

SOBERANES FIRE

CA-BEU-003422

OPERATIONAL PERIOD

SATURDAY AUGUST 6TH 0700

to

SUNDAY AUGUST 7TH 0700

CORRECTED

R. DUTTON RESULT

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Soberanes	2. Operational Period: Date From: 8/6/16 Time From: 0700	Date To: 8/7/16 Time To: 0700			
3. Objective(s): <u>Management Objectives</u> <ul style="list-style-type: none"> Provide for and maintain public and first responder safety by utilizing the incident safety analysis process. Protect all critical assets at risk to include the redwoods, historical assets within the affected area, infrastructure and improvements, watershed, and transmission lines. Utilize tactics that promote protection of sensitive natural and cultural resources in the Ventana Wilderness. It is the Unified Incident Commander's Leader's Intent to ensure collaboration at all levels of the incident. Be financially responsible for all management and fire suppression tactics. Foster and enhance community and political relationships. All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Monterey County. <u>Control Objectives</u> <ul style="list-style-type: none"> Keep the fire North of the Nacimiento-Fergusson Rd Keep the fire South of Huckleberry Hill Keep the fire West of Carmel Valley and Reliz Canyon Keep the fire East of Hwy 1 in the North and the Coast Ridge in the South

Soberanes Fire Weather Forecast

FORECAST NO: 14

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Sat-0700 Sun

UNIT: CA-BEU/LPF

SHIFT DATE: 8/6-8/7

SIGNED:

TIME AND DATE

Incident Meteorologist- Ryan Walbrun
NWS-Bay Area

FORECAST ISSUED: 1900 8/5/16

WEATHER DISCUSSION: The marine layer will be around 2000 feet this morning with clouds and fog over slopes. Upper slopes will start the day with fairly high humidity values but expected to trend slightly drier than yesterday. However, by this afternoon another weather disturbance will approach the coast. This will initiate a strong seabreeze along the coast and up Carmel Valley as the general winds will be from the west as well. The marine layer will deepen tonight into Sunday morning to at least 2500 feet and possibly 3000 feet. Even above the marine layer humidity recovery will be good tonight with continued light westerly winds. Periods of drizzle will be possible both early this morning and again overnight.

WEATHER FORECAST FOR Saturday:

WEATHER: Clouds and drizzle...pulling back to the coast by late morning. Becoming sunny Carmel and Sur Zone with smoke over the Seco zone and interior areas.

TEMPERATURES: Little change. 69-79 above 2500 feet. 60s lower slopes and Highway 1.

HUMIDITY: Little change. 25-40% above 2500 feet. 55-70% coast.

10 FT WINDS:

RIDGETOP - West to Northwest 5-10 mph afternoon gusts 15 mph.

SLOPE/VALLEY - Seabreeze and upcanyon 1400-2000 hours 4-8 mph gusts 12-15 mph.

Marine Layer: Around 2000 feet in the morning...may deepen 2500 feet by late in the day.

WEATHER FORECAST FOR Saturday Night:

WEATHER: Becoming mostly cloudy below 2500 feet. Smoke over the Seco and interior Sur Zone.

TEMPERATURES: 60s above 2500 feet. 49-58 along Hwy 1 and up Carmel Valley.

HUMIDITY: Good recovery below 2500 feet 80-95%...35-50% above 2500 feet.

10 FT WINDS:

RIDGETOP - Northwest 5-10 mph...evening gusts to 15 mph.

SLOPE/VALLEY - Evening upcanyons 4-7 mph...becoming downcanyon 1-3 mph overnight.

Marine Layer: Deepening 2500 to 3000 feet overnight into Sunday morning.

Extended Forecast: Marine layer will burn off Sunday morning allowing for a warming and drying trend Sunday afternoon. Quiet but seasonably warm weather Monday with lowering humidity in the hills above 2000 feet. Another weak system on Tuesday will deepen the marine layer and bring a cooling trend into Wednesday. Ridge starts to rebuild Thursday and Friday with a return to warmer and drier conditions.

Portable RAWS 163.350 Tone 0032 for H3, Tone 0033 Piney Creek, Tone 0035 White Rock, Tone 0029 for Blue Rock, Tone 0038 Ch₃₉ Ridge, Tassajara Hot Springs 0039.

WEATHER SUMMARY Cool with higher humidity persist today.
PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

Fire activity is expected to be low in the morning until the marine layer moves off shore. The main fire is primarily spreading above the marine layer (2500ft) and will continue to be more active than the lower elevations. Fire movement below the marine layer (2500ft) will be more of an understory burn with low to moderate intensity and rates of spread. Along the coast fine fuels continue to burn even when RH is 80% or more. Monitor the moving marine layer and smoke column and notice how it affects your fire behavior and burning operations in relation to your elevation and amount of shading from the sun. The fire is burning into the Basin Fire scar (2008) and the area continues to be affected by the 5th year of drought. Critically low live fuel moistures and heavy dead fuels in all size classes will support rapid rates of spread and mid-range spotting, when in alignment with slope and wind. The fire is burning in a mix of brush, grass and timber understory; fuels will vary by slope and aspect and proximity to the coast. Nighttime RH recovery will dampen the fire spread considerably and will not support active fire after midnight.

Probability of Ignition =65% Spotting Distance= 1/4 mile ROS in Brush 30-50 ch/h ROS in Timber Understory 10-15 ch/h
 Fine Dead Fuel Moisture = 5-8% 10hr Fuels= 3-6% Predicted BI 63 Predicted ERC 66

SPECIFIC

Carmel Zone BRANCH I

Little to no fire activity expected today. As you engage in mop-up watch for snags, fire weakened trees, stump holes, and dirty burn areas that have re-burn potential.

Carmel Zone BRANCH II

The fire will continue to burn interior islands. The N-NW winds will continue to cause smoke to shadow the branch causing a delay in air operations. Slower rates of spread area expected under the smoke and marine layer and when on the leeward side of the ridge. Should a spot fire across Los Podres reservoir and Carmel River, expect to have upslope runs as the fire will be in alignment with slope and wind with heavy dead fuels from the Basin Fire (2008) making access difficult. Fire activity at night will be dependent on the position of the marine layer with good humidity recovery and POI less than 20%.

Carmel Zone BRANCH IX

Under the marine layer there is still potential for active burning even when humidity is high. Grass and brush will burn even with >80% RH, generally with low to moderate rates of spread. However with the right alignment with slope and wind, there could be active fire behavior with flame lengths greater than 15ft and spread rates about half a mile per hour. As you engage in mop-up watch for snags, fire weakened trees, stump holes, and dirty burn areas that have re-burn potential. Prime burn window should be after noon until about 1600-1700 hrs.

Seco Zone BRANCH III, IV, V

Smoke is expected to shadow the area on the eastern portion of the Ventana Wilderness again today making visibility difficult to detect the main fire or potential spot fires. Use multiple lookouts as air operations could be delayed due to poor visibility. The daily progression of the fire should not impact this branch. Be sure to identify and reevaluated escape routes and safety zones should there be unexpected active fire behavior when the marine layer moves out. Prime burn window will be after noon to about 1600-1700 hrs.

Sur Zone BRANCH VII, VIII

Fire activity is expected to be minimal however, there is potential for slope reversal should the fire cross S.Fork Little Sur below Cabezo Prieto (north H2). Should the fire cross, expect very high to extreme fire behavior and intensities with rapid rates of spread. Under the marine layer there is still potential for active burning. Fuels in this branch have been burning with low intensity even with RH greater than 80%. Fire activity at night will be dependent on the position of the marine layer and good RH recovery with POI less than 20%.

AIR OPERATIONS

Visibility difficult throughout the incident while the marine layer onshore and could delay operations for quite some time.

SAFETY

Terrain has been a major factor in numerous fatality fires. As you scout throughout the fire area and out ahead of it, look for these terrain indicators: steep slopes (> 50%), chutes and box canyons, saddles, and narrow canyons. The alignment of topography and wind should always be considered a trigger point to reevaluate strategy and tactics.

SAFETY MESSAGE

SOBERANES

Y

COMPLACENCY

THE FIRE IS WINDING DOWN IN SOME AREA OF THE FIRE- NOW IS NOT THE TIME TO BE COMPLACENT

Watch Out

- Cooler temperatures may cause you to forget to drink fluids and rest
- Patrol and aggressive mop-up can seem routine
- Many accidents occur during mop-up – this is not the time to get hurt

Mitigation

- Slow down and take breaks during exhaustive work
- Drink plenty of water throughout the shift-even if you're not thirsty
- Coach members of your team and take care of one another

S
A
F
E
T
Y

TRAFFIC SAFETY

WE HAVE EXPERIENCED SEVERAL NEAR SERIOUS ACCIDENTS

Watch Out

- Highway 1 remains open for weekend traffic so watch for high speed vehicles
- Access roads are unforgiving in the fire area, they are narrow, soft soils, steep
- Watch for civilians and congestion through the weekend in the Carmel Valley area

Mitigation

- Drive with a high level of Situational Awareness and optimum defensive driving techniques
- Use caution when navigating through your branch and divisions
- Use warning lights as appropriate when entering highways with fast moving vehicles

S
A
F
E
T
Y

DEMOB

ACCIDENTS CAN HAPPEN DURING DEMOB

Watch Out

- Vehicles will be moving in tight areas around Ground Support and parking areas
- There will be an increase in backing and maneuvering of vehicles in tight spots
- Crews may be in a hurry to leave the incident due to reassignment

Mitigation

- Provide back-up and spotter personnel - more than one may be required
- Drive safely and be on the lookout for ICP/camp and demob pedestrian traffic
- Drive safely and monitor fatigue when traveling to home unit or new incident

 Incident Location
 5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the RX and TX reversed.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: CALCORD

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 - Closest EMS resource
 - Communications Unit
- Communications Unit contacts:
 - Ground or Air ambulance as requested
 - Operations
 - Safety
 - Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

INCIDENT BASE EMERGENCY:
Contact Communications on CALCORD with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
 - Medical Unit
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor
 - Comps/Claims

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at <http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&orcuib=00001-01000&file=403-420.1>

CAL FIRE SOCIAL MEDIA POLICY – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at <http://calfireweb.fire.ca.gov/library/handbooks/0609/0691.pdf>

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email Soberanesfire2016@gmail.com

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

DEMOB

SOBERANES INCIDENT

CA – BEU – 003422

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- **Please return all supplies and equipment, either at ICP-Toro Park or the camp assigned to, prior to reporting to Demob (ICP – Toro Park)**
- **Strike Team Leaders and/or Overhead personnel** report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader. After receiving the #221, the STEN will report to ground inspection.

*Engines will report to ground support (Fort Ord) at the times posted. The engines will go through vehicle inspection and **weed wash** then wait for their STEN to meet up with them at Fort Ord.

- When the strike team and leaders are completed with ground support, the strike team will report back to ICP – (Toro Park) to finish their #221.
- Resources will get signatures from the following units:
 - Motels
 - Supply
 - Ground Support
 - Weed Wash
 - Training (If they have a trainee)
 - Communications
 - Documentation
 - Time
 - Demob
- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.

Human Resource Message

Soberanes - 8/6/16

Prevention of Sexual Harassment

Sexual harassment is an offensive working condition, which undermines the integrity of the organization, debilitates morale, and interferes with work productivity.

Some examples of behavior that may be sexual harassment include (but are not limited to): touching, grabbing, lewd gestures, jokes with sexual connotation, or photographs of a sexual nature, and any behavior with sexual overtones which is intimidating or offensive to the recipient, or to one who observes such behavior.

DON'T initiate or participate in this behavior!

DO report it!

HUMAN RESOURCE SPECIALIST (HRS): MARY MCDONOUGH, (559) 593-3905

HUMAN RESOURCE SPECIALIST (HRS-T): TOSHA CONEY, (209) 213-9323

HUMAN RESOURCE SPECIALIST (HRS-T): FRANCES LINDQUIST, (530) 605-6313

FIRE SUPPRESSION REPAIR PLAN SOBERANES FIRE: CA-BEU-003422

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

Archaeological or Historic Sites

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE: Yellow and black stripped & Orange and black stripped
 U.S.F.S. Yellow and black stripped tied with blue
 Santa Lucia Preserve: White and blue tied together & Yellow and black stripped

Waterbreaks/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

Archaeological and Historical Sites Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Wilderness Special Instructions – Resource Advisor

DOZER LINES - DIVISIONS K, M, & P

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.

Wilderness Minimum Impact Suppression Tactics (MIST)

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

FIRELINE CONSTRUCTION PHASE:

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

HELISPOT CONSTRUCTION:

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

Attach Firing Operations Checklist to ICS-214
