INPUTS

WEATHER SUMMARY:

Morning inversion will cause smoke and haze to linger in the valleys and drainages, lifting by 1100. Seasonable temperatures throughout the work period. North winds shifting to the West in the afternoon. Amount of night time Relative Humidity recovery is greatly dependent on your location. The Marine Layer will become established by 2200. Elevations above 1800 ft will see lower humidity levels (20% RH) than other areas around the fire. Lower levels can expect between Humidity to be 45 -100%.

Max. Temperatures - Lower elev. 88-95 degrees Ridges 76-81%

Min. Humidity - Lower elev. 20-30% Ridges 35-50%

Winds(Eye Level)- *Morning:* Downslope/Downvalley 4 mph. *Ridgetops* Northwest 4-8 mph.
Afternoon: Upcanyon/Upslope 4-8 mph. *Ridgetops* West 5-10 mph gusts to 15 mph.
Evening: Downslope 5 mph. *Ridgetops* Northwest 4-8mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Multiple drainages are in alignment with the prevailing winds. These will funnel the winds with increased intensity, and contribute to an increase in fire spread in those drainages.
- Hold over spot fires and fingers will be hard to locate in the dense fuel stands, and heavy brush.
- Overnight fire intensity may remain active above the inversion layer at 1800 ft.
- Expect erratic winds in the area to the East of the FAA Radio Facility due to the "Horseshoe" drainage found around the "2400 Mountain".

SPECIFIC:

All Divisions: Spot fires outside established containment lines or new starts...

Flame Lengths- Up to 7 ft. in Grass, Up to 20 ft. in Brush, Up to 80ft from the tops of torching trees.

Rate of Spread- Up to 40 feet/minute in Grass, Up to 90 feet/minute in Brush

Spotting Distances- Up to .3 miles in Grass/Brush, Up to .2 miles in Torching Trees

Probability of Ignition- Unshaded Fuels **70%** at the peak of the burn period;

AIR OPERATIONS:

Expect clean air by 1100. Mixing heights will again rise to 5,000 AGL during peak daytime heating. Anticipate terrain induced turbulence in areas with complex terrain; especially during times of plume development.

Sunrise- 6:15 **Sunset-**7:34

SAFETY

Fire weakened timber will continue to fall and produce roll-out in the drainage bottoms.

LOOK UP, LOOK DOWN, LOOK AROUND.

Post lookouts that can monitor both fire activity and changing weather patterns.

SAFETY MESSAGE ***CUESTA***

FATIGUE

CREWS ON THE ROAD FOR MULTIPLE FIRES AND MULTIPLE DAYS

Watch Out

- Impacts situational awareness
- Impacts work performance
- Impacts general safety

Mitigation

- Brief crews specific to the special instructions in 204 to divisional assignment
- Implement the buddy system
- Utilize the proper work rest cycle

KILLER TREES

DROUGHT STRESSED TREES IN FIRE AREA

Watch Out

- Working in and around large oak trees
- Be aware of snags
- Fire weakened trees

Mitigation

- Be vigilant when around trees
- Post lookouts
- Isolate KILLER trees with red and white, “three stripes you’re out” flagging

FIRE BEHAVIOR / WEATHER

HISTORY OF WIND SHIFTS IN FIRE AREA

Watch Out

- Wind increasing and or changing direction
- Unfamiliar with weather and local factors influencing fire behavior
- Weather becoming hotter and drier

Mitigation

- Keep informed on fire weather conditions and forecasts
- Base all actions on current and expected fire behavior
- Know what your fire is doing at all times

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the RX and TX reversed.

PUBLIC INFORMATION SECTION

SOCIAL MEDIA POLICY

Incident Information Line: (805) 543-2444

Incident Media Line: (562) 619-7467

MEDIA - The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede mitigation of the incident or the disturbing of evidence.

- The Media is NOT permitted on private property without the property owner's permission.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be direct the questioning party to the incident PIO.
- Do not speculate or give opinions.
- There is no such thing as an "off the record" comment.

INCIDENT SOCIAL MEDIA POLICY, – Public agencies, the media, as well as the public are increasingly using social media. This form of communication continues to grow rapidly in order to supply the instant gratification needs of society. All resources assigned to this incident will adhere to the Incident Social Media Policy.

There will be no posting of:

- Inappropriate information or materials
- No opinions
- No endorsements
- Do not post inappropriate pictures or videos
- If you are uncertain, don't post

PICTURES AND VIDEO OF INCIDENT – Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and/or photographs, and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo, or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND – The Information Section will manage Lost and Found items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information.

MAIL SERVICE – The Information Section will assist you in getting items mailed from the incident as well as receiving letters and packages.

TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident. We are located downtown next to the cloning trailer.

All federal, state and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

Remember to register trainees early on and bring your task book with you.

Performance Evaluations will be required to complete the process.
