**Spot Forecast for Yreka Staging Fire**

National Weather Service Medford

621 PM PDT Sun Aug 17 2014

IF CONDITIONS BECOME UNREPRESENTATIVE,  
CONTACT THE NATIONAL WEATHER SERVICE.

SPOT FORECAST FOR YREKA STAGING...CAL FIRE  
NATIONAL WEATHER SERVICE MEDFORD OR  
621 PM PDT SUN AUG 17 2014

FORECAST IS BASED ON REQUEST TIME OF 1638 PDT ON AUGUST 17.  
IF CONDITIONS BECOME UNREPRESENTATIVE...CONTACT THE NATIONAL WEATHER  
SERVICE.

...RED FLAG WARNING FOR ABUNDANT LIGHTNING WITH DRY FUELS IN EFFECT  
FROM 1PM TO 11PM PDT MONDAY...

.DISCUSSION...

THUNDERSTORMS WILL DEVELOP ACROSS THE AREA MONDAY AFTERNOON AND  
EVENING. THESE THUNDERSTORMS WILL BE HIGH BASED, BUT SLOW MOVING.  
THEREFORE, THEY ARE LIKELY TO PRODUCE RAIN IN THE STORM CORES, BUT  
ALSO A LOT OF LIGHTNING OUTSIDE OF THE RAIN CORES ALONG WITH  
OUTFLOW WINDS THAT WILL POSE A NEW FIRE START AND INITIAL ATTACK  
PROBLEM. THE GREATEST THREAT OF STORMS WILL BE FROM 1400 THROUGH  
2000 PDT ON MONDAY. THE THREAT OF SHOWERS AND STORMS LINGERS INTO  
TUESDAY, BUT IT IS MOST LIKELY THAT STORMS ON TUESDAY WILL BE SOUTH  
OF THE INITIAL ATTACK AREA, MORE NEAR THE TRINITY ALPS, WEED, AND  
MOUNT SHASTA.

.MONDAY...

SKY/WEATHER.....PARTLY CLOUDY BECOMING MOSTLY CLOUDY. SCATTERED  
SHOWERS AND THUNDERSTORMS IN THE AFTERNOON.

MAX TEMPERATURE.....AROUND 92.

MIN HUMIDITY.....17 PERCENT.

EYE LEVEL WINDS.....EAST 0-2 MPH. WINDS BECOMING UPSLOPE 1-3 MPH  
LATE MORNING AND THEN SHIFTING TO  
WEST-NORTHWEST 1-3 MPH IN THE AFTERNOON. GUSTY  
AND ERRATIC WINDS EXPECTED NEAR THUNDERSTORMS  
IN THE AFTERNOON.

MIXING HEIGHT.....500 FT AGL OR LESS EARLY, 3500 FT AGL LATE  
MORNING, INCREASING TO 11000 FT AGL DURING THE  
AFTERNOON.

MIXING WINDS.....EAST 5-10 MPH BECOMING NORTHWEST 5 MPH IN THE  
AFTERNOON.

CWR.....10 PERCENT.

LAL.....3.

WIND (20 FT).....EAST 5-10 MPH, BECOMING NORTHWEST 5-10 MPH IN  
THE AFTERNOON. GUSTY AND ERRATIC WINDS EXPECTED  
NEAR THUNDERSTORMS IN THE AFTERNOON.

.MONDAY NIGHT...

SKY/WEATHER.....MOSTLY CLOUDY IN THE EVENING WITH SCATTERED  
SHOWERS AND THUNDERSTORMS THEN BECOMING PARTLY  
CLOUDY WITH A SLIGHT CHANCE OF SHOWERS AND  
THUNDERSTORMS.

# **CAL FIRE Safety Communication 2014-03**

## **Monitoring Fatigue**

CAL FIRE's Safety Program recognizes our personnel have experienced a high level of physical and mental fatigue during this wildland fire season. The arduous work often involves long and irregular work shifts, lack of sleep and/or quality sleep, improper nutrition and unpredictable and stressful events. Fatigue and stress can decrease situational awareness which in turn increases the risk of injury, and accidents.

- Allow enough time to sleep after work shifts and on days off.
- Avoid strenuous activities on your rest days and allow your body to recover for the next shift.
- Avoid heavy meals late at night, especially before going to sleep.
- Reduce the intake of sugar, caffeine and other stimulants (Energy Drinks etc.) particularly the hours before sleeping.
- Ensure fluid and nutritional needs are met, and work/rest cycles are implemented to prevent unnecessary fatigue among both firefighters, fire managers, contractors and non-uniformed personnel.

### **Injuries:**

CAL FIRE personnel are exposed to a variety of hazards placing them at risk of injuries while on duty, or on Rest and Rehab. Through CAL FIRE's network of Safety Officers, we have identified a few trends listed below.

- Slips, Trips and Falls (Causing Sprains and Strains; CAL FIRE's # 1 injury)
- Burns from radiant heat and thermal heat contact (Stump Holes, Fireline Operations)
- Lacerations from tools and equipment (Chain Saws, Axes, Pulaski's)
- Falling objects (Fire Weakened Trees, Unstable Structure Components)
- Reactions from plants and insects (Poison Oak, Sumac, Ticks, Yellow Jackets)
- Vehicle accident injuries

### **Reducing Injuries:**

- Communicate potential hazards to personnel along with, mitigation, avoidance, and reporting unsafe conditions (Safety Briefings, Tailgate Safety Sessions)
- Ensure firefighters receive training on safe response to and from emergencies and to always be aware of the potential to be caught in a hazardous condition
- Review and enforce standard operating procedures for operating motor vehicles and wearing seat belts (Restraints, Defensive Driving)
- Inspect and train on the proper use and limitations of personal protective equipment
- Report all injuries and illnesses to appropriate supervisors for proper reporting

Below is a link to "Six Minutes for Safety." Please use these documents for the purposes of discussion, Tailgate Safety Sessions, and provide appropriate documentation using a IIPP-6 at an incident or at the local level.

# THUNDERSTORM & LIGHTNING SAFETY

## REMEMBER!

If you can hear thunder or see lightning (the actual strike vs “heat lightning” described below), you are close enough to the storm to be struck by lightning.

Heat lightning is lightning from a thunderstorm too far away for the thunder to be heard. However, the storm may be moving in your direction.

- Maintain **Situational Awareness** at all times and post **Lookouts** as needed to observe thunder cells.
- Approaching thunder cells will affect wind speed and direction.
- Keep the “**30/30 Rule**” in mind. If you see lightning and hear thunder within 30 seconds, seek shelter and/or follow the established **Safety/Disengagement Plan**.
- Take shelter inside vehicles or buildings.
- If caught outdoors, find a low spot and assume a crouched position, limiting contact with the ground.
- Avoid tall trees, wire fences, utility poles, etc.
- Do not stay on ridgetops, wide open areas, near ledges or rock outcroppings.
- Do not group together.
- Handheld radios and cellular telephones can be used.
- Do not use land line telephones, machinery, or electric motors.
- Remain in a safe environment for at least 30 minutes after the thunder cell has passed.

**LOOKOUTS COMMUNICATIONS ESCAPE ROUTES SAFETY ZONES**

# THUNDERSTORM & LIGHTNING SAFETY CHEAT SHEET

---

## Facts About Lightning

**FACT 1:** ALL THUNDERSTORMS PRODUCE LIGHTNING.

**FACT 2:** LIGHTNING KILLS THE SAME NUMBER OF PEOPLE AS TORNADOES AND MORE PEOPLE THAN HURRICANES

**FACT 3:** LIGHTNING OFTEN STRIKES OUTSIDE THE RAIN AREA AND AS FAR AS 10 MILES FROM CELL.

**FACT 4:** IF YOU HEAR THUNDER, YOU ARE IN DANGER. REGARDLESS OF BLUE SKIES, THUNDER SAYS YOU ARE WITHIN STRIKING DISTANCE OF LIGHTNING.

**FACT 5:** LIGHTNING LEAVES MANY VICTIMS WITH PERMANENT DISABILITIES WHILE A SMALL PERCENTAGE ARE KILLED

---

## How Lightning Hurts Us

- ⚡ Ground current – occurs with each strike. Hundreds of thousands of volts radiating through the ground. Keep your feet close together
  - ⚡ Side Flash – jumps from tall objects like trees. Don't seek shelter near tall trees, objects, surfaces
  - ⚡ Contact – touching long conductors (rails, cables, fences) when they are struck
  - ⚡ Direct strikes – cause 3-5% of lightning fatalities. Avoid high places and open ground
- 

## What To Do During a Storm

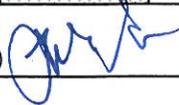

- ⚡ "30/30" Rule. If you see lightning and hear thunder within 30 seconds, seek shelter.
  - ⚡ Take shelter inside a building or a vehicle
  - ⚡ If caught outdoors, find a low spot and assume a crouched position, limiting contact with the ground
  - ⚡ Avoid tall trees, wire fences, utility poles, etc
  - ⚡ Do not stay on ridgetops, wide open areas, near ledges or rock outcroppings
  - ⚡ Do not group together
  - ⚡ Handheld radios and cellular phones can be used. No landlines, machinery or electric motors
  - ⚡ Remain sheltered for at least 30 minutes following last sound of thunder.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25). All channels are shown as if programmed in a portable or mobile radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

### 8. MEDICAL EMERGENCY PROCEDURES

**EMERGENCY FREQUENCY:** Air Guard 168.625 Tone 1  
\* Engine companies will serve as line EMTs \*

#### LINE EMERGENCY:

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource (LEMP)
  2. Yreka ECC (911)
- Yreka ECC contacts:
  1. Ground or Air ambulance as requested
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Yreka ECC will clear command channel for emergency traffic as needed and only for duration of need.

#### CAMP EMERGENCY:

Contact Yreka ECC (911) with patient complaint/condition and location. Yreka ECC (911) will dispatch local Fire/EMS(911):

- Reporting Party contacts:
  1. Medical Unit Leader  
- MEDL contacts safety

# DEMOBILIZATION PLAN - SUMMARY

## Siskiyou Lightning Complex

### CA-SKU-005509

#### GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. By definition, surplus personnel are available for release if they have rested for a minimum of 8 hours, are cleaned up, outfitted and have a vehicle ready to depart to their next destination.

#### GENERAL GUIDELINES

- **NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOB UNIT.**
- Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours.
- All government and hired vehicles leaving the incident will have a safety inspection. If a vehicle is within 1,000 miles of a "B" service, it is the responsibility of the resource to contact Ground Support and have an oil change prior to their scheduled demob time.
- All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- **All CAL FIRE strike team leaders are responsible to call North Ops at 1-800-237-3703 immediately upon being released from the incident.**

#### RESPONSIBILITIES

**Unit Leaders** will declare resources excess to their **Section Chief**. **Section Chiefs** will declare excess resources to the Planning Section Chief through the **Resource Unit Leader**. This should be done 36 hours in advance of anticipated release. **Use the Declaration of Excess Resources Form or General Message Form (ICS-213) to list all excess resources.** Include the Request #, ICS position, name/ID, date and time of declared excess, and time in which the resource will be eligible to leave. Send to the **RESOURCE UNIT** where the resource will be determined to be surplus to the incident. Surplus resources will then be able to report to the **DEMOB UNIT**, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures, and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment.

#### RELEASE PRIORITIES

1. Organized fire departments
2. OES engines
3. State and Federal Military Resources
4. Hired personnel and equipment
5. Other agencies (USFS, BLM, etc.)
6. Out of region CAL Fire forces
7. Within Region CAL Fire Forces
8. Unit CAL Fire Forces

#### TRAVEL INFORMATION

All resources will meet agency specific requirements on hours of travel per day. For CAL FIRE hand crews, a full 24 hour reset period shall be adhered to before departing from the incident. After a crew's last operational period they shall begin the demobilization release procedure during their 24 hour off shift. In addition, they must use the following complete 24 hour period as reset time before they depart from the incident.

# CAL FIRE

## WATER USAGE PLAN

### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

#### **Fireline personnel-** (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

#### **Aviation Operations-**

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, Water Usage Reports) and develop a plan to replace water.

#### **Public/Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.

#### **Management and Supervision-**

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
