Soberanes Fire Weather Forecast

FORECAST NO: 10

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Tue-0700 Wed

UNIT: CA-BEU/LPF

SHIFT DATE: 8/2-8/3

SIGNED:

TIME AND DATE

**Incident Meteorologist- Ryan Walbrun
NWS-Bay Area**

FORECAST ISSUED: 1900 8/1/16

Ridge winds turning Westerly today

WEATHER DISCUSSION: The marine layer will remain between 2000 and 2500 feet with cool and moist conditions below that elevation. As the inversion layer slowly mixes out this morning, humidity readings will briefly rise as the moist air mixes upwards before the afternoon drying occurs. For the first time in nearly a week the *ridge top winds are forecast to turn westerly and then northwest by tonight*. Warm and dry conditions will continue above the marine inversion layer which should be favorable for the Firing Group. However ridge winds could be adverse to the line in Branch II. Afternoon seabreeze and upcanyon winds will be strongest from around 2 pm to 8 pm for most divisions. Night operations should expect rapidly lowering humidity values, from 10-20% during the overnight hours with ridge winds turning northwest.

WEATHER FORECAST FOR Tuesday:

WEATHER: Fog and clouds coast and Carmel Valley Rd clearing back to Hwy 1. Otherwise widespread smoke except full sunshine Sur Zone south of Pico Blanco.

TEMPERATURES: 77-86 smoky areas below 2500 feet. 90-95 full sunshine above.
65-75 along Hwy 1 in Branch 9.

HUMIDITY: Afternoon minimums 18-28% above 2500 feet inland Divisions. 55-70% Branch 9.

20 FT WINDS:

RIDGETOP - West 5-10 mph afternoon gusts 12-15 mph. Except southerly 5-10 mph along Hwy 1 with gusts 15-20 mph in Branch 9.

SLOPE/VALLEY - Becoming upcanyon 2-5 mph afternoon gusts 10-12 mph.

Marine Layer: 2000-2500 feet...deepest along Hwy 1.

WEATHER FORECAST FOR Tuesday Night:

WEATHER: Areas of smoke otherwise clear. Mild and dry with low humidity hills except clouds on the coast.

TEMPERATURES: 65-75 above 2500 feet. 51-58 along Hwy 1 and up Carmel Valley.

HUMIDITY: Poor recovery 20-30% above 2500 feet...locally 10-20% around 2500-3500 feet late.
Good recovery 70-90% lower slopes Branch 9 along the coast.

20 FT WINDS:

RIDGETOP - Northwest 5-10 mph...strongest evening hours.

SLOPE/VALLEY - Evening upcanyons 2-5 mph...becoming downcanyon 1-4 mph overnight.

Marine Layer: 2000 to 2200 feet.

Extended Forecast: Cooling trend Thu-Sat. Marine layer up to 3000 feet deep. West to Southwest winds.

Portable RAWS 163.350 Tone 0031 for Botchers Gap, Tone 0034 Pinyon Peak,
Tone 0035 White Rock, Tone 0029 for Blue Rock, Tone 0038 Chews Ridge, Tassajara Hot Springs 0039.

OUTPUTS

FIRE BEHAVIOR

GENERAL

ENERGY RELEASE COMPONENT OF THE NFDRS IS FORECAST TO BE 76 TODAY. THE ERC IS LOWER THAN IT HAS BEEN SINCE THE DAY THE FIRE STARTED, HOWEVER IT IS STILL ABOVE THE 90TH PERCENTILE. FINE DEAD FUEL MOISTURE RANGES FROM 3% ON SOUTH FACING SLOPES IN THE SUN TO 8 IN THE SHADED DRAINAGES. LIVE FUEL MOISTURES ARE NEAR CRITICAL LEVELS. IN ADDITION DUFF MOISTURE CONTENT IS ALSO EXTREMELY LOW. PROBABILITY OF IGNITION RANGES FROM 40% IN (SMOKE) SHADED AREAS TO 88% IN THE SUN ON SOUTH SLOPES. THE FIRE IS IN THE BASIN/MARBLE CONE BURN FOOTPRINT AND THERE ARE HEAVIER FUELS THAN WOULD BE EXPECTED FOR AN AREA THAT HAS BURNED TWICE IN 40 YEARS. THERE ARE MANY DOWN LOGS, BRUSH SKELETONS AND SNAGS INSIDE THE OLD BURN. SMOKE REDUCES VISIBILITY SO IT IS DIFFICULT TO LOCATE THE FIRE EVEN WHEN IT IS NEAR.

SPECIFIC

CARMEL ZONE

BRANCH I
DIVISIONS A, B, C, F
FIRE ACTIVITY IN THESE DIVISIONS IS QUIET. A AND B MAY BE IN PATROL STATUS SOON. C AND F ARE STILL ACTIVE IN HEAVIER FUELS BUT HAVE SLOWED OR STOPPED FORWARD PROGRESS. SOME INTERIOR ISLANDS BURNING MAY NEED TO BE WATCHED OR EXTINGUISHED. ROLL OUT WILL STILL BE A HAZARD.

BRANCH II
DIVISIONS G, H, I, J AND FIRING BRANCH
FUELS IN THE FIRING AREA ARE A MIX OF BRUSH, GRASS OAK UNDERSTORY. THE BRUSH ON THE OPEN RIDGETOPS WILL PRESENT THE GREATEST ENERGY PRODUCER AND WILL HAVE TO BE FIRED SO THAT A BACKING FIRE RESULTS. MODERATING HUMIDITY WILL KEEP THE FIRE ON THE GROUND IN UNDERSTORY IN THE OAKS. WATCH FOR TURBULENT AIR FLOW NEAR THE FORMER LOCATIONS OF THE LOS PADRES AND CLEMENTE RESERVOIRS. MAXIMUM SPOTTING DISTANCE FROM THE CLEMENTE RIDGE AND 0.2 MILES. RIDGETOP WINDS FROM THE WEST MAY BE A PROBLEM IN DIVISION I AND J.

BRANCH III
DIVISIONS K, L, M
FIRE CONTINUES AN EASTERN MOVEMENT ABOUT A HALF MILE A DAY. HEAVY DROUGHT STRESSED FUELS ARE RESPONSIBLE FOR HOW THE FIRE IS MOVING ON THE RIDGES. FIRE IS AN UNDERSTORY LOW INTENSITY CREEPING FIRE.

SUR ZONE

BRANCH VIII
DIVISIONS N, O, P
THE FIRE IS ON THE EDGE OF THE SOUTH FORK OF THE LITTLE SUR RIVER IN SEVERAL PLACES. A SLOPE REVERSAL RUN TO THE SOUTH IS POSSIBLE TOWARD THE POST SUMMIT AND THE OLD COAST ROAD. THE FIRE IS CHECKED UP ON DANI RIDGE BY RETARDANT.

BRANCH IX
DIVISIONS S,T,X,Z
THE FIRE CONTINUES TO BE ACTIVE IN VERY HIGH HUMIDITY ALL HOURS OF THE DAY AND NIGHT WITH LOW INTENSITY UNDERSTORY FIRE IN COASTAL BRUSH. FIRE CREEPS THROUGH DEEP DUFF. PERSISTENT DROUGHT AND HIGH DEAD FRACTION IN THE BRUSH IS ALSO A FACTOR. THE FIRE WILL CROSS WET CREEKS AND DRAINAGES.

AIR OPERATIONS:

SMOKE STILL A PROBLEM DURING THE DAY ON MANY PARTS OF THE FIRE.

SAFETY

- YOU MAY HAVE TO MONITOR THE STATUS OF THE COLUMN BY USING AIRCRAFT REPORTS. NOTE ANY CHANGES IN THE SMOKE SHIELD FROM BELOW FIRING OPERATIONS, AS THE FORMATION OF A HOLE OR "DRAIN" MAY INDICATE THE FIRE IS ABOUT TO VENT ITSELF
- MAKE SURE YOU CAN SECURE YOUR EXIT IF A TREE FALLS ACROSS, OR HAVE AN ALTERNATE.
- MONITOR THE WEATHER 24 HOURS FOR THE MOVEMENT OF THE MARINE INVERSION AND THE LOCATION OF THE THERMAL BELT. THE LOWEST HUMIDITY AND HIGHEST TEMPS WILL BE NEAR THE TOP OF THE MARINE LAYER.

SAFETY MESSAGE

FIRE BEHAVIOR

Watch Out

- Fuels are dry from being drought stricken and are receptive to fire spread
- Inconsistent weather pattern alters the relative humidity's and winds
- Chimneys, Box Canyon, Shoots and Saddles

Mitigation

- Know the weather forecast and review with your crews / Plan accordingly
- Request spot weather forecasts / Take onsite weather
- Look-Outs, Communications, Escape Routes, Safety Zones (LCES)

VEHICLE STAGING

HOT EMBERS CAN DAMAGE TIRES AND CAUSE THEM TO CATCH FIRE

Watch Out

- Caution when operating in locations previously burned
- When staging apparatus and smaller vehicles in burned areas
- STUMPHOLES ; Retain a significant amount of heat

Mitigation

- Avoid staging vehicles in recently burned areas
- Thoroughly water down areas recently burned prior to staging vehicles
- LOOKOUT for areas tree roots have burnt out and developed STUMPHOLES

AIRCRAFT

Watch Out

- Fixed wing aircraft working on your division
- Rotor wing aircraft working on your division
- Water and retardant drops

Mitigation

- PREPARE for retardant drops and avoid being near Hazard Trees prior to the retardant impacting them
- COMMUNICATE to Air Attack of the accuracy and effectiveness of the drops on your division
- BE AWARE of the wind changes due to rotor wash and turbulence following retardant and water drops

Note: Anyone who witnessed or has firsthand information of the dozer roll over resulting in a fatality, and was not interviewed by the SART, please contact Chris Carrera at 951-757-5932

Douglas M. Ferro
TEAM SAFETY OFFICER

AIR OPERATIONS SUMMARY ICS-220

Incident Name Soberanes	Sunrise 610	Startup 640	Cutoff 1939	Sunset 2009
General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc. TRACK ALL DIP SITE LOCATIONS / NUMBER OF DIPS / GALLONS TAKEN. TRACK ALL DROP LOCATIONS / NUMBER OF DROPS / GALLONS DROPPED ALL GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES FORMAT. AVOID Aerial Application of Retardant / Foam / Agent within 300' of Waterways, Bodies of Water, etc. If Retardant / Foam / Agent is Dropped Within These Areas Immediately Notify the AOB/D and Provide the Following Information: Lat / Long, Estimated Number of Gallons and a Map Detailing The Area.

Incident Location

5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

Prepared By (Communications Unit)
Austin L. Browne (COML)

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Kx and Ix reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

Incident Location

5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

Prepared By (Communications' Unit)

Austin L. Browne(COML)

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: CALCORD

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 - Closest EMS resource
 - Communications Unit
- Communications Unit contacts:
 - Ground or Air ambulance as requested
 - Operations
 - Safety
 - Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

INCIDENT BASE EMERGENCY:
Contact Communications on CDF CMD 2 with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
 - Medical Unit
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor
 - Comps/Claims

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at <http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1>

CAL FIRE SOCIAL MEDIA POLICY – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at <http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf>

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email Soberanesfire2016@gmail.com

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

TRAINING SPECIALIST

MESSAGE

A Training Specialist is available for trainees on the incident. Get registered early!!!

All federal, state and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

Drop off boxes located @ Pfeiffer, Carmel & Toro ICP's.

Complete Trainee Data Form & place in Drop off box.

Upon Demob, This will be your last opportunity to check out with the Training Specialist @ Fort Ord.

Jonathan White 562-324-1811

Aaron Grove 530-394-8094

**Human Resource Message
Soberanes Fire
August 2, 2016**

The word for today is APPROPRIATE:

- appropriate ACTIONS;
- appropriate BEHAVIORS;
- appropriate COMMENTS.

Inappropriate behavior (name calling, swearing, put-downs, harassment, etc) will not be tolerated, and if you are found to have engaged in this type of behavior, you could find yourself with an immediate ticket home.

We all deserve a workplace that is free from harassment. Together we can create and sustain a great camp community. Thank you for all your hard work towards this effort.

“BULLIES”

- Display abrupt and intimidating behavior
- May use abusive language
- May become loud angry or hostile
- Overwhelm you with their presence

DON'T BE A BULLY!!!

**HR Office is located in the Quonset Hut (tent) #15 at ICP
HR (Fire) Specialist: Mary McDonough 559-593-3905
HR (Fire) Specialist (T): Tosha Coney 209-681-3096**

DEMOB

SOBERANES INCIDENT CA – BEU – 003422

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- Strike Team Leaders and/or Overhead personnel report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader.

*Engines should remain at the Camp assigned to, until STEN advises their resources to depart to vehicle inspection. If the Strike Team has supplies and/or equipment checked out, the strike team leader should return the supplies. If needed, an engine may accompany the strike team leader.

- Prior to reporting to Demob (ICP – Toro Park):
Please return all supplies and equipment.
- Resources will get signatures from the following units:
 - Motels
 - Supply
 - Ground Support
 - Weed Wash
 - Training (If they have a trainee)
 - Communications
 - Documentation
 - Time
 - Demob
- Vehicle Inspection will be completed at Fort Ord (Ground Support).
- All CAL FIRE and Federal employees will complete their “Time” at ICP (Toro Park). Then if needed, will report to vehicle inspection and weed wash. After vehicle inspection they will report to Demob to turn in their ICS #221, located adjacent to Ground Support.
- All Local Government employees will complete their “Time” with the OES representative located adjacent to Ground Support.
- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.

GROUND SUPPORT

- Highway 68 East
- Exit Reservation Rd
- Turn Left and follow Reservation Rd
- At Inter-Garrison Rd turn left
- At “T” intersection turn right (still Inter-Garrison Rd)
- Turn left onto 8th St
- Immediate right on A St
- SIGNS ARE POSTED ALONG ROUTE

DEMOB / TRAINING / OES

- Exit Ground Support
- Turn Right on 8th St.
- First Left into driveway
- Park apparatus
- Report to DEMOB tent

FIRE SUPPRESSION REPAIR PLAN SOBERANES FIRE: CA-BEU-003422

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

Archaeological or Historic Sites

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE: Yellow and black stripped & Orange and black stripped
 U.S.F.S. Yellow and black stripped tied with blue
 Santa Lucia Preserve: White and blue tied together & Yellow and black stripped

Waterbreaks/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

Archaeological and Historical Sites Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Wilderness Special Instructions – Resource Advisor

DOZER LINES - DIVISIONS K, M, & P

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.

Wilderness Minimum Impact Suppression Tactics (MIST)

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

FIRELINE CONSTRUCTION PHASE:

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

HELISPOT CONSTRUCTION:

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.
