INCIDENT ACTION PLAN

OPERATIONAL PERIOD

August 16 – August 17, 2015

0700 - 0700

**THIS PAGE LEFT
BLANK INTENTIONALLY**

INCIDENT OBJECTIVES	1. INCIDENT NAME Humboldt Complex	2. DATE 8/15/15	3. TIME 2045																		
4. OPERATIONAL PERIOD (DATE/TIME) 0700 – 0700 8/16/2015 to 8/17/2015																					
5. MANAGEMENT OBJECTIVES <ul style="list-style-type: none"> • Provide for firefighter and public safety. • Protect prime grazing land and other natural resources. • Establish and maintain positive relationships with cooperating agencies and the public. • Keep costs commensurate with values at risk. • Provide for an efficient and effective demobilization. 6. GENERAL CONTROL OBJECTIVES <ul style="list-style-type: none"> • Keep all fires within established containment lines. 																					
7. WEATHER FORECAST FOR OPERATIONAL PERIOD <p>Hot and dry conditions will prevail through the operational period. Humidity will drop into the teens this afternoon with poor to moderate recovery tonight. Weak northeast winds will prevail in the night and morning hours while southwest/up valley winds develop in the afternoon and evening. Max temps 88-98. Min RH 12-22%</p>																					
8. GENERAL SAFETY MESSAGE <p>Maintain situational awareness in country not seen in daylight and when unfamiliar with weather and local factors influencing fire behavior.</p>

INCIDENT Weather Forecast

FORECAST NO: 13

NAME OF FIRE: Humboldt Complex

PREDICTION FOR: 24 Hour **SHIFT**

UNIT: CALFIRE

SHIFT DATE: 8/16/15 – 8/17/15 (0700-0700)

SIGNED: Richard Thompson

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 8/15/15 @ 1830

WEATHER DISCUSSION: Hot and very dry conditions will persist through the operational period. At the ridges... northeast winds will prevail in the morning and overnight... with southwesterly winds this afternoon and evening. Across the slopes and valleys... typical diurnal winds will prevail. Humidity will drop into the teens this afternoon... with poor to moderate recoveries tonight.

Hot and dry conditions will continue through mid-week... although temperatures each successive day are expected to be a bit cooler.

WEATHER FORECAST:

WEATHER: Mostly clear.

TEMPERATURES: Max: 90-98 below 3500 feet... 84-90 above 3500 feet.
Min: 56-64.

HUMIDITY: Min: 12-22%.
Max: 40-60% below 3500 feet... 25-40% above 3500 feet.

20 FT WINDS:

RIDGETOP - 0700-1200: Northeast to east 4-8 MPH Gust 12 MPH.
1200-2000: Southwest to west 6-12 MPH Gust 18 MPH.
2000-0700: North to northeast 3-6 MPH Gust 10 MPH.

SLOPE/VALLEY - 0700-1100: Variable/northeast 3-6 MPH.
1100-2100: Upvalley 6-12 MPH Gust 18 MPH.
2100-0700: Downslope/downvalley 3-6 MPH.

OUTLOOK FOR MONDAY: Mostly clear. Highs: 88-98. Lows: 58-66. Min RH: 12-22%. Max RH: 50-70% below 3500 feet... 30-50% above 3500 feet. Ridgetop winds: southwest to west 5-10 MPH Gust 15 MPH. Slope/valley winds: upvalley 6-12 MPH Gust 18 MPH daytime and downslope/downvalley 3-6 MPH.

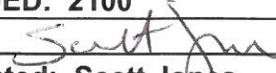

EXTENDED FORECAST (TUESDAY THROUGH THURSDAY):

TUESDAY: Partly cloudy. Highs: 86-96. Lows: 56-64. Min RH: 15-25%. Max RH: 60-80% below 3500 feet... 40-60% above 3500 feet. Ridgetop winds: southwest to west 5-10 MPH Gust 15 MPH. Slope/valley winds: typical diurnal winds gusting to 18 MPH in the afternoon.

WEDNESDAY: Partly cloudy. Highs: 84-94... except 78-84 above 3500 feet. Lows: 54-62. Min RH: 20-35%. Max RH: 60-80% below 3500 feet... 40-60% above 3500 feet. Ridgetop winds: west to northwest 5-10 MPH Gust 15 MPH. Slope/valley winds: typical diurnal winds gusting to 18 MPH in the afternoon.

THURSDAY: Mostly clear. Highs: 82-92... except 77-82 above 3500 feet. Lows: 54-62. Min RH: 20-35%. Max RH: 70-90% below 3500 feet... 50-70% above 3500 feet. Ridgetop winds: northwest to north 5-10 MPH Gust 15 MPH. Slope/valley winds: typical diurnal winds gusting to 18 MPH in the afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: Wildland Fire
FIRE NAME: Humboldt Complex	OPERATIONAL PERIOD: 08/16 (0700-0700)
DATE ISSUED: 08/15/2015	TIME ISSUED: 2100
UNIT: HUU	SIGNED: 
Typed/printed: Scott Jones	

INPUTS

WEATHER SUMMARY

Unseasonably HOT and dry conditions through mid-week.

TEMPERATURES: 90-98 below 3500' 84-90 above 3500' **RELATIVE HUMIDITY:** 12-22%

20 FT WINDS: (MPH)

RIDGETOP - Morning NE 4-8 gusts 12; Afternoon/evening SW 6-12 gusts 18, Overnight NNE 3-6 gusts 10.

SLOPE/VALLEY -Moring Variable/NE 3-6; Afternoon/evening up-valley 3-6 gusts 18; Overnight downslope/valley 3-6

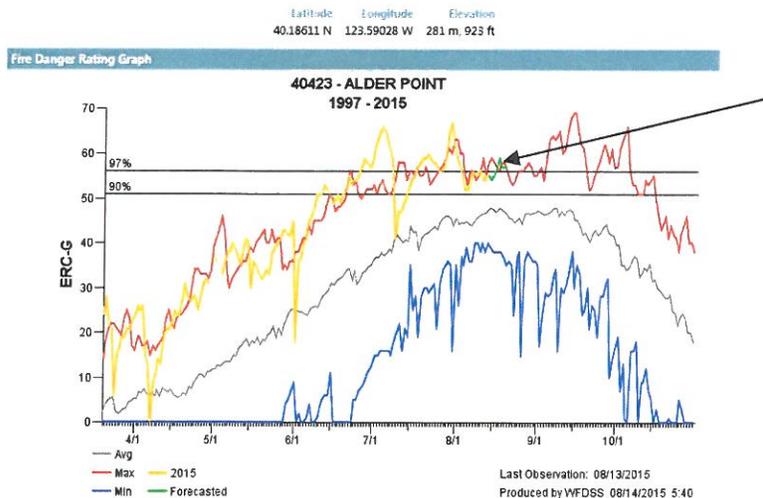

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Minimal levels of fire activity continue to be reported throughout the complex. The warmer wx and lower RHs with the wind shift did stir interior smokes. While there is ample fuel loads the opportunity for a re-burn has been reduced with the lack of ground to ladder fuels available to burn. ERC values still remain at or above the 97 percentile and are trending up. This number is also at or near Max levels.

In optimal alignment at the fire area an established fire in the Shrub Group; FWD ROS 25-50 ft/min, FL 8-15 ft. Lat ROS 5 ft/min FL 5 ft. Probability of Ignition 92%

Predicted Services is forecasting that with the 5-10 degree above mid August normal and increasing single digit RH values, overnight RH recovery will be generally lower especially for midslope and higher west side timber fire areas.

SPECIFIC:

Minimal levels of fire activity expected. Wind should not factor in creating an optimal alignment event however with the higher temps and lower RH sleepers may begin to become active. Should a sleeper establish respect the potential for short burst runs or increased activity.

AIR OPERATIONS:

Possible early morning clouds otherwise no expected limitations.

SAFETY

Work areas are in a drought stricken post fire landscape. Maintain situational awareness for root cavities, weakened trees and branches that could come down without notice and poor footing and rolling hazards.

Humboldt Complex

CA HUU 005606 August 16, 2015 0700-0700

AS OUR INCIDENT WINDS DOWN, WE CANNOT LET OUR GUARD DOWN AND LOSE SIGHT OF SAFE WORK PRACTICES. KEEP SAFETY IN YOUR MIND AND REFLECT IT IN YOUR ACTIONS!

For some personnel, Demob may mean a new assignment. Let's consider two of the 18 "WATCH-OUT" Situations:

- **In country not seen in daylight.**
- **Unfamiliar with weather and local factors influencing fire behavior.**

We'll combine a few of these words to get to: **Unfamiliar with the country.** When traveling through unfamiliar country, do not rely solely on a GPS unit for navigation advice. The GPS database may indicate that roads are navigable when they are not. The mountains of Northern California have many dirt-surfaced roads that will show up on your GPS unit appearing to be the shortest route from Point A to Point B. These roads may actually be abandoned or inaccessible. **They are dangerous if you are not familiar with their hazards.** They are typically overgrown and may be washed out in places. They may start out as a road but deteriorate into a single track that will not support your apparatus. If necessary to travel on these roads, scout the terrain on foot first!

SAFETY IS EVERYONE'S JOB, MAKE IT YOUR PRIORITY!

Humboldt Complex Safety Team

Hazard Tree Awareness

08/16/15

We are sad to report that a USFS firefighter died and another was injured on August 8th when they were hit by a hazard tree during initial attack on the Sierra Fire in the Lake Tahoe basin.

Hazard Tree Safety

Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazards.

Situational Awareness

Environment:

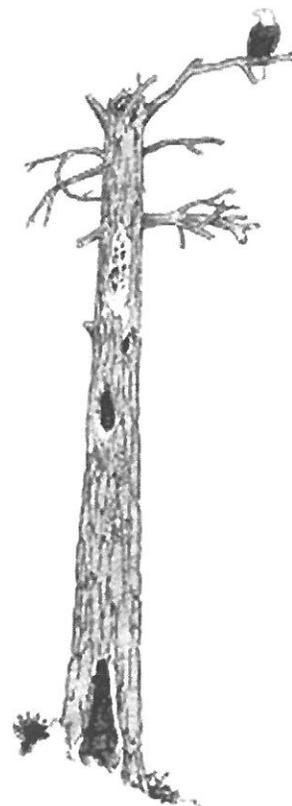

- Current and forecasted winds
- Night operations
- Steep slopes
- Diseased or bug-kill areas
- Number and height of hazard trees
- Anticipated burn-down time
- Potential for trees to domino into each other.

Tree Hazard Indicators

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs
- Accumulation of downed limbs
- Absence of needles, bark, or limbs – SNAGS!
- Leaning or hung-up

Hazard Control and Mitigation

- Eliminate the hazards with qualified sawyers or heavy equipment
- Establish a secure felling area, a minimum of 2 ½ times tree height
- Avoid hazards by designating “No Work Zones” (flag, sign, and map)
- Post a lookout
- Modify suppression tactics or fireline location to avoid high risk areas
- Fire proof potential hazard trees to prevent ignition
- Keep clear of bucket/retardant drops near trees/snags
- Reposition firefighters to secure/safe areas in response to high wind forecast
- Provide timely feedback to others regarding any hazard tree
- No one shall reenter the felling area until an “All Clear” is called by the sawyer
- Safety zones should be established, whenever possible, in the opposite direction of the planned fall, at a distance at least 2 ½ times the height of the tree being felled

MAINTAIN SITUATIONAL AWARENESS – LOOK UP AND LIVE!!

Prepared By (Communications Unit) *Robert Ellis* Robert Ellis, COML Incident Location

County - Humboldt | State - CA | Latitude - 40° 13.345 N | Longitude - 123° 87.035 W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed

MEDICAL PLAN

1. INCIDENT NAME

Humboldt Complex

2. DATE PREPARED

8/15/2015

3. TIME PREPARED

1900

4. OPERATIONAL PERIOD

8/16/2015
0700 - 0700

5. INCIDENT MEDICAL AID STATIONS

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - Line EMT / PM
 - Communications Unit
- **Communication Unit will clear command channel for emergency traffic**
- **Communications will switch all emergency traffic to CALCORD**
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on CALCORD
- Comm Unit will:
 1. Dispatch air/ground ambulance to as appropriate.
 2. If necessary, after patient pickup, dispatch ambulance to helibase for transportation
 3. Notify receiving hospital of injury status.

CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. In Camp Paramedic will respond to stabilize the incident.

INJURY REPORTING PROCEDURES

NATURE OF INJURY _____

LOCATION OF PATIENT _____

TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___

POINT OF PICKUP _____

LAT _____ LONG _____

PATIENT UNIT ID _____

REMINDER: DO NOT GIVE PT NAME OVER RADIO
IS AN EMT WITH PATIENT: YES ___ NO ___

AGE _____

SEX: MALE ___ FEMALE ___

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

Medical Unit (909) 234-7970

ICS 206 8-78

9. PREPARED BY (MEDICAL UNIT LEADER)

Kris Yeary, MEDL Steve Stone, MEDL
Kevin Fortney, MEDL *Steve Stone*

10. REVIEWED BY (SAFETY OFFICER)

Louis Sciocchetti, SOFR
Louis Sciocchetti

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

Attach Firing Operations Checklist to ICS-214

PUBLIC INFORMATION

Humboldt Complex Info phone number is **707 418-0411**

Please provide this number to the inquiring public for Fire Information.

Additionally, if you receive a question about the *Mad River Complex* (Pickett, Gobbler, Lassic, and Swayback Fires), or a question about any fire in the Mount Lassic Wilderness or near Ruth Lake, please provide the following:

USFS Information number is 707-574-6289.

LOGISTICS

Please utilize **commercial car washes only** for engine washing. There are commercial car washes in Eureka, Fortuna Redway and Garberville.

Instructions for Use of CDF 101 Property Certification of Location or Damage

Document Number: for use as a local number system or when attached to a FC-40 document.

Location / Incident Name: Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

Incident Number: Enter the appropriate incident number

Unit: Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

Region: Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.

Date: Enter the date the P.L. or D. was completed.

The following items were: Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property.

Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.

Date of Occurrence: Enter the date the property was broken, left on line or damaged.

Quantity: Enter the quantity for the line item.

Unit of Measure: Enter the unit of measure for the line item (example ea = each).

CDF Stock Number: Enter the PIN or stock number.

Description: Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

Property Number: Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.

Location of Items: Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

Remarks: Enter specific remarks here, how was the property damaged, what specifically is wrong with it.

Signature of Person Certifying Occurrence as Described:

Signature: The CDF Employee certifying the occurrence must sign.

Printed Name: Enter the printed name of the signature.

Title: Enter the title of the signature.

Date: Enter the date of the signature.

Unit Supervisors Approval:

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.

Comments: Supervisors may enter comments of approval or disapproval.

Signature of Unit Administrator: Signature of Unit Supervisor reviewing the certification described.

Title: Title of the signature.

Date: Date of the signature.

Notes:

This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.

This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to you local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.

FIRE SUPPRESSION REPAIR

HUMBOLDT COMPLEX: CAHUU-005606

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Group, shall be turned over to the local Unit or the Comp/Claims Unit.

Fire Suppression Repair needs should be reported as soon as discovered. To the extent feasible and with approval, repair work should start as soon as practical without conflicting with fire suppression actions. When feasible, construct waterbreaks (waterbars) on all dozer lines, handlines, and safety zones concurrent with line construction or mop-up operations. Remove trash and debris, including flagging and signs when no longer needed.

Repair Site Inventory

Field Observers and Fire Suppression Repair Group will assess the fire area for repair needs. All fireline resources are asked to contribute to this assessment by aiding in the development a complete evaluation of impacts and communicating them to the Fire Suppression Group.

Infrastructure Damage

Report the location and type of suppression damage to infrastructure. Common examples of such features include: fences, gates, culverts, bridges, watercourse crossings, water sources -including conduit and piping, utility distribution lines (above/below ground), and manmade barriers on roads previously closed but opened for suppression activities.

Natural Resource Damage

This category represents the repairing of existing problems caused by fire suppression activities and to prevent potential problems such as erosion caused by rainfall.

- Construct oversized waterbars where surface erosion in the form of riling/gullyng of the dozer line would occur and in areas where any erosion has the potential to enter a watercourse. Berm removal may be sufficient without constructing a waterbar where dozer lines generally follow the contour, naturally outsloped or where the topography allows immediate drainage of (winter) rainfall.
 - Cut waterbars diagonally with a minimum depth of 6” into existing grade with a 12” berm for a height of 18”. Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed onto the least erodible material possible.

Line or Road Gradient (%)	0-25%	>40%
Waterbar Spacing	100'	50'

- While performing repair on dozer lines, remove berms created by suppression activities unless berm is necessary to divert runoff from a sensitive site.
- Clean culverts and drainage facilities plugged with soil and debris by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and placed in a stable location away from the watercourse.
- Work within the vicinity of a watercourse and within 100 feet of a cultural site or other sensitive location should be performed by hand crews to avoid further damage. This applies to all direct and indirect lines.
- Construct drivable waterbars on unsurfaced roads when directed.

Cultural Site Damage

Flag site perimeter of known, found or suspected cultural site for identification. Report any disturbance to such a site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group immediately. Use the least disturbing suppression methods possible. Removing or disturbing any artifact is not permissible.

Comp Claims Issues

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, gates, road surfaces, etc.

TRAINING MESSAGE

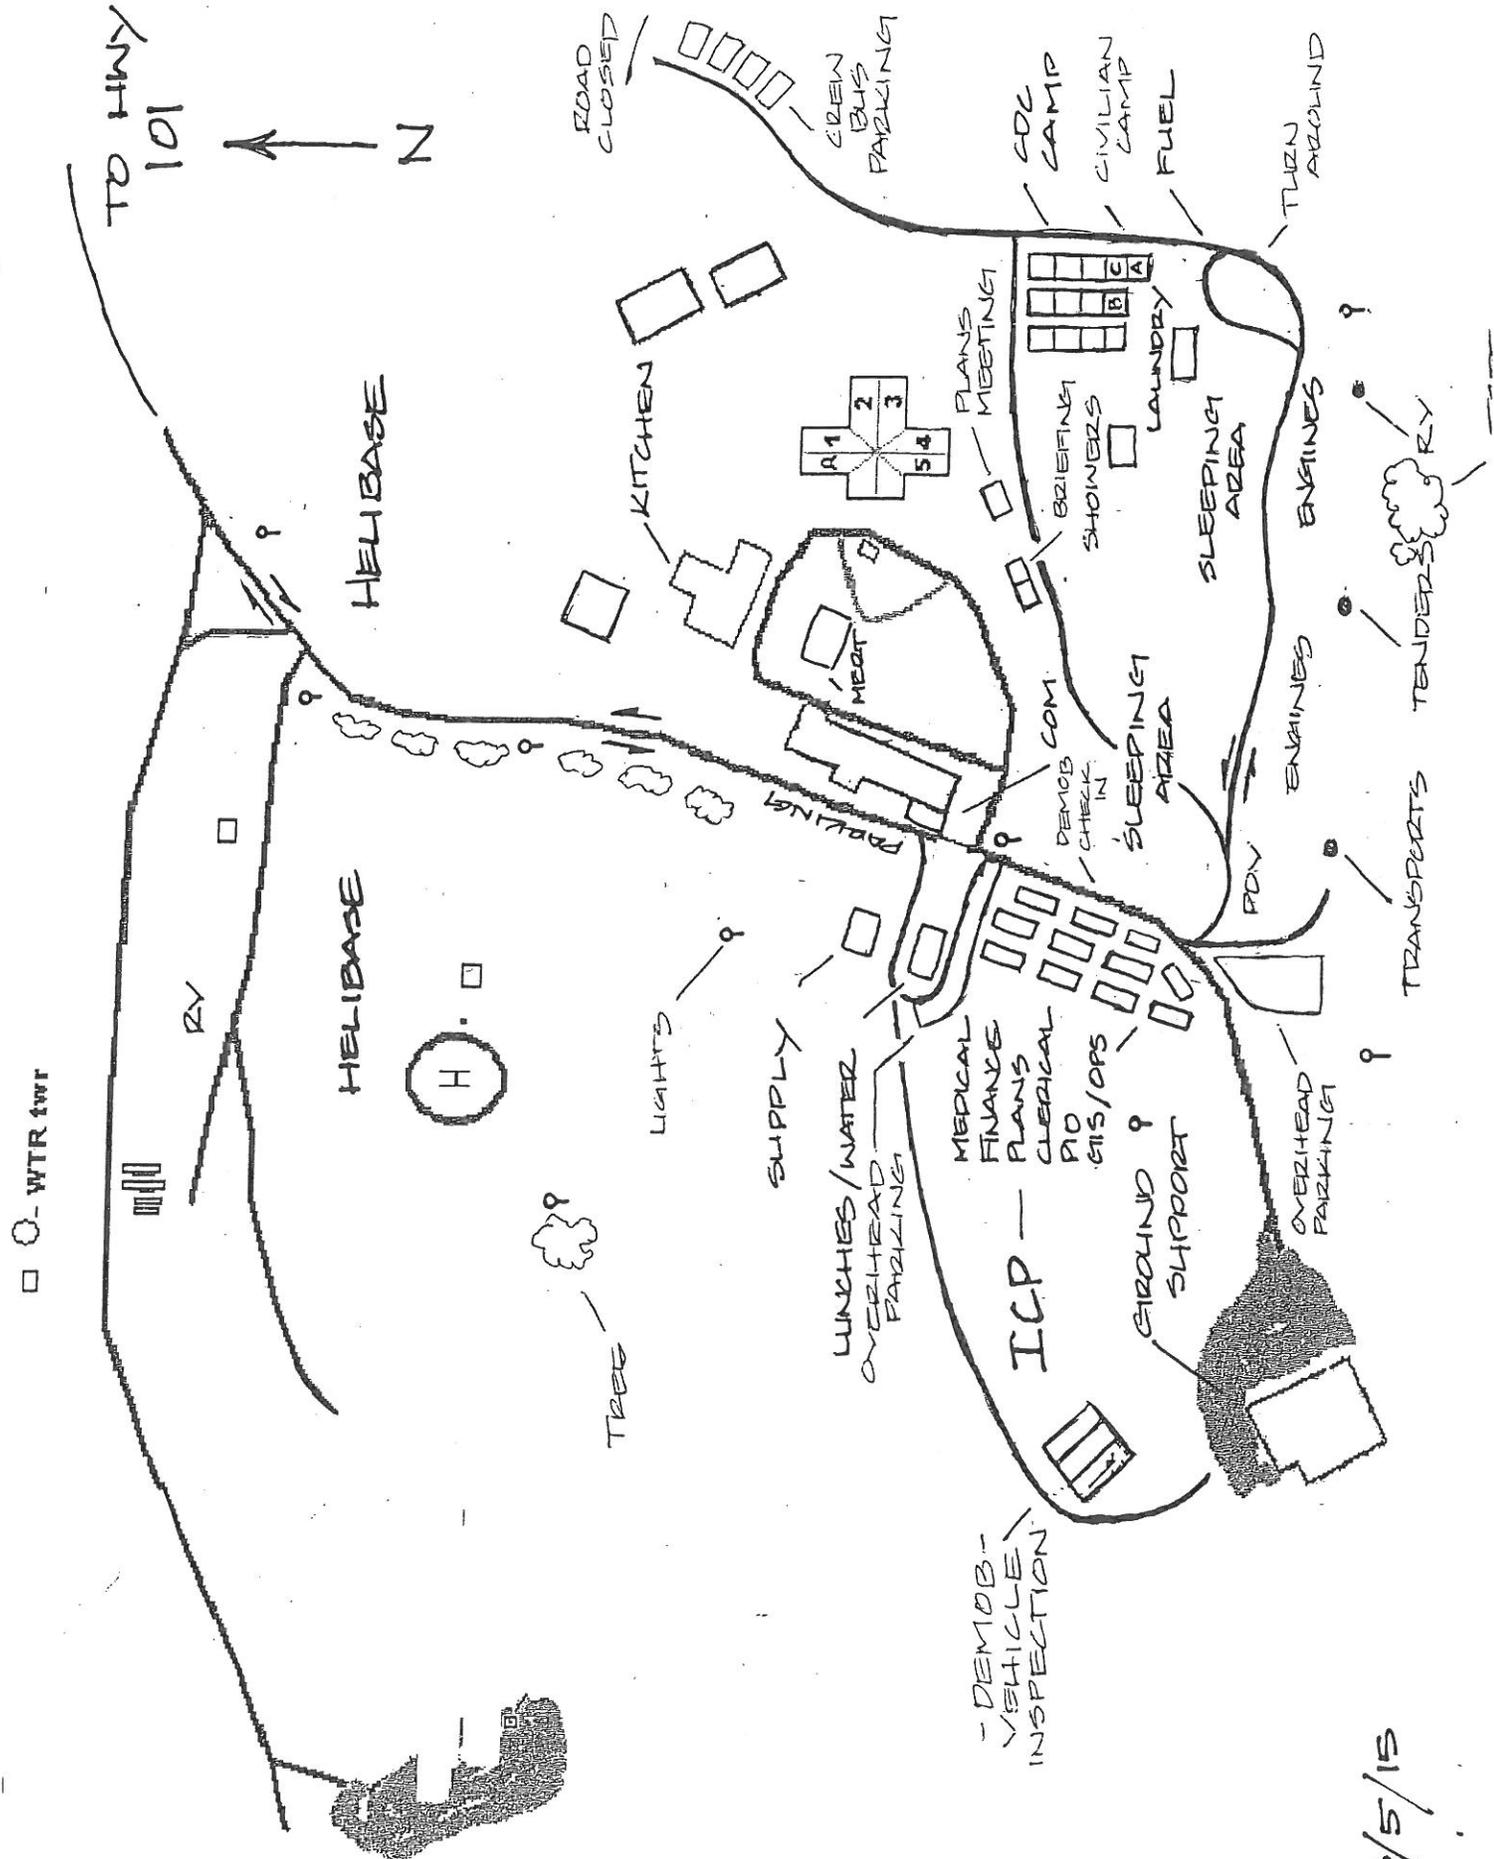

Training at the Humboldt Complex is as simple as one, two, three. . .

- 1.** Visit the Training Specialist at the Plans /SIT-STAT trailer as soon as you can. Bring your task book and qualifications card (if applicable).
- 2.** While on assignment, work with your evaluator to complete items in your task book.
- 3.** Wrap up with a performance evaluation then go to the Training Specialist at the Plans /SIT-STAT trailer. We will document your accomplishments.

Training Specialist Lynn Webb can be reached by phone as well @ 707-391-6754 to help with questions.
