Soberanes Fire Weather Forecast

FORECAST NO: 22

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Sun- 0700 Mon

UNIT: CA-BEU/LPF

SHIFT DATE: 8/14-8/15

SIGNED: *Matt Mehle*

TIME AND DATE

**Incident Meteorologist- Matt Mehle
NWS-Bay Area**

FORECAST ISSUED: 1900 8/13/16

WEATHER DISCUSSION: A shallow marine layer with low clouds/fog will be possible early Sunday as high pressure lingers over the region. Temperatures will moderate or cool slightly as a trough of low pressure begins to develop over the region Sunday afternoon. Do not expect some clearing everywhere for a few hours, but the marine layer may impact the Sur Zone late Sunday afternoon as the trough of low pressure develops. A more noticeable marine layer will return Sunday night with moderate to excellent humidity recoveries over mid and lower slopes. Higher elevations and ridges will continue to see poor humidity recoveries.

WEATHER FORECAST FOR SUNDAY:

WEATHER: Morning clouds and fog...pulling back to the coast 9-10 am. Clouds will linger along Sur Zone through early morning, then clear mainly south of Pt Sur. Transport winds will push smoke to the southeast.

TEMPERATURES: 85-91 interior/ridges 80-87 lower slopes...Hwy 1 72-77. **24 HR Trend (down 2-5)**

HUMIDITY: Coast 35-50%...interior/ridges 15-25%. **24 HR Trend (up 10% coast)**

20 FT WINDS:

RIDGETOP - Sur Zone – North-Northeast 2-5 mph gusts 8 mph becoming west to northwest during the afternoon 5-15 mph. Gusts to 20 mph Hwy 1. **Seco Zone** –north-northeast 1-3 mph in the morning becoming north-northwest 3-6 with gusts 10 mph in the afternoon

SLOPE/VALLEY - Downslope/downcanyon 3-6 in the morning becoming ...Seabreeze and upcanyon 1400-2000 hours 4-8 mph gusts 10-12 mph.

Sur Zone/hwy 1 – light northeast/downslope in the morning switching west-northwest & gusty

Marine Layer: 1000-1200 feet.

WEATHER FORECAST FOR SUNDAY NIGHT:

WEATHER: Becoming mostly cloudy below 1200 feet, especially Sur zone. Smoke settling over lower elevations.

TEMPERATURES: 65-71 above 2000 feet. 52-59 along Hwy 1 and up Carmel Valley.

HUMIDITY: Moderate recovery below 1500 feet 70-90%...25-35% above 1500 feet. Peaks may recover early then dry to very low humidities through sunrise.

20 FT WINDS:

RIDGETOP – Sur Zone – West to Northwest 4-6 mph gusts 15 mph becoming northeast 3-6 mph. **Seco Zone** –north-northeast 3-6 with gusts 8 mph.

SLOPE/VALLEY – Evening upcanyons 4-7 mph...becoming downcanyon 2-4 mph overnight.

Marine Layer: 1200-1500 feet.

Extended Forecast: An upper level trough will develop over the region bringing a cooling and moistening trend to the Soberanes Fire. Night and morning low clouds will return, but higher elevations will remain mild and dry.

Portable RAWS 163.350 Tone 0032 for H3, Tone 0033 Piney Creek, Tone 0029 for Blue Rock, Tone 0038 Chews Ridge, Tassajara 0039, Tone 0031 Memorial.

FIRE BEHAVIOR FORECAST

INPUTS

WEATHER SUMMARY Slightly cooler today as low pressure begins to develop over the region.
PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

Fire behavior was active in the Sur Zone above the marine layer yesterday, making short uphill runs and consuming interior islands. The presence or absence of the marine layer is a key factor to fire behavior and intensity. Areas of the fire below the marine layer generally produce smaller rates of spread and less intense fire conditions. **There are exceptions to this and during the last two weeks active burning in fine fuels has been observed within the marine layer.** Areas of the fire that are above the marine layer tend to be much more active and produce greater rates of spread. Overnight as the marine layer is compressed back towards the coast. Expect poor overnight humidity recoveries and the potential for a second burn period in the pre-dawn hours. The fire will continue to slowly back down into the very steep and rugged terrain of the Carmel (Branch III) and Ventana (Branch VIII) river drainages with low intensity. Suppression efforts and marine influence have impeded this spread into the heavier fuels at the bottom of these drainages. This fire has crossed watercourses before and if it crosses again expect slope runs to the south increasing in behavior and intensity as it moves into higher elevations. The fire is burning in a mix of brush and grass oak understory. Grass fuels in the area have cured and heavier dead fuel moistures are very low. **Live fuel moistures are at or near critical levels (LFM = 70%).** ERC's have been trending towards critical levels over the last few days and are expected to continue climbing.

Optimal Alignment Peak Burning Conditions

Probability of Ignition = 90% **Spotting Distance**= up to 1/3 – 1/2 Mi. **ROS** 80-140 ch/h for uphill runs
Fine Dead Fuel Moisture = 3% **10hr Fuels**= 4-6% **BI** 164 **ERC** 77 2-3 ch/hr for backing

SPECIFIC

Carmel Zone BRANCH I, II, IX

No forward fire progression is expected. Interior islands and heavier fuels will continue to burn out.

Seco Zone BRANCH III, IV, V

The fire is holding on the north side of Carmel River with only minor growth in the far interior. The hotter and drier weather will be a test to the fire edge continuing to hold or not. The potential for spotting and rollout is low. However, **if the fire were to cross the Carmel River...**be prepared for upslope/upcanyon winds to align with the steep and complex terrain toward Hennicksons Ridge. Expect moderate rates of spread of 1/2 - 1 1/2 mph with flame length of 5-10 ft in the oak vegetation types and 15-20 ft in the brush. Should rollout occur on the same side as the fire, expect short upslope pulses as the fire burns back into itself. Backing rates of spread in slopes > 60% will be about 100-250 feet per hour.

Sur Zone BRANCH VII, VIII

The main fire has crossed Ventana creek above the Big Sur confluence. Expect upslope runs to occur in the interior of DIV O. West of the confluence the fire will continue to back south towards the drainage bottom. If the fire crosses the Big Sur River slope reversal will increase spread rates and could threaten control lines in DIV O and N. Re-burn potential exists within pockets of dense brush. Expect smoke and the potential for spotting across the line in the afternoon as northerly winds increase. In the Pfeiffer area the fire will continue to back to the west. Expect fire activity to be hampered by the marine layer in the afternoon, especially in areas where firing operations may occur. Fire will remain active within the thermal belt tonight.

AIR OPERATIONS

Expect the smoke and marine layer to lift around late-morning.

SAFETY

Know what your fire is doing at all times. Particularly where it is in relation to the marine layer.

Unfamiliar with weather and local factors influencing fire behavior – Many resources have recently arrived to this incident, please take the time to share your recent local knowledge and brief your personnel!

FIRING OPERATIONS

MULTIPLE FIRING OPERATIONS ON THE FIRE

Watch Out

- Tunnel Vision and decreased situational awareness
- Important that all crews monitor Divisional and Firing Group radio traffic
- FIRE BEHAVIOR ON THE SOBERANES

Mitigation

- Brief crews specific to the special instructions in 204's
- Confirm all crews have current Radio load and are able to monitor multiple channels
- Ensure the Firing Operations Checklist has been followed (Go-No Go)
- BE AWARE!! The FIRE BEHAVIOR on the Soberanes increases at night

TRAFFIC

FIRE EQUIPEMENT IS LARGE AND HEAVY

Watch Out

- Roads and Highways surrounding the fire will have increased traffic during the weekend
- Roads in the fire area are narrow, steep and are shared by civilian traffic
- Reports of increased fire apparatus speeds around the fire

Mitigation

- Drive with a high level of Situational Awareness and utilize defensive driving techniques
- Use road cones and signs as necessary to coordinate traffic flows on road systems
- Slow down and obey posted signs and speed limits

INCIDENT HEALTH

FATIGUE DECREASES YOUR BODIES DEFENSES AGAINST ILLNESS

Watch Out

- Poor personal hygiene can lead to rashes and severe discomfort
- Poison oak contaminated clothing can extend the symptoms
- Watch out for stockpiling old lunches or other debris in packs or vehicles

Mitigation

- Take time to use the provided shower facilities, wash your hands before eating and utilize hand sanitizer throughout the day
- Use the laundry services to clean dirty and Poison Oak contaminated clothing
- Police your work areas and trailers, throw out old food/lunches to deter ant and rodents

Prepared By (Communications Unit) 
 Austin L. Browne(COML)
 Incident Location
 5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as it programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the RX and TX reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: CALCORD

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 - Closest EMS resource
 - Communications Unit
- Communications Unit contacts:
 - Ground or Air ambulance as requested
 - Operations
 - Safety
 - Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

INCIDENT BASE EMERGENCY:
Contact Communications on Assigned CMD channel with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
 - Medical Unit
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor
 - Comps/Claims

DEMOB

SOBERANES INCIDENT

CA – BEU – 003422

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- *Please return all supplies and equipment, either at ICP-Toro Park or the camp assigned to, prior to reporting to Demob (ICP – Toro Park)*
- **Strike Team Leaders and/or Overhead personnel** report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader. After receiving the #221, the STEN will report to ground inspection.

*Engines will report to ground support (Fort Ord) at the times posted. The engines will go through vehicle inspection and weed wash then wait for their STEN to meet up with them at Fort Ord.

- When the strike team and leaders are completed with ground support, the strike team will report back to ICP – (Toro Park) to finish their #221.
- Resources will get signatures from the following units:
 - Motels
 - Supply
 - Ground Support
 - Weed Wash
 - Training (If they have a trainee)
 - Communications
 - Documentation
 - Time
 - Demob
 -
- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.
- Air Travel: For Federal resources, provide a #213 to the Demob Unit with the following information:
 - Full Name: (As it appears on Drivers License)
 - Date of Birth
 - Destination jet port and departure jet port.
 - Phone Number and Email
 - Date of Travel

FIRE SUPPRESSION REPAIR PLAN SOBERANES FIRE: CA-BEU-003422

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

Archaeological or Historic Sites

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE:	Yellow and black stripped & Orange and black stripped
U.S.F.S.	Yellow and black stripped tied with blue
Santa Lucia Preserve:	White and blue tied together & Yellow and black stripped

Waterbreaks/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6” into existing grade with a 12” berm for a minimum height of 18”. Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

Archaeological and Historical Sites Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Forest Service Wilderness and California State Parks Special Instructions – Resource Advisor

DOZER LINES - DIVISIONS K, M, P, and CONTINGENCY LINES

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.
- Avoid archeological sites flagged with black/yellow and blue ribbon

Wilderness Minimum Impact Suppression Tactics (MIST)

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

FIRELINE CONSTRUCTION PHASE:

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

HELISPOT CONSTRUCTION:

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road: Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

Attach Firing Operations Checklist to ICS-214

Human Resource Message

Soberanes Fire

August 14, 2016

The Ten Commandments of Human Relations

1. SPEAK TO PEOPLE. There is nothing so nice as a cheerful word of greeting.
2. SMILE AT PEOPLE. It takes 72 muscles to frown and only 14 to smile.
3. CALL PEOPLE BY NAME. The sweetest music to anyone's ears is the sound of his/her own name.
4. BE FRIENDLY AND HELPFUL. If you have friends, be a friend.
5. BE CORDIAL. Speak and act as though everything you do is a genuine pleasure.
6. BE GENUINELY INTERESTED IN PEOPLE. You can like almost everybody if you try.
7. BE GENEROUS WITH PRAISE. Cautious with criticism.
8. BE CONSIDERATE WITH THE FEELINGS OF OTHERS. There are usually three sides to every controversy; yours, the other fellow's and the correct side.
9. BE ALERT TO GIVE SERVICE. What counts most in life is what we do for others.
10. ADD TO THIS A GOOD SENSE OF HUMOR...a big dose of patience, a dash of humility and you will be rewarded many fold.

Janine Summy, Human Resource Specialist, 509-429-1206

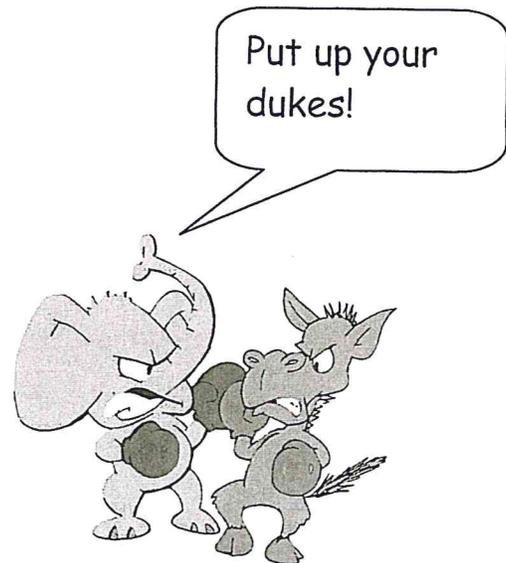

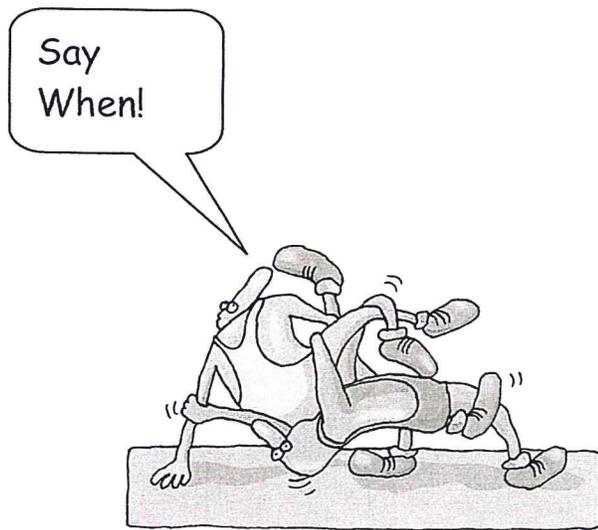

Todd Morrow, Human Resource Specialist Trainee, 707-373-0204

Human Resource Message

AVOID HORSEPLAY

HORSEPLAY is rough and rowdy play that does not contribute effectively to a productive and safe work or R&R environment.

HR OFFICE is located in the Quonset Hut (tent) #15 at ICP

Human Resource Specialist (HRSP) Janine Summy (509) 429-1206

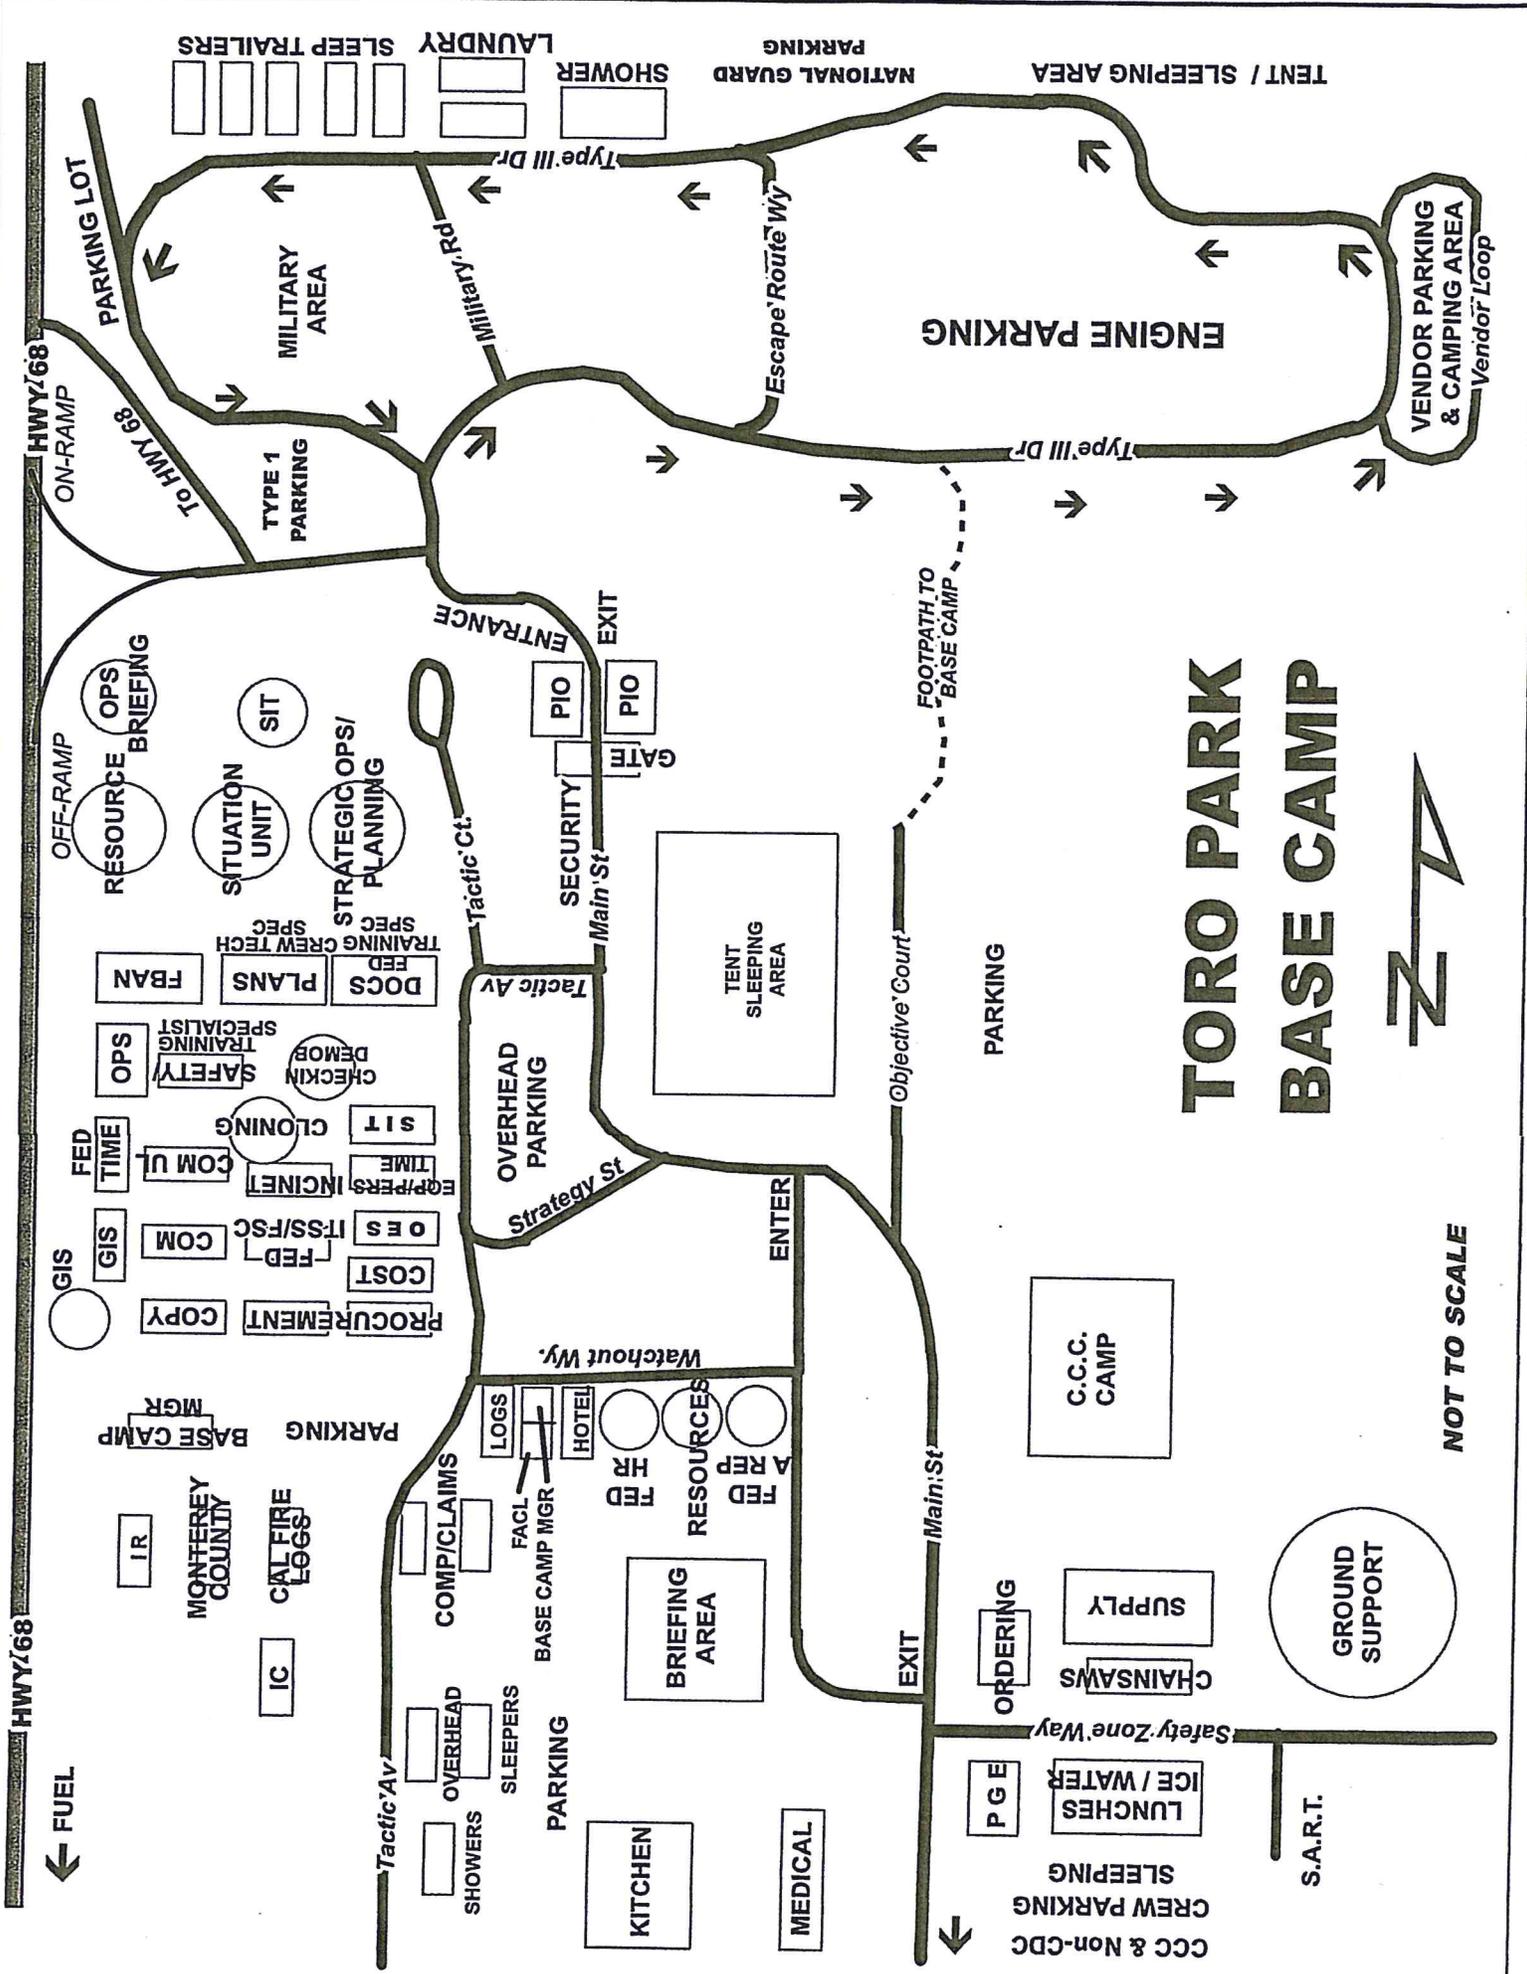

Human Resource Specialist (HRSP-T) Frances Lindquist (530) 605-6313

Human Resource Specialist (HRSP-T) Todd Morrow (707) 373-0204

The HRSP Staff is collecting non-perishable food for the local community.

Please drop off any non-perishable food in the centrally located collection boxes.

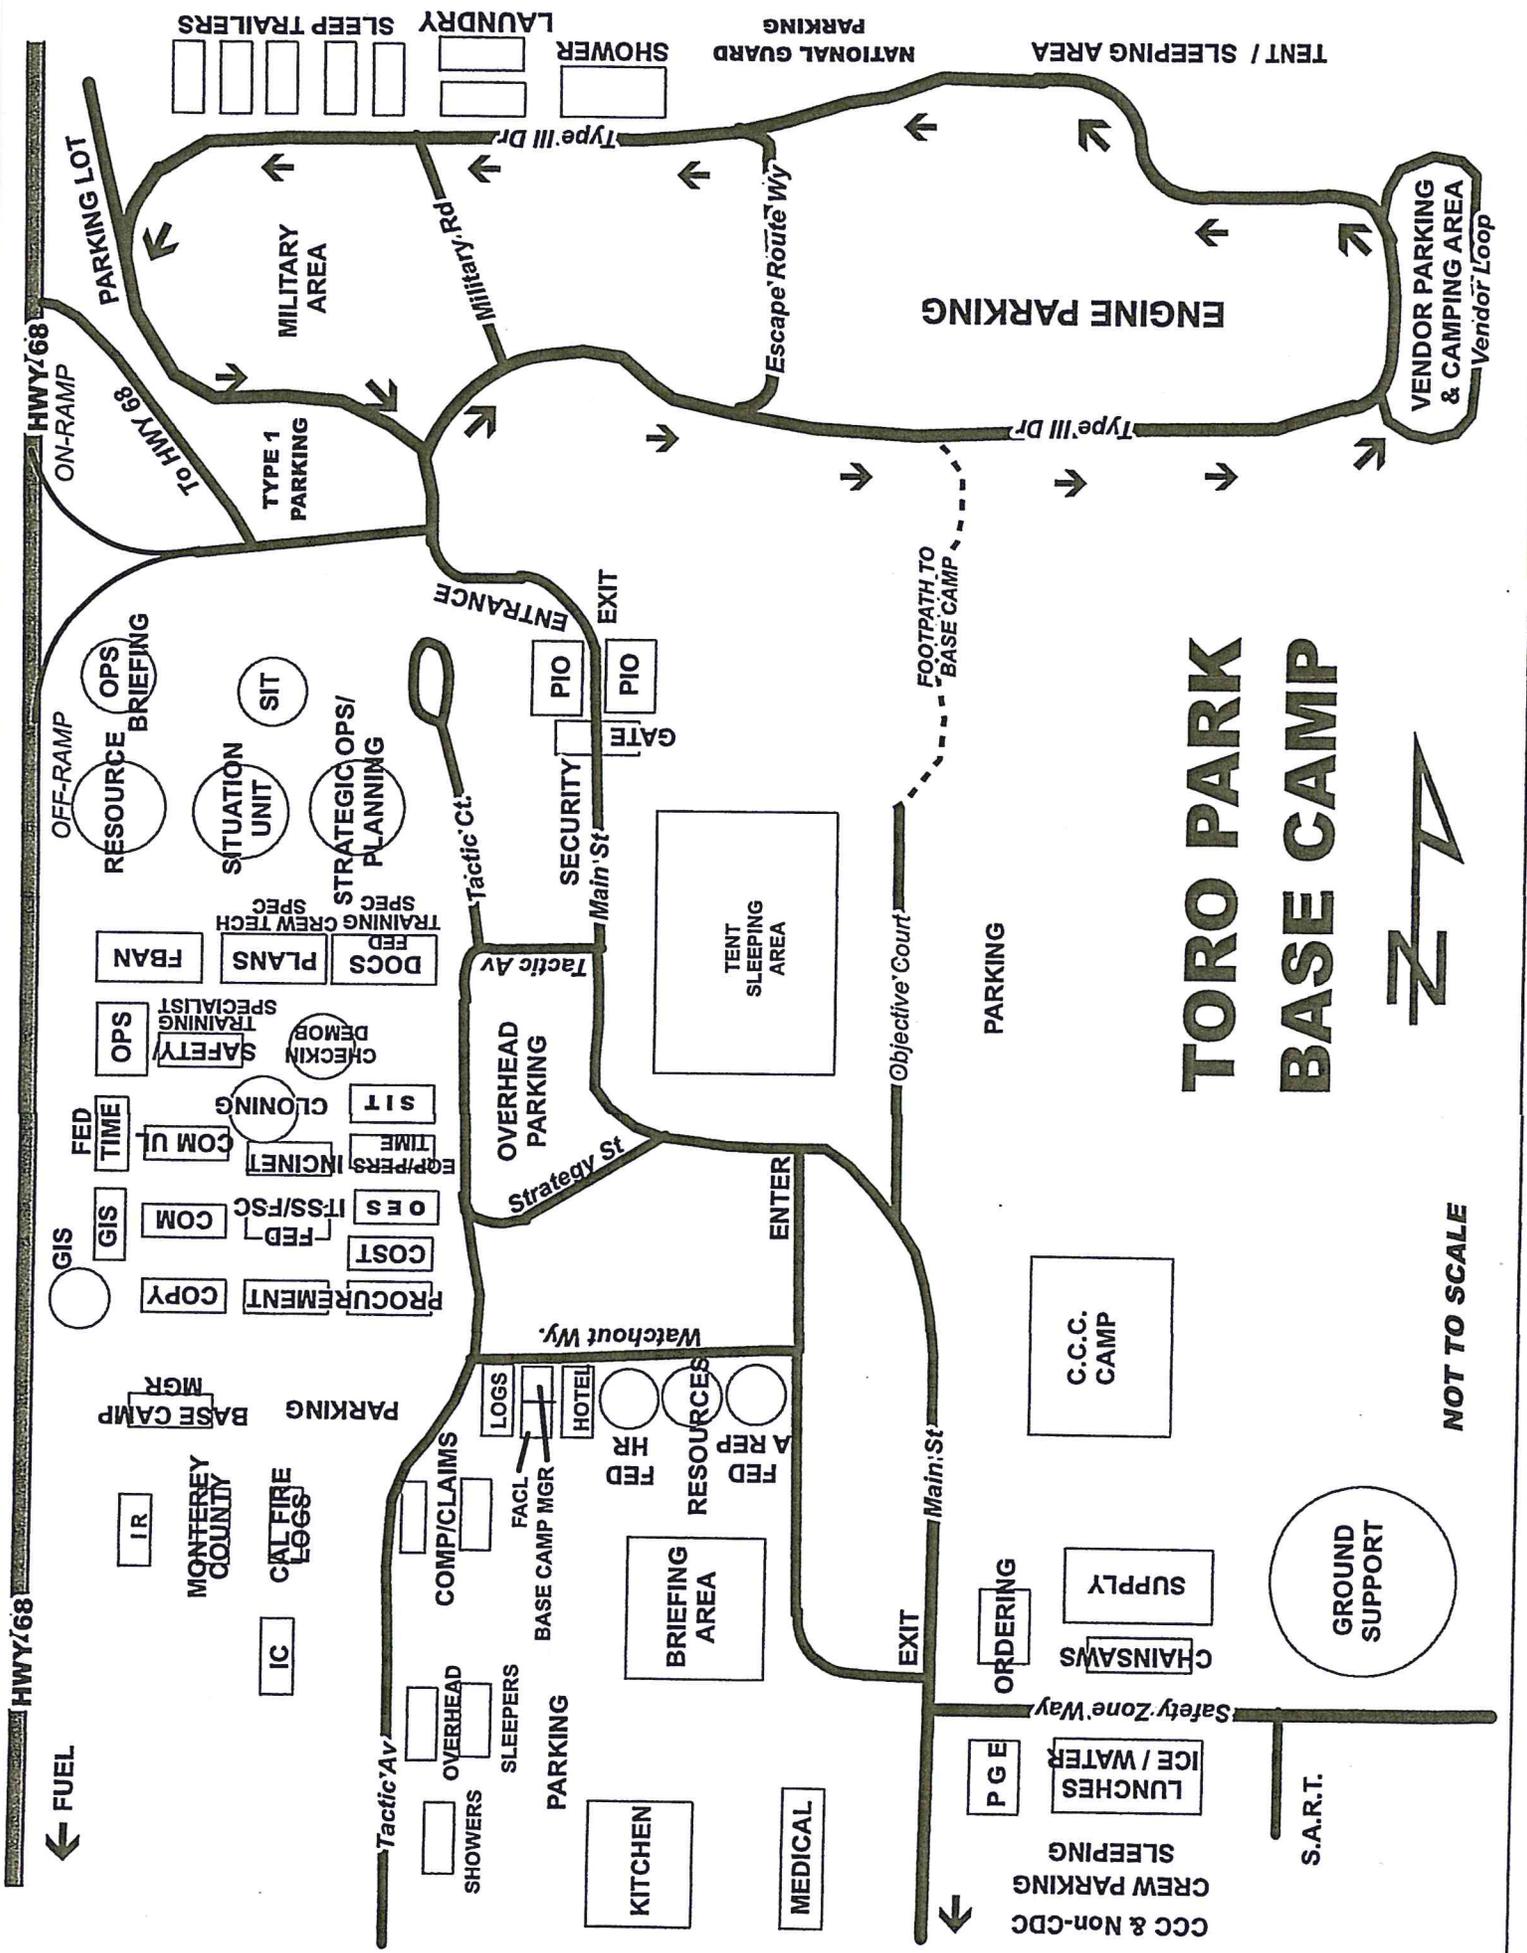

Collection boxes are located at the HRSP tent, the morning/evening Briefing tent and the Federal Pay Trailer. The non-perishable food will be collected daily in the early evening and will be distributed once a week to a collection point in the local community. If you have any questions, please feel free to contact: **Fran Lindquist at (530) 605-6313 or ANY HRSP.** Thank you for your support to the local community
