**Wednesday, September 7<sup>th</sup> 0700**

**INCIDENT OBJECTIVES**

1. Incident Name  
**Soberanes Fire**

2. Date Prepared  
09/5/16

3. Time Prepared  
1900

**4. Operational Period – 09/6/2016 0700 TUES - to - 09/7/2016 0700 WED**

**Management Objectives:**

- Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.
- Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed by keeping the fire:
  - Inside the current perimeter in Branches I, II, and IX to protect infrastructure in adjacent communities.
  - North of Nacimiento-Ferguson Road to limit fire growth to the south at the point of greatest opportunity
  - West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation
  - East of the Coast Ridge Road to protect values within the visual corridor of the Highway 1 National Scenic Byway.
- Assess suppression repair needs on federal lands and implement where safe and appropriate.
- Provide initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.
- Ensure cost containment measures are identified, applied, and documented.
- Enhance community relationships through respect, engagement, communication, and trust.
- Keep public informed of incident status

**Control Objectives:**

- Secure the southern edge of the fire along the Coast Ridge Road in Branches VII and VIII.
- Evaluate options for containing fire spread to the east and northeast in order to protect values on inholdings within the Wilderness, and to the north in the Carmel Valley.
- Evaluate the effectiveness of aerial resources to check fire spread and consider the use of direct, indirect, and burnout tactics where risk to firefighters can be effectively mitigated.
- Work with agency administrators and cooperators to develop alternate and contingency plans for containing fire spread to the east and south.
- Avoid adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST). Where opportunities exist, use natural features and pre-existing containment lines. Consult with resource advisors to ensure tactics are compatible with social, economic, and environmental values.

**Command Emphasis:**

Apply the right resources, to the right task, at the right time, for the right duration in order to achieve objectives with minimum firefighter exposure.

**Situational Awareness:**

Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.

***Stop, think, talk... then act in response to any situation that may represent unnecessary exposure.***

Smoke transport winds should continue to push most of the smoke southward over the ocean and along Hwy 1. The marine layer will be around 1000 feet and not impact any areas of the fire today. Northeast winds gradually shift more Easterly overnight with continued very poor humidity recovery. By early Wednesday morning Southerly winds show up Branch VII and VIII.

**WEATHER FORECAST For Tuesday:**

**WEATHER:** Sunny...hot and dry. Smoke interior and southern areas.

**TEMPERATURES:** Highs 88-99 active fire area and Branch 6. 77-87 lower slopes. (5-10 degrees warmer)

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL

Seasonal and Long Term drought conditions continue to bake both live and dead fuels.

Fire is moving out of the area burned by the 1999 Kirk Fire and now burning in fuels only burned by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant and increase fire intensity.

With hot and dry conditions intensifying, expect shrub fuels to burn aggressively upslope and steadily under full sun across south slopes. When wind pushes in litter fuels under oak woodlands, upslope on north aspects and through heavy fuels in stringers and drainage bottoms, intense fires can make short runs.

Head fire spread rates in brush can be up to 1 mph with aligned wind and slope. Flanking spread across slope has averaged about 1/2 mile per day. 10-20' flame lengths with running fire can be expected

**ERC 71 1hr 4-6% Pig 70% Spotting up to 1/3 mile**

#### SPECIFIC

#### BRANCH III, IV

Fire remains in place above Sulphur Springs Camp, but heat is diminishing with no new perimeter reported. The potential for spotting across the Carmel River continues to decrease as fuels are consumed. There is still no heat observed near Miller Mountain and above the English Cabin. The potential for spread is decreasing daily as no smoke is observed in the area. Fire at the head of Willow Creek not a factor at this time.

#### BRANCH VI

Fire in Zigzag creek and at the head of Higgins Creek is not a factor at this time. Fire could reach the slopes above the Arroyo Seco drainage Tuesday night or Wednesday.

#### Branch VII, VIII

DIV N – Fire established at the head of the Pick Creek drainage below the Coast Ridge line. Expect fire movement towards Indian Valley and Higgins Creek. Fire that is established in the bottom of Pick Creek could make uphill runs towards containment lines where fuels allow. Heavier fuels on the north and east aspects are burning but not as readily as on south and west aspects. The potential for spots over containment lines is high as winds shift to the northeast and eddy around topography.

DIV UU/SS – Fire established in Indian Valley, Zigzag Creek, and on south slopes above the head of Higgins Creek. Anticipate further runs upslope on north slopes, topping out above Higgins Creek.

### AIR OPERATIONS

Marine layer poorly defined at 1000ft or less. Little to limit air operations.

### SAFETY

Indirect line now a short term concern for Divisions N, UU, SS. Line Spikes increase exposure. Insure LCES is established around the clock.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. # HEALTH AND SAFETY MESSAGE

***SAFETY** starts with **YOU***

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Soberanes	DATE: 9/6/16	Oper. Period: Day/Night
---------------------	--------------	-------------------------

## **Major Hazards and Risks:**

- Firing Operations**
- Indirect Fireline**
- Unexpected Outcomes**

### Fire Order of the Day – **FIGHT FIRE AGGRESSIVELY, BUT PROVIDE FOR SAFETY FIRST**

Standard Fire Order #10 must be taken into account at all times when fighting fire. In order to fight fire safely and aggressively: Post lookouts. Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.

## **Watch Out Situation of the Day**

**6. INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR**

## **Human Factor Watch Outs**

Watching out for yourself, coworkers, subordinates and your boss is a primary responsibility for everyone involved in high risk activities. Watch outs are not just for the tactical environment. The Human Factor Watch Outs are designed to create an opportunity for you to take a tactical pause and re-evaluate your situation.

If any of the following occur:

- Your briefing was unclear.
- You don't remember what took place in the last hour.
- You are not getting answers to your questions.
- You are not getting clear acknowledgement of your message.
- You are encountering hazards that are not mentioned in your brief.
- Your team is not debriefing.
- Your tempo is too high to maintain command and control.
- Your leaders intent is vague.
- Your supervisor's expectation is unrealistic.

## **Archaeological and Historical Sites Fireline Guidance for the SOBERANES Incident**

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites.*** Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph.*** Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.
