11. Report Time Period: From Date/Time: 08/03/2014 2000 To Date/Time: 08/04/2014 0800			
12. Prepared By: Print Name: Eric Scovel SITL Date/Time Prepared: 08/04/2014 0800		13. Approved By: Print Name: Todd Derum IC Signature: 	
14. Date/Time Submitted: 08/04/2014 0802		15. Primary Location, Organization, or Agency Sent To: NOPS	
16. State: CA	17. County / Parish / Borough: Mendocino	18. City: Laytonville	
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership: CA-MEU	
22. Latitude/Longitude: Latitude: 39° 46' 6" Longitude: 123° 38' 59"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Mount Diablo Township: 22N Range: 16W Section: 21 1/4 Sec: of 1/4 Sec:	
25. Short Location or Area Description (list all affected areas or a reference point): West of Laytonville			26. UTM Coordinates: Zone: Easting: Northing:
27. Note any electronic geospatial data included or attached (indicate data format, content, and collection time information and labels): IAP and map products are located on the NIFC FTP website			
28. Significant Events for the Time Period Reported (summarize significant progress made, evacuations, incident growth, etc.): Firing operations were started in Div A. The firing operation will be completed later this morning. This will secure the the			

Incident Status Summary (ICS-209)

Incident: LODGE COMPLEX

southern portion of the west flank of the fire. Plans to start firing the northern portion are planned for later tonight. No fires were reported outside the line during the firing operation. Crews continue to construct line in other divisions making progress. A medical aid occurred on the fireline and the patient was transported to camp and examined by MERT. A vehicle accident in Fort Bragg (unrelated to this incident), cutting a fiber optic cable and has effected cell phone service to this area. No ETA on it's repair.

29. Primary Fuel Model, or Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc.):

Fuel Model: Timber (Litter and Understory)

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc.):

Structural Summary	# Threatened (up to 72 hrs)	# Damaged	# Destroyed
Single Residences	3	0	0
Multiple Residences	6	0	0
Mixed Commercial / Residential	0	0	0
Nonresidential Commercial Property	0	0	0
Other Minor Structures	8	0	0

31. Public Status Summary:

Number of Civilians (Public) Indicated Below:

	Previous Report Total	# this Reporting Period	Total # to-date
Fatalities	0		0
With Injuries/Illness	0		0
Trapped/In Need of Rescue	0		0
Missing	0		0
Evacuated	12	0	12
Sheltering in Place	0		0
In Temporary Shelters	0		0
Have Received Mass Immunizations	0		0
Require Immunizations	0		0
In Quarantine	0		0
Other	0		0
Total # Civilians (Public) Affected:	12	0	12

32. Responder Status Summary:

Number of Responders Indicated Below:

	Previous Report Total	# this Reporting Period	Total # to-date
Fatalities	0		0
With Injuries/Illness	0		0
Trapped/In Need of Rescue	0		0
Missing	0		0
Evacuated	0		0
Sheltering in Place	0		0
In Temporary Shelters	0		0
Have Received Mass Immunizations	0		0
Require Immunizations	0		0
In Quarantine	0		0
Other	0		0
Total # Responders Affected:	0		0

33. Life, Safety, and Health Status/Threat Remarks:

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

Last night's cool weather helped fire crews with their firing operations. Temperatures barely getting out of the 60's and no winds were observed. The National Weather Service has issued a Fire Weather Watch for isolated

34. Life, Safety, and Health Threat Management:

	Active?
No Likely Threat	
Potential Future Threat	X

	Area Restriction in Effect	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour timeframes:

The completion of the firing operations in portions of the fire may be tested today by any winds associated with any thunderstorm that might develop. This could also affect other parts of the fire. Spread of the fire will continue in all directions.

12 hours:

The potential for spread toward the east increases with an onshore wind. Spot fires are continued to be discovered and the fires continue to spread out in all directions.

24 hours:

The fire has potential to reach the Elkhorn Ridgeridge to the west and back down the leeward side advancing toward the contingency lines, and advance eastward to Brushy Ridge.

48 hours:

The fire has potential to be pushed eastward along a south facing slope if all the weather conditions are right. This would allow the fire to have a long, strong run toward the dozerline. The fuels along this ridge are brushy and create spotting conditions which would allow for spotting conditions across the line. This run could continue to Hwy 101. Repeaters, located atop of Cahto Mountain, consists of Verizon, CHP, AT&T, Cal Fire and multiple others could be threatened by the fire.

72 hours:

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

100% CONTAINMENT

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor.

12 hours:

Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor.

24 hours:

Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor.

48 hours:

Incident Status Summary (ICS-209)

Incident: LODGE COMPLEX

72 hours:	Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor, the town of Laytonville and Hwy 101, repeaters, located atop of Cahto Mountain, consisting of Verizon, CHP, AT&T, Cal Fire and multiple others
Anticipated after 72 hours:	
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:	
12 hours:	5 type III strike teams of engines to support firing operations and construct line; 5 strike teams of type I handcrews to support firing operations and construct fireline; 10 C-fallers; 3 DIVS; 4 SOFR; 5 FEMP; 5 HEQB
24 hours:	5 type III strike teams of engines to support firing operations and construct line; 5 strike teams of type I handcrews to support firing operations and construct fireline; 10 C-fallers; 3 DIVS; 4 SOFR; 5 FEMP; 5 HEQB
48 hours:	10 type III strike teams of engines to support firing operations and construct line; 5 strike teams of type I handcrews to support firing operations and construct fireline; 10 C-fallers; 3 DIVS; 4 SOFR; 5 FEMP; 5 HEQB
72 hours:	15 type III strike teams of engines to support firing operations and construct line and provide structure protection; 5 strike teams of type I handcrews to support firing operations and construct fireline; 10 C-fallers; 3 DIVS; 4 SOFR; 5 FEMP; 5 HEQB
Anticipated after 72 hours:	
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results.	
The above resources are necessary to ensure safe operations. Remote location of this fire, on extremely steep terrain and in heavy fuels, is a contributing factor. All containment lines must be scouted, reviewed prior to construction. Resources are needed to fully staff fire. Currently some divisions and branches are unstaffed due to lack of resources. Some fireline personnel are working in multiple ICS roles. Dozerline, on Brushy Ridge, east of the fire has continued from Drop point 4 to Drop point 5.	
41. Planned Actions for Next Operational Period: Continue to construct direct handline when possible, indirect line as planned. Improve existing lines. Build contingency lines, additional contingency lines are being scouted and identified. Additional BLM READ have been supplied to review containment and contingency lines. Firing operations will continue in the Low Gap area.	
42. Projected Final Incident Size/Area: 14,000	
43. Anticipated Incident Containment or Completion Date: 08/20/2014	
44. Projected Significant Resource Demobilization Start Date: 08/15/2014	
45. Estimated Incident Costs to Date: \$2,677,002.00	
46. Projected Final Incident Cost Estimate: \$6,000,000.00	
47. Remarks (or continuation of any blocks above – list block number in notation): ICP located in Laytonville. Fire spread continues to be a threat to numerous high profile areas including the conservancy owned and operated by UC Berkeley, which includes USGS Hydrologic Bench Mark Stream for stream monitoring purposes. It is also a critical zone observatory. UC Berkeley is utilizing a \$5 million grant for continued studies in this area. BLM has numerous threatened and endangered species in this area, including a designated Wilderness Area and a Wild & Scenic River Corridor. ERC's are historic high levels. Handlines are the primary control line which is hampered by the steep terrain, potential for rolling debris to ignite fuels below working crews, and high temperatures. The average slope is 70%. Additional resources have been arriving and has helped achieve short term goals. Additional prep work being done to	

Incident Status Summary (ICS-209)

Incident: LODGE COMPLEX

structures in the Horseshoe Bend area. Drift smoke from the fire has been settling in the Ukiah Valley and could create potential health and economic impacts, including vineyards and pear orchards .
All times represented are in Central Standard Time (CST) unless otherwise noted.
