SOBERANES FIRE

CA-BEU-003422

Plata 1311

OPERATIONAL PERIOD

WEDNESDAY AUGUST 3RD 0700
to
THURSDAY AUGUST 4TH 0700

CORRECTED

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Soberanes	2. Operational Period: Date From: 8/3/16 Time From: 0700	Date To: 8/4/16 Time To: 0700

3. Objective(s):

Management Objectives

- Provide for and maintain public and first responder safety by utilizing the incident safety analysis process.
- Protect all critical assets at risk to include the redwoods, historical assets within the affected area, infrastructure and improvements, watershed, and transmission lines.
- Utilize tactics that promote protection of sensitive natural and cultural resources in the Ventana Wilderness.
- It is the Unified Incident Commander's Leader's Intent to ensure collaboration at all levels of the incident.
- Be financially responsible for all management and fire suppression tactics.
- Foster and enhance community and political relationships.
- All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Monterey County.

Control Objectives

- Keep the fire North of the Nacimiento-Fergusson Rd
- Keep the fire South of Huckleberry Hill
- Keep the fire West of Carmel Valley and Reliz Canyon
- Keep the fire East of Hwy 1 in the North and the Coast Ridge in the South

4. Operational Period Command Emphasis:

Perimeter Control , Structure Defense, Improve Contingency Lines, Hold and Improve Existing Control Lines

General Situational Awareness

S. T. O. P. Stop Think Organize Proceed

5. Incident Action Plan (the items checked below are included in this Incident Action Plan):

6. Work Assignments:

Identify and report all hazard trees to Group Supervisors for assessment and mitigation.

Prepare structures for protection.

Implement firing operations and utilize defensive firing tactics to minimize intensities.

****All Resources assigned to Boy Structure are on a 12-Hour shift.**

7. Special Instructions:

Review and understand medical evacuation plan.

Maintain slow speeds when accessing the fireline, use low gears and exhaust brakes to prevent brake fade.

The Communications Plan is complex; please review the ICS 205 with all Division personnel.

High frequency of tree fall; use extreme caution.

Fireplans: Ensure all line personnel in group are notified and the Go-No-Go check list is utilized.

8. Communications (radio and/or phone contact numbers needed for this assignment):

Soberanes Fire Weather Forecast

FORECAST NO: 11

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Wed-0700 Thu

UNIT: CA-BEU/LPF

SHIFT DATE: 8/3-8/4

SIGNED:

TIME AND DATE FORECAST ISSUED: 1900 8/2/16

Incident Meteorologist- Ryan Walbrun
NWS-Bay Area

WEATHER DISCUSSION: The marine layer will be around 2000 feet but may lower to 1500 feet in Branch II. Ridge winds will remain from the west to northwest and align with the afternoon seabreeze that spreads up Carmel Valley after 1400 hours. Temperatures will remain warm above the marine layer with continued low humidity readings. This pattern will keep most of the smoke over the Seco Zone which will be out of the Carmel Valley helibase but may impact Miller helibase. Winds will ease after sunset with the marine layer at least 2000 feet deep. Humidity values may stay a little higher than previous nights as an upper low approaches which will deepen the marine layer and bring a slightly wetter airmass to the region.

WEATHER FORECAST FOR Wednesday:

WEATHER: Low clouds and fog pulling back to the coast by 10 am...otherwise sunny except smoke in the Seco Zone.

TEMPERATURES: 80-90 degrees above the marine layer. 70 along Hwy 1.

HUMIDITY: Afternoon minimums 18-28% above 2000 feet inland Divisions. 50-65% Branch 9 along the coast.

20 FT WINDS:

RIDGETOP - West 5-10 mph afternoon gusts 12-15 mph...except gusts 20 mph Branch 9.

SLOPE/VALLEY - Becoming upcanyon 2-5 mph afternoon gusts 10 mph.

Marine Layer: 2000 feet Highway 1...locally only 1500 feet upper Carmel Valley.

WEATHER FORECAST FOR Wednesday Night:

WEATHER: Clear except clouds along the coast and in Carmel Valley. Smoke over the Seco Zone.

TEMPERATURES: 62-72 above 2000 feet. 51-58 along Hwy 1 and up Carmel Valley.

HUMIDITY: Good recovery below 2000 feet 70-90%...25-40% above 2000 feet.

20 FT WINDS:

RIDGETOP – Northwest 5-10 mph til sunset...then 5 mph overnight.

SLOPE/VALLEY – Evening upcanyons 2-5 mph...becoming downcanyon 1-3 mph overnight.

Marine Layer: Deepening to 2500 feet overnight or towards dawn Thursday morning.

Extended Forecast: Cooling trend Thursday through the weekend as unseasonably deep upper low approaches the region. Marine layer up to 3000 feet deep. Ridge winds from the west but continued light 5-10 mph. Better night time humidity recovery with cooler daytime highs in the 70s and 80s with lows in the 50s and 60s.

Portable RAWS 163.350 Tone 0031 for Bottchers Gap,Tone 0034 Pinyon Peak, Tone 0035 White Rock, Tone 0029 for Blue Rock, Tone 0038 Chews Ridge, Tassajara Hot Springs 0039.

INPUTS

WEATHER SUMMARY ***A change in wind direction may increase fire behavior. PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST***

OUTPUTS

FIRE BEHAVIOR

GENERAL

Fire activity is likely to increase under clearer skies and dryer fuels. Fire activity above the marine layer (2000ft) will continue to be heavy, making good upslope runs especially on south aspect slopes. Fire movement below the marine layer (2000ft) will be less, with more of an understory burn with moderate intensity. Monitor the moving marine layer and how it will affect your fire behavior in relation to your elevation. The fire is burning into the scar of the Basin Fire(2008) but fuel loading is supporting critical rates of spread and mid range spotting. Expect fuels on the North aspect to continue to burn the timber understory but transition to crown is possible. **ERC will be in the 97th percentile this operational period** and situational awareness must be used the whole shift. Indirect line construction or smokey conditions may make it difficult to see the main fire and **reaction time to escape routes** must be planned accordingly. The fire is burning in a mix of brush, grass and timber understory; fuels will vary by slope and aspect. Low nighttime RH recovery will continue to support active fire after midnight. Look for shifting winds at the confluence of creeks and drainages.
Probability of Ignition =88% Spotting Distance= 1/3 mile ROS in Brush 33ch/h ROS in Timber Understory 12ch/h
Fine Dead Fuel Moisture = 3-5% Energy Release Component in the fire area are at the 97th

BRANCH I
Divisions A, B, C, F
Fire activity should be low in this branch and isolated to interior islands and heavy interior fuels. Look for any potential rollout as heavy interior fuels burnout or snags with heat that fall across control lines.

BRANCH II
Divisions G, H, I, J
Winds should be favorable for burning operations in this branch. Look for wind influence or chance in wind direction if the main fire intensity increases and starts to affect the burn operation. Solar radiation will heat the fine fuels and the potential for spots will increase. The fire should have moderate to dangerous rates of spread where slope and drought stressed fuels align. Some sustained crown runs have been observed and but mostly rollout and slope reversal runs have challenged control efforts. Fire activity at night will be dependent on the position of the marine layer but the RH recovery will be slightly better. Watch out working on indirect line and know what the fire is doing on neighboring branches at all times.

BRANCH III
Divisions K, L, M
Indirect line construction must use lookout to know what the fire is doing at all times. The daily progression of the fire should not impact this branch but escape routes must be identified and revaluated as the operational period moves into prime burn windows.

BRANCH VIII
Divisions N, O, P
Fire activity has remained on the North side of the South spur of the Little Sur River. Fuel and slope runs will have critical rates of spread and medium range spotting is expected. Look to the fire to continue to push to the South of Pico Blanco toward Lautnz Ridge. Despite being in the footprint of the Basin Fire(2008) the fuel loading is enough to continue progression to the South. when it finds opportunity in deep drainages with heavy fuel loading. Crews that are extended in the South of the Branch must use lookouts to know what the fire is doing at all times.

BRANCH IX
Despite most of this division being in or under the marine layer there is still active fire burning in the canyons and drainages. Fuels in this branch have been burning with low intensity but in high RH. The steep terrain and potential rollout will continue to challenge control efforts.

AIR OPERATIONS:

- Smoke or fog could make visibility difficult through out the incident
- Fire Behavior can change rapidly don't rely on air craft for your plan

SAFETY

- Indirect line must have lookouts that can see the main fire
- Expect fire activity after midnight due to a drop in RH, monitor weather every hour
- Dead trees could fall and cut off escape routes

SAFETY MESSAGE
SOBERANES

16-CA-BEU-003422 – August 2, 2016 – 0700 TO 0700

SAFETY SAFETY SAFETY

EVERYONES RESPONSIBILITY

FIRE BEHAVIOR

Watch Out

- Fuels are dry from being drought stricken and are receptive to fire spread
- Inconsistent weather pattern alters the relative humidity's and winds
- Chimneys, Box Canyon, Shoots and Saddles

Mitigation

- Know the weather forecast and review with your crews / Plan accordingly
- Request spot weather forecasts / Take onsite weather
- Look-Outs, Communications, Escape Routes, Safety Zones (LCES)

VEHICLE STAGING

HOT EMBERS CAN DAMAGE TIRES AND CAUSE THEM TO CATCH FIRE

Watch Out

- Caution when operating in locations previously burned
- When staging apparatus and smaller vehicles in burned areas
- STUMPHOLES ; Retain a significant amount of heat

Mitigation

- Avoid staging vehicles in recently burned areas
- Thoroughly water down areas recently burned prior to staging vehicles
- LOOKOUT for areas tree roots have burnt out and developed STUMPHOLES

AIRCRAFT

Watch Out

- Fixed wing aircraft working on your division
- Rotor wing aircraft working on your division
- Water and retardant drops

Mitigation

- PREPARE for retardant drops and avoid being near Hazard Trees prior to the retardant impacting them
- COMMUNICATE to Air Attack of the accuracy and effectiveness of the drops on your division
- BE AWARE of the wind changes due to rotor wash and turbulence following retardant and water drops

Note: Anyone who witnessed or has firsthand information of the dozer roll over resulting in a fatality, and was not interviewed by the SART, please contact Chris Carrera at **951-575-5932**

Douglas M. Ferro
TEAM SAFETY OFFICER

POSION OAK: Take quick preventative measures once exposed

AIR OPERATIONS SUMMARY ICS-220

Time Prepared	Date Prepared	Prepared By
1700	Tuesday, August 02, 2016	Mark Gradek

Incident Name	Sunrise	Startup	Cutoff	Sunset	Shutdown	Operational Period - Date	Operational Period - Time
Soberanes	610	640	*1939*	*2009*	2045	Wednesday, August 03, 2016	0700 - 2100

General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc.

TRACK ALL DIPSITE LOCATIONS / NUMBER OF DIPS / GALLONS TAKEN.
TRACK ALL DROP LOCATIONS / NUMBER OF DROPS / GALLONS DROPPED
All GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES FORMAT.
AVOID Aerial Application of Retardant / Foam / Agent within 300' of Waterways, Bodies of Water, etc.
If Retardant / Foam / Agent is Dropped Within These Areas Immediately Notify the AOBD and Provide the Following Information: Lat / Long, Estimated Number of Gallons and a Map Detailing The Area.

Air Attack Briefing 132.0250 AM

Prepared By (Communications Unit)

Austin L. Browne(COML)

Incident Location

5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: CALCORD

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

INCIDENT BASE EMERGENCY:
Contact Communications on CDF CMD 2 with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
  1. Medical Unit
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

PUBLIC INFORMATION SECTION

Incident Information Line: (831) 204-0446 or 211

Incident Media Line: (831) 647-6257

STATUS	
Incident Start Date: 07/22/2016	**Incident Start Time:** 8:48 am
Incident Type: Wildland	**Cause:**
Incident Location: Soberanes Creek, Garrapata State Park, Palo Colorado, north of Big Sur	**Total Personnel:**
Acreage:	**Containment:**

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1

CAL FIRE SOCIAL MEDIA POLICY – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email Soberanesfire2016@gmail.com

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.

CAL FIRE
INCIDENT MANAGEMENT TEAM
WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

Human Resource Message

Thought for the Day

As days go on and accident rates increase as you become a little complacent, so too do human resource contacts and complaints of inappropriate behavior, bullying, harassment, and discrimination.

- The fire has been going on for a while; people are starting to get tired, and some ready to go home.
- Some people are more easily irritated; be aware of these facts and make the necessary effort to speak up, if you have any issues or problems.
- Please attempt to resolve all issues at the lowest possible level! (IF POSSIBLE)

Be sure to include and deal with human resources in situations before they become conflicts that are painful and out of control.

Courage is fire, and bullying is smoke.
"Benjamin Disraeli"

HRSP Office is located in Quonset Hut #15 at ICP

DEMOB

SOBERANES INCIDENT

CA – BEU – 003422

- Resources must Check-In prior to the Demob process.

- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.

- Strike Team Leaders and/or Overhead personnel report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader.

  *Engines should remain at the Camp assigned to, until STEN advises their resources to depart to vehicle inspection. If the Strike Team has supplies and/or equipment checked out, the strike team leader should return the supplies. If needed, an engine may accompany the strike team leader.

- Prior to reporting to Demob (ICP – Toro Park):
  Please return all supplies and equipment.

- Resources will get signatures from the following units:

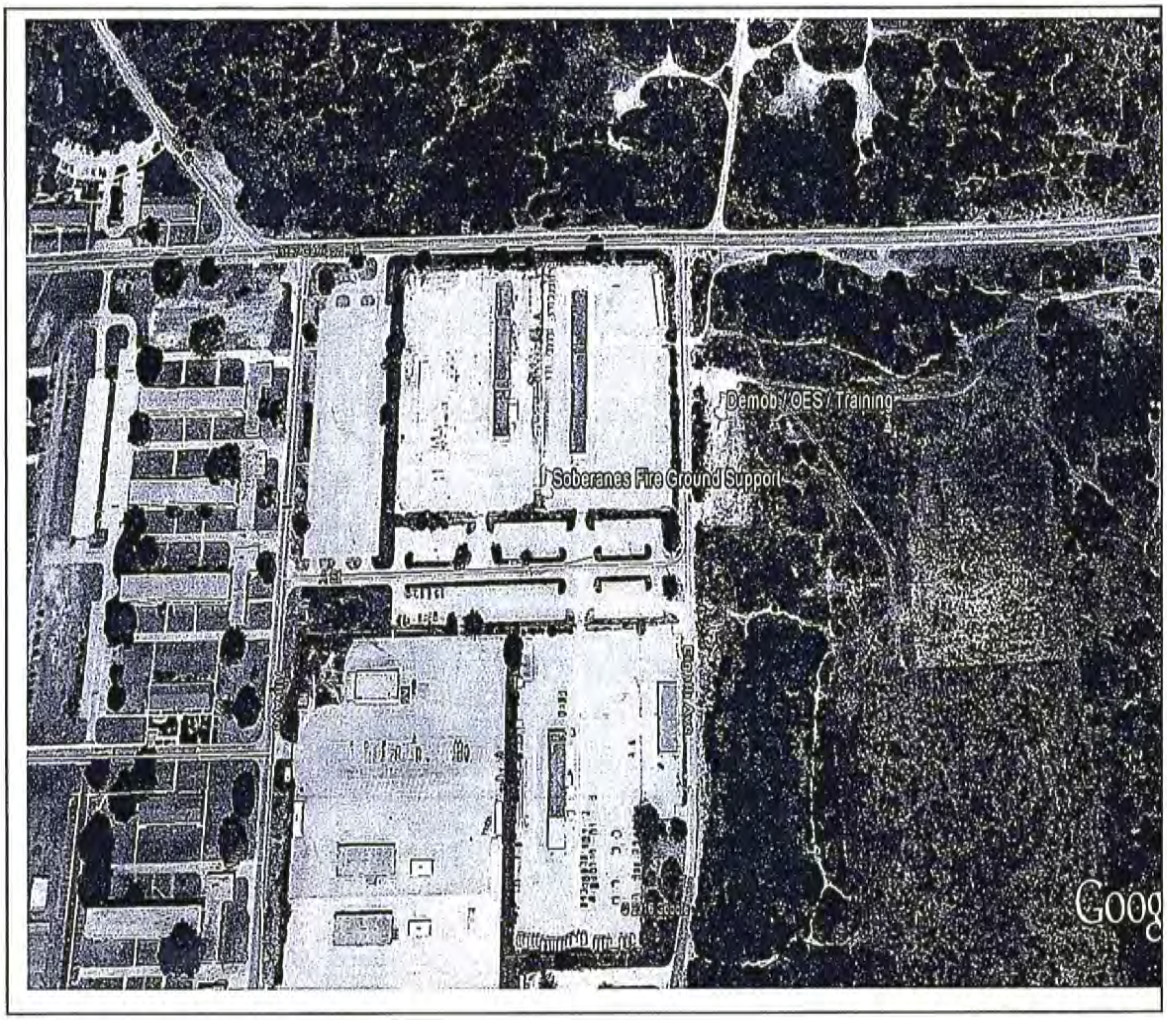
  - Motels
  - Supply
  - Ground Support
  - Weed Wash
  - Training (If they have a trainee)
  - Communications
  - Documentation
  - Time
  - Demob

- Vehicle Inspection will be completed at Fort Ord (Ground Support).

- All CAL FIRE and Federal employees will complete their "Time" at ICP (Toro Park). Then if needed, will report to vehicle inspection and weed wash. After vehicle inspection they will report to Demob to turn in their ICS #221, located adjacent to Ground Support.

- All Local Government employees will complete their "Time" with the OES representative located adjacent to Ground Support.

- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.



GROUND SUPPORT

- Highway 68 East
- Exit Reservation Rd
- Turn Left and follow Reservation Rd
- At Inter-Garrison Rd turn left
- At "T" intersection turn right (still Inter-Garrison Rd)
- Turn left onto 8th St
- Immediate right on A St
- SIGNS ARE POSTED ALONG ROUTE

DEMOB / TRAINING / OES

- Exit Ground Support
- Turn Right on 8th St.
- First Left into driveway
- Park apparatus
- Report to DEMOB tent

FIRE SUPPRESSION REPAIR PLAN
SOBERANES FIRE: CA-BEU-003422

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up
While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping
Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives
- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points
- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

Archaeological or Historic Sites

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE:	Yellow and black stripped & Orange and black stripped
U.S.F.S.	Yellow and black stripped tied with blue
Santa Lucia Preserve:	White and blue tied together & Yellow and black stripped

Waterbreaks/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12"berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

Archaeological and Historical Sites
Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.

2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.

3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.

4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.

5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.

6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Wilderness Special Instructions – Resource Advisor

DOZER LINES - DIVISIONS K, M, & P

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.

Wilderness Minimum Impact Suppression Tactics (MIST)

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

FIRELINE CONSTRUCTION PHASE:

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

HELISPOT CONSTRUCTION:

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ **Time:** _____

Firing Supervisor _____

1. **Personnel Briefing**

   - ☐ Objectives
   - ☐ Conditions (fire environment)
   - ☐ Resource assignments identified
     - ☐ Firing personnel
     - ☐ Holding forces
     - ☐ Lookouts
   - ☐ Ignition plan/sequence
   - ☐ Communication Plan
   - ☐ Contingency Plan
   - ☐ Safety issues

2. **Go / No-Go**

   - ☐ All personnel briefed
   - ☐ Weather forecast reviewed
   - ☐ Resources in place
   - ☐ Lookouts posted as needed
   - ☐ Anchor and termination firing points identified
   - ☐ Communications systems in place
   - ☐ Fire behavior forecast reviewed
   - ☐ Escape routes and safety zones established and made known
   - ☐ Adjoining forces/Air Attack notified

3. **Approval Prior To Firing**

   - ☐ Division Supervisor
   - ☐ Branch Director
   - ☐ Operations

4. **Other Notifications**

   - ☐ Other: _____
