Fire weather

OPERATIONAL PERIOD

Monday, September 12th 0700

to

Tuesday, September 13th 0700

INCIDENT OBJECTIVES

1. Incident Name
Soberanes Fire

2. Date Prepared
09/11/16

3. Time Prepared
1900

4. Operational Period – 09/12/2016 0700 SUN - to - 09/13/2016 0700 MON

Management Objectives:

- Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.
- Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed by keeping the fire:
 - Inside the current perimeter in Branches I, II, and IX to protect infrastructure in adjacent communities.
 - North of Nacimiento-Ferguson Road to limit fire growth to the south at the point of greatest opportunity
 - West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation
 - East of the Coast Ridge Road to protect values within the visual corridor of the Highway 1 National Scenic Byway.
- Assess suppression repair needs on federal lands and implement where safe and appropriate.
- Provide initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.
- Ensure cost containment measures are identified, applied, and documented.
- Enhance community relationships through respect, engagement, communication, and trust.
- Keep public informed of incident status
- Maximize training opportunities for the Los Padres National Forest and the Federal Priority Training Program.
- Prepare for Transfer of Command at 0600 on September 13.

Control Objectives:

- Secure the southern edge of the fire along the Coast Ridge Road in Branches VII and VIII.
- Evaluate options for containing fire spread to the east and northeast in order to protect values on inholdings within the Wilderness, and to the north in the Carmel Valley.
- Evaluate the effectiveness of aerial resources to check fire spread and consider the use of direct, indirect, and burnout tactics where risk to firefighters can be effectively mitigated.
- Work with agency administrators and cooperators to develop alternate and contingency plans for containing fire spread to the east and south.
- Avoid adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST). Where opportunities exist, use natural features and pre-existing containment lines. Consult with resource advisors to ensure tactics are compatible with social, economic, and environmental values.

Command Emphasis and End-state:

Communities and other values at risk are protected with a combination of direct and indirect tactics to suppress the fire. Existing or, historic fire lines are used for control purposes to minimize resource effects to wilderness. Life First Doctrinal Guidelines and Chief's Intent for 2016 and implement the right plan at the right place at the right time with the right assets for the right duration and the right reason in order are followed to achieve objectives with minimum firefighter exposure.

Situational Awareness:

Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.

Stop, think, talk, listen... then act in response to any situation that may represent unnecessary exposure.

Soberanes Fire Weather Forecast

Forecast Info

FORECAST NO: 51

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Mon - 0700 Tue.

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Monday Sept 12th, 2016

SIGNED: Phil Manuel / Mark Pellerito

TIME AND DATE

Incident Meteorologists

FORECAST ISSUED: 1900 9/11/16

240-499-6636 – Phil's Cell (Toro) 240-205-4030 – Mark's Cell (Molera)

WEATHER DISCUSSION:

***** Breezy...Dry Push...Turning Cool *****

A cold dry upper level trough will move through the area today and tonight bringing much cooler temperatures and very dry air. This push of dry air will be accompanied by breezy conditions along the ridge tops. Relative humidity values as low as the single digits are possible late this afternoon, and across the ridgetops tonight. Temperatures through Wednesday morning will be below normal with highs in the 60s/70s. Morning lows in the 30s are possible at the both Rana and Fort Hunter Liggett Camps Tuesday and Wednesday mornings. A gradual warming trend is expected for the second half of the week.

WEATHER FORECAST For Monday:

WEATHER: Sunny except for clouds on lower coastal slopes. Breezy and turning cooler.

TEMPERATURES: Highs 70-79 active fire area. 65-70 lower coastal slopes (10 degrees cooler)

HUMIDITY: 15-25% Branch VII and VIII...5-15% after 1700. 12-22% Tassajara.
32-40% lower coastal slopes. (down 5 to 10%)

20 FT WINDS:

RIDGETOP – Northwest 14-18 mph. Gusts 20-30 mph in the afternoon.

Branches VII and VIII Ridgetop – West/Southwest 12-18 mph. Gusts 20-30 mph in the afternoon.

SLOPE/VALLEY - Upslope 3-7 mph. Gusts 12-18 mph in the afternoon. Shifting at times during the afternoon due to opposing wind aloft.

Marine Layer: 2000 feet with little or no impact on firelines. **Haines:** 4

WEATHER FORECAST For Monday Night:

WEATHER: Clear, except for clouds on lower coastal slopes. Remaining breezy along ridges.

TEMPERATURES: Lows 37-45 in the valleys. 55-64 ridges. (7-10 degrees cooler).

HUMIDITY: Poor Recovery 20-35%; potentially remaining in the teens or upper single digits along the ridges.

20 FT WINDS:

RIDGETOP – West/Northwest 12-16 mph. Gusts 20 to 30 mph before midnight.

SLOPE/VALLEY – Down canyon (west) 3-7 mph.

Marine Layer: 2000 feet mainly impacting Highway 1.

EXTENDED FORECAST: Decreasing winds Tuesday into Wednesday. Below normal temperatures. Highs 65-75 Tuesday, 70 to 79 Wednesday. Remaining Dry.

Portable RAWS Frequency: 163.350 DTMF tones 0032 for Hot Springs, 0033 Anderson, 0029 Blue Rock, 0038 Chew Ridge, 0039 Tassajara, 0031 Benchmark and 0037 Coastal Ridge.

WEATHER SUMMARY (see attached forecast)

*** Still fairly unstable. Sunny except for clouds on lower coastal slopes ***

Temps: 70-79 active fire area, 65-70 lower coastal slopes (10 degrees cooler)

RH: 15-25% **Branch VII**...5-15% after 1700, 12-22%**Tassajara**, 32-40% **lower coastal slopes** (down 5-10%)

20 Ft Winds: **Ridges** NW 14-18G20-30, **Br VII** W/SW 14-18G20-30, **Upslope** 3-7G12-18 afternoon

Night: **Temps** 37-45 valleys, 55-64 ridges, **RH** 20-35%, teens on ridges **Winds** Ridge W/NW 12-16G20-30 dwn 3-7

OUTPUTS

FIRE BEHAVIOR

GENERAL

Intense fire runs yesterday, with some plume development over upslope and updrainage fuelbeds, relatively short duration. Instability again today. Increased fire growth potential with higher forecasted wind speeds today (see Fire Weather Forecast).

Shrub fuels, primarily chamise and button brush, have seasonally low live fuel moisture at this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant.

With dry fuels, alignments in shrub fuels will continue to run upslope and upvalley, especially with the forecast higher windspeeds. It can enhance column development, increase spread rates upslope, and encourage more spotting across ridges than we've seen so far. Battling winds at the surface may bring fire downslope toward drainages.

Head fire spread rates in brush can be up to 1 mph on steepest slopes. Extreme fire intensity with running fire can be expected on those slopes. Be aware that these heavy fuels may prompt more rollout on steep slopes where burning actively up high and send embers further under these unstable conditions.

ERC 69 1hr 4-6% Pig 70% Spotting up to .2 mile

SPECIFIC

BRANCH III

Fire in the North Fork of the Big Sur drainage will continue to move NW towards Cienega Creek (1 mile NW) and make runs upslope/drainage to the east, when conditions align and burn toward the ridge adjacent to the Tassajara drainage. Open fireline above Willow Creek was not active yesterday, but anticipate rollout or spread from the slope above. Fire could establish low in the Willow Creek and possibly reach the mouth of the Tassajara Canyon. Any of these runs could be boosted by the higher wind speeds in the forecast.

BRANCH IV & VI

With fire firmly established above the Arroyo Seco River and in the Lost Valley Creek, expect fire to continue downslope toward the mouth of Willow Creek and down drain in Lost Valley Creek toward the mouth. Spread down and across the Arroyo Seco and up the drainage in Willow Creek and into the Tassajara canyon are new threats.

BRANCH VII

DIV N – Now mostly burned out, primary concern for spotting across the line decreases each day. Increased winds could encourage runs from bottom of Pick Creek.

DIV UU/SS – Fire active in Lost Valley Creek down drainage from the mouth of Higgins Creek. Upslope and updrainage spread could take fire out toward the mouth of Higgins Creek.

AIR OPERATIONS

Marine Layer reaching 2000 feet impacting mainly Highway 1. Higher forecasted windspeeds may affect ops.

SAFETY

As fire moves into new drainages, approaches new branches, and impacts new fuelbeds, you may be unfamiliar with weather and local factors influencing fire behavior. Look for the Spot Forecast for the Benchmark RAWS.

SOBERANES			III	Division/Group:		
2. Operational Period:				EAST STRUCTURE		
Date/Time From: 09/12/2016 0700 MON		Date/Time To: 09/13/2016 0700 TUE				
4. Operations Personnel						
OPERATIONS CHIEF	RUSS LONG (9/12)		BRANCH DIRECTOR	TOGIE WIEHL (9/12) PAUL JOHNSON (9/21) (T)		
PLANNING OPERATIONS	CARL SCHWOPE (9/18) JASON CLAWSON (9/19) (T)		DIVISION/GROUP SUPERVISOR	DANA BAGNOLI (9/13)		
AIR ATTACK SUPERVISOR	RICH WEBSTER (9/12) MARK S NUNEZ (9/17)		SAFETY OFFICER	BRUCE MALLOY (9/20)		
7. Special Instructions:						
<p>**Resource Identified as Night Swing. Monitor fire behavior and growth from DP 42.</p> <p>The Communications Plan is complex; please review the ICS 205 with all Division personnel. DIVS, TFLD, and HEQB must account for & certify all hired equipment shift tickets during the operational period. Use headlights. Slow down. Assume there is a vehicle around each corner. Division Supervisors: fire apportionment validation process will be to call Kris Armstrong at (661) 342-7297 between 0830-1100. "If you see something, say something." Identify and communicate hazards between day and night shift personnel. Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

6. Control Operations/Work Assignments:						
TASK: Assess Partington Ridge community and other identified structures/subdivisions along Highway 1, and continue structure protection in Partington subdivision.						
PURPOSE: To protect all values at risk along the Highway 1 Corridor adjacent to the fire.						
END STATE: All structures were protected and no loss of infrastructure occurred.						
7. Special Instructions:						
Post lookout in Partington to watch burnout in Division N. Use headlights. Slow down. Assume there is a vehicle around each corner.						
Fire personnel in staging along Hwy 1 place traffic cones, wear visible clothing and use overhead lights when pulling off and on the highway.						
Division Supervisors: fire apportionment validation process will be to call Dave Dukart at (805) 698-2541 between 0830-1100.						
"If you see something, say something." Identify and communicate hazards between day and night shift personnel.						
Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.

6. Control Operations/Work Assignments:						
<p>TASK: Continue to secure Coast Ridge RD from previous firing operations. PURPOSE: Contain fire activity along control lines, protecting structures and values at risk along Highway 1. END STATE: All control lines successfully held fire with no infrastructure damage.</p>						
7. Special Instructions:						
<p>Please keep all Dozer lines out of Highway 1 viewshed. The Communications Plan is complex; please review the ICS 205 with all Division personnel. Use headlights. Slow down. Assume there is a vehicle around each corner. Look up. Be aware of hazard trees. Review and understand medical emergency evacuation plan. DIVS, TFLD and HEQB must account for & certify all hired equipment shift tickets during operational period. Once ignition begins, only critical resources will be south along North Ridge Rd in front of the ignition group. If the main fire gets established on the south facing slope and Logwood drainage, only critical resources will be in unburned areas. If fire becomes established west of the North Coast Ridge Road and cannot be contained with resources on hand, an evacuation order for Partington subdivision will be initiated. Division Supervisors: fire apportionment validation process will be to call Dave Dukart at (805) 698-2541 between 0830-1100. Utilize Ch. 12 (V-Tac 14) for traffic control on North Coast Ridge Road. “If you see something, say something.” Identify and communicate hazards between day and night shift personnel. Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

6. Control Operations/Work Assignments:						
<p>TASK: Continue firing operations as needed to secure Coast Ridge Road. Monitor weather to ensure optimal conditions for successful firing operations. Prepare holding lines as needed with ground and aerial resources. Scout and improve indirect line for firing operations. Prep structures within DIV UU.</p> <p>PURPOSE: Control fire activity along dozer lines, protect values at risk along Hwy 1.</p> <p>END STATE: Fire remains east of control lines in UU, is controlled, and no longer threatens structures or other values at risk along Hwy 1.</p>						
7. Special Instructions:						
<p>Look UP, be aware of hazard trees. Back haul excess equipment and trash. Use human repeaters for communications.</p> <p>Firing Plans: Ensure all line personnel in the division are notified and that the Go No Go checklist is utilized.</p> <p>The Communications Plan is complex; please review the ICS 205 with all Division personnel.</p> <p>DIVS, TFLD and HEQB must account for & certify all hired shift tickets during operational period.</p> <p>Use headlights. Slow down. Assume there is a vehicle around each corner.</p> <p>Utilize Ch. 12 (V-Tac 14) for traffic on North Coast Ridge Rd.</p> <p>Division Supervisors: fire apportionment validation process will be to call Dave Dukart at (805) 698-2541 between 0830-1100.</p> <p>"If you see something, say something." Identify and communicate hazards between day and night shift personnel.</p> <p>Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.</p>

Prepared By (Communications Unit) Lindsey Lien COML				Incident Location 5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA					

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Kx and 1x reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

HEALTH AND SAFETY MESSAGE

SAFETY starts with ***YOU***

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Soberanes

DATE: 9/12/16

Oper. Period: Day/ Night

Major Hazards and Risks:

Cumulative Fatigue

Increased Fire Behavior

TRANSFER OF COMMAND

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. Many fatalities, serious injuries, and incidents with potential for injury have occurred during these transition periods. Be proactive in mitigating the risks by proper implementation of LCES—Lookouts, Communications, Escape Routes, and Safety Zones.

- Factors for increased risks to fireline personnel during transfer of command periods include:
 - No, or poor, briefing of incoming personnel
 - Lack of fire weather and fire behavior information, both forecast and observed
 - Communications: face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
 - All resources may not have checked-in and the Incident Management Team may not be aware of the number, type and location of all resources.
 - Location of safety zones and escape routes may not be known and communicated to all resources.

- Mitigation actions to take:
 - Lookouts: Post and maintain your own lookouts.
 - Ensure an adequate briefing from incoming supervisors
 - Receive an update on fire weather and fire behavior conditions and forecasts
 - Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
 - Escape routes and safety zones: Identify escape routes and assure incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.

Items specific to Soberanes Fire

- Flag, Fall or Avoid snags and fire weakened trees. Be sure to inform your co-workers and supervisors. Keep personnel away from felling operations. Use hazard tree mitigation measures.
- Use the Risk Management Process in the Incident Response Pocket Guide to analyze any new projects, and review the Process intermittently when conducting operations.
- Know what the commo plan is, and use it correctly.
- Drive Defensively at all times – don't assume the other driver will make the right decision.
-

Thank you for all your hard and Safe Work --- Your Safety Officers

Incident Safety Officer: AK IMT1 Safety Team

 Time Sensitive or Emergency Orders may be called in to Communications on the Command Channel.

Human Resource Message

STRESS

~ Be good to your body! It is the only place you have to live! ~

Life is full of frustrations and demands. You may feel there's nothing you can do about stress but keep in mind, stress isn't always bad. Stress within your comfort zone can help you perform under pressure, motivate you to do your best, even keep you safe when danger looms. When stress becomes overwhelming, it can damage your health, mood, relationships, and quality of life.

You have more control over stress than you might think. Stress management is all about taking charge: of your lifestyle, thoughts, emotions, and the way you deal with problems. No matter how stressful your life seems, there are steps you can take to relieve the pressure and regain control.

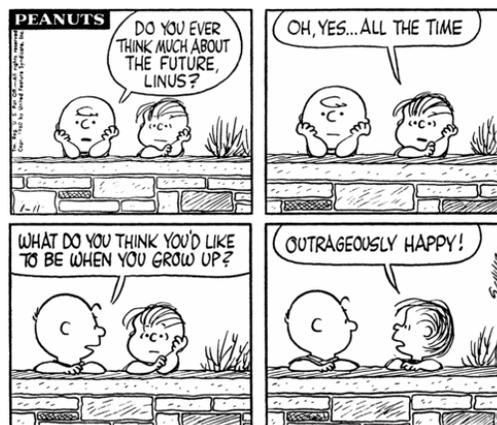

You can protect yourself by understanding how the body's stress response works, recognizing the signs and symptoms of stress, and taking steps to reduce effects.

Factors that influence your stress tolerance:

- Take Control - identify sources of stress
- Support Network
- Physical and Mental Health
- Attitude and Outlook
- Ability to deal with emotions
- Knowledge and Preparation

How you can support each other:

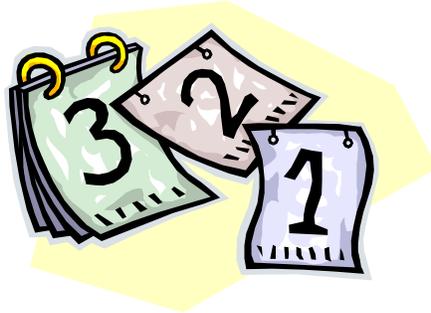

- Listen without judgement
- Don't take anger personally
- Look out for one-another
- Give and respect space
- Take a breath

Getting ready for demob...

here are some Finance Tips

As the days tick down on your assignment, please:

- 1) Turn in your CTRs and Shift Tickets DAILY. Do not hold onto them.
- 2) Come into Finance to get a copy of your time sheets, when possible, prior to demob.
- 3) **Please don't forget to put E#, Division and Camp** on your Shift Tickets.
- 4) Contractors and out of state cooperators are to pay for fuel with credit card or sign fuel issue ticket.

If you have any questions for Finance please call:

Equipment: 406-381-4187

Time: 505-321-4126

Archaeological and Historical Sites Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites.*** Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph.*** Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.

Medical Incident Report

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

Ground Transport: [Click here to enter text.](#)

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...*

REMEMBER: **Confirm ETA's of resources ordered
Act according to your level of training
Be Alert. Keep Calm. Think Clearly. Act Decisively.**
