### Soberanes Fire Weather Forecast

**FORECAST NO:** 18

**NAME OF FIRE:** Soberanes

**PREDICTION FOR:** 0700 Wed-0700 Thur

**UNIT:** CA-BEU/LPF

**SHIFT DATE:** 8/10-8/11

**SIGNED:** *Matt Mehle*

**TIME AND DATE**

**Incident Meteorologist- Matt Mehle  
NWS-Bay Area**

**FORECAST ISSUED:** 1900 8/9/16

**WEATHER DISCUSSION:** The first part of today's ops period will see low clouds and coastal drizzle with the marine layer. Clouds erode back to the coast by mid-late morning. However, Sur Zone may hold onto clouds longer into the day with local onshore winds. Wind direction will vary greatly across the fire today with a more southerly influence over the Sur Zone and a northerly influence over the Seco Zone, especially over mid and lower elevations. Temperatures and humidities will be within a few degrees of Tuesday's values. The marine layer will build back in Wednesday night, but begin to compress as high pressure begins to build over the region. As a result, a more noticeable drying will occur over the higher peaks Wednesday night.

**WEATHER FORECAST FOR WEDNESDAY:**

**WEATHER:** Clouds and coastal drizzle...pulling back to the coast 10-11 am. Clouds will linger along Sur Zone with possible clearing late afternoon. Becoming sunny Carmel Zone with smoke over the Seco and Sur zone.

**TEMPERATURES:** 78-88 interior/ridges 71-79 lower slopes and Highway 1. **24 HR Trend** (little change)

**HUMIDITY:** 15-25% above 2500 feet. 35-50% coastal areas. **24 HR Trend** (little change)

**20 FT WINDS:**

**RIDGETOP -** Sur Zone – Southwest to west 3-7 mph gusts 10 mph...becoming west – northwest late afternoon 5-10 gust to 13 mph. Seco Zone – above 3k feet southwest to south 3-7 mph becoming southeast 5-10 mph in the afternoon

**SLOPE/VALLEY -** Downslope/downcanyon 3-6 in the morning becoming ...Seabreeze and upcanyon 1400-2000 hours 4-8 mph gusts 10-12 mph. Northeast for Seco Zone

**Marine Layer:** 1500-1800 feet.

**WEATHER FORECAST FOR WEDNESDAY NIGHT:**

**WEATHER:** Becoming mostly cloudy below 1800 feet. Smoke settling over lower elevations.

**TEMPERATURES:** 59-66 above 2000 feet. 48-57 along Hwy 1 and up Carmel Valley.

**HUMIDITY:** Good recovery below 2000 feet 85-95%...25-40% above 2000 feet

**20 FT WINDS:**

**RIDGETOP –** West 5-10 mph...evening gusts to 15 mph...becoming southerly overnight.

**SLOPE/VALLEY –** Evening upcanyons 4-7 mph...becoming downcanyon 1-3 mph overnight.

**Marine Layer:** 1500-1800 feet.

**Extended Forecast:** High pressure ridge is still forecast to build over the region Thu-Fri with warming and drying trend. The building ridge will also compress the marine layer.

**Portable RAWS 163.350** Tone 0032 for H3, Tone 0033 Piney Creek, Tone 0035 White Rock, Tone 0029 for Blue Rock, Tone 0038 Chews Ridge, Tassajara 0039, Tone 0031 Memorial.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER 18	TYPE OF FIRE Surface
FIRE NAME Soberanes	OPERATIONAL PERIOD 8-10-2016 24 HOUR SHIFT
DATE ISSUED 8-9-2016	TIME ISSUED 1900 HOURS
UNIT CALFIRE BEU & USFS LOS PADRES NF	SIGNED  Geoff Marshall FBAN-t

## INPUTS

### WEATHER SUMMARY

Cooler and moister than yesterday.  
**PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST**

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL

Today, the weather has started to transition. We should start to see more moderated fire conditions over the next few days with the 1 hr fuels beginning to recover with the higher RH's. Fire below the marine layer (1800') will be very similar as it has been the past few days; low rates of spread and low intensities. Fire above the marine layer will have smaller flame lengths and slower rates of spread than you have seen the past few days; low rates of spread and low intensities, except for short up hill runs. The fire has persistently continued to move at these slow rates of spread even with RH's above 80%. As the marine layer lifts fire activity will increase, more so in areas that are not shadowed by the smoke column. Areas above the marine layer have been experiencing very poor fuel moisture recoveries for the past week, so expect 10 hour and heavier fuels to still be readily available. Fire activity will primarily be backing down slopes at low intensity with potential for short intense uphill runs when there is a slope reversal. Critically low live fuel moistures due to multiple years of drought can support short to mid-range spotting when wind and slope are aligned. A second burn period may occur in the pre-down hours due poor RH's recovery above 1800'. ERCs are at or just below the 90<sup>th</sup> percentile. The fire is burning in a mix of brush, grass and oak understory; fuels and fuel loading are highly variable on each of the four aspects proximity to the coast and from old burn scars.

Probability of Ignition = 48% Spotting Distance= up to 1/4 mile ROS in Brush 60-106 ch/h for short uphill runs  
Fine Dead Fuel Moisture = 7% 10hr Fuels= 6% BI 91 ERC 70 1-2 ch/hr for backing

#### SPECIFIC

##### Carmel Zone BRANCH I, II, IX

No forward fire progression is expected. Interior islands and heavier fuels will continue to burn out, potentially putting up large volumes of smoke.

##### Seco Zone BRANCH III, IV, V

In the mid to lower elevations, the fire will be primarily influenced by the upslope/upcanyon winds (generally NE) in the area of Los Padres lake and Elephant Mountain. The upper level north winds will again shade the area with smoke and moderate fire behavior. The fire will continue to flank around Elephant Mt and back downslope toward Carmel River. Should rollout occur or fire cross Carmel River, expect upslope runs with higher rates of spread of ½ - 1 mph and about 5-10 ft flame lengths, especially where draws align with wind. The Carmel River and adjacent terrain is extremely steep and complex. Be aware of winds eddying in this terrain with sudden changes in speed and direction. Backing rates of spread in slopes > 60% will be about 1-2 ch/h.

##### Sur Zone BRANCH VII, VIII

The fire will continue to back to the south into the Big Sur and Ventana drainages, as well as to the west towards Highway 1. The deep marine layer that has moved over the area will keep the fire behavior in most of the zone moderated today. However, an afternoon increase in activity above the marine layer should be expected. Short upslope runs will occur where uneven fingers are established. If the fire crosses Ventana Creek or Big Sur River slope reversal will increase spread rates that may impact the control lines in DIV O. Unburnt islands in DIV P will continue to consume, but should not present holding concerns. Humidity recovery tonight below the marine layer will hamper fire spread and intensity. Fire will remain active within the thermal belt.

### AIR OPERATIONS

Expect the smoke and marine layer to lift around mid-morning.

## SAFETY

Short intense fire runs are possible. Make sure you know where your safety zone is at and the time it takes to get there.

# ***SAFETY MESSAGE***

## ***SOBERANES***

***16-CA-BEU-003422 - August 10, 2016 - 0700 TO 0700***

### **5 at 2**

#### **Driving / Fire Behavior**

- **Fire behavior; is it doing what was predicted?**
- **Driving safety cushion in place?**

#### **Possible mitigation could include:**

- **At 1400, take a 5-minute break and reaccess your current situation against objectives. Remember, of 20 burnovers, 15 occurred between the hours of 1400 and 1630.**
- **Validate:**
  - **Lookout is still in the best location for the assignment?**
  - **Communication is still good or do I need to do a radio check?**
  - **Escape Route is still valid or do I need to reestablish a new escape route?**
  - **Can I survive in my current safety zone given the current weather conditions or should I reestablish another Safety Zone?**
- **Continue to take spot weather for updated local weather conditions. Your input will help validate and update the forecast and fire behavior.**
- **Will your driving speed allow you to slow down or stop if you encounter a crew working just around the corner?**

**TAKE CARE of EACH OTHER!!**

**Ron Bertsch**

 Incident Location  
 5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the KX and IX reversed.

### 8. MEDICAL EMERGENCY PROCEDURES

#### EMERGENCY FREQUENCY: CALCORD

#### LINE EMERGENCY:

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

#### INCIDENT BASE EMERGENCY:

Contact Communications on Assigned CMD channel with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
  1. Medical Unit
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

## **DEMOB**

### SOBERANES INCIDENT

CA – BEU – 003422

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- **Please return all supplies and equipment, either at ICP-Toro Park or the camp assigned to, prior to reporting to Demob (ICP – Toro Park)**
- **Strike Team Leaders and/or Overhead personnel** report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader. After receiving the #221, the STEN will report to ground inspection.

\*Engines will report to ground support (Fort Ord) at the times posted. The engines will go through vehicle inspection and **weed wash** then wait for their STEN to meet up with them at Fort Ord.

- When the strike team and leaders are completed with ground support, the strike team will report back to ICP – (Toro Park) to finish their #221.
- Resources will get signatures from the following units:
  - Motels
  - Supply
  - Ground Support
  - Weed Wash
  - Training (If they have a trainee)
  - Communications
  - Documentation
  - Time
  - Demob
  -
- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.
- **Air Travel:** For Federal resources, provide a #213 to the Demob Unit with the following information:
  - Full Name: ( As it appears on Drivers License)
  - Date of Birth
  - Destination jet port and departure jet port.
  - Phone Number and Email
  - Date of Travel

## **FIRE SUPPRESSION REPAIR PLAN SOBERANES FIRE: CA-BEU-003422**

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

### **Instructions for suppression repair during mop-up**

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

### **Inventory and Mapping**

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

### **Objectives**

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

### **Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points**

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

**Roads**

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

**Watercourses**

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

**Archaeological or Historic Sites**

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE:	Yellow and black stripped & Orange and black stripped
U.S.F.S.	Yellow and black stripped tied with blue
Santa Lucia Preserve:	White and blue tied together & Yellow and black stripped

**Waterbreaks/Waterbar/Cross Drain spacing**

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

**Conflicts with Suppression Activities**

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

## Archaeological and Historical Sites Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

## Forest Service Wilderness and California State Parks Special Instructions – Resource Advisor

### **DOZER LINES - DIVISIONS K, M, P, and CONTINGENCY LINES**

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.
- Avoid archeological sites flagged with black/yellow and blue ribbon

### **Wilderness Minimum Impact Suppression Tactics (MIST)**

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

#### **FIRELINE CONSTRUCTION PHASE:**

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

#### **HELISPOT CONSTRUCTION:**

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

# CAL FIRE

## INCIDENT MANAGEMENT TEAM

### WATER USAGE PLAN

#### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

#### Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

#### Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

#### Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

#### Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

# FIRING OPERATION CHECKLIST

Location: \_\_\_\_\_

Date: \_\_\_\_\_ Time: \_\_\_\_\_

Firing Supervisor \_\_\_\_\_

## 1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
  - Firing personnel
  - Holding forces
  - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

## 2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

## 3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

## 4. Other Notifications

- Other: \_\_\_\_\_
- Other: \_\_\_\_\_

Attach Firing Operations Checklist to ICS-214

Rev: Ops Group February 8, 2011

## Human Resource Message

August 10, 2016

*Thought for the Day*

**F.I.R.E**

- Fatigue..... Be aware of fatigue having a negative impact on your conduct and speech
- Integrity..... Integrity and Honesty are vital on a fire. If you mess up, fess up, whatever you did can most likely be fixed if you report it as soon as you are aware of it.
- Respect..... Treat others as you would like to be treated!
- Example..... Set an example! Realize you influence others around you, therefore, always conduct yourself in a professional and competent manner, but still have fun!

### **HR OFFICE is located in the Quonset Hut (tent) #15 at ICP**

Human Resource Specialist (HRSP) Mary McDonough (559) 593-3905  
Human Resource Specialist (HRSP-T) Tosha Coney (209) 213-9323  
Human Resource Specialist (HRSP-T) Frances Lindquist (530) 605-6313  
Human Resource Specialist (HRSP-T) Todd Morrow (707) 373-0204

**The HRSP Staff is collecting non-perishable food for the local community.**  
**Please drop off any non-perishable food in the centrally located collection boxes.**

Collection boxes are located at the HRSP tent, the morning/evening Briefing tent and the Federal Pay Trailer. The non-perishable food will be collected daily in the early evening and will be distributed once a week to a collection point in the local community.

If you have any questions, please feel free to contact

**Fran Lindquist at (530) 605-6313 or ANY HRSP.**

*Thank you for your support to the local community*
