SOBERANES FIRE

CA-BEU-003422

PNKG7Z Override Code USFS 1502

OPERATIONAL PERIOD

Thursday, September 1st 0700

to

Friday, September 2nd 0700

Division Supervisors: Validate fire apportionment as follows:

Branch – I, II, VII, IX – Divisions call Dave Dukart at (805)698-2541 between 0830-1100.

Branch – III, IV, V – Divisions call Kris Armstrong at (661)342-7297 between 0830-1100.

INCIDENT OBJECTIVES	Soberanes Fire	08/31/16	1900

4. Operational Period – 09/1/2016 0700 THUR - to - 09/2/2016 0700 FRI

Management Objectives:

- Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.
- Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed.
- Ensure cost containment measures are identified and applied.
- Enhance community relations and political relationships through timely information exchange.
- Provide for initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.
- Integrate BAER team into the IMT planning process.
- Demonstrate principles of respect and dignity.

Control Objectives:

- Complete suppression repair activities at the north end of the fire in Branches I, II, and IX.
- Protect private property, surrounding communities, and values at risk by keeping the fire:
  - North of Nacimiento-Ferguson Road to limit fire growth toward values to the south.
  - West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation.
  - East of Highway 1 to protect the visual corridor of this National Scenic Byway.
- When possible, minimize adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST). Where opportunities exist, use natural features and preexisting containment lines. Consult with Resource Advisers to ensure tactics are compatible with social, economic, and environmental values.

Command Emphasis:

Protect values at risk by using a combination of direct and indirect tactics to suppress the fire. A key element of the strategy is to apply the right resources, to the right task, at the right time, for the right duration in order to achieve objectives with minimum firefighter exposure.

Situational Awareness:

Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.

Stop, think, talk... then act in response to any situation that may represent unnecessary exposure.

Soberanes Fire Weather Forecast

FORECAST NO: 40

NAME OF FIRE: Soberanes

PREDICTION FOR: 0600-2200 Thu

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Thursday Sept 1st, 2016

SIGNED: Ryan Walbrun

TIME AND DATE FORECAST ISSUED: 1900 8/31/16

Incident Meteorologist

WEATHER DISCUSSION: An upper trough over northern California will keep seasonably cool conditions in place over the incident. Temperatures will be in the 80s over most of the fire with humidity readings generally in the moderate category. Winds will be lighter today than each of the last few days. Over most of the ridges the winds will be north to northwest but generally light under 10 mph. Some northeast winds may still show up and be adverse to the line in Branch 7 and 8 but only during the morning and overnight hours before turning more onshore during the afternoon. The marine layer will try and reform around 2000 feet but is expected to be weak with only patchy clouds this morning. Smoke transport winds will be from the southwest at 5000 feet and tend to blow smoke towards Chews Ridge and Tassajara. Models are indicating a return of very dry air again tonight with poor recovery under 30% and locally in the teens Friday morning.

WEATHER FORECAST For Thursday:

WEATHER: Patchy morning clouds. Otherwise mostly sunny except interior smoke.

TEMPERATURES: Highs 80-90 interior above 2000 feet...65-75 lower slopes. **24 HR trend**- 1-3 cooler.

HUMIDITY: 20-35% interior above 2000 feet. 42-52% lower slopes **24 HR trend**- 1-4% wetter.

20 FT WINDS:

RIDGETOP - West to Northwest 4-8 mph afternoon gusts 10-12 mph

SLOPE/VALLEY - Northeast 2-5 mph early turning upcanyon 3-6 mph afternoon gusts 8-10 mph.

Marine Layer: Around 2000 feet but poorly defined with patchy cloud coverage.

WEATHER FORECAST For Thursday Night:

WEATHER: Mostly clear early then patchy low clouds forming along the coast overnight.

TEMPERATURES: Lows 64-70 above 2000 feet. 53-62 lower elevations.

HUMIDITY: Potentially much drier recovery 20-35% and locally 10-15% interior with 70-90% lower slopes.

20 FT WINDS:

RIDGETOP – Northwest 4-8 mph evening gusts 10-12 mph turning Northeast 3-6 mph.

SLOPE/VALLEY - Evening upcanyon 4-7 mph becoming downcanyon 1-4 mph overnight.

Marine Layer: 2000 feet but still poorly defined most of the night.

EXTENDED FORECAST: An upper trough stays over California through the Labor Day weekend. This will keep temperatures near normal with no big changes of note as the upper trough slowly moves inland. The marine layer will likely reform and become better defined around 2000 feet. General winds to remain westerly 5-10 mph.

Portable RAWS Frequency: 163.350 DTMF tones 0032 for H3, 0033 Anderson, 0029 Blue Rock, 0038 Chew Ridge, 0039 Tassajara, 0031 Memorial and 0037 Coastal Ridge.

ERC 68 1hr 4-6% Pig 70% Rate of spread head fire in brush 50-70cph Spotting up to 1/3 mile

OUTPUTS

FIRE BEHAVIOR

GENERAL

It has been almost four months since the last wetting rain. Live fuels and dead fuels are critically dry. The fire is burning primarily in a mix of brush and oak burned in the 2008 Basin Fire. Snags, skeleton brush and heavy downed fuels are abundant and will increase the fire line intensity. Cooler temperatures and lower winds speeds will lessen the fire potential today. Where wind and slopes align, the fire can exhibit rapid rates of spread, large flames lengths, and short range spotting. As the overall winds lessen expect local drainage winds to start playing a more important role in fire behavior. 10-20' flame lengths in brush fuels should be expected.

SPECIFIC

BRANCH I, II, IX

No forward fire progression is expected.

BRANCH III, IV, V

The fire above Sulphur Springs Camp will continue to flank, roll out and make short uphill runs. The potential for spotting across the Carmel River is decreasing fuels are consumed and the weather moderates. Any roll out will also increase the potential to cross the drainage bottom.

No smoke was observed near Miller Mountain and above the English Cabin on 8/30 and 8/31. The potential for spread is still there but significantly lower today.

Branch VIII

DIV N – Fire continues to burn in the upper reaches of South Fork of Big Sur River. Expect the fire to continue to finger across the drainage to the west and moving towards Pick Creek. Active fire behavior is also expected in the North Fork of the Big Sur but is further interior from the containment lines. Expected running and short range spotting to continue. Pick Creek still has potential to spread toward indirect control lines from DP105 to the Chimney House.

Branch VII

DIV UU & SS – Fire is not expected to reach the division in this burn period.

AIR OPERATIONS

Patchy marine layer burning off by 1000.

SAFETY

North and east aspect fuels will burn under the right conditions. Receptive fuels have potential to produce large flames lengths, high rates of spread and increase fire behavior from interior fire.

6. Control Operations/Work Assignments:

TASK: Scout and improve indirect line for firing operations. Monitor weather to ensure optimal conditions for successful firing operations.
PURPOSE: Contain fire activity along control lines, protecting structures and values at risk along Highway 1.
END STATE: All control lines successfully held fire with no infrastructure damage.

7. Special Instructions:

Please keep all Dozer lines out of Highway 1 viewshed.
The Communications Plan is complex; please review the ICS 205 with all Division personnel.
Use headlights. Slow down. Assume there is a vehicle around each corner. Look up. Be aware of hazard trees.
Review and understand medical emergency evacuation plan.
DIVS, TFLD and HEQB must account for & certify all hired equipment shift tickets during operational period.
Once ignition begins, only critical resources will be south along North Ridge Rd in front of the ignition group. If the main fire gets established on the south facing slope and Logwood drainage, only critical resources will be in unburned areas.
If fire becomes established west of the North Coast Ridge Road and cannot be contained with resources on hand, an evacuation order for Partington subdivision will be initiated.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

HEALTH AND SAFETY MESSAGE

SAFETY starts with ***YOU***

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Soberanes	DATE: 09/01/2016 Oper. Period: Day

Major Hazards and Risks:

Increased Fire Behavior
Traffic
Temperatures rising

Fire Order of the Day – ***R***ecognize current weather conditions and obtain forecasts

Narrative: Along with increased fire behavior, we are seeing a steady increase in ambient air temperatures. Temps are in the 90's and expected to rise over the next few days. It is important to stay well hydrated and recognize the the symptoms of heat related injuries. You can find information on heat related injuries in the pink pages of your IRPG.(pg 103) Remember: Heat stroke is a medical emergency!

Watch Out Situation of the Day

14.WEATHER IS GETTING HOTTER AND DRIER

Look Up, Look Down, Look Around

*__Fuel Characteristics__ – Assess prior to beginning operations.

*__Fuel Moisture__ – Read daily shift plan and assess on site.

*__Fuel Temperature__ – Varies with exposure to direct sunlight.

*__Terrain & Fuel Accumulations__ – Scout prior to beginning operations and continuously during operations.

*__Wind__ – Measure, observe, feel and notice changes.

*__Atmospheric Stability__ – Observe.

*__Fire Behavior__ – Monitor constantly prior to and during operations.

*__Safety__ – Ask questions in unfamiliar situations. The only dumb question is the one you did not ask.

Human Resource Message

Thoughts for the Day

Exercise TOLERANCE. Pledge to respect people whose abilities, beliefs, culture, race, sexual identity or other characteristics are different from your own.

Patience will be needed as well as we transition teams to new organizations. The focus remains the same: take care of each other and have each other's back. Increase your tolerance of each other by exercising patience.

Incident Human Resource Specialist is: Sue Warren and DaAndrea Cabida

Archaeological and Historical Sites
Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites***. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.

2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.

3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.

4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.

5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph***. Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.

6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.
