

Bar Complex Incident Action Plan

9/24/2006

Sunday

Day Operations

0700 - 1900

Night Operations

1800 - 0600

**Shasta-Trinity and Klamath National Forests
CIIMT 2 and SCSIIMT**

FIRE WEATHER FORECAST NO. 57

NAME OF FIRE: Bar Complex	UNIT: Shasta-Trinity & Klamath	PREDICTION FOR: Day/Night Shift
FORECAST ISSUED: 1900 PDT 9/23/2006	SIGNED: Mark Burger Incident Meteorologist	SHIFT DATE: Sun. 09/24/2006

WEATHER DISCUSSION: A weak area of low pressure will drift north to the central California coast by late today...resulting in a slight increase in relative humidity along with light, primarily slope-driven winds. Due to lighter winds, smoke dispersion will be less effective today compared to the last couple of days.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Sunny but increasingly smoky.

MAXIMUM TEMPERATURES: 1500-3000 ft: 78-83. 3000-4500 ft: 71-76. 4500-7000 ft: 61-69.

MINIMUM HUMIDITY: 1500-3500 ft: 18-23%. 3500-7000 ft: 16-21%.

20 FOOT WINDS:

LOWER SLOPES/DRAINAGES: Variable 3 to 6 mph until 1100 PDT...then upslope at the same speed. Afternoon southwest winds 4 to 9 mph through southwest to northeast oriented canyons.

UPPER SLOPES/RIDGETOPS: Southeast 4 to 9 mph until 1100 PDT...then variable at the same speed.

SMOKE INFORMATION: Smoke will persist in drainages later...with some areas possibly remaining obscured through the afternoon. Maximum upward extent of smoke around 9,000 feet MSL with little smoke drift.

WEATHER FORECAST FOR TONIGHT:

SKY/WEATHER: Clear but smoky.

MINIMUM TEMPERATURES: Drainages: 37-42. Mid-slope: 41-46.

MAXIMUM HUMIDITY: Drainages: 50-60%. Mid/upper slope: 35-45%.

20 FOOT WINDS:

LOWER SLOPES/DRAINAGES: Variable 3 to 6 mph until 1900 PDT except southwest 4 to 9 mph through southwest to northeast oriented canyons. Then...downslope 2 to 5 mph all areas.

UPPER SLOPES/RIDGETOPS: Southeast to south 3 to 7 mph.

OUTLOOK FOR MONDAY/MONDAY NIGHT: Mostly clear. Continued smoky with drift of smoke to the northeast. Highs 80-84 warmest locations...62-70 higher ridges. Cold in the drainages in the morning. Southeast to south ridge winds 3 to 7 mph in the morning...becoming southwest 4 to 9 mph in the afternoon. Upslope afternoon winds 5 to 10 mph in canyons and on slopes. Minimum daytime RH 19-24%. Maximum nighttime RH 40-50% ridges...higher in drainages.

ALMANAC:

Sunset tonight: 1906 PDT Sunrise tomorrow: 0703 PDT

FIRE BEHAVIOR FORECAST

FORECAST NUMBER #6	TYPE OF FIRE Wildland Fire
FIRE NAME North Bar (Branch IV)	OPERATIONAL PERIOD 9/24/06 Day
DATE ISSUED 9/23/06	TIME ISSUED 1930
UNIT Shasta-Trinity National Forest	SIGNED <i>Duane Weis/Dave Bartlett FBAN</i>

WEATHER SUMMARY:

Maximum Temperature: 61-69%
Minimum Relative Humidity: 16-21%
Ridgetop Winds: SE 4-9 until 11:00, then variable at the same speed
Midslope Winds: Variable 3-6

GENERAL:

Fire behavior will be active again today with continued drying of fuels. Expect continued activity in timber fuels with potential for torching and short upslope runs. Spotting potential will remain high, with probability of ignition reaching 75-80%, but a stable environment and light winds will restrict spotting distance to short range.

SPECIFIC:

Division J: Fire will continue to back slowly down slope in timber fuels. Spread rates will remain minimal in backing fire, but intensity may continue to increase slightly each day as larger fuels respond to dry conditions. The possibility of short upslope runs and torching will continue today.

Division K: Active fire behavior in the Mill Gulch drainage will continue today, but threat to containment lines in Division K remains minimal. Fire spread in this area will likely be of more concern to Division L, but should be monitored due to variability in winds throughout the day.

Division L: Areas of active burning in the Grizzly Creek drainage and Mill Gulch will continue to burn today. Fire intensity may respond quickly to changing wind directions throughout the day, but poor smoke dispersion will limit solar exposure and convection column development. These conditions should help minimize the chance of any major fire runs.

AIR OPERATIONS:

Visibility will likely be limited during the morning hours, and possibly throughout the day. While there may be some opportunity for air support at times, do not count on it today. Sunrise 07:00 Sunset 19:09

SAFETY

Watch for changing wind directions throughout the day which may cause rapid increases in fire behavior.

FIRE BEHAVIOR FORECAST

FORECAST NO.:2-6

NAME OF FIRE: Bar Cmplx So.

UNIT: CA-SHF 2120

DATE & TIME ISSUED: 09/23 2200 hr

PREDICTION FOR: 9/24/06 24hrShift

DATE : 09/23/06.

SIGNED: /s/ Dennis Burns

FIRE BEHAVIOR ANALYST

WEATHER SUMMARY: Sunny with low humidity

Winds: Day, SE 4-10mph, becoming SW. Night, S-SE 3-7mph.

Min. RH: 18-23% Valleys, 16-21% Upper Slopes. Max RH: 35-45%

Temperatures: Day 78-83 Night 37-46

ERC 89 just below 97th percentile, 1000hr FM 7%

FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

With the continued low RH the fire will remain active on slopes exposed to the sun. The fire will be primarily fuels and slope driven. Slope winds will determine spotting direction, so watch the column. Expect spot fires from rollouts and out 1/4mile. Single and group tree torching with some passive crowning is probable in dense stands where ladder fuels are present.

With the low RH expect the fire to remain active into the night along exposed ridges.

Probability of Ignition is 80-90%

SPECIFIC:

Branch I

- Expect mostly backing fire. Torching will continue to cause spot fire.
- Single and group tree torching in north Manzanita drainage is probable.
- With the dry conditions areas of heat will continue to show up.

Branch II

- The fire has crossed between Twin Sisters, fire progression will be to the NW.
- There is the potential for spot fires over Limestone Ridge.
- Smoke will obscure most of the Branch.

Branch VI

- Expect backing fire with minimal rates of spread in Hobo Grp.
- Single and group tree torching is still probable in the interior.
- Watch for spot fires from rolling material.

Air Operations: Smoke in the drainages possibly all day long to 9000ft.

SAFETY:

With the low RH spotting will continue to be a problem. Watch your column.

ORGANIZATION ASSIGNMENT LIST		9. Operations Section	
1. Incident Name NORTH BAR		PLANNING OPS	MARK KINGSBURY

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: BAR COMPLEX

DATE: 9-24-2006 Ops. Period: 0700-1900 DAY &
1800-0600 NIGHT

Major Hazards and Risks: Snags and Hazard trees, Rolling material, Transportation issues, Fatigue, rekindle and unburned areas. Open Range and wildlife. Changes in weather and fire behavior.

Fire Order of the Day – Initiate all actions based on current weather and expected fire behavior

Narrative: Always stay alert for hazard trees and rolling material, watch where you work, drive and park. Be very defensive while driving, watch out for rocks in the road, cattle and other wildlife. Pay special attention while driving in and out of camp and communities. Lookout for other drivers, and always drive with your lights on. With the change in the weather, the fire behavior will also change, make sure your L.C.E.S. is still valid, reassess whenever necessary. With the change in weather, smoke issues may arise, lookouts may be compromised. Monitor camp personnel and firefighters for fatigue and health problems, rotate assignments if possible.

Watch Out Situation of the Day

11. UNBURNED FUEL BETWEEN YOU AND THE FIRE

Look Up, Look Down, Look Around

***Look Up:** Check the sky for any weather changes such as building or approaching thunderstorms, wind shifts or increasing in speed. Watch for air operations and water drops. Look for snags.

***Look Down:** Watch your footing. Keep an eye out for snakes, bees nests and observe fine fuels on the ground.

*** Look Around** Check fuel loading in the area, general terrain, current fire behavior and ladder fuels. Keep an eye on fellow firefighters for signs of heat stress and smoke inhalation.

Incident Safety Officers: Howard Rayon SOF1, Marc Nelson SOF1, David Brown SOF2(T)

Human Resource Message

Thought for the Day

Communication Skills

Working in emergency incident situations is no simple task. Nor is the process of communicating. The most important communication skill is:

LISTENING!

To improve your skill in proactive listening remember:

TWO EARS, ONE MOUTH, LISTEN TWICE AS MUCH AS YOU SPEAK!!

Incident Human Resource Specialist is: Gary Cole (801-721-9992)

Location: ICP Junction City or near the briefing area

**From the North and South Bar offices of the
Training Specialist**

Trainees that have not checked in with the Training Specialist need to do so, so that we can document your training on this incident. **Remember, if it is not in writing, it did not happen!**

Trainees and Trainers that are near the end of their training assignment can come in to start their closing documentation and beat the rush.

Thanks,
Hal Nolan, TNSP
Bruce Hasek, TNSP
Rick Wennekamp, TNSP (t)

MULE PROTOCOL

Safety standards while working around Mules.

- 1. Do not leave slings & sling loads in the trail, move them to off the trail out of site of the mules.**
- 2. All people, tools, packs, chain saws, put on the down hill side, get away from the trail.**
- 3. Talk to the Packers in a normal tone(loud noises can scare the mules).**
- 4. Avoid sudden movements around the mules.**
- 5. DON'T FEED THE ANIMALS!!!!!!!!!!!!**
- 6. Don't pet the animals without the packers permission (NEVER PET THE HEAD).**
- 7. Packers cannot leave the animals to scout a line.**
- 8. Remember if you encounter the Packers with trailers on the road, they cannot stop fast. It could injure the animals. Give the Packers the right away.**
- 9. Animals don't go on the fireline, only the trails.**
- 10. Mules and Horses have the right away on the trail.**
