# MONTICELLO INCIDENT

CA-LNU-005465

**OPERATIONAL PERIOD**

**JULY 7, 2014**

**0700-0700**

<b>INCIDENT OBJECTIVES</b>	1. INCIDENT NAME <b>Monticello</b>	2. DATE PREPARED <b>7-6-2014</b>	3. TIME PREPARED <b>1615</b>									
4. OPERATIONAL PERIOD (DATE/TIME) <b>7-7-2014 0700-0700</b>												
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) <b>Control Objectives:</b> <ul style="list-style-type: none"> <li>• <b>Keep fire north of Highway 128</b></li> <li>• <b>Keep fire south of County Road 78A</b></li> <li>• <b>Keep fire east of Lake Berryessa</b></li> <li>• <b>Keep fire west of Road 87</b></li> </ul> <b>Management Objectives:</b> <ul style="list-style-type: none"> <li>• <b>Utilize Incident Risk Analysis to identify hazardous conditions and apply mitigations to provide for responder and public safety throughout the duration of the incident.</b></li> <li>• <b>Reduce the potential for impacts to natural and cultural resources.</b></li> <li>• <b>Maintain and accurately track costs commensurate with values at risk that are threatened by the incident.</b></li> <li>• <b>Collect and validate incident intelligence and ensure internal and external information is coordinated for accuracy throughout the incident.</b></li> </ul>												
6. WEATHER FORECAST FOR OPERATIONAL PERIOD <ul style="list-style-type: none"> <li>• <b>*See attached spot weather forecast*</b></li> </ul>												
7. GENERAL SAFETY MESSAGE <ul style="list-style-type: none"> <li>• <b>Provide proper work rest cycles for all personnel while ensuring hydration takes place throughout the operational period. Ensure that all crew receive an operational briefing.</b></li> </ul>

**Incident Forecast for the Monticello Fire  
1950 PDT Sunday July 6, 2014**

Location T8N R2W Sec 22 Elev. 600-1200' S-W aspect Drainage Putah Creek  
Based on RAWS weather data from Brooks, Atlas Peak & County Line RAWS

**\*\*\* Local Red Flag Warning 2pm-8pm for Hot/Dry/Unstable Conditions & Gusty SW Winds \*\*\***

**Discussion:** The heat wave will build today with near record heat. Humidity, which will already be very dry in the morning due to poor overnight recoveries, will fall into the single digits to near 10% by afternoon. This heat will draw in SW winds off of the nearby Coastal Mountains by the afternoon hours and by afternoon we will begin to see a critical combination of increasing winds and very low humidity. The most critical time period should be from 2pm thru 8pm...with SW winds of 15-30 mph and RH of near 10%. The atmosphere will also become increasingly unstable and the Haines Index will be a 6 during the day. For these reasons a *local Red Flag warning has been issued for the Monticello Fire*. Later in the period, monsoonal moisture approaching from the SE is expected to trigger widespread lightning across the Sierra to our east and the Coastal Mtns to our north and west, mainly north of Mendocino Pass and well north of our fire.

**\*\*\* NOTE - All forecast winds are for the 20-ft level \*\*\***

**Today:** *Local Red Flag Warning 2pm-8pm for Hot/Dry/Unstable Conditions & Gusty WSW Winds.* Morning smoke thru noon, otherwise sunny and very hot. Max temps 99-104 deg. , Morning RH only 25-35%...falling to Min RH 7-12%. Winds drainage (NW-N 2-5 mph) thru late morning, becoming WSW 13-18 mph gusts 25 mph by afternoon. Ridge winds NW-N 4-8 mph early but becoming WSW 18-23 mph gusts 30 mph by afternoon.

**Tonight:** Clear and breezy in the evening...diminishing SW winds after 10 pm. Min temps mid/upper slopes 70-75 deg...cooler in valley's at mid 60's. Max RH mid-upper slopes 25-35% ...valley's near 50%. Winds SW 10-20 mph thru the evening, diminishing to light N//drainage 1-4 mph.

**Tuesday:** Sunny and very hot/dry. Cumulus buildups to the N and E. Max temps 100-105 deg, Min RH 6-11%. Winds light drainage early otherwise SW 10-15 mph gusts 20 mph. Ridge winds becoming WSW 15-20 mph gusts 25 mph by afternoon.

**Outlook for Wednesday:** Continued sunny and hot. Max temps 97-102 deg, Min RH 8-13%. Winds becoming WSW 10-15 mph gusts 20 mph.

Basil Newmerzhycky

Incident Meteorologist – Predictive Services

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 002	TYPE OF FIRE: Wildfire
FIRE NAME: Monticello	OPERATIONAL PERIOD: 7/7/14 0700-0700
DATE ISSUED: 7/6/14	TIME ISSUED: 1800
UNIT: LNU	SIGNED: Don Boursier, FBAN 

## INPUTS

**WEATHER SUMMARY: \*\*\*LOCAL RED FLAG WARNING\*\*\***

Day: Sunny, Max. Temps: 99-104 degrees, Min. RH: 7-12%, Winds: NW 2-5 mph before 1200.  
Winds *transitioning to West/Southwest by 1400 hrs 13-23 with gusts 25+ mph.*

Night: Min. Temps: 60-70 degrees, Max. RH: 25-35% upper slopes, 50% valleys, Winds: 1-4 mph early am.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

Fire is burning in Oak Grasslands with patches of chaparral along Rocky Ridge. Complete consumption is occurring. FDFM is 2% for 1 hr and 3% for 10 hr fuels. LFM is roughly 75%. Fire is carrying very well with wind and topography alignment. The first operational period had growth in excess of 3000 acres with less wind than today. Expect rapid rates of spread with head fire alignment. Wind/topography align. Head Fire ROS in excess of 120-200+ chains/hr and flanking 8-20 chains/hr. Grass became very active at winds exceeding 10 mph. Spotting ½ to 1 mile. A chance for a plume activity exists today heads up 1200-1400 hrs  
Probability of Ignition: 100%.  
Burning index = 185

#### SPECIFIC:

Div.A & D: Runs towards Rocky Ridge remain a possibility especially in the morning.

Div M: Backing activity from Crane Ridge. Possible slope reversal in Enos Creek drainage will present challenges with forecast winds. With this situation expect alignment runs toward Wild Cow Mountain and spotting.

Div Q: Backing towards Enos Creek. Aligned afternoon/evening winds will test control lines.

Div T, W & X: Interior smoldering predominately in Oak litter.

#### AIR OPERATIONS:

Smoke, powerlines and high winds will challenge aircraft operations.

#### SAFETY

**We are in the apex of hot, dry, windy weather....RH is Dropping into the single digits.  
A very strong Southwesterly wind will be on the fire today.  
Look for areas of topographic wind sheltering because slope may change the fire direction.  
Know where you are in relation to headfire alignment.  
Identify Plume dominated fire dynamics.**

# SAFETY MESSAGE

Monticello Incident

7-7-14

0700-0700

- Powerlines in area- Treat all lines as energized until otherwise determined.
- HYDRATION-HYDRATION-HYDRATION- Drink Early Drink Often. Bring plenty of water with you to the line.
- Size up all trees before approaching. Identify and tag hazard trees. Minimize exposure under and around trees. Post lookouts if necessary.
- Ensure you have been adequately briefed and have established communications with your supervisor and adjacent forces. When in doubt, ask questions.
- Situation Awareness – Maintain good situation awareness at all times, remember to Look Up, Look Down, and Look Around.
- Be aware of tripping hazards in the field to prevent knee and ankle injuries.
- Watch out for Snakes and Bees. Be aware there is a lot of poison oak in the area, wash after each line assignment.
- Tailgate Safety Briefings- Discuss Levels of Engagement:

## CONSIDER PACE

### Primary Plan (Offense)

- Focused on FF safety and objectives

### Alternative Plan (Offensive)

- Fallback plan that closely resembles primary plan

### Contingency Plan (Defense)

- Focused on FF safety, move to safety zone, temporary refuge areas.

### Emergency Plan (Defense)

- FF survival
- Deployment zones/Refuge area
- Fire shelters

Prepared By: Mike Salas SOE2(T)

Deputy IC: Ron Bravo

## INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES	
ALL	<b>HYDRATION NUTRITION FATIGUE</b>	<ul style="list-style-type: none"> <li>• Ensure proper H2O/Electrolyte ratio 4:1</li> <li>• Take frequent/adequate short breaks 2:1 (work/rest cycle)</li> <li>• Monitor all personnel for fatigue</li> <li>• Eat while on short breaks</li> </ul>	
ALL	<b>COMMUNICATIONS</b>	<ul style="list-style-type: none"> <li>• Ensure instructions are clear and understood</li> <li>• Use human repeaters/relays if necessary</li> <li>• Brief others as needed</li> <li>• Ask if you don't know!</li> </ul>	
ALL	<b>FIRE BEHAVIOR POTENTIAL</b>	<ul style="list-style-type: none"> <li>• L.C.E.S. and Situational Awareness</li> <li>• Adhere to the downhill line construction guidelines</li> <li>• Monitor weather for changes and be alert for frequent spot fires</li> <li>• Lookup, Look Down, Look Around</li> </ul>	
ALL	<b>HAZARD TREES</b>	<ul style="list-style-type: none"> <li>• Identify/Isolate</li> <li>• Flag - 3 Stripes</li> <li>• Proper notification</li> <li>• DO NOT fall outside your certification!</li> </ul>	
ALL	<b>DOWNED POWER LINES</b>	<ul style="list-style-type: none"> <li>• Follow Power Line safety guidelines (IRPG pg.24.)</li> <li>• Communicate power line hazards to immediate supervisor and hazard flag accordingly.</li> <li>• 3 stripes and deny access</li> <li>• Treat all downed power lines as energized.</li> </ul>	
ALL	<b>DRIVING HAZARDS</b>	<ul style="list-style-type: none"> <li>• Monitor speed and following distances</li> <li>• Seatbelts and headlights are mandatory</li> <li>• Always have a backer in place when backing up.</li> <li>• Use chock blocks when necessary</li> </ul>	
ALL	<b>SNAKES, BEES &amp; POISON OAK</b>	<ul style="list-style-type: none"> <li>• Look down and around before taking a step</li> <li>• Flag any bees nests</li> <li>• Carry epi pen if needed</li> <li>• Avoid poison oak when possible</li> </ul>	
ALL	<b>DOZER SAFETY</b>	<ul style="list-style-type: none"> <li>• Watch for rolling material</li> <li>• Monitor safe working distances</li> <li>• Avoid working below any heavy equipment if possible</li> </ul>

KEN PARKER *[Signature]*

County State CA Latitude N Longitude W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

**8. MEDICAL EMERGENCY PROCEDURES**

**LINE EMERGENCY:**  
Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
  - Line EMT
  - Communications Unit
- Communications Unit contacts:
  - Heli-Base for AIR EVAC only
  - Medical Unit (619) 743-8895
  - Operations
  - Safety
- Division Supervisor will run medical emergency on command channel
- Communication Unit will clear command channel for emergency traffic
- Medical Unit will:
  - Dispatch ground ambulance to nearest drop-point for ground transport only.
  - Dispatch ambulance to Angwin Heli-base for AIR EVAC.
  - Notify receiving hospital of injury status.

**CAMP EMERGENCY:**  
Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
  - Communications
  - Safety
  - Logistics
  - Operations
  - Crew Supervisor

*CA-LNU-005465*

### ALL PERSONNEL

Make sure to stop by the Time Unit and update or complete your eFC-33.

### LOCAL GOVERNMENT RESOURCES

Make sure you check in with OES to start your F-42 Paperwork.

### ALL HIRED EQUIPMENT

"Shift Tickets" for hired equipment need to be signed and turned in to Equipment Time by *Line Supervisors*.

*Supervisors, make sure the evaluations are completed on the shift tickets.*

### PROPERTY DAMAGE or INJURIES

Please report any property damage caused by suppression activities and/or injuries to the COMP/CLAIMS Unit Leader.

### PERSONNEL ACCOMMODATIONS

The Motel Unit is located in the Finance Section Area for room assignments.

### REMINDER!!!

All off-site feeding must be pre-approved by the IC and FSC.

# CAL FIRE

## INCIDENT MANAGEMENT TEAM

### WATER USAGE PLAN

#### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

#### **Fireline personnel-** (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

#### **Aviation Operations-**

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### **Public/Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### **Management and Supervision-**

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.

## **Archaeological and Historical Sites Fireline Guidance for the Monticello Incident**

**Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:**

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or chert flakes that often look like broken glass. More permanent village sites containing circular depressions (house pits), artifact scatters, and dark brown-black soils (midden). These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites include old wooden buildings, structures and corrals, rock foundations, wells, and debris scatters. These kinds of resources can be found in the same kinds of environmental settings as prehistoric camp sites.
2. No archaeological or historical sites have yet been flagged. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.
