SOBERANES FIRE

CA-BEU-003422

PNKG7Z Override Code USFS 1502

OPERATIONAL PERIOD

Sunday, September 4th 0700

to

Monday, September 5th 0700

INCIDENT OBJECTIVES	1. Incident Name Soberanes Fire	2. Date Prepared 09/3/16	3. Time Prepared 1900

4. **Operational Period** – 09/4/2016 0700 SUN - to - 09/5/2016 0700 MON

Management Objectives:

- Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.
- Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed.
- Ensure cost containment measures are identified and applied.
- Enhance community relations and political relationships through timely information exchange.
- Provide for initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.
- Integrate BAER team into the IMT planning process.
- Demonstrate principles of respect and dignity.

Control Objectives:

- Protect private property, surrounding communities, and values at risk by keeping the fire:
  - North of Nacimiento-Ferguson Road to limit fire growth toward values to the south.
  - West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation.
  - East of Highway 1 to protect the visual corridor of this National Scenic Byway.
- When possible, minimize adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST). Where opportunities exist, use natural features and preexisting containment lines. Consult with Resource Advisers to ensure tactics are compatible with social, economic, and environmental values.

Command Emphasis:

Protect values at risk by using a combination of direct and indirect tactics to suppress the fire. A key element of the strategy is to apply the right resources, to the right task, at the right time, for the right duration in order to achieve objectives with minimum firefighter exposure.

Situational Awareness:

Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.

Stop, think, talk... then act in response to any situation that may represent unnecessary exposure.

WEATHER DISCUSSION: The fire will be in a stable post-frontal environment today with gusty northwest winds continuing this morning along the coast and over the ridges. Branch 7&8 will continue to see moderate westerly winds at least through midday that will be parallel to the containment line at times in Div N and UU. The strong winds and cool air aloft will essentially mix out the marine inversion layer with seasonably cool temperatures again today. Humidity readings will be high for areas below 2500-3000 feet and only slowly dry out through the day. Only the highest ridges above 3000 feet will see moderate humidity readings today. For tonight, winds will ease but turn northeast over the fire including Branch 7&8.

WEATHER FORECAST For Sunday:

WEATHER: Some patchy coastal clouds. Otherwise sunny with interior smoke.

TEMPERATURES: Highs 74-83 active fire area and Branch 6. 65-73 lower slopes. (little change)

HUMIDITY: 22-32% active fire area. 50-60% lower slopes. (little change)

20 FT WINDS:

RIDGETOP - Northwest 10-15 mph strongest morning hours...easing 5-10 mph afternoon.
Branch 7&8 – Southwest 7-10 mph gusts 10-15 mph in the afternoon.
SLOPE/VALLEY - Light becoming upvalley 4-7 mph gusts 10-12 mph late afternoon.

Marine Layer: 3000 feet but becoming poorly defined due to strong winds and mixing. **Haines:** 4

WEATHER FORECAST For Sunday Night:

WEATHER: Mostly clear with interior smoke. Some patchy coastal clouds at camp/icp.

TEMPERATURES: Lows 45-55.

HUMIDITY: Good recovery 70-90% below 2500 feet. Some late night drying Branch 7&8 25-40%

Marine Layer: 2500 feet...starting to compress towards Monday morning.

EXTENDED FORECAST: Seasonable on Monday with a transition from trough to ridge leading to a few degrees of warming and drying with light North winds. Ridge builds Tuesday through Thursday with warming and drying trend with general N/NE winds and a compressing marine layer along the coast. Poor nighttime humidity recovery.

OUTPUTS

FIRE BEHAVIOR

GENERAL

Fuels are critically dry and climatology suggests no rain in the near future. The fire is burning primarily in a mix of brush and oak burned in the 2008 Basin Fire. Snags, skeleton brush and heavy downed fuels are abundant and will increase the fire line intensity. Where wind and slopes align, the fire can exhibit rapid rates of spread, large flames lengths, and short range spotting. Drainage winds will play an important role in fire behavior as the stronger northwest winds begin to decrease. 10-20' flame lengths in brush fuels should be expected.

ERC 65 1hr 4-6% Pig 70% Rate of spread head fire in brush 50-70cph Spotting up to 1/3 mile

SPECIFIC

BRANCH III, IV,VI

The fire above Sulphur Springs Camp will continue to flank, and roll out. The potential for spotting across the Carmel River continues to decrease as fuels are consumed.

There is still no heat observed near Miller Mountain and above the English Cabin. The potential for spread is decreasing daily as no smoke is observed in the area.

Branch VII,VIII

DIV N – The alignment of wind and topography will increase spread overnight and should continue today. Expect fire movement towards Indian Valley and Higgins Creek. Winds should funnel around Black Cone and move fire down Willow Creek towards Shovel Handle Creek and Camp Creek. Heavier fuels on the north and east aspects are burning but not as readily as on south and west aspects. Expect uphill runs and short range spotting to continue in areas where fuels have a chance to build some momentum. The potential for spots over containment lines is high as winds eddy around topography.

DIV UU – Fire could become established in Higgins Creek below the Coast Ridge Road.

DIV SS – Fire is not expected to reach the Division this operational period.

AIR OPERATIONS

If a marine layer is present, it should burn off early morning.

SAFETY

Expect numerous spots after last night's fire spread.

Incident Location

5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Soberanes	DATE: 09/04/16	Oper. Period: Day/Night

RESPECT:

- **Provide accurate and timely briefings**
- **Give the intent for assignments and tasks**
- **Make yourself available to answer questions at appropriate times**

BACKFIRING OR BURNOUT OPERATIONS

Backfiring or burnout operations are often critical operations in the fire management job. If planned and executed correctly, they can speed control of a fire and greatly reduce suppression costs. Conversely, if done incorrectly, they can endanger personnel, extend control time and increase cost. Safety considerations must always be given first priority. No backfiring or burnout action, regardless of strategic importance or other critical factors, is worth risking one human life!

- **Backfiring or burnout operations must not jeopardize the safety of personnel or equipment or compromise suppression actions on adjacent portions of the fireline.**
- **One qualified individual must be responsible for controlling and directing the firing operation.**
- **Before beginning backfiring or burnout operations, assure that:**
  - **Lookouts are posted.**
  - **Communications are established with both fireing and holding teams.**
  - **Escape routes and safety zones are established, known to all resources, and will not be compromised by the firing operations.**
- **If it is necessary, and time allows, concentrations of fuel adjacent to and inside the control line should be removed.**
- **Fuel outside the control line may be removed; concentrations of fuel may be scattered, covered with foam or wet down, or treated by ground or aerial retardant applications.**
- **Critical points such as hooks in the fireline, saddles or canyon may require extra holding forces.**

Archaeological and Historical Sites
Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites***. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.

2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.

3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.

4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.

5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph***. Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.

6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.
