OPERATIONAL PERIOD

Wednesday, September 7th 0700

to

Thursday, September 8th 0700

INCIDENT OBJECTIVES	1. Incident Name Soberanes Fire	2. Date Prepared 09/6/16	3. Time Prepared 1900

4. Operational Period – 09/7/2016 0700 WED - to - 09/8/2016 0700 THURS

Management Objectives:

- Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.
- Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed by keeping the fire:
  - Inside the current perimeter in Branches I, II, and IX to protect infrastructure in adjacent communities.
  - North of Nacimiento-Ferguson Road to limit fire growth to the south at the point of greatest opportunity
  - West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation
  - East of the Coast Ridge Road to protect values within the visual corridor of the Highway 1 National Scenic Byway.
- Assess suppression repair needs on federal lands and implement where safe and appropriate.
- Provide initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.
- Ensure cost containment measures are identified, applied, and documented.
- Enhance community relationships through respect, engagement, communication, and trust.
- Keep public informed of incident status

Control Objectives:

- Secure the southern edge of the fire along the Coast Ridge Road in Branches VII and VIII.
- Evaluate options for containing fire spread to the east and northeast in order to protect values on inholdings within the Wilderness, and to the north in the Carmel Valley.
- Evaluate the effectiveness of aerial resources to check fire spread and consider the use of direct, indirect, and burnout tactics where risk to firefighters can be effectively mitigated.
- Work with agency administrators and cooperators to develop alternate and contingency plans for containing fire spread to the east and south.
- Avoid adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST). Where opportunities exist, use natural features and pre-existing containment lines. Consult with resource advisors to ensure tactics are compatible with social, economic, and environmental values.

Command Emphasis:

Apply the right resources, to the right task, at the right time, for the right duration in order to achieve objectives with minimum firefighter exposure.

Situational Awareness:

Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.

Stop, think, talk... then act in response to any situation that may represent unnecessary exposure.

Soberanes Fire Weather Forecast

FORECAST NO: 46

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Wed - 0700 Thu.

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Wedenesday Sept 7th, 2016

SIGNED: Phil Manuel

TIME AND DATE FORECAST ISSUED: 1900 9/6/16

Incident Meteorologist

WEATHER DISCUSSION: Hot and dry today with highs well into the 90s over the fire and very low humidity readings. These conditions will occur with mainly light terrain driven winds, and with little or no transport wind to move the smoke aloft. The smoke may actually stagnate with poor dispersion within the vicinity of the active fire. The overall airmass will be fairly stable and not favorable for significant plume development. The marine layer will be around 1000 feet and not impact any areas of the fire today. Winds will gradually favor more of a southerly direction tonight into Thursday with only fair humidity recovery. Winds along the coast vicinity of Branch VII and VIII will favor more of a southwesterly direction during the afternoon.

WEATHER FORECAST For Wednesday:

WEATHER: Sunny...hot and dry. Smoke mainly interior.

TEMPERATURES: Highs 90-100 active fire area and Branch VI. 80-90 lower slopes. (2-5 degrees warmer)

HUMIDITY: 15-25% Branch VII and VIII. 7-12% Tassajara. 22-35% lower coastal slopes. (unchanged)

20 FT WINDS:

RIDGETOP – Variable 3 to 6 mph with some afternoon gusts 12 mph.
Branch VII and VIII – Variable in the morning, then southwest 5-8 mph gusts 12-16 mph after 1000.
SLOPE/VALLEY - Light becoming upslope 3-6 mph gusts 8-10 mph late afternoon.

Marine Layer: 1000 feet or less with little or no impact on firelines. **Haines:** 4

WEATHER FORECAST For Wednesday Night:

WEATHER: Clear with interior smoke.

TEMPERATURES: Lows 48-58 below 1500 feet. 64-72 above 1500 feet. (unchanged).

HUMIDITY: Poor Recovery 25-35% Branch VII and VIII. Locally 20% interior ridges.

20 FT WINDS:

RIDGETOP – Variable 3-6 mph becoming south overnight.
Branch VII and VIII- East-Northeast 3-6 mph gusts 12 mph.
SLOPE/VALLEY – Evening upcanyon 3-6 mph...becoming downcanyon 2-5 mph.

Marine Layer: 1000 feet along the immediate coast near Highway 1 only.

EXTENDED FORECAST: Southerly winds are expected across the fire Thursday. It will not be quite as hot, on Thursday, with highs in the 80s to mid 90s, but it will remain dry with humidity minimums in the teens. Slight cooling will continue into Friday with southerly wind flow gradually turning onshore at times.

Today's Safety message: *Operation Hydration...drink plenty of water given the hot and dry weather.*

Portable RAWS Frequency: 163.350 DTMF tones 0032 for Hot Springs, 0033 Anderson, 0029 Blue Rock, 0038 Chew Ridge, 0039 Tassajara, 0031 Benchmark and 0037 Coastal Ridge.

OUTPUTS

FIRE BEHAVIOR

GENERAL

Today brings the peak heating to these drought baked live and dead fuels. Winds may battle through the day.

Fire is moving out of the area burned by the 1999 Kirk Fire and now in fuels only burned by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant and increase fire intensity.

With hot and dry conditions intensifying, alignments in shrub fuels will run upslope and but may stall otherwise under light winds. On north slopes and stringers of heavy fuels in draws and drains, short runs upslope can burn hot. Be aware that these heavy fuels may prompt more rollout on steep slopes.

Head fire spread rates in brush can be up to 1 mph on steepest slopes. Flanking spread across slope should be somewhat lower under light winds, much like Tuesday. 10-15' flame lengths with running fire can be expected. Watch for increased downslope spread with the rollout and very dry conditions.

ERC 72 1hr 3-5% Pig 80% Spotting up to .1 mile

SPECIFIC

BRANCH III, IV

Fire remains in place above Sulphur Springs Camp, but heat is diminishing with no new perimeter reported. The potential for spotting across the Carmel River continues to decrease as fuels are consumed. There is still no heat observed near Miller Mountain and above the English Cabin. Fire above the Willow Creek and now moving in the North Fork of the Big Sur have potential to move toward the ridges above Tassajara

BRANCH VI

Fire in Zigzag creek and at the head of Higgins Creek was less active Tuesday.. Terrain winds not aligned to indirect lines, but look for downslope spread that could lead to slope reversals and upslope runs.

Branch VII,VIII

DIV N – Fire established at the head of the Pick Creek drainage below the Coast Ridge line. Continued heating may prompt new growth in active areas.

Fire movement towards Indian Valley and Higgins Creek is possible. Fire that is established in the bottom of Pick Creek could make uphill runs towards containment lines where fuels allow. Heavier fuels on the north and east aspects are burning but not as readily as on south and west aspects. Remain aware of potential for spots across the coast ridge, especially where local features can funnel terrain winds.

DIV UU/SS – Fire established in Indian Valley, Zigzag Creek, and on south slopes above the head of Higgins Creek. Anticipate further runs upslope, topping out at ridgelines and carrying across.

AIR OPERATIONS

Marine layer poorly defined at 1000ft or less. Little to limit air operations.

SAFETY

Hot, dry conditions create possibility for pockets of heat to become active in areas previously quiet. Take another look behind you for reburn potential.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Soberanes	DATE: 9/7/16	Oper. Period: Day

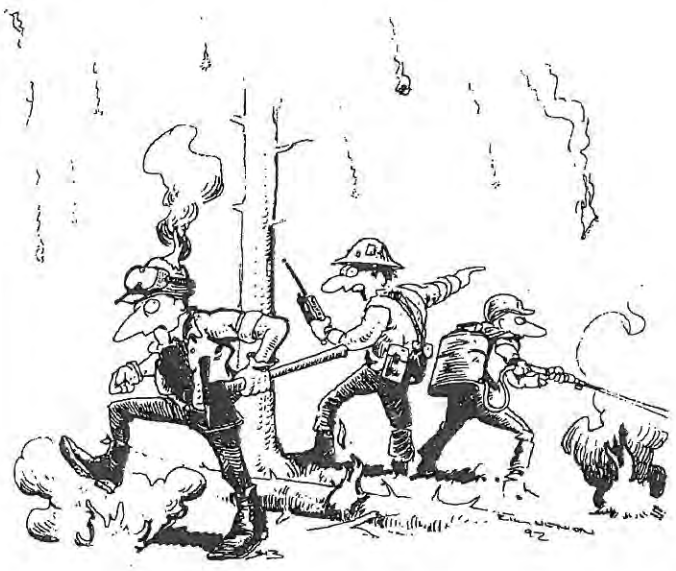
Major Hazards and Risks:

Steep narrow roads
Rising ERC's
Risk of heat related illnesses

Fire Order of the Day –***Keep informed on fire weather conditions and forecasts***

Narrative: The weather is getting hotter and drier. FFMC's are 4-6%. Expect rapid spread rates on any spot fire. Be heads up for predicted wind shift. Make sure to read and brief the weather discussion and fire behavior forecast with your personnel.

Watch Out Situation of the Day



16.GETTING FREQUENT SPOT FIRES ACROSS LINE

Directing Helicopter Bucket Drops

⇛Give general location on the incident.

⇛Finalize location with: Clock direction – straight in front of the aircraft is 12 o'clock; the right door is 3 o'clock; the tail is 6 o'clock; and the left door is 9 o'clock. When giving directions, remember that helicopters generally orbit in a clockwise pattern. Describe prominent landmarks – don't say "I'm wearing a yellow shirt", "I'm by a big tree", etc. Use a signal mirror (a compass works fine) or a 2-3 foot piece of flagging tied to a long stick. Stand in drop location (when safe) for ID, then move away before the drop.

⇛Visualize what the pilot sees from the air and describe the target.

⇛Describe the target from your location and explain the mission. The pilot will decide drop technique and flight path, or you can ask the pilot for a hover drop or line drop in a given direction.

⇛Assure pilot that all personnel are safe and they know the aircraft's intentions before the drop.

⇛Give feedback to the pilot about drop accuracy. Be honest and constructive. Let pilot know if drop is early, late, uphill, downhill, etc. The pilot wants to provide you with the best support possible.

Remember: The Pilot Has Final Say On Drops

Human Resource Message

High Trust State

Trust is the firm belief in the reliability, truth, ability, or strength of someone or something

- Leading in Wildland Fire states:
  - Leaders start by building a foundation of trust in teams. Trust is the underpinning of all cohesive teams; without it, teams are merely a collection of individuals that can never hope to achieve synergy.

Communication is the key to building that trust. While on Fire Assignments, this is communicated through Management Objectives and Control Objectives; through Operations, Branch, Division, and Crew Lead briefings. Trust is vital on all levels to accomplish the mission and ultimately ensuring that everyone comes home safely!

Some of the following examples is what right looks like: (Mission-Centered Solutions, Inc.)

- Even without the benefit of acquaintance, respect the professionalism of fellow staff members and recognize that all are professionals intending to do their best to fulfill the mission.
- Trust that others are competent until proven otherwise.
- Convey your professional judgement and knowledge- including problems, risks and solutions to the group in a balanced manner.
- Demonstrate integrity by backing and supporting the team decision to demonstrate alignment to the goal of the common good.
- Exhibit trustworthiness by expanding one's personal arena in regard to relevant strengths and weaknesses and sharing internal thinking processes that inform one's judgement.

"Trust your hunches. They're usually based on facts filed away just below the conscious level" By Dr. Joyce Brothers

Training Message

Frequently asked questions before Demob:

"What should I do if my evaluator is demobing, but I am not?"

"Confirm that you have another evaluator. Ensure you get an Eval. Record and ICS225 from each evaluator. Then come see us with your task book and all Eval. records/225s at Toro."

"What do I bring to you at demob?"

"Your task book as well as the completed evaluation records and ICS 225s."

"How long will it take during Demob?"

"Our goal is 5 minutes. And if come to us with completed paperwork prior, it will be 5 seconds on your Demob day."

If you haven't registered as a trainee stop by at the Toro ICP or utilize the QR code or the web address below.

Archaeological and Historical Sites
Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites***. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.

2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.

3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.

4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.

5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph***. Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.

6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.
