INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: BUTTE INCIDENT CA-AEU-024918	2. Operational Period: Date From: 09/16/2015 Date To: 09/17/2015 Time From: 0700 hours Time To: 0700 hours																																								
3. Objective(s): <u>Management Objectives</u> <ul style="list-style-type: none"> • Provide for public and emergency personnel safety at all times • Provide for timely and accurate release of incident information to the public, media, first responders and cooperators • Protect and defend structures and improvements in the fire area • Protect natural and cultural resources in the fire area • Provide a process to manage emergency resources efficiently • Ensure costs are minimized appropriately for values at risk • Ensure coordination and communication with stakeholders and cooperating agencies <u>Control Objectives</u> <ul style="list-style-type: none"> • Keep the fire: <ol style="list-style-type: none"> 1. North of the Stanislaus River 2. South of Ridge, Sutter Creek Volcano, Pioneer Creek and Mill Creek Roads and the North Fork of the Mokelumne River 3. East of Highway 49 4. West of the Stanislaus National Forest DPA boundry 																																									
4. General Weather Conditions: SEE ATTACHED																																									
General Situational Awareness and Safety: <ul style="list-style-type: none"> • MAINTAIN L.C.E.S. AT ALL TIMES. Safety zones and escape routes are mandatory • Ensure all personnel maintain situational awareness • Rolling material and steep terrain. Remember to maintain good footing • Keep your hydration up by drinking water and electrolyte beverages. Avoid energy drinks • Maintain good communications with your supervisors, adjacent forces and crew members • Guard against complacency. 																																									
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plan(s) Located at:																																									
6. Incident Action Plan (the items checked below are included in this Incident Action Plan): <table border="1" style="width: 100%; border-collapse: collapse; margin-top: 5px;"> <tr> <td style="width: 5%; text-align: center;"><input checked="" type="checkbox"/></td> <td style="width: 20%;">ICS 203</td> <td style="width: 5%; text-align: center;"><input checked="" type="checkbox"/></td> <td style="width: 20%;">ICS 214</td> <td style="width: 5%; text-align: center;"><input checked="" type="checkbox"/></td> <td style="width: 20%;">Finance Section Message</td> <td style="width: 5%; text-align: center;"><input checked="" type="checkbox"/></td> <td style="width: 20%;">Fire Operation Check List</td> </tr> <tr> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>ICS 204(s)</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>ICS 220</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>FC-33 Input Form</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Water Usage Report</td> </tr> <tr> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>ICS 205</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Weather Forecast</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Training Message</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Facility/Base Map</td> </tr> <tr> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>ICS 206</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Fire Behavior Forecast</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Documentation Message</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Travel Map</td> </tr> <tr> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>ICS 208</td> <td style="text-align: center;"><input type="checkbox"/></td> <td>Supp. Repair Message</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Demobilization Procedure</td> <td style="text-align: center;"><input checked="" type="checkbox"/></td> <td>Incident Map</td> </tr> </table>		<input checked="" type="checkbox"/>	ICS 203	<input checked="" type="checkbox"/>	ICS 214	<input checked="" type="checkbox"/>	Finance Section Message	<input checked="" type="checkbox"/>	Fire Operation Check List	<input checked="" type="checkbox"/>	ICS 204(s)	<input checked="" type="checkbox"/>	ICS 220	<input checked="" type="checkbox"/>	FC-33 Input Form	<input checked="" type="checkbox"/>	Water Usage Report	<input checked="" type="checkbox"/>	ICS 205	<input checked="" type="checkbox"/>	Weather Forecast	<input checked="" type="checkbox"/>	Training Message	<input checked="" type="checkbox"/>	Facility/Base Map	<input checked="" type="checkbox"/>	ICS 206	<input checked="" type="checkbox"/>	Fire Behavior Forecast	<input checked="" type="checkbox"/>	Documentation Message	<input checked="" type="checkbox"/>	Travel Map	<input checked="" type="checkbox"/>	ICS 208	<input type="checkbox"/>	Supp. Repair Message	<input checked="" type="checkbox"/>	Demobilization Procedure	<input checked="" type="checkbox"/>	Incident Map

Butte Fire Weather Forecast

FORECAST NO: 5
PREDICTION FOR: DAY SHIFT – NIGHT SHIFT
SHIFT DATE: Wednesday, September 16, 2015
FORECAST ISSUED: September 15, 2015

NAME OF INCIDENT: Butte Fire
UNIT: Cal Fire Amador-El Dorado Unit
SIGNED: *Terry Lebo*
 Terry Lebo, Incident Meteorologist

WEATHER DISCUSSION:

A mid-level trough off the western United States this morning will move onshore during the day and overnight. The trough will push low pressure into the Pacific Northwest and drive an associated cold front into northern California. The remains of front will cross central California late Wednesday night or early Thursday.

FORECAST FOR WEDNESDAY:

Max Temperature: Valley Bottom 65-70 Ridgetop 63-68
Minimum Humidity: Valley Bottom 40-45% Ridgetop 35-40%
20 ft Winds:
 Slopes/Valleys: Southwest 6 to 10 mph with occasional gusts around 13 mph.
 Ridges: West 8 to 12 mph with occasional gusts around 16 mph.
Transport Winds: Southwest 20 mph.
LAL 1
Chance of Rain 10% - no appreciable accumulation expected
Chance of Wetting Rain 0%

FORECAST FOR TONIGHT:

Max Temperature: Valley Bottom 48-53 Ridgetop 46-51
Minimum Humidity: Valley Bottom 58-63% Ridgetop 55-60%
20 ft Winds:
 Slopes/Valleys: Southwest 4 to 8 mph becoming east 2 to 4 mph overnight.
 Ridges: Southwest 8 to 12 mph.
Transport Winds: Southwest 15 mph.
LAL 1
Chance of Rain 15% - Isolated rainfall amounts up to 0.02"
Chance of Wetting Rain 0%

FORECAST FOR THURSDAY:

Max Temperature: Valley Bottom 77-82 Ridgetop 72-77
Minimum Humidity: Valley Bottom 28-33% Ridgetop 25-30%
20 ft Winds:
 Slopes/Valleys: Northwest 4 to 9 mph.
 Ridges: North to northwest 7 to 14 mph.
Transport Winds: North 10 mph.
LAL 1
Chance of Rain 0%
Chance of Wetting Rain 0%

INPUTS

WEATHER SUMMARY:

Today will be the last day of the cooler weather and slightly increased humidity. The humidity will decrease from the day before, however there is still a slight chance of showers. Temperatures will be 63-70 degrees during the day and 46-53 degrees overnight. The minimum humidity will be 35-45% during the day and 55-63% overnight. The winds will be south to southwest 6-10 mph with gusts to 13 mph in the valleys/slopes and 15-20 mph with gust to 30 mph on the ridges during the day. Winds overnight will continue to be from the southwest 10-15 mph with gust to 25 on the ridges and slightly less in the valleys and slopes, until midnight.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fine fuels in the area were able to recover for most of the day on Tuesday, however by late afternoon they began to dry out. The skies will be clear in the morning increasing the drying on the fuels. The heavier fuels have had no recovery with the higher humidity and are available to burn. The potential for spot fires will increase when the fuels are exposed to the sun. Rates of spread and Probability of Ignition will continue to increase as the fuels continue to dry over the next 24-48 hours. This also has the potential for previous spot fires to become active. The fuels are at critical levels and there is a Fuels and Fire Behavior Advisory for this region, see link below. The other links will take you to the 7 day outlook for both Regions.

Fuels Advisory

CSR 7 Day Outlook

CNR 7 Day Outlook

SPECIFIC:

The northeast portion of the fire, in the middle and south fork of the Mokelumne River, will once again have a southwest wind. This wind can blow embers across the line or across the canyon. Be aware of any flare ups of brush near the line or trees in the area of the line or on the ridges. The wind will be strong enough to carry embers 1/3 to 3/4 of a mile. These embers may turn into spot fires as the humidity decreases. The east side of the fire also has the potential for spot fires as the wind will continue to blow across the line. The south and west portions of the fire will have less of a problem from spot fires in general but terrain can create eddies in the wind, directing it back across the line. Any spot fire will have a moderate to rapid rate of spread dependent on the fine dead fuel moisture. Remember the spread of this fire has been determined by the spotting ahead of the fire front.

AIR OPERATIONS

Air operations will be limited until the smoke lifts out of the area, in the late morning or early afternoon.

SAFETY

The cooler weather will not have a dramatic change in the fire behavior due to the lag time in the heavier fuels. Continue to monitor your surroundings for spot fires. Continually monitor the unburned areas for spot fires.

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name: BUTTE FIRE	2. Operational Period:	Date From: 9/16/2015 Time From: 0700	Date To: 9/17/2015 Time To: 0700
3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan: Major Hazards/Risks: <p>Repopulation: Engage citizens regarding safety and information. Be aware of repopulation status in your area. Use law enforcement to assist as needed.</p> <p>Traffic and Driving Hazards: Reduce speeds in the field and in base camp. Increase your following distance. Watch for civilian vehicles.</p> <p>Communication: Review communications plan with personnel. Reduce non-essential traffic, use phones if appropriate. Use human repeaters and lookouts as needed.</p> <p>Fire Weather/Changing Conditions: Weather changes are occurring, review forecast with all personnel, expect changes in fire behavior. Have LCES in place.</p> <p>Hydration/Nutrition/Fatigue: Keep hydrating even with lower temps and higher humidity. Monitor personnel and establish proper work/rest cycles. Recognize illness early and take action, know ICS 206.</p> <p>Life Hazards: Lookout for power lines, hazard trees, stump holes, mine shafts, mining hazards, steep terrain, and others. Identify and communicate hazards.</p> <p>PPE: Wear all PPE for current and expected conditions at all times.</p>

Incident Location

County Amador State-CA Latitude Longitude

W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Fuels and Fire Behavior Advisory

Sierra Nevada Mountains and Foothills

September 9, 2015

Subject: Four years of drought has significantly increased the number of dead and dying conifers and oaks across portions of the Sierra Nevada and surrounding foothills. This has resulted in explosive fire behavior conditions and wildfire's resistance to control. Fire fighter safety is a major concern, as well as continued risk to the public in the affected forested areas.

Discussion: It is estimated that well over 5 million trees have died across the Sierra and Sequoia National Forests as well as in the nearby foothills. This is due to a combination of a multi-year drought and significant bark beetle infestation. This number is up from last year when approximately 300,000 trees had died. The deceased trees have immediately increased the amount of standing dead fuel load, which will contribute to extreme fire behavior in the affected areas. **Fire Managers/Firefighters should plan accordingly and be vigilant for flash fires through dead crowns.** Risk to ground suppression personnel and equipment from a greater likelihood of falling and/or weakened trees is also a major concern.

Departure from normal conditions: Normally, conifer forests across the southern and central Sierra experience something less than five percent mortality. In the last six months a substantial number of conifer stands have displayed a ten-fold increase in the number of dead and dying trees. It has been suggested that the current situation mimics the early stages of what occurred in the Southern California national forests between 2001 and 2005. The latest Energy Release Component (ERC) values are all near the 90th percentile for this time of year and are expected to increase further through the second week of September. **Recent fire behavior on the Rough Incident underscores the seriousness of the current situation.** Flash fires, long range spotting, and extreme rates of spread will continue to be common characteristics on new and existing incidents in the coming weeks.

Concerns to Firefighters and the Public:

- Fire Managers/Firefighters need to plan for and anticipate the potential for explosive fire behavior conditions in the affected areas **even during non-critical weather events.**
- Fire personnel and the public should be aware of the increased fall hazard and should seek to mitigate appropriately.

Mitigation Measures: At the onset of a wildfire event, history shows a quick and effective initial suppression response is the first best tool in suppressing unwanted wildfire.

- Fire Managers/ Firefighters should consider suppression options and safe access prior to an event.
- Agency Administrators need to ensure the concerns brought forward in this advisory are included in all suppression and or prescribed fire operations.
- Review the most current Southern California 7-day Significant Fire Potential along with the Monthly and Seasonal Outlooks.

Area of Concern: Predictive Service Areas **SC02, SC03, and SC04** (Southern Sierra, Central Sierra, and the Sierra Foothills).

Issued: September 9, 2015 (Note this advisory will be in effect for 14 days and will be reviewed/updated at that time.)

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

Attach Firing Operations Checklist to ICS-214

A		
Type 1 Engine Access?		
Address or Location		
W Water Source? define below	100 Feet Defensible Space?	 Civilians Present ?
Special Notes or Hazards: 		
Date	Resource ID	
Time		

The final decision to defend a structure is always up to the assigned resource

Based on your experience, complete the Placard by answering the following questions:

Access: Does it appear to have access/egress and turnarounds for

Type 1 fire engines?

Yes = Circle

No = Circle with diagonal slash

Address or Location:

Complete for address, or location being assessed

Water Source: Does the structure appear to have a water source for use by fire engines?

Yes = Circle (describe in the "Special Notes or Hazards" area)

No = Circle with diagonal slash

Defensible Space: Does it appear that a minimum of 100' of combustible vegetation has been cleared away from the structure?

Yes = Circle

No = Circle with diagonal slash

Civilians Present: Do civilians appear to be present at the site?

Yes = Circle (describe in the "Special Notes or Hazards" area)

No = Circle with diagonal slash

Special Notes or Hazards: Note the presence of hazards or useful pieces of information.

Date and Time: Complete

Resource ID: Complete using agency identifier and unit ID.

If conditions change, and as time and resources permit, you may complete a new placard and place it over the top of the previous placard.

Placard should be printed on yellow card stock preferably 60 lb. minimum.

Butte Fire
CA-NEU-024918

FINANCE MESSAGE

DATE: 9-16-15

Finance Section will be located at both Incident Bases.

LOCAL GOVERNMENT

- Please contact OES prior to your 7 day rotation

TIME UNIT

- Please come by the Time Unit and start your FC-33
- Vendor drop off your agreements to the Time Unit
- Shift Tickets need to be completed by line supervisor and turned in at the end of each shift.

COMP / CLAIMS

- Report all injuries
- Property Damage must be reported to and documented
- Please report any Vehicle Damage

PROCUREMENT UNIT

- Offsite feeding must have prior approval of the Finance Chiefs
- Water usage report needs to be turned in Daily

INCIDENT BILLING INFORMATION

Finance Section Chiefs

Instructions for Use of CDF 101 Property Certification of Location or Damage

Document Number: for use as a local number system or when attached to a FC-40 document.

Location / Incident Name: Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

Incident Number: Enter the appropriate incident number

Unit: Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

Region: Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.

Date: Enter the date the P.L. or D. was completed.

The following items were: Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property.

Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.

Date of Occurrence: Enter the date the property was broken, left on line or damaged.

Quantity: Enter the quantity for the line item.

Unit of Measure: Enter the unit of measure for the line item (example ea = each).

CDF Stock Number: Enter the PIN or stock number.

Description: Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

Property Number: Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.

Location of Items: Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

Remarks: Enter specific remarks here, how was the property damaged, what specifically is wrong with it.

Signature of Person Certifying Occurrence as Described:

Signature: The CDF Employee certifying the occurrence must sign.

Printed Name: Enter the printed name of the signature.

Title: Enter the title of the signature.

Date: Enter the date of the signature.

Unit Supervisors Approval:

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.

Comments: Supervisors may enter comments of approval or disapproval.

Signature of Unit Administrator: Signature of Unit Supervisor reviewing the certification described.

Title: Title of the signature.

Date: Date of the signature.

Notes:

This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.

This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to you local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.

CAL FIRE INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

CAL FIRE INCIDENT MANAGEMENT TEAM 1

PHILL VENERIS – INCIDENT COMMANDER

DEMOBILIZATION PLAN - SUMMARY

Butte Incident
CA-AEU-024918

GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. By definition, surplus personnel are available for release if they have rested for a minimum of **8 hours**.

GENERAL GUIDELINES

- o **NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOB UNIT.**
- o DEMOB list will be posted around camp and also will be added to the CAL FIRE IMT 1 online folder. (Scan QR code to read DEMOB list or <http://calfire.box.com/calfireimt1>)
- o Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours.
- o All government and hired vehicles leaving the incident will have a safety inspection. If a vehicle is within 1,000 miles of a "B" service, it is the responsibility of the resource to contact Ground Support and have an oil change prior to their scheduled DEMOB time.
- o All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- o All strike team leaders are responsible to call North Ops at 1-800-237-3703 immediately upon being released from the incident.

RESPONSIBILITIES

Unit Leaders will declare resources excess to their **Section Chief**. **Section Chiefs** will declare excess resources to the Planning Section Chief through the **Resource Unit Leader**. This should be done 36 hours in advance of anticipated release. Use the **Declaration of Excess Resources sheet** or **General Message Form (ICS-213)** to list all excess resources. Include the resource name, request number, name of person, date and time of declared excess, and time in which the resource will be eligible to leave. Send to the **RESOURCE UNIT** where the resource will be determined to be surplus to the incident. Surplus resources will then be able to report to the **DEMOB UNIT**, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures, and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment.

RELEASE PRIORITIES

1. Organized fire departments
2. OES engines
3. Hired personnel and equipment
4. Other agencies (USFS, BLM, etc.)
5. Out of region Cal Fire forces
6. Within Region Cal Fire Forces
7. Unit CAL FIRE Forces

TRAVEL INFORMATION

All resources will meet agency specific requirements on hours of travel per day. For CAL FIRE hand crews, a full 24 hour reset period shall be adhered to before departing from the incident. After a crew's last operational period they shall begin the demobilization release procedure during their 24 hour off shift. In addition, they must use the following complete 24 hour period as reset time before they depart from the incident.

TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident. We are located with Check In.

All federal, state and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment. Remember to register trainees early on and bring your task book with you.

Performance Evaluations will be required to complete the process.

If I am not at the desk please fill out the Incident Trainee data form and leave it on my computer.

Training Specialist
Steve Hurdle
