHER: Cloudy. Occasional rain showers. Thunderstorms appearing in the area by 1000 and becoming more frequent in the afternoon.

TEMPERATURES: 78-83 valleys...70-75 mid slopes and ridges.

HUMIDITY: Falling to 60% by 0900...minimum of 45-50%

20 FT WINDS: ***Winds will be gusty and erratic near thunderstorms***

RIDGETOP - Northeast to East 5-7 mph in the morning...backing toward the North and Northwest 15-20 mph after 1300.

SLOPE/VALLEY - Variable 5-7 mph until 1400, then Southwest 8-10 mph.

HAINES INDEX: 4 (Low)

LIGHTNING ACTIVITY LEVEL: 2 through early afternoon...3 to 4 after 1500.

WEATHER FORECAST: NIGHT SHIFT

WEATHER: Rain showers and thunderstorms. Rain could be locally heavy.

TEMPERATURES: Overnight lows 55 to 60.

HUMIDITY: Rising to 60% by 2000...maximum 90%.

20 FT WINDS:

RIDGETOP - Northwest 12-15 mph until 2300...then backing to Southwest 10-15 mph.

SLOPE/VALLEY - Southwest 10-15 mph in the evening...then becoming light downslope.

HAINES INDEX: 2 (Very Low)

LIGHTNING ACTIVITY LEVEL: 3 or 4 until midnight...then 2.

OUTLOOK FOR TUESDAY: Rain showers with a few embedded thunderstorms. Highs 80-85. Min RH 35-40% West wind 12-15 mph.

FIRE BEHAVIOR FORECAST
Day Fire

FORECAST NUMBER: 3	TYPE OF FIRE: Wildland Fire
FIRE NAME: Day Fire	OPERATIONAL PERIOD:8/4/2014 0700-0700
DATE ISSUED: 8/3/2014	TIME ISSUED: 2000 Hrs.
UNIT: LMU – CAL FIRE Lassen-Modoc	SIGNED: typed/printed: Chris Waters FBAN

INPUTS

WEATHER SUMMARY: ***RED FLAG WARNING FOR THUNDERSTORMS TODAY.***

Moisture and instability will be over the fire area today into the evening hours. Expect thunderstorms to begin developing around noon and continue over night. Thunderstorms will be wet with the potential for moderate to heavy downpours. **Expect Lighting.**

OUTPUTS

FIRE BEHAVIOR:

Fire behavior has dropped off significantly with aggressive suppression operations and the cooperation of the weather. Mop up operations will continue over the next several days. The major wild card for today will be the development of thunderstorms over the fire area. All hazards associated with thunderstorms will be over the fire with potential for down bursts, rainfall, and lightning. All of these may occur alone or together as the day wears on. Be prepared for any situation.

The fire continues interior burn out and numerous hot spots remain in close enough proximity to control lines to cause spotting or isolated runs from downdrafts. Remember parts of the fire are still active.

Fuels: The Day Fire is burning primarily in commercial mixed conifer timber stands actively managed for timber production. Light to moderate slash accumulations as well as piles can be found throughout the fire area. All live fuels are under drought stress with live fuel moisture values at levels well below normal.

Topography: Topography ranges from moderately steep to flat with most of the fire area generally dominated by mild slopes.

SPECIFIC:

Mop up operations are in full force across most of the fire. This is the phase of the operation where most injuries tend to occur. Watch out for Fire damaged trees and hot stump holes.

Divisions C, H, & S: Fire suppression operations are in the final stages and these were the last areas with active fire. This will be the area with the highest potential for control issues as the thunderstorms develop, mature, and collapse.

Divisions V, W, X, & A: Low intensity fire behavior is expected in these divisions. Remember thunderstorm collapse can cause even the quietest fire to come to life.

AIR OPERATIONS:

Smoky conditions will hamper Air Operations all morning and will not completely clear out until around noon.

SAFETY:

Monitor the fire area for the development of thunderstorms after 1200 hrs. Downdrafts and all the other hazards related to thunderstorm development will be over the fire. Watch out for fire damaged trees, hot stump holes, and spot fires outside the line.

CAL FIRE INCIDENT MANAGEMENT TEAM 3

SAFETY MESSAGE	1. INCIDENT NAME:	2. DATE PREPARED:	3. TIME PREPARED:
	DAY	August 3, 2014	1400

SAFETY MESSAGE

com·pla·cen·cy

1. a feeling of security, often while unaware of some potential danger, defect, or the like; self-satisfaction with an existing situation, condition, etc.

- **Watch for sudden windshifts, rain, lightning, or hail due to Thunderstorm activity.**
- **There's no glory in getting hurt during mop up, keep your safety and the safety of your crews as a top priority.**
- **Stay at least 100 feet away from the train tracks.**
- **Be aware of what is happening around you (SA) and adapt your exit strategy accordingly.**
- **Trees are weakened due to fire activity. Look Up, Down, and Around for tree hazards.**
- **Wetting rain WILL cause the roadways to become slick. DRIVE SLOW!**
- **Establish COMMUNICATIONS report any coverage issues to your line supervisor.**
- **Document 2:1 rest and hydration on 214'S. Take frequent breaks!!!**
- **Beware of stump-holes, steep slopes, trip hazards, and loose footing.**

Thunderstorm Safety

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature.

Rain, hail, and lightning *occur only in the mature stage of a thunderstorm.*

Situational Awareness

Observe the 30/30 rule: If you see lightning and hear the thunderclaps following in less than 30 seconds take the storm precautions identified below. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

Hazard Control

- *Take shelter in a vehicle or building if possible.*
- *If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.*
- *If in the woods, move to an area with shorter trees.*
- *If only isolated trees are nearby, keep your distance twice the tree height.*
- *If in open county, crouch low with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lay on the ground.*
- *If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.*
- *Don't group together.*
- *Don't stay on ridge tops, wide open areas, or near ledges or rock outcroppings.*
- *Don't operate landlines telephones, machinery, or electric motors.*
- *Don't handle flammable materials in open containers or metal hand tools.*

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	DRIVING HAZARDS/ ROADS	• Drive defensively! SLOW DOWN!!!! • Increase following distances on dusty roads. Slow down when you meet opposing traffic. Be alert for construction work on Highway 299. • Drive with headlights on. • Be alert for wildlife, heavy trucks, & high speed opposing traffic crossing into your lane. • Check traffic approaching behind you when making left turns. • Maintain Situational Awareness.
ALL	FATIGUE	• Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor incoming resources for level of fatigue.
ALL	RED FLAG WARNING	• Ensure situational awareness • Establish LCES
ALL	SNAGS/ FIRE-WEAKENED TREE HAZARDS	• Follow Hazard Tree Safety Guidelines (IRPG p. 20 (RED)). • Many of the trees within the fire area are weakened due to fire activity. • Be especially alert around snags during wind events.
ALL	TRAINS	• Stay 100' away from track at all times. • Use caution when crossing track. LOOK both ways.
ALL	MEDIVAC	• Assign personnel with Advanced Life Support capability on the line. • Cache emergency equipment (backboards etc.) in various locations on line. • Maintain ALS ambulance at DROP POINT 23. • Keep line personnel informed of this issue. Safety briefings to stress that extra care should be taken with high-risk tasks (i.e. tree falling, chainsaw use, etc.). • Supervisors insure that personnel with severe reaction to bee sting, etc. have "epi-kits" or consider leaving such individuals in camp.
ALL	THUNDERSTORM/ FLASH FLOODING	• Follow Thunderstorm Safety Precautions in IAP
ALL	SMOKE	• Monitor crew's health. Get med care for early signs of respiratory illness. • Mop up smoky areas only as necessary
ALL	MOP UP	• Conduct thorough briefing for all personnel (inside rear cover IRPG). • Use all required PPE, including eye protection. • Maintain proper spacing and overhead clearance. • Be alert for stump holes and root cavities. • Minimize exposure to smoke, and rotate personnel into clean as practical. • Evaluate unburned islands/Increase situational awareness.

Prepared By (Communications Unit)

KYLE JOHNSON - COML TEAM 3 Kyle R Johnston

Incident Location

County Lassen & Modoc State CA Latitude N Longitude W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY:

Crew Supervisor will contact **Division Supervisor** with patient complaint/condition and location.

- **Division/Group Supervisor contacts:**
  1. Closest EMS resource
  2. Communications Unit
- **Communications Unit contacts:**
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
- **Division Supervisor or designee** will serve as point of contact and run medical emergency on assigned channel.
  1. **CALCORD** shall be used as the tactical frequency for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

INJURY REPORTING PROCEDURES

NATURE OF INJURY_____
LOCATION OF PATIENT_____
POINT OF CONTACT _____
TRANSPORTATION REQUESTED BY:AIR___ GROUND__
POINT OF PICKUP_____
LAT _____ LONG _____
PATIENT UNIT ID_____
IS AN EMT WITH PATIENT: YES _____ NO_____
AGE_____
SEX: MALE_____ FEMALE_____

START RESOURCES EARLY – DON'T WAIT

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

DAY FIRE
Training Specialist Message
08/04/14

Incident Trainees; to document your progress on this assignment as a Trainee, please make sure you check in with us and also check out during demobilization. We are here to help you with your questions and documentation as it relates to USFS PMS 310-1, California CICCS, and CAL FIRE HB4039.

According to our records the following identified trainees have not checked-in yet with the Training Specialist:

Bowden, Anthony	Ghisletta, Ben	Meyer, Jeff
Brown, Matt	Inman, Michael	Morris, Kevin
Carroll, Chuck	Kimpton, Jason	Norville, Tori
Cocroft, Gary	Klem, Al	Rueckheim, Matt
Diggs, David	Lewis, Janet	Walker, Brett
Ermigarat, Louis	Manfred, Brent	Wallace, Ryan
Evans, Keith	McMillin, Darren	Wiley, Diondray
		Ybarra, Damian

If your name is on this list in error, please let us know.

FINANCE SECTION MESSAGE 8/4/14

Please make sure hired equipment shift tickets are completed and dropped off in the Time Unit by agency personnel / line supervisors only.

Please report all injuries and suppression damage to the Comp / Claims Unit, no matter how minor. For fire suppression damage, please include photos (if possible), a location address and / or Lat / Long and a brief description.

Please be aware of the water use forms included in the IAP.

Any off site feeding charged to the incident must be pre-approved by the Logistics Section and/or Finance Section Chief. The Motel Tech Spec will have information on this.

ROGER RAINES, FSC1
TERRY EASTWOOD, DEP. FSC1

CAL FIRE
INCIDENT MANAGEMENT TEAM 3
WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, IMT3 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.

INCIDENT MANAGEMENT TEAM 3

WATER USAGE REPORT

DATE: _____ **Division / Group:** _____

RESOURCE / VENDOR ID: _____ **REQUEST #**_____

I.e.. Strike Team 1110C, Acme Water Tenders

TURN INTO FINANCE DAILY

WATER SOURCE LOCATION	Source (Hydrant, Pond, Tank, Other)	Gallons Used	Property Owner / Contact Number**

****Please note PROPERTY OWNER AND CONTACT NUMBER! (Use reverse side if needed.)**

The intent of this document is to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.
