Salt Creek Incident

Operation Period: 08/03/2012 Night Shift

Emphasis on Attention to Detail

The Small Things Make a Difference

- **Stay focused on the small things that can compromise your safety**
- **Sometimes multiple small issues can develop into a major problem**
- **Mitigate small issues so they do not snowball into a major issue**
- **Communicate minor problems so everyone is aware**

Fireline Hazards: Steep terrain and difficult footing, hazards from rolling materials, working around heavy equipment, rattlesnakes and other environmental hazards, personnel fatigue, snags and fire weakened trees. If you come across any marijuana grows, stay clear and notify your supervisor.

Be sure all elements of your safety plan are in place prior to engagement

Snag Safety

Inspect area for snags before starting work. Are there trees that have been falling, leaning, hung up, or have broken tops? Are there high risk species? How long has the fire been burning in the area?

Identify hazards and fell or avoid the hazard and flag.

Take down snags only with qualified sawyers and then only if necessary.

Look Up, Look Down, Look Around During Mop Up

***Look Up:** Check the sky for any weather changes such as building or approaching thunderstorms, wind shifts or increasing in speed. Watch for air operations and water drops. Look for snags and the potential for rolling material.

***Look Down:** Watch your footing. Keep an eye out for snakes, bee's nests, Stump holes, and ash pits.

*** Look Around** Check for flagging identifying hazards in the area, and general terrain features. Keep an eye on fellow firefighters for signs of heat stress and fatigue.
