INCIDENT OBJECTIVES	1. Incident Name Soberanes Fire	2. Date Prepared 09/7/16	3. Time Prepared 1900
4. Operational Period – 09/8/2016 0700 THURS - to - 09/9/2016 0700 FRI			
<b>Management Objectives:</b>			
<ul style="list-style-type: none"> <li>• Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.</li> <li>• Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed by keeping the fire: <ul style="list-style-type: none"> <li>○ Inside the current perimeter in Branches I, II, and IX to protect infrastructure in adjacent communities.</li> <li>○ North of Nacimiento-Ferguson Road to limit fire growth to the south at the point of greatest opportunity</li> <li>○ West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation</li> <li>○ East of the Coast Ridge Road to protect values within the visual corridor of the Highway 1 National Scenic Byway.</li> </ul> </li> <li>• Assess suppression repair needs on federal lands and implement where safe and appropriate.</li> <li>• Provide initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.</li> <li>• Ensure cost containment measures are identified, applied, and documented.</li> <li>• Enhance community relationships through respect, engagement, communication, and trust.</li> <li>• Keep public informed of incident status</li> </ul>			
<b>Control Objectives:</b>			
<ul style="list-style-type: none"> <li>• Secure the southern edge of the fire along the Coast Ridge Road in Branches VII and VIII.</li> <li>• Evaluate options for containing fire spread to the east and northeast in order to protect values on inholdings within the Wilderness, and to the north in the Carmel Valley.</li> <li>• Evaluate the effectiveness of aerial resources to check fire spread and consider the use of direct, indirect, and burnout tactics where risk to firefighters can be effectively mitigated.</li> <li>• Work with agency administrators and cooperators to develop alternate and contingency plans for containing fire spread to the east and south.</li> <li>• Avoid adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST). Where opportunities exist, use natural features and pre-existing containment lines. Consult with resource advisors to ensure tactics are compatible with social, economic, and environmental values.</li> </ul>			
<b>Command Emphasis and End-state:</b>			
<p>Communities and other values at risk are protected with a combination of direct and indirect tactics to suppress the fire. Existing or, historic fire lines are used for control purposes to minimize resource effects to wilderness. Life First Doctrinal Guidelines and Chief's Intent for 2016 and implement the right plan at the right place at the right time with the right assets for the right duration and the right reason in order are followed to achieve objectives with minimum firefighter exposure.</p>			
<b>Situational Awareness:</b>			
<p>Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.</p>			
<b>Stop, think, talk... then act in response to any situation that may represent unnecessary exposure.</b>			
9. Prepared By (Planning Section Chief) Peter Butteri /s/ 		10. Approved By (Incident Commander) Tom Kurth /s/ 	

## ORGANIZATION ASSIGNMENT LIST

1. Incident Name	
<b>Soberanes Fire</b>	
2. Date 09/7/2016	3. Time 2200
4. Operational Period 09/8/2016 0700 THURS to 09/9/2016 0700 FRI	
<b>5. Incident Commander and Staff</b>	
Position	Name
Incident Commander	Tom Kurth / Norm McDonald ICT2(T)
Deputy	Tony Doty
Safety Officer	Bruce Malloy / Greg Arkle(T)
Safety Officer(Molera)	Kim Lemke / Tom Greiling
Information Officer	Pete Buist / Tim Evans / Tim Mowry (T) / Celeste Prescott(T)
Human Resources	Sue Warren / Andrea Cabida
Liaison Officer	Jim Butler

## Soberanes Fire Weather Forecast

**FORECAST NO:** 47

**NAME OF FIRE:** Soberanes

**PREDICTION FOR:** 0700 Thu - 0700 Fri.

**UNIT:** CA-BEU/LPF MRD

**SHIFT DATE:** Thursday Sept 8<sup>th</sup>, 2016

**SIGNED:** Phil Manuel

**TIME AND DATE**

**Incident Meteorologist**

**FORECAST ISSUED:** 1900 9/7/16

**WEATHER DISCUSSION:** Onshore wind flow will increase today resulting in significantly cooler temperatures along the coast with higher humidity. Across the higher elevations and into the inland canyons, east of the coastal ridge road, temperatures will also trend down, the cooling not as dramatic. Never the less, temperatures will not be as warm as the recent two days. The humidity will also be up slightly across the higher elevations and inland canyons interior of the containment lines. Strongest winds will be along the coastal ridge road with speeds upwards of 12 mph sustained and gusty. Some of this wind will also influence the inland ridge tops, producing a southeast transport wind, any smoke drifting to the northwest. The overall airmass will remain stable and not favorable for significant plume development. The marine layer will remain at or below 1000 feet and not impact any areas of the fire today, although it may produce some reduced visibility along the lower slopes near Highway 1.

### WEATHER FORECAST For Thursday:

**WEATHER:** Morning clouds and fog lower coastal slopes, otherwise sunny. Not as warm, but continued dry.

**TEMPERATURES:** Highs 79-92 active fire area. 75 to 82 lower coastal slopes (5-8 degrees cooler)

**HUMIDITY:** 19-29% Branch VII and VIII. 12-18% Tassajara. 30 to 40% lower coastal slopes. (up 5-10%)

#### **20 FT WINDS:**

**RIDGETOP** – South 4 to 8 mph with some gusts 12-15 mph shifting northeast in the afternoon.

**Branch VII and VIII** – Southwest 6-10 mph with gusts 14 to 18 mph. Winds northeast after 1700.

**SLOPE/VALLEY** - Upslope 3-7 mph gusts 8-12 mph late afternoon.

**Marine Layer:** 1000 feet or less with little or no impact on firelines. **Haines:** 4

### WEATHER FORECAST For Thursday Night:

**WEATHER:** Clear above 1000 feet. Clouds and fog redeveloping lower coastal slopes below 1000 feet.

**TEMPERATURES:** Lows 48-54 in the valleys. 58 to 66 ridges. (unchanged).

**HUMIDITY:** Poor Recovery 25-35% Branch VII and VIII. Locally 20% interior ridges.

#### **20 FT WINDS:**

**RIDGETOP** – Northeast 4 to 8 mph with gusts 10 to 15 mph.

**Branch VII and VIII**- Northeast 5-9 mph gusts 12-14 mph.

**SLOPE/VALLEY** – Evening upcanyon 3-7 mph...becoming downcanyon 2-5 mph.

**Marine Layer:** Under 1000 feet mainly impacting Highway 1.

**EXTENDED FORECAST:** Ebb and flow of onshore versus offshore winds will continue Friday, favoring onshore in the morning and offshore during the late afternoon and evening. Temperatures will be near seasonal with highs mainly in the 80s.

**Portable RAWs Frequency:** 163.350 DTMF tones 0032 for Hot Springs, 0033 Anderson, 0029 Blue Rock, 0038 Chew Ridge, 0039 Tassajara, 0031 Benchmark and 0037 Coastal Ridge.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER</b> 47	<b>TYPE OF FIRE</b> Wildfire
<b>FIRE NAME</b> Soberanes	<b>OPERATIONAL PERIOD</b> 9-08-2016 24 HOUR SHIFT

<b>UNIT</b> CALFIRE BEU & USFS LOS PADRES NF	<b>SIGNED /s/</b> Robert Ziel FBAN Robb Beery FBAN

### INPUTS

**WEATHER SUMMARY** \*\*\*Sunny...hot and dry. Smoke mainly interior\*\*\*

Temps: 79-92 active fire area. 75-82 lower coastal slopes (5-8 degrees cooler)

RH: 19-29% Branch VII/VIII, 12-18% Tassajara. 30-40% lower coastal slopes (up 5-10%)

20 Ft Winds: Ridges S 4-8 G12-15mph. Branch VII/VIII SW 6-10 G14-18mph. Slope/Valley Upslope 3-7 G8-12mph

Night: Valley lows 48-54, Ridges 58-66. RH in Br VII/VIII 25-35%, locally 20%. Br VII/VIII NE 5-9G12-14, down 2-5

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL

Somewhat cooler temperatures produce only minimal improvement in fine fuel moistures. Overall, fuels very dry.

Fire is moving out of the area burned by the 1999 Kirk Fire and now in fuels only burned by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant and increase fire intensity.

Anticipate upslope/upvalley spread with some alignments with south winds on upper east and west aspects.

With dry fuels, alignments in shrub fuels will continue to run upslope and upvalley, especially where aligned with southerly winds. On north slopes and stringers of heavy fuels in draws and drains, short runs upslope are possible. Fires stall at ridges. Be aware that these heavy fuels may prompt more rollout on steep slopes.

Head fire spread rates in brush can be up to 1 mph on steepest slopes. Flanking spread across slope can be significant especially on east and west aspects today when exposed to southerlies. 10-20' flame lengths with running fire can be expected.

**ERC 69** 1hr 4-6% **Pig 70%** Spotting up to .1 mile

##### SPECIFIC

#### BRANCH III, IV

Fire remains in place above Sulphur Springs Camp, but heat is diminishing with no new perimeter reported. The potential for spotting across the Carmel River continues to decrease as fuels are consumed. There is still no heat observed near Miller Mountain and above the English Cabin. Fire in the North Fork of the Big Sur drainage could continue to burn toward the ridges above Tassajara. Winds in the Willow Creek drainage may push fire, especially high in the drainage. Growth in Cienega Creek through some sparse and rock fuels may stall with forecast winds and light fuels.

#### BRANCH VI

Fire above Zigzag Creek continue to find wind alignments and spread toward Willow Creek and slopes above Arroyo Seco River. Terrain winds not aligned to indirect lines, but look for downslope spread that could lead to slope reversals and upslope runs.

#### Branch VII, VIII

DIV N – Fire established at the head of the Pick Creek drainage below the Coast Ridge line may be limited by recent burnout. Anticipate NE winds again in the evening.

DIV UU/SS – Fire established in Indian Valley and above Higgins Creek. South winds should discourage significant additional spread. .

#### **AIR OPERATIONS**

Anticipate some limitations due to 500 ft marine layer until about 1100.

##### SAFETY

Winds are changing direction. Additions to active fireline may find unburned fuels ahead of the new wind direction. Evaluate your situation with that in mind.

## Division/Group Assignment List (ICS 204 WF)

<b>1. Incident Name:</b>			<b>3.</b>			
SOBERANES			<b>Branch:</b>		<b>Division/Group:</b>	
<b>2. Operational Period:</b>			<b>III</b>		<b>J / K</b>

<b>7. Special Instructions:</b>						
<p>The Communications Plan is complex; please review the ICS 205 with all Division personnel.                  LOOK UP, Be Aware of Hazard Trees.                  DIVS, TFLD, and HEQB must account for &amp; certify all hired equipment shift tickets during the operational period.                  Use headlights. Slow down. Assume there is a vehicle around each corner.                  Division Supervisors: fire apportionment validation process will be to call Kris Armstrong at (661) 342-7297 between 0830-1100.                  "If you see something, say something." Identify and communicate hazards between day and night shift personnel.                  READS will report in and out to Division Supervisors.                  Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

<b>6. Control Operations/Work Assignments:</b>						
<p>TASK: Improve indirect line and continue firing operations. Monitor weather to ensure optimal conditions for successful firing operations. Prepare holding lines as needed with ground and aerial resources.</p> <p>PURPOSE: Contain fire activity along control lines, protecting structures and values at risk along Highway 1.</p> <p>END STATE: All control lines successfully held fire with no infrastructure damage.</p>						
<b>7. Special Instructions:</b>						
<p>Please keep all Dozer lines out of Highway 1 viewshed.</p> <p>The Communications Plan is complex; please review the ICS 205 with all Division personnel.</p> <p>Use headlights. Slow down. Assume there is a vehicle around each corner. Look up. Be aware of hazard trees.</p> <p>Review and understand medical emergency evacuation plan.</p> <p>DIVS, TFLD and HEQB must account for &amp; certify all hired equipment shift tickets during operational period.</p> <p>Once ignition begins, only critical resources will be south along North Ridge Rd in front of the ignition group. If the main fire gets established on the south facing slope and Logwood drainage, only critical resources will be in unburned areas.</p> <p>If fire becomes established west of the North Coast Ridge Road and cannot be contained with resources on hand, an evacuation order for Partington subdivision will be initiated.</p> <p>Division Supervisors: fire apportionment validation process will be to call Dave Dukart at (805) 698-2541 between 0830-1100.</p> <p>Utilize Ch. 12 (V-Tac 14) for traffic control on North Coast Ridge Road.</p> <p>"If you see something, say something." Identify and communicate hazards between day and night shift personnel.</p> <p>Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

<b>6. Control Operations/Work Assignments:</b>						
<p>TASK: Monitor fire activity in assigned area and hold lines burned by day shift.  PURPOSE: To ensure adequate resources are allocated to protect values at risk.  END STATE: Changes in fire location and potential are identified and communicated.</p>						
<b>7. Special Instructions:</b>						
<p>Please keep all dozer lines out of Highway 1 viewshed.  Use headlights. Slow down. Assume there is a vehicle around each corner. LOOK UP, be aware of hazard trees.  Firing Plans: Ensure all line personnel in the division are notified and that the GO No GO checklist is utilized.  The Communications Plan is complex. Please review the ICS 205 with all Division personnel.  DIVS, TFLD, and HEQB must account for &amp; certify all hired equipment shift tickets during the operational period.  Please follow medical plan for medical emergencies. H-407 is available for night hoist operations.  At 0001 hrs. all Divisions will contact Branch for any Branch needs.  Division Supervisors: fire apportionment validation process will be to call Dave Dukart 805-698-2541 between 0830-1100.  Utilize Ch. 12 (V-Tac 14) for traffic control on North Coast Ridge Road.  Safety officers to contact SOF2 Greiling at 907-631-8506 and Commo in case of emergency.  "If you see something, say something." Identify and communicate hazards between day and night shift personnel.  Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

Prepared By (Communications Unit) Lindsey Lien COML				Incident Location 5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA					

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the RX and TX reversed.

# HEALTH AND SAFETY MESSAGE

*SAFETY* starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Soberanes

DATE: 9/8/16

Oper. Period: Day/ Night

## Major Hazards and Risks: Cumulative Fatigue

### Fire Order of the Day – Remain in communications with crew, supervisor and adjoining forces

Narrative: It is day 49 of this incident. Some people have been on this fire since it started with minimal time off. Others have had long fire seasons in other GACC's. For a lot of us, our minds and bodies are getting worn out. We are only half way to our containment goals on this incident and there are many weeks of work ahead. Take the opportunities to get rest whenever you can. A short nap when conditions warrant can do wonders to clear the fog out of your head. Maintain your 2:1 work ratio and mitigate any violations as soon as possible. Stay focused on the task at hand and go home injury free to your loved ones.

## Watch Out Situation of the Day

18. TAKING A NAP NEAR THE FIRELINE

## Aerial Retardant Operations

Personnel and equipment can be injured and damaged by the impact of material dropped by aircraft. Clear personnel out of target area when drop is to be made. If an individual is unable to retreat to a safe place, the safest procedure is to:

- Hold onto your handtool away from your body;
- Lie face down, with head toward oncoming aircraft and hardhat in place. Grasp something firm to prevent being carried or rolled about by the dropping liquid;
- Do not run unless escape is assured;
- Get clear of dead snags, tops, and limbs in drop area;
- Get at least 200 feet away from powerlines/poles;
- Working in an area covered by wet retardant should be done with caution due to slippery surfaces.

### Some Tactical Use Criteria:

- Call for retardant early, if it is needed, and **follow-up** with aggressive ground suppression action;
- Consider: Drop effectiveness, safety of ground personnel, fuel type(s), wind conditions, fire behavior and ability to follow-up with ground actions;
- Suspend drops if not effective. Notify pilot of any hazards in the area.

**Remember that the lead plane or retardant plane pilot makes the final decision on any aerial drops or activity!**

Incident Safety Officer: AK IMT1 Safety Team

Orders can be placed at Supply Units located at Toro ICP/Base, Malera, Rana, or Hunter Liggett Camps.  
 Orders can also be emailed to: [soberanesordering@gmail.com](mailto:soberanesordering@gmail.com)  
 Time Sensitive or Emergency Orders may be called in to Communications on the Command Channel.

## Human Resource Message

# GOOSE SENSE

### **Goose Fact**

When a goose flaps its wings, it creates uplift for the bird immediately behind. By flying in a “V” formation, the whole flock increases its flying range by almost 75%.

When a goose falls out of formation, it feels the drag and resistance of going it alone and quickly returns to formation to take advantage of the lifting power of the bird in front.

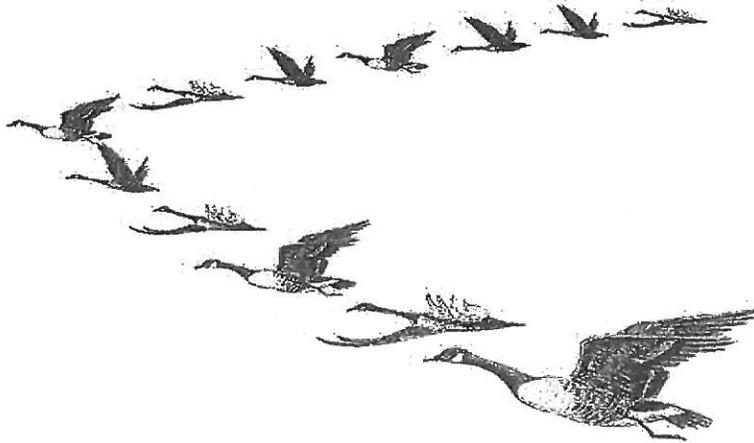

When the lead goose gets tired it rotates back in the formation and another goose flies lead.

### **Goose Lesson**

*You can get where they're going quicker and easier when you rely on the efforts of every member of the team.*

*When you rely on the efforts of every team member you will be able to accomplish the task with shared effort and less resistance.*

*Team members are capable of and can share leadership, which leads to greater efficiencies for the whole team.*

*Job well done folks!*

*Sue Warren HRSP Andrea Cabida HRSP Alan Seago HRSP*

## Archaeological and Historical Sites Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites.*** Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph.*** Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.

# MEDICAL PLAN (ICS 206 WF)

Medical Incident Report					
<b>FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</b>					
<b>Use items one through nine to communicate situation to communications/dispatch.</b>					
<b>1. CONTACT COMMUNICATIONS/DISPATCH</b> <i>Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)</i>					
<b>2. INCIDENT STATUS:</b> <i>Provide incident summary and command structure.</i>					
<b>Nature of Injury/Illness</b>			<i>Describe the injury (Ex: Broken leg with bleeding)</i>		
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>		
Incident Commander			<i>Name of IC</i>		
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>		
<b>3. INITIAL PATIENT ASSESSMENT:</b> <i>Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.</i>					
Number of Patients:	Male / Female	Age	Weight:		
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> <b>NO = MEDEVAC!</b>					
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> <b>NO = MEDEVAC!</b>					
Mechanism of Injury: <i>What caused the injury?</i>					
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>					
<b>4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY</b>					
SEVERITY			TRANSPORT PRIORITY		
<input type="checkbox"/> <b>URGENT-RED</b> Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>			Ambulance or MEDEVAC helicopter. Evacuation need is <b>IMMEDIATE.</b>		
<input type="checkbox"/> <b>PRIORITY-YELLOW</b> Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>			Ambulance or consider air transport if at remote location. Evacuation may be <b>DELAYED.</b>		
<input type="checkbox"/> <b>ROUTINE-GREEN</b> Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>			Non-Emergency. Evacuation considered <b>Routine of Convenience.</b>		
<b>5. TRANSPORT PLAN:</b>					
<b>Air Transport:</b> (Agency Aircraft Preferred)					
<input type="checkbox"/> Helispot		<input type="checkbox"/> Short-haul/Hoist		<input type="checkbox"/> Life Flight	
<input type="checkbox"/> Other
