SAFETY MESSAGE

August 7, 2015

10 & 18's Lookouts- Communications- Escape Routes -Safety Zones

Major Hazards and Risks:

TOPOGRAPHY!!! Many areas of the fires are in very steep terrain. Watch your footing be aware when working above other crews. ALWAYS watch for compromised trees and snags, **Look up** and **Live**.

WEATHER!!!! Carefully review and be familiar with the weather forecast. Be aware of changing conditions, lightning, wind shifts, increasing temperature, and decreasing humidity.

FATIGUE, DEHYDRATION AND HEAT EXHAUSTION!!! Get plenty of rest, watch for fatigue and mitigate, follow proper hydration procedures. Watch for heat illnesses make sure you pace yourself, good nutrition are also keys to wellness on the fire line.

Fire Behavior Know what your fire is doing at all times, observe personally and use scouts.

Driving Safety: Watch speeds on roads, there are tight turns, narrow roads and potentially unstable shoulders. We have had a few close calls with civilian drivers. Be careful moving your equipment to and from the incident and in tight spaces.

Chipper Safety: Brief your crews on the chipper safety sheet when using a chipper on the fire line.

Base Camp Safety: Watch out for tripping hazards in the base camp, Practice safe parking awareness use backing person when applicable.

Remember Fire activity sees the most injury on incidents **Conduct & Performance** is essential to your fire line safety; document your tailgate safety briefing.

Incident Location

County - Humboldt | State - CA | Latitude - 41 22.00 N | Longitude - 123 46.27 W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
