INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: BUTTE INCIDENT CA-AEU-024918	2. Operational Period: Date From: 09/15/2015 Time From: 0700 hours	Date To: 09/16/2015 Time To: 0700 hours
--	--	--

3. Objective(s):
Management Objectives

- Provide for public and emergency personnel safety at all times
- Provide for timely and accurate release of incident information to the public, media, first responders and cooperators
- Protect and defend structures and improvements in the fire area
- Protect natural and cultural resources in the fire area
- Provide a process to manage emergency resources efficiently
- Ensure costs are minimized appropriately for values at risk
- Ensure coordination and communication with stakeholders and cooperating agencies

Control Objectives

- Keep the fire:
 North of the Stanislaus River
 South of Ridge, Sutter Creek Volcano, Pioneer Creek and Mill Creek Roads and the Mokelumne River
 East of Hwy 49
 West of the Stanislaus National Forest DPA boundry

4. General Weather Conditions:

SEE ATTACHED

General Situational Awareness and Safety:

- MAINTAIN L.C.E.S. AT ALL TIMES. Safety zones and escape routes are mandatory
- Ensure all personnel maintain situational awareness
- Rolling material and steep terrain. Remember to maintain good footing
- Keep your hydration up by drinking water and electrolyte beverages. Avoid energy drinks
- Maintain good communications with your supervisors, adjacent forces and crew members
- Guard against complacency.

5. Site Safety Plan Required? Yes No **Approved Site Safety Plan(s) Located at:**

6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Butte Fire Weather Forecast

FORECAST NO: 4
PREDICTION FOR: DAY SHIFT – NIGHT SHIFT
SHIFT DATE: Tuesday, September 15, 2015

NAME OF INCIDENT: Butte Fire
UNIT: Cal Fire Amador-El Dorado Unit
SIGNED:

FORECAST ISSUED: September 14, 2015

Terry Lebo, Incident Meteorologist

WEATHER DISCUSSION:

Strong south to southwest winds will continue today with gusts around 30 mph in exposed locations. Isolated showers are possible across the area today but little measurable rainfall is expected. A cold front will approach from the northwest on Wednesday, increasing southwest winds ahead of the front. High pressure will return for the end of the week with temperatures creeping back into the 90s by the weekend.

FORECAST FOR TUESDAY:

Max Temperature:	Valley Bottom	73-78	Ridgetop	70-76
Minimum Humidity:	Valley Bottom	30-35%	Ridgetop	28-33%
20 ft Winds:				
Slopes/Valleys:	South to southwest 10 to 15 mph with gusts around 25 mph.			
Ridges:	South to southwest 15 to 20 mph with gusts around 30 mph.			
Transport Winds:	Southwest 23 mph.			
LAL	1			
Chance of Rain	30% - Total rainfall amounts 0.01" to 0.05"			
Chance of Wetting Rain	0%			

FORECAST FOR TONIGHT:

Max Temperature:	Valley Bottom	48-53	Ridgetop	45-50
Minimum Humidity:	Valley Bottom	52-58%	Ridgetop	50-56%
20 ft Winds:				
Slopes/Valleys:	Southwest 8 to 13 mph with occasional gusts to 17 into early evening.			
Ridges:	Southwest 10 to 15 mph with occasional gusts to 25 mph until midnight.			
Transport Winds:	Southwest 20 mph.			
LAL	1			
Chance of Rain	10% - Total rainfall amounts 0.01" to 0.03"			
Chance of Wetting Rain	0%			

FORECAST FOR WEDNESDAY:

Max Temperature:	Valley Bottom	65-70	Ridgetop	63-68
Minimum Humidity:	Valley Bottom	40-45%	Ridgetop	35-40%
20 ft Winds:				
Slopes/Valleys:	Southwest 7 to 10 mph with occasional gusts around 15 mph.			
Ridges:	West 10 to 15 mph with occasional gusts around 18 mph.			
Transport Winds:	Southwest 20 mph.			
LAL	1			
Chance of Rain	10% - Total rainfall amounts 0.01" to 0.02"			
Chance of Wetting Rain	0%			

EXTENDED OUTLOOK:

THURSDAY: Mostly sunny. Highs 73-83, Lows 50-57. Min RH 25%. Northwest winds 5 to 10 mph.
FRIDAY: Sunny. Highs 80-90, Lows 55-62. Min RH 20%. Northwest winds 5 to 12 mph.
SATURDAY: Sunny. Highs 82-92, Lows 58-65. Min RH 15%. Northwest winds 5 to 10 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: Wildfire
FIRE NAME: Butte	OPERATIONAL PERIOD: 9/15-16/15 0700-0700
DATE ISSUED: 9/14/15	TIME ISSUED: 1900
UNIT: AEU – Amador El Dorado Unit	SIGNED: 
	Typed/printed: Don Watt FBAN

INPUTS

WEATHER SUMMARY:

The weather will continue to moderate with cooling temperatures and rising humidity. The temperature will be 70-78 during the day and 45-53 overnight. Relative humidity will be 28-35 percent during the daytime and 50-58 percent. There is a slight chance of rain, but it will not be a wetting rain. **Winds will be southwest 10-15 mph with gusts to 25 mph in the valleys and slopes and 15-20 mph with gusts to 30 mph on the ridges.**

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The decrease in temperature and increase in humidity today will do little to moderate the fire activity. The grass and light fuels will be affected by slightly decreasing their receptiveness to fire brands and the rate of spread. The lag time for larger fuels is longer than the effect of the increased humidity and will still readily burn. Due to the drought the brush and trees are at critical fuel moisture levels and will produce large number of fire brands when actively burning. This high number of fire brands will increase the potential for spotting in the lighter fuels, even with higher humidity levels. The fuels and winds have been the main carrier of fire and with the increase in wind the fire has potential to grow to the northeast. Watch for trees near the fires edge for torching and casting embers across the line. Spotting from the brush will be over ¼ mile and from trees up to 1 mile. The wind can be affected locally by the terrain creating an eddy effect changing the direction of the wind over small areas.

SPECIFIC:

The northeast portion in the Mokelumne River drainage will be active with a strong southwest wind increasing spread to the east. The drainage splits into two main branches with a dominant ridge in-between. The fire has progressed to the east on the south side of the south fork of the Mokelumne River. There is a high potential for spot fires on the ridge dividing the south fork and the middle fork of the Mokelumne River, with spread into the drainage of the north fork of the Mokelumne River. The east side of the fire has transition areas from trees and brush into grass fields. Spotting into these fields is a strong possibility with the increasing wind. These spots will have a moderate to rapid rate of spread and will transition again into brush and timber. The south portion of the fire is in the grass oak woodland, which has the high potential for spot fires, however the wind should be more favorable for control efforts. There is still potential for a spot to cross the line with the increasing wind and get into the San Antonio Creek drainage. The east side of the fire is also in the grass oak woodland and will have favorable winds during and changing directions across the line in the overnight hours. Spotting potential will be reduced in the overnight hours but is still a strong possibility.

AIR OPERATIONS

Air operations will be limited until the smoke lifts out of the area.

SAFETY

The cooler weather will not have a dramatic change in the fire behavior due to the lag time in the heavier fuels. Continue to monitor your surroundings for spot fires. Continually monitor the unburned areas for spot fires.

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name: Butte	2. Operational Period:	Date From: 9/15/2015 Time From: 0700	Date To: 9/16/2015 Time To: 0700
3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan: <u>Major Hazards/Risks</u> <p>Fire Weather/Changing Conditions: Weather changes are occurring. Review weather forecast with all personnel. Expect resulting changes in fire behavior.</p> <p>Communications: Review and understand the communications plan (ICS 205). Clone portable radios. Use human repeaters and lookouts as needed.</p> <p>Driving Hazards/Traffic/Narrow Roads: Monitor speed and following distances. Watch for civilian vehicles.</p> <p>Repopulation: Be aware of repopulation status in your area of operation. Inform citizens regarding safety and communications. Use law enforcement to assist as needed.</p> <p>Hydration/Nutrition/Fatigue: Monitor personnel and establish proper work/rest cycles. Recognize illness early and take action. Know the ICS 206 information and how to use it.</p> <p>Temporary Refuge Areas: Locate TRA's and know your plan prior to engaging.</p> <p>Hazard Trees: Identify and flag hazardous areas. All personnel should frequently survey their work area and be aware of their surroundings.</p> <p>PPE: Wear all PPE for current and expected conditions at all times.</p>

Prepared By (Communications Unit)
Tom Webb COML IMT #1

Incident Location
County Amador State-CA Latitude N Longitude W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Fuels and Fire Behavior Advisory

Sierra Nevada Mountains and Foothills

September 9, 2015

Subject: Four years of drought has significantly increased the number of dead and dying conifers and oaks across portions of the Sierra Nevada and surrounding foothills. This has resulted in explosive fire behavior conditions and wildfire's resistance to control. Fire fighter safety is a major concern, as well as continued risk to the public in the affected forested areas.

Discussion: It is estimated that well over 5 million trees have died across the Sierra and Sequoia National Forests as well as in the nearby foothills. This is due to a combination of a multi-year drought and significant bark beetle infestation. This number is up from last year when approximately 300,000 trees had died. The deceased trees have immediately increased the amount of standing dead fuel load, which will contribute to extreme fire behavior in the affected areas. **Fire Managers/Firefighters should plan accordingly and be vigilant for flash fires through dead crowns.** Risk to ground suppression personnel and equipment from a greater likelihood of falling and/or weakened trees is also a major concern.

Departure from normal conditions: Normally, conifer forests across the southern and central Sierra experience something less than five percent mortality. In the last six months a substantial number of conifer stands have displayed a ten-fold increase in the number of dead and dying trees. It has been suggested that the current situation mimics the early stages of what occurred in the Southern California national forests between 2001 and 2005. The latest Energy Release Component (ERC) values are all near the 90th percentile for this time of year and are expected to increase further through the second week of September. **Recent fire behavior on the Rough Incident underscores the seriousness of the current situation.** Flash fires, long range spotting, and extreme rates of spread will continue to be common characteristics on new and existing incidents in the coming weeks.

Concerns to Firefighters and the Public:

- Fire Managers/Firefighters need to plan for and anticipate the potential for explosive fire behavior conditions in the affected areas **even during non-critical weather events.**
- Fire personnel and the public should be aware of the increased fall hazard and should seek to mitigate appropriately.

Mitigation Measures: At the onset of a wildfire event, history shows a quick and effective initial suppression response is the first best tool in suppressing unwanted wildfire.

- Fire Managers/ Firefighters should consider suppression options and safe access prior to an event.
- Agency Administrators need to ensure the concerns brought forward in this advisory are included in all suppression and or prescribed fire operations.
- Review the most current [Southern California 7-day Significant Fire Potential](#) along with the [Monthly and Seasonal Outlooks](#).

Area of Concern: Predictive Service Areas **SC02, SC03, and SC04** (Southern Sierra, Central Sierra, and the Sierra Foothills).

Issued: September 9, 2015 (Note this advisory will be in effect for 14 days and will be reviewed/updated at that time.)

**THIS PAGE
INTENTIONALLY
LEFT BLANK**

A		
Type 1 Engine Access?		
Address or Location		
W Water Source? define below	100 Feet Defensible Space?	 Civilians Present ?
Special Notes or Hazards:		
Date	Resource ID	
Time		

The final decision to defend a structure is always up to the assigned resource

Based on your experience, complete the Placard by answering the following questions:

Access: Does it appear to have access/egress and turnarounds for Type I fire engines?

Yes = Circle

No = Circle with diagonal slash

Address or Location:

Complete for address, or location being assessed

Water Source: Does the structure appear to have a water source for use by fire engines?

Yes = Circle (describe in the "Special Notes or Hazards" area)

No = Circle with diagonal slash

Defensible Space: Does it appear that a minimum of 100' of combustible vegetation has been cleared away from the structure?

Yes = Circle

No = Circle with diagonal slash

Civilians Present: Do civilians appear to be present at the site?

Yes = Circle (describe in the "Special Notes or Hazards" area)

No = Circle with diagonal slash

Special Notes or Hazards: Note the presence of hazards or useful pieces of information.

Date and Time: Complete

Resource ID: Complete using agency identifier and unit ID.

If conditions change, and as time and resources permit, you may complete a new placard and place it over the top of the previous placard.

Placard should be printed on yellow card stock preferably 60 lb. minimum.

FINANCE MESSAGE

DATE: 9-15-15

Finance Section will be located at both Incident Bases.

LOCAL GOVERNMENT

- Please contact OES prior to your 7 day rotation

TIME UNIT

- Please come by the Time Unit and start your FC-33
- Vendor drop off your agreements to the Time Unit
- Shift Tickets need to be completed by line supervisor and turned in at the end of each shift.

COMP / CLAIMS

- Report all injuries
- Property Damage must be reported to and documented
- Please report any Vehicle Damage

PROCUREMENT UNIT

- Offsite feeding must have prior approval of the Finance Chiefs
- Water usage report needs to be turned in Dailey

Instructions for Use of CDF 101 Property Certification of Location or Damage

Document Number: for use as a local number system or when attached to a FC-40 document.

Location / Incident Name: Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

Incident Number: Enter the appropriate incident number

Unit: Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

Region: Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.

Date: Enter the date the P.L. or D. was completed.

The following items were: Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property.

Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.

Date of Occurrence: Enter the date the property was broken, left on line or damaged.

Quantity: Enter the quantity for the line item.

Unit of Measure: Enter the unit of measure for the line item (example ea = each).

CDF Stock Number: Enter the PIN or stock number.

Description: Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

Property Number: Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.

Location of Items: Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

Remarks: Enter specific remarks here, how was the property damaged, what specifically is wrong with it.

Signature of Person Certifying Occurrence as Described:

Signature: The CDF Employee certifying the occurrence must sign.

Printed Name: Enter the printed name of the signature.

Title: Enter the title of the signature.

Date: Enter the date of the signature.

Unit Supervisors Approval:

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.

Comments: Supervisors may enter comments of approval or disapproval.

Signature of Unit Administrator: Signature of Unit Supervisor reviewing the certification described.

Title: Title of the signature.

Date: Date of the signature.

Notes:

This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.

This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to you local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

CAL FIRE INCIDENT MANAGEMENT TEAM 1

PHILL VENERIS – INCIDENT COMMANDER

DEMOBILIZATION PLAN - SUMMARY

Butte Incident
CA-AEU-024918

GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. By definition, surplus personnel are available for release if they have rested for a minimum of **8 hours**.

GENERAL GUIDELINES

- **NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOB UNIT.**
- DEMOB list will be posted around camp and also will be added to the CAL FIRE IMT 1 online folder. (**Scan QR code to read DEMOB list or <http://calfire.box.com/calfireimt1>**)
- Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours.
- All government and hired vehicles leaving the incident will have a safety inspection. If a vehicle is within 1,000 miles of a "B" service, it is the responsibility of the resource to contact Ground Support and have an oil change prior to their scheduled DEMOB time.
- All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- All strike team leaders are responsible to call North Ops at 1-800-237-3703 immediately upon being released from the incident.

RESPONSIBILITIES

Unit Leaders will declare resources excess to their **Section Chief**. **Section Chiefs** will declare excess resources to the Planning Section Chief through the **Resource Unit Leader**. This should be done 36 hours in advance of anticipated release. Use the **Declaration of Excess Resources sheet** or **General Message Form (ICS-213)** to list all excess resources. Include the resource name, request number, name of person, date and time of declared excess, and time in which the resource will be eligible to leave. Send to the **RESOURCE UNIT** where the resource will be determined to be surplus to the incident. Surplus resources will then be able to report to the **DEMOB UNIT**, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures, and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment.

RELEASE PRIORITIES

1. Organized fire departments
2. OES engines
3. Hired personnel and equipment
4. Other agencies (USFS, BLM, etc.)
5. Out of region Cal Fire forces
6. Within Region Cal Fire Forces
7. Unit CAL FIRE Forces

TRAVEL INFORMATION

All resources will meet agency specific requirements on hours of travel per day. For CAL FIRE hand crews, a full 24 hour reset period shall be adhered to before departing from the incident. After a crew's last operational period they shall begin the demobilization release procedure during their 24 hour off shift. In addition, they must use the following complete 24 hour period as reset time before they depart from the incident.

TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident. We are located with Check In.

All federal, state and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment. Remember to register trainees early on and bring your task book with you.

Performance Evaluations will be required to complete the process.

If I am not at the desk please fill out the Incident Trainee data form and leave it on my computer.

Training Specialist
Steve Hurdle
