SOBERANES FIRE

CORRECTED 1315

CA-BEU-003422

OPERATIONAL PERIOD

TUESDAY AUGUST 9TH 0700

to

WEDNESDAY AUGUST 10TH 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Soberanes	2. Operational Period: Date From: 8/9/16 Time From: 0700	Date To: 8/10/16 Time To: 0700

3. Objective(s):

Management Objectives

- Provide for and maintain public and first responder safety by utilizing the incident safety analysis process.
- Protect all critical assets at risk to include the redwoods, historical assets within the affected area, infrastructure and improvements, watershed, and transmission lines.
- Utilize tactics that promote protection of sensitive natural and cultural resources in the Ventana Wilderness.
- It is the Unified Incident Commanders' Leader's Intent to ensure collaboration at all levels of the incident.
- Be financially responsible for all management and fire suppression tactics.
- Foster and enhance community and political relationships.
- All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Monterey County.

Control Objectives

- ☐ Keep the fire inside the current perimeter in the Carmel Zone
- ☐ Keep the fire North of the Nacimiento-Fergusson Rd
- ☐ Keep the fire West of Carmel Valley and Reliz Canyon
- ☐ Keep the fire East of Hwy 1

4. Operational Period Command Emphasis:

Perimeter Control , Structure Defense, Improve Contingency Lines, Hold and Improve Existing Control Lines

General Situational Awareness

S. T. O. P. Stop Think Organize Proceed

5. Incident Action Plan (the items checked below are included in this Incident Action Plan):

6. Work Assignments:

Plan and implement firing operations in Division P and coordinate firing operations with DIV O.

Mop up and secure perimeter.

All Divison P Resources are on 12-Hour Shift except for DIVS, STC 2310C and STG.

7. Special Instructions:

LOOK UP, be aware of hazard trees.

Fire Plans: Ensure all line personnel in the Division are notified and that the GO- No GO checklist is utilized.

Maintain slow speeds when accessing the fireline, use low gears and exhaust brakes to prevent brake fade.

The Communications Plan is complex; please review the ICS 205 with all Division personnel.

Extreme number of snags and unexpected tree fall. Identify and report all hazard trees to DIVS for mitigation and assessment.

6. Work Assignments:

Continue assessment and repair of fire suppression damage.

****All Resources are on a 12-hour shift (except STG will be on a 24-Hour shift) and will report to Branch II at night.**

7. Special Instructions:

Resources dispatched to a division from staging are required to receive a briefing specific to their assignment.

The Communications Plan is complex; please review the ICS 205 with all Division personnel.

Use Gate Etiquette - you open it, you close it or leave it the way you found it.

LOOK UP, Be Aware of Hazard Trees.

Soberanes Fire Weather Forecast

ORECAST NO: 17

NAME OF FIRE: Soberanes

REDICTION FOR: 0700 Tue-0700 Wed

UNIT: CA-BEU/LPF

HIFT DATE: 8/9-8/10

SIGNED: Matt Mehle

ME AND DATE ORECAST ISSUED: 1900 8/8/16

Incident Meteorologist- Matt Mehle
NWS-Bay Area

EATHER DISCUSSION: Morning marine layer will once again erode back to the coast by mid-morning. emperatures will be within a few degrees of Monday's values, except coastal Hwy 1 where temps may be slightly ooler. Ridge winds will prevail from the Northwest with smoke transport over the Seco Zone and interior Sur Zone. kies will become mostly sunny south of Pt Sur over the Sur Zone. Marine layer will deepen Tuesday night with ightly better humidity recoveries. The concern, as of late, will continue to be lack of humidity recovers over the higher eaks. Humidity recoveries over the peaks will occur early in the night then gradually dry through sunrise.

EATHER FORECAST FOR TUESDAY:

EATHER: Clouds...pulling back to the coast by 10 am. Becoming sunny Carmel Zone with smoke over the Seco nd Sur zone and interior areas.

EMPERATURES: 80-90 interior/ridges 73-83 lower slopes and Highway 1. **24 HR Trend** (little change)

UMIDITY:. 15-25% above 2500 feet. 40-50% coastal areas. **24 HR Trend** (little change)

) FT WINDS:

RIDGETOP - West to Northwest 5-10 mph afternoon gusts 15 mph except north to northeast 5-10 mph with gust to 20 mph in Branch 8 above Big Sur.

SLOPE/VALLEY - Seabreeze and upcanyon 1400-2000 hours 4-8 mph gusts 12-15 mph.

arine Layer: Around 2000 feet.

EATHER FORECAST FOR TUESDAY NIGHT:

EATHER: Becoming mostly cloudy below 2500 feet. Smoke settling over the Seco and interior Sur Zone.

EMPERATURES: 65-72 above 2000 feet. 49-57 along Hwy 1 and up Carmel Valley.

JMIDITY: Good recovery below 2000 feet 85-95%...25-40% above 2500 feet in the evening then drying 9-19% in thermal belts between midnight and dawn, especially above 3000 feet.

) FT WINDS:

RIDGETOP – Northerly 5-10 mph...evening gusts to 15 mph. Locally Northeast in Branch 8.

SLOPE/VALLEY – Evening upcanyons 4-7 mph...becoming downcanyon 1-3 mph overnight.

arine Layer: Around 2500 feet.

---

tended Forecast: Only minor day to day changes with night and morning low clouds clearing to the coast each afternoon. High pressure ridge builds Thu-Fri with warming trend.

INPUTS

WEATHER SUMMARY About the same as yesterday.

PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

The fire is burning in two distinct climate patterns, above and below the marine layer(2500ft). Below the marine layer fire activity will continue burn very slowly in the understory with low intensity. It has been persistently moving in the fine dead fuels at low rates of spread even with RH's above 80%. As the marine layer lifts fire activity will increase, more so in areas that are not shadowed by the smoke column. Areas above the marine layer are experiencing very low fuel moisture recoveries and have been seeing RH's dip into single digits at night. Fire activity has primarily been backing down slopes at low intensity with short intense uphill runs when there is a slope reversal. Critically low live fuel moistures due to multiple years of drought can support mid-range spotting when wind and slope are aligned. A second burn period can be expected at night as the RH's bottom out in the pre-dawn hours in the thermal belt (2500'-4000'). ERCs are at or above the 90th percentile. The fire is burning in a mix of brush, grass and timber understory; fuels are highly variable with aspect and proximity to the coast.

Probability of Ignition = 75% **Spotting Distance=** less than 1/4 mile **ROS in Brush** 50-95 ch/h for short uphill runs
Fine Dead Fuel Moisture = 4% **10hr Fuels=** 6% **BI** 120 **ERC** 72

SPECIFIC

Carmel Zone BRANCH I, II, IX

No forward fire progression is expected. Interior islands and heavier fuels will continue to burn out, potentially putting up large volumes of smoke.

Seco Zone BRANCH III, IV, V

The persistent northwest winds will continue shade Seco Zone with smoke which will continue to moderate fire behavior. For the most part, the upslope/upcanyon winds will have more effect on the Seco Zone fire edge than the upper level north winds as the fire backs into the Carmel River drainage. Yesterday the fire made a run up the north-northeast side of Elephant Mountain then lost momentum as it rolled over the ridges. Today that part of the fire will continue to flank around and back down the south side of Elephant Mt and Uncle Sam Mtn into Carmel Creek with occasional rollout and fire pulsing back upslope into itself. The fire is not expected to cross Carmel River today. Expect backing rates of spread less about 2 ch/h at worst case. If slope and wind align on the steepest slopes expect uphill runs at ½ to 1 mph. Flame lengths 5-10 feet.

Sur Zone BRANCH VII, VIII

Fire progression at the head will continue to the south, towards the Big Sur and Ventana Creek Drainages. Wind, humidity, and fuels will vary based on position on slope and will affect fire behavior. Upslope runs towards Manuel Ridge will continue to occur when wind and slope are in alignment and will impact control lines in DIV O. In DIV P, unburnt fuels along the S.Fork Little Sur drainage will continue to consume and have potential to make short runs towards Coast Ridge Road. Upper slopes and ridges will burn actively during the night with warm and dry conditions within the thermal belt. Increased rates of spread and short range spotting are probable. Fire behavior will be moderated below the marine layer due to higher humidity and sheltering from the wind.

AIR OPERATIONS

Expect the smoke and marine layer to lift around mid-morning.

SAFETY

Fire conditions can remain very active with in a thermal belt, even at night!

SAFETY MESSAGE
SOBERANES

16-CA-BEU-003422 – August 9, 2016 – 0700 TO 0700

SAFETY

SCHOOLS IN SESSION

CARMEL AND MONTEREY AREA CHILDREN ARE HEADING TO SCHOOL

Watch Out

- Increased presence of children
- School Zone Areas
- Increased traffic with parents driving children to school

Mitigation

- BE AWARE! Of your speed and attentiveness on the roads
- RECOGNIZE! Those areas with school…Be Prepared to SLOW DOWN
- PLAN AHEAD! Provide ample driving time with increased traffic

SAFETY

FATIGUE

CREWS ON THE ROAD and FIRELINE

Watch Out

- Operating machinery
- Driving to your assignment, camps and hotels
- Working on the fireline

Mitigation

- Wear proper PPE and avoid running machinery when overly fatigued
- Drive Slowly and Cautiously, Be Alert and Respectful with our local community members
- Schedule work/rest cycle based on workload and weather, intake Water and Quality Calories

SAFETY

DEMOB

ACCIDENTS CAN HAPPEN DURING DEMOB

Watch Out

- Vehicles will be moving in tight areas around Ground Support and parking areas
- There will be an increase in backing and maneuvering of vehicles in tight spots
- Crews may be in a hurry to leave the incident due to reassignment

Mitigation

- Provide back-up and spotter personnel - more than one may be required
- Drive safely and be on the lookout for ICP/camp and demob pedestrian traffic
- Drive safely and monitor fatigue when traveling to home unit or new incident

EVERYONES RESPONSIBILITY

Douglas M. Ferro
TEAM SAFETY OFFICER

POSION OAK: Take quick preventative measures once exposed

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: CALCORD

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

INCIDENT BASE EMERGENCY:
Contact Communications on Assigned CMD channel with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
  1. Medical Unit
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

INCIDENT REPORTING PROCEDURES

DEMOB

SOBERANES INCIDENT
CA – BEU – 003422

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- ***Please return all supplies and equipment, either at ICP-Toro Park or the camp assigned to, prior to reporting to Demob (ICP – Toro Park)***
- **Strike Team Leaders and/or Overhead personnel** report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader. After receiving the #221, the STEN will report to ground inspection.

  *Engines will report to ground support (Fort Ord) at the times posted. The engines will go through vehicle inspection and **weed wash** then wait for their STEN to meet up with them at Fort Ord.
- When the strike team and leaders are completed with ground support, the strike team will report back to ICP – (Toro Park) to finish their #221.
- Resources will get signatures from the following units:
  - Motels
  - Supply
  - Ground Support
  - Weed Wash
  - Training (If they have a trainee)
  - Communications
  - Documentation
  - Time
  - Demob
- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.
- Air Travel: For Federal resources, provide a #213 to the Demob Unit with the following information:
  - Full Name (As it reads on Drivers License)
  - Date of Birth
  - Destination Jet Port
  - Phone Number
  - Date of Travel

FIRE SUPPRESSION REPAIR PLAN
SOBERANES FIRE: CA-BEU-003422

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

Archaeological or Historic Sites

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE:	Yellow and black stripped & Orange and black stripped
U.S.F.S.	Yellow and black stripped tied with blue
Santa Lucia Preserve:	White and blue tied together & Yellow and black stripped

Waterbreaks/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12"berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

Archaeological and Historical Sites
Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.

2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.

3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.

4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.

5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.

6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Forest Service Wilderness and California State Parks Special Instructions – Resource Advisor

DOZER LINES - DIVISIONS K, M, P, and CONTINGENCY LINES

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.
- Avoid archeological sites flagged with black/yellow and blue ribbon

Wilderness Minimum Impact Suppression Tactics (MIST)

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

FIRELINE CONSTRUCTION PHASE:

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

HELISPOT CONSTRUCTION:

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

EMERGENCY SHIFT TICKET and EVALUATION FORM

CAL FIRE
INCIDENT MANAGEMENT TEAM
WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

CAL FIRE
INCIDENT MANAGEMENT TEAM
WATER USAGE LOG

DATE: _____ Division / Group: _____

AGENCY ID / VENDOR: _____
i.e.. Strike Team 1110C, Acme Water Tenders

REQUEST # _____

WATER SOURCE LOCATION	Hydrant	Open source i.e. pond	Tank	Gallons Used	Property Owner / Contact Number if known **

TURN INTO FINANCE DAILY

**Please note if you made contact with property owner and their contact.
(Use reverse side if needed.)
Information: _____

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

IMT1 version 1

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- ☐ Objectives
- ☐ Conditions (fire environment)
- ☐ Resource assignments identified
  - ☐ Firing personnel
  - ☐ Holding forces
  - ☐ Lookouts
- ☐ Ignition plan/sequence
- ☐ Communication Plan
- ☐ Contingency Plan
- ☐ Safety issues

2. Go / No-Go

- ☐ All personnel briefed
- ☐ Weather forecast reviewed
- ☐ Resources in place
- ☐ Lookouts posted as needed
- ☐ Anchor and termination firing points identified
- ☐ Communications systems in place
- ☐ Fire behavior forecast reviewed
- ☐ Escape routes and safety zones established and made known
- ☐ Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- ☐ Division Supervisor
- ☐ Branch Director
- ☐ Operations

4. Other Notifications

- ☐ Other: _____
- ☐ Other: _____

Attach Firing Operations Checklist to ICS-214

Human Resource Message

August 9, 2016

Our time is getting shorter…
How about our Tempers???

We can see the end in sight, although this has been an uncertainty for a while. Some are ready to leave; some are wishing it was longer.

With the hard work and especially the changes taking place, it is easy to get on edge and "on the edge" with each other. Let's guard against that, and try to help each other out.
Take care and be safe.

Anger and intolerance are the enemies of correct understanding.
Mahatma Gandhi

A quick temper will make a fool of you soon enough.
Bruce Lee

HR OFFICE is located in the Quonset Hut (tent) #15 at ICP

Human Resource Specialist (HRSP) Mary McDonough (559) 593-3905
Human Resource Specialist (HRSP-T) Tosha Coney (209) 213-9323
Human Resource Specialist (HRSP-T) Frances Lindquist (530) 605-6313
Human Resource Specialist (HRSP-T) Todd Morrow (707) 373-0204

The HRSP Staff is collecting non-perishable food for the local community.

Please drop off any non-perishable food in the centrally located collection boxes. Collection boxes are located at the HRSP tent, the morning/evening Briefing tent and the Federal Pay Trailer.

The non-perishable food will be collected daily in the early evening and will be distributed once a week to a collection point in the local community.
If you have any questions, please feel free to contact

Fran Lindquist at (530) 605-6313 or any HRSP.
Thank you for your support to the local community
