4. Operational Period – 08/31/2016 0700 WED - to - 09/1/2016 0700 THUR

Management Objectives:

- Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.
- Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed.
- Ensure cost containment measures are identified and applied.
- Enhance community relations and political relationships through timely information exchange.
- Provide for initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.
- Demonstrate principles of respect and dignity.

Control Objectives:

- Complete suppression repair activities at the north end of the fire in Branches I, II, and IX.
- Protect private property, surrounding communities, and values at risk by keeping the fire:
 - North of Nacimiento-Ferguson Road to limit fire growth toward values to the south.
 - West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation.
 - East of Highway 1 to protect the visual corridor of this National Scenic Byway.
- When possible, minimize adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST). Where opportunities exist, use natural features and preexisting containment lines. Consult with Resource Advisers to ensure tactics are compatible with social, economic, and environmental values.

Command Emphasis:

Protect values at risk by using a combination of direct and indirect tactics to suppress the fire. A key element of the strategy is to apply the right resources, to the right task, at the right time, for the right duration in order to achieve objectives with minimum firefighter exposure.

Situational Awareness:

Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.

Stop, think, talk... then act in response to any situation that may represent unnecessary exposure.

Soberanes Fire Weather Forecast

FORECAST NO: 39

NAME OF FIRE: Soberanes

PREDICTION FOR: 0600-2200 Wed

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Wednesday Aug 31st, 2016

SIGNED: Joseph Bower

TIME AND DATE

Incident Meteorologist Trainee

FORECAST ISSUED: 1900 8/30/16

Continued breezy ridgetop winds today

WEATHER DISCUSSION: Breezy winds will continue this morning from the northwest at lower elevations but still northeast in Branch 7 and 8. Wind speeds will be a lighter than Tuesday. The trend will be for winds to gradually decrease through the day. There will be a slight cooling and moistening trend as well except for higher ridges. The marine layer will remain mostly diffuse by the strong winds and cool air aloft. Strong transport winds will push smoke to the south with minimal impact on the helibases. Gusty northwest winds will continue for the swing shift before winds gradually ease overnight into Thursday morning.

WEATHER FORECAST For Wednesday:

WEATHER: Partly cloudy. Areas of smoke interior pushing southward.

TEMPERATURES: Highs 82-92 above 1500 feet...65-75 lower slopes. **24 HR trend-** 1-3 degrees cooler.

HUMIDITY: 15-25% above 1500 feet. 50-60% lower slopes **24 HR trend-** 2-4% wetter.

20 FT WINDS:

RIDGETOP - Northerly 6-12 mph with gusts 15-20 mph except Northeast Branch 7 and 8.

SLOPE/VALLEY - Northerly 4-7 mph afternoon gusts 8-10 mph.

Marine Layer: Around 1500 feet but poorly defined with minimal cloud coverage.

WEATHER FORECAST For Wednesday Night:

WEATHER: Mostly clear early then patchy low clouds forming along the coast overnight.

TEMPERATURES: Lows 65-75 above 2000 feet. 55-65 lower elevations.

HUMIDITY: Poor to fair recovery. 20-30% above 2000 feet...70-90% lower slopes.

20 FT WINDS:

RIDGETOP - North to Northwest 6-15 mph in the evening then North to Northeast 5-10 mph overnight.

SLOPE/VALLEY - Evening upcanyon 4-7 mph staying northerly overnight.

Marine Layer: 2000 feet but still poorly defined most of the night.

EXTENDED FORECAST: An upper trough will be slow to move over the state, keeping day and night temperatures near normal. Marine layer around 2000 feet and not as dry above as previous days. General winds will be westerly 5-10 mph.

Portable RAWS Frequency: 163.350 DTMF tones 0032 for H3, 0033 Anderson, 0029 Blue Rock, 0038 Chew Ridge, 0039 Tassajara, 0031 Memorial and 0037 Coastal Ridge.

OUTPUTS

FIRE BEHAVIOR

GENERAL

The last wetting rain for the fire area was May 6th (.19"). Live and dead fuels are critically dry. The fire is burning primarily in a mix of brush and oak burned in the 2008 Basin Fire. Snags, skeleton brush and heavy downed fuels are abundant and will increase the fire line intensity. Fire burning on ridges and exposed areas and aligned drainages will show increased behavior during this wind event. Fire burning in sheltered areas or drainage bottoms may not see any increased activity if the wind does not reach canyon bottoms.

Fire behavior will continue to be active with the northerly winds on ridges, exposed slopes and north/south aligned drainages. 10-20' flame lengths in brush fuels should be expected.

SPECIFIC

BRANCH I, II, IX

No forward fire progression is expected.

BRANCH III, IV, V

The fire in the Carmel River drainage above the Los Padres Reservoir has potential to cross, but the likelihood of that happening is less today with the expected lower wind speeds. Interior pockets of fuel will continue to burn out on the slope above Sulphur Springs Camp. Any roll out will also increase the potential to cross the drainage bottom.

Near Miller Mountain and above the English Cabin any heat remaining will become active when exposed to the northerly winds. No fire activity was observed on 8/30. The potential for spread is still there but significantly lower today.

Branch VIII

DIV N - The fire is well established in the South Fork of Big Sur River. Expect the fire to continue moving along the south aspect above the South Fork towards the confluence with the North Fork. Expected running and short range spotting to continue. Fire has come out of Mocho Creek and below the South Fork of the Big Sur into Pick Creek, with potential for spread toward indirect control lines from DP105 to the Chimney

Branch VII

DIV UU & SS – Fire is not expected to reach the division in this burn period.

AIR OPERATIONS

No marine layer is expected this morning with clear visibility all day.

SAFETY

Don't underestimate fire behavior from burnout operations. Receptive fuels have potential to produce large flames lengths, high rates of spread and increase fire behavior from interior fire.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

Human Resource Message

Effective Communication

The Forest Service Values are: Caring for the land, serving people, valuing diversity, working collaboratively, and strengthening our connection with communities.

The way we present ourselves and the way we communicate with each other will determine how successful we will be. Effective communication is the ability to speak and be heard. The hardest part of effective communication can be the way the message is delivered and received, as it takes both parts to be successful. As we continue to work together for the same mission and goals, we cannot forget to be respectful to each other, the public, and ourselves.

Ways to improve communication-

- *Be respectful to the person you are speaking to.*
- *Stand in the other persons shoes.*
- *Drop your point of view long enough to take another way of seeing things.*
- *Remember the point of communication is not to win or be right, but to either bring people together or clarify their differences.*

Incident Human Resource Specialist is: Andrea Cabida and Sue Warren

Archaeological and Historical Sites Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites.*** Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph.*** Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.
