FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: Wildland Fire

INPUTS

WEATHER SUMMARY:

RED FLAG WARNING – THUNDERSTORM ACTIVITY

Near the fire site from 11 am to 10 pm (Monday). Light rain expected early with increasing precipitation Monday night into Tuesday.

Mostly Cloudy – Max Temp 70-75 RH 30-40% LAL 3

20ft Wind – Slope Valley 6 to 11 mph: Ridgetop; North 10 to 20 mph GUSTS up to 30 MPH

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire behavior (FB) continues to be high to extreme as fuels that are drought stricken are receptive to fire progression. Downed 100 and 1000 hr dead fuels, medium height shrubs and smaller trees are the main carriers of fire for both horizontal and vertical growth. The grass models were less effective carriers of fire growth.

Vertical extension into canopy created Crown Fire conditions in the denser Ponderosa Pine configurations.

Early morning dense smoke lowered (FB). As the afternoon heat and winds cleared the smoke, more extreme (FB) presented with higher flame lengths and higher rates of spread. The current fuel loads and weather supported plume driven fire activity. (SEE SAFETY MESSAGE REGARDING PLUME DOMINATED FIRES)

The fire area is a mix of Ponderosa Pine, Sage and Mahogany, lava cap, logging slash and regrowth. With the exception of the area around Burney Mountain the terrain is moderate slope.

Fire Behavior for Optimal Alignment
INCREASE EXPECTED NUMBERS DURING ANY FIRING OPERATIONS

Fuel Type	ROS (Ft-MIN) FWD	Transition to Crown	Spot DIST	FL (Ft)	P(i)G
Brush (Shaded)	22-135'	YES	.4 mi	8 – 20'	42 %
Brush (UN-Shaded)	25-150'	YES	.4 mi	9 – 22'	64 %
Timber Litter (Shaded)	1 – 2'	NO	.3 mi	1 – 2'	39 %
Timber Litter (UN-Shaded)	3 – 16'	YES	.4 mi	2 – 6'	64 %

SPECIFIC:

With expected thunderstorms, downdrafts have the potential to push fire in all directions. Fuels are diverse throughout the area and have proven to be receptive to ember fall out. Due to the range of spotting, potential lines may not be able to hold the fire progression within the control lines. The higher RH may aid in lowering the Probability of Ignition for new starts, however line personnel should assume that there will be high potential for spots due to CURRENT SEASON TRENDS in respect to fire receptive fuel loads.

If the thunderstorms do not develop, even with the cooler temps and higher RH, the current fire carriers will still remain active and support higher levels of fire behavior.

There could also be isolated showers as cells move over the fire area. Be cautious as localized flash flooding could create other hazards.

AIR OPERATIONS:

Thunderstorm activity and or heavy smoke production in the drainages may inhibit aircraft availability.

SAFETY

A plume dominated fire in heavy fuels can make a fast uphill run. When the fire runs into lighter fuels the column can collapse, causing a downward rushing of air in every direction and spreading fire rapidly outward.

Either one of these events is especially threatening to personnel because the escalation of fire behavior is sudden and difficult to predict.

INCIDENT: Eiler Incident

DATE: August 4, 2014 TIME: 0700-0700

Major Hazards and Risks: Thunderstorms, Extreme Fire Behavior, Fatigue, Narrow Roads, Terrain, Limited Resources.

*Red Flag Warning: Thunderstorms are predicted throughout the fire area today. Follow **Thunderstorm Safety**, pg. 21 in your IRPG.*

Extreme fire behavior is predicted. Know your L.C.E.S and practice P.A.C.E.

Manage yourself and those around you for excessive fatigue; many have driven long distances or been assigned for extended periods. Use the buddy system and take breaks as needed.

Eat and drink fluids on a regular basis to maintain an appropriate energy level for any expected work assignment. "Remember you are the only one that knows your limitations".

The Communications Plan (ICS 205) has changed, know the plan and follow it.

Review your ICS 206 and know what to do in the event of a medical emergency.

Driving: Keep your speeds down on all fire roads, watch out for loose, dusty roads, unstable shoulders and fire debris. Keep speeds to posted limits. Watch for wildlife and pedestrians in roadway. Wear your seatbelts.

Lookouts, **C**ommunication, **E**scape routes, **S**afety zones

P.A.C.E

Primary Plan (Offense)

- Focused on FF safety and objectives

Alternative Plan (Offense)

- Fallback plan that closely resembles primary plan

Contingency Plan (Defense)

- Focused on FF safety, move to safety zone, temporary refuge areas.

Emergency Plan (Defense)

- FF survival
- Deployment zones/Refuge area
- Fire shelters

TAILGATE SAFETY

- **Accountability:** everyone checks in and everyone checks out. Supervisors know where their crews are at all times
- **Communication:** everyone knows the com-plan
- **Briefing:** everyone knows the game plan, everyone knows the contingency plan
- **Safety gear:** everyone has the appropriate safety gear and in good working condition
- **LCES:** they are clear and made known to everyone
- **Medical:** follow the medical procedures found on the ICS206 in the IAP

A firefighter with good situational awareness is a **SAFE** firefighter

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, IMT3 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
