INCIDENT OBJECTIVES	1. Incident Name Soberanes	2. Date 09/20/2016	3. Time 2200
4. Operational Period DAY / NIGHT September 21-22, 2016 0700 - 0700 Hours			
5. General Control Objectives for the Incident (include alternatives) Management Objectives <ul style="list-style-type: none"> • Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations. • Reduce firefighter exposure by only engaging fire assignments with the highest probability of success. • Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests. • Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations. • Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information. • Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy. • Manage incident costs effectively for the values at risk through regular and ongoing cost analysis. Control Objectives Keep Fire <ul style="list-style-type: none"> • East of the Coast Ridge Road. • North of Nacimiento-Fergusson Road. • West of Carmel Valley and Reliance Community • South of current containment line <div style="border: 2px dashed red; padding: 5px; display: inline-block; color: red; font-weight: bold;">See Supplemental Page 1</div>			
6. Weather Forecast for Operational Period <ul style="list-style-type: none"> • RED FLAG WARNING in effect from 1500 hours today through 2100 hours Thursday. Winds will dominate the fire environment beginning late afternoon and continue through Thursday evening. The frontal system over the Pacific NW will impact the coast bringing a marine layer and stronger winds this morning. 			
7. General Safety Message <ul style="list-style-type: none"> • Safety continues to be and will always be the most important priority on this incident. • Use the briefing process to mitigate possible complacency. • Take adequate rest breaks and continue to hydrate frequently to lessen firefighter fatigue.

Soberanes Fire Weather Forecast East Operational Area

Forecast Info

FORECAST NO: 60

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Wed. - 0700 Thu.

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Wednesday, Sept 21st, 2016

SIGNED: Jon Bonk / Julia Ruthford
Incident Meteorologists

TIME AND DATE

FORECAST ISSUED: 2000 hrs. 9/20/16

Jon's Cell (Hunter-Liggett): (240)773-5287
Julia's Cell (Toro): (971) 221-6723

**** Dry Cold Front Passage This Afternoon ****

**** Red Flag Warning in effect from 1500 hours today through 2100 hours Thursday ****

WEATHER DISCUSSION: Winds will totally dominate the fire environment beginning late the afternoon and continue through Thursday evening. Westerly winds will shift northwest as a dry cold front crosses late this afternoon. Winds increase further Wednesday night and Thursday. These stable winds will hug the terrain and could dive down becoming channeled by aligned drainages including the Carmel Valley and Rana Camp. Temperatures will be noticeably cooler but the drier air behind the front will keep humidity low across the higher terrain overnight.

WEATHER FORECAST For Today:

WEATHER: Increasing high clouds. Some afternoon mid-level cumulus.

TEMPERATURES: Highs 76-84 in the active fire area. 5-8 degrees cooler)

See Supplemental Page 2

HUMIDITY: 19-24%. (little change)

20 FT WINDS:

RIDGETOP / UPPER SLOPE – West 7-10 mph with gusts around 15 mph shifting northwest 12-15 mph with gusts up to 25 mph around 1700 hours.

LOWER SLOPE / VALLEY – Upslope/upvalley 3-7 mph. Gusts up to 20 mph in the afternoon along east-west aligned drainages.

Inland Marine Layer: 1500 feet...possible impact to Rana Helibase through 1100 hours

Haines: 4

WEATHER FORECAST For Tonight:

WEATHER: Partly cloudy then clearing overnight.

TEMPERATURES: Lows 44-48 in the valleys. Ridges 46-50 (6-10 degrees cooler).

HUMIDITY: Valley bottoms: Max 85-90%. Ridges: falling to around 10% with the frontal passage then rising to 15-20% close to 0200.

20 FT WINDS:

RIDGETOP – Northwest 12-15 mph with gusts up to 25 mph increasing to 15 to 20 mph with gusts around 30 mph around 0200 hrs.

LOWER SLOPE/VALLEY – Variable winds 5-10 mph, except 12-15 mph with gusts to 30 mph possible given terrain alignment.

Marine Layer: 2500 feet.

Thermal Belt: None, well mixed.

EXTENDED FORECAST: Minimal humidity improvement for Thursday as strong winds continue. Strong high pressure returns for the weekend with temperatures returning to well above normal.

DATE ISSUED 9-20-2016		TIME ISSUED 2030 HOURS
UNIT CA BEU-003422		SIGNED Mike Crook \s\ FBAN
INPUTS		
RED FLAG WARNING IN EFFECT		
*** Wind Summary ***		
DAY: RIDGETOP: 0600 W to NW 12-15mph G25		SLOPE/VALLEY: 0600-0900 Down-valley -5mph... 0900-1900 Upslope/Up-valley 3-7mph G20
NIGHT: RIDGETOP: 1800 NW 15-20mph G30		SLOPE/VALLEY: 1900-0600 12-15mph
FIRE BEHAVIOR		
GENERAL		
<u>LOCAL THRESHOLDS – WATCH OUTS</u>		
Combinations of any of these threshold factors can greatly increase fire behavior:		
Thresholds:	20' wind Over 7mph	RH Less Than 17%
	Temperatures Over 98°	10hr fuel Less than 6%
Forecasted	Ridges 12-15mph	20-24%
	Valleys 3-7mph	15-19%
	76°	3-8%
	84°	3-6%
<p>Coastal Sage Scrub fuel, primarily charred. See Supplemental Page 3 Very low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1949 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant.</p> <p>Probability of ignition : Day: Shaded 60% Unshaded 90% Night: 60%</p> <p>*Probability of ignition will become irrelevant when strong winds reach the surface. All fuels will readily consume and spread.</p>		
SPECIFIC		
<u>BRANCH III, IV, VI</u>		
<p>Expect winds to begin increasing from west to northwest by early afternoon. All ridgetops and any drainages aligned with the general wind will have rapid fire spread and large growth potential. Drainages that do not align with the strong general winds will have very erratic wind speeds and gusts making general fire spread direction difficult to determine. Expect rapid spread rates (>80ch/hr) and spotting distances ¾ mile.</p> <p>Winds will continue to increase overnight into Thursday morning while ridgetop humidity values remain at the critical threshold. Expect spread rates >100ch/hr where drainages are aligned with winds. Very erratic wind speed and direction will occur within drainages that do not align with the general winds and fire spread direction will be difficult to determine. Spotting distances of ¾ to 1 mile or more can be expected.</p>		
AIR OPERATIONS		
Smoke may reduce visibility and restrict flying at Rana and Miller helibase but should lift out by 1100. Strong gusts in the evening may restrict the ability to fly. VFR conditions expected from 1100 through the operational period.		
SAFETY		
Standard Order Number 1 is emphasized today: Keep informed on fire weather conditions and forecasts. Fire danger will be high today and tomorrow. Now is the time to be most aware, your most observant, and your most in tune with the fire environment.		

Soberanes Fire Weather Forecast West Operational Area

FORECAST NO: 60

NAME OF FIRE: Soberanes

Forecast Info

PREDICTION FOR: 0700 Wed- 0700 Thu

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Wednesday Sept 21th, 2016

SIGNED: Jason Clapp

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2000 9/20/16

Jason Clapp - Cell 530-383-4839 (West-Molera)

WEATHER DISCUSSION: ** RED FLAG WARNING Late Today thru Thu - Strong NW Winds **

The frontal system over the Pacific NW will impact the coast bringing a marine layer and stronger wind this morning. WNW winds increase later today over the fire area. Wind will become strong tonight and continue through Thu in the wake of the dry frontal passage. These NW ridge winds will likely increase down Higgins Creek and could push fire downcanyon. Winds transition to the NE by Fri.

WEATHER FORECAST For Today:

WEATHER: Cooling with little change in humidity today. Breezy W winds shift to stronger NW winds by late in the day. A Red Flag Warning has been issued for strong winds and low humidity beginning at 3 pm this afternoon continuing through 9 pm Thu. Ridge winds will align with the Higgins drainage and enhance downcanyon winds late today through tonight. Marine layer will impact aviation resources on coast (H-70 & H-71) this morning, then skies will become partly cloudy midday before filling in again late this afternoon.

TEMPERATURES: Highs 72-76...high: See Supplemental Page 4 degrees)

HUMIDITY: 18-22% Lower slopes... 22-25% Coastal Ridge (Little Change).

20 FT WINDS:

RIDGETOP – WSW 7-10 gusting 14 mph...after 1500 WNW 13-17 mph, gusting 25 mph.

SLOPE/VALLEY – Downvalley 2-5 mph through 0900, then upvalley/upslope 5-8 mph.

Gusts 10-13 mph in the afternoon. Then battling upcanyon/downcanyon winds late afternoon.

Marine Layer Top: Increasing to 1000-1500 feet Above Sea Level. **Haines:** 4

WEATHER FORECAST For Tonight:

WEATHER: Marine layer stratus will thicken overnight to between 1500-2000 feet. NW ridge winds will increase and enhance any downcanyon winds within Higgins canyon, especially along mid to upper slopes.

TEMPERATURES: Lows 56-59 in the valleys. 60-63 ridges. (Down 5-6%).

HUMIDITY: 40-45% in Higgins drainage...35% thermal belt/ridges.

20 FT WINDS:

RIDGETOP – Increasing to NW 20-25 mph gusting to 30-35 mph.

SLOPE/VALLEY – Downcanyon 10-14 mph with gusts 20 mph down Higgins Creek

Marine Layer: 1500-2000 feet impacting H-70 & 71.

EXTENDED FORECAST:

Strong NNW winds impact the fire area (20-25 g35 mph) and Molera Camp (20 g30 mph) Thursday as the dry frontal system pushes across the area. Relatively low humidity will continue on the ridges. The approaching front will increase the marine layer to near 2000 feet Thursday. Wind shift to NE Friday behind the frontal system followed by high pressure with dry, but weaker, winds dominating into the weekend.

WEST

FIRE BEHAVIOR FORECAST

WEST

UNIT: CA-BEU-LPF	SIGNED: Dan Mindar FBAN

INPUTS

*****Wind Summary***
Red Flag Warning**

Day- Ridge Top: Morning W/SW 7-10 mph, Gusting 14 mph. After 1500 WNW 13-17 mph, gusting 25 mph

Slope/Valley: Down valley 2-5 mph through 0900 then up valley/upslope 5-8 mph gusting 10-13 mph afternoon. Then battling up canyon/down canyon winds late afternoon.

Night- Ridge Top: Increasing NW 20-25 mph Gusting 30-35 mph

Slope/Valley: Down Canyon 10-14 mph gusting to 20 down Higgins Creek

*****Local Thresholds- Watch Outs*****

Combinations of any of these threshold factors may greatly increase fire behavior.

Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
Forecast	Ridges	See Supplemental Page 5		72-76°	3-5%
	Valleys			75-78°	4-6%

(See Weather Forecast for details)

FIRE BEHAVIOR

Coastal Sage shrub fuel moisture, primarily chamise and button brush are running below seasonal averages. Abundant dead fuels remain from the 1999 Kirk and 2008 Basin fires. Many drainage bottoms did not burn during these previous fires and contain deep duff under timber and brush. These fuels can hold heat for many days and under the right conditions initiate fire spread.

Probability of Ignition: Day: 60-70%, Night: 35-45%

SPECIFIC

Branch VII: Strong NW winds will align with Higgins Creek drainage fanning any remaining embers in the area. Fuels are extremely dry! Any heat along the edge in contact with unburned fuel has the potential for significant down drainage runs. Any spread has the potential to consume significant acreage and burn well into the night.

AIR OPERATIONS:

Marine layer will impact visibility along the coast H-70 & H-71 Strong winds may limit some missions late afternoon.

SAFETY: Preplay! Don't wait until you're in the wrong place at the wrong time---with no time.

Trigger points should be based on measurable factors such as:

- RH
- Winds
- Fire Behavior
- Topographical boundaries
- Time constraints/Time of day
- Time/distance to safety zones
- Loss of suppression resources
- Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change)

Never, under any circumstances, take a sleeping pill and a laxative on the same night.

Soberanes Fire – Safety Message

INCIDENT #CA-BEU-003422

DATE:09-21/22-16 TIME: 0700-0700

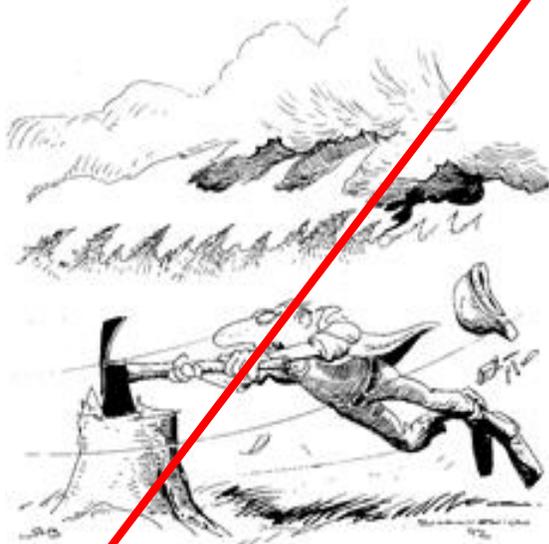

Day/Night Shift

Make a Plan to Reposition

- Establish a plan to reposition resources in the event of adverse fire behavior.
- Have trigger points established
- Post experienced lookouts who know the trigger points, and where all the resources are working.
- Develop notification protocols to initiate the plan.
- Make sure all resources know where to go and their travel time to that location.
- Have a check in protocol for resources when they arrive at their safe locations.
- **“Stay alert, keep calm, think clearly, and act decisively.”**

Reburn Potential

- Reburn potential can happen anywhere in the fire.
- Unburned patches and islands exist in some areas.
- Weather is expected to change, winds are going to increase and change directions. **See Supplemental Page 8**
- Watch for slope aligned with sun, wind and re-burn fuel conditions.
- Be vigilant, and have a plan. Establish and maintain LCES at all times.

5. WIND INCREASES AND/OR CHANGES DIRECTION

Make a Safety Difference

- Set the example.
- Correct and/or report any unsafe actions or conditions.
- Monitor crew members and yourself for fatigue and complacency.
- Everyone is a Safety Officer and is responsible for safety.
- Challenge yourself and your crew to be the safety leaders on your Division or assignment.

Prepared by:

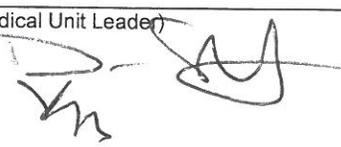

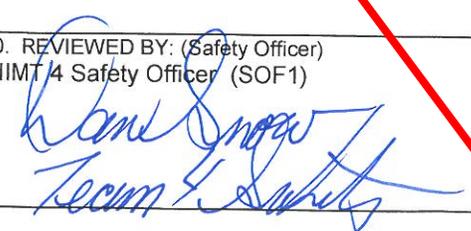

The Team 4 Safety Group

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE BEHAVIOR AND WEATHER	<ul style="list-style-type: none"> • RED FLAG Warning in effect from 1500 Wednesday to 2100 Thursday for NW winds gusting to 35-40mph due to a dry, cold frontal passage. • Beware of increasing fire activity. • Watch out for increasing winds in the afternoon hours. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters. • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing, and know who you are working for.
ALL	MOP-UP	<ul style="list-style-type: none"> • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue, shorten shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area; what hazards exist, and how can we mitigate those hazards.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Use caution while driving on all incident roads. • Heavy local traffic on Highway 1 & Carmel Valley roads during shift changes. • Drive defensively! Expect the unexpected around every curve. • Watch for other vehicles, rocks and debris on the roadway. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers when available. • Roads are narrow with steep drop-offs, we're not in a hurry. • Know that the flagging on the side of Coast Ridge road indicates a false berm/soft shoulder created by a dozer.
ALL	FATIGUE & DEHYDRATION	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Get adequate rest, follow the 2:1 work/rest guidelines. • Monitor ALL resources for level of fatigue. • Drink plenty of water at and maintain a 3:1 ratio of water to Gatorade. • Monitor employees for signs of dehydration and heat related illness. <p style="text-align: center; border: 1px dashed red; padding: 2px;">See Supplemental Page 9</p>
ALL	AVIATION OPERATIONS	<ul style="list-style-type: none"> • Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical freq. when assigned a specific aircraft. • Use air to ground command freq. to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Maintain good separation between ground forces & water/retardant drops. • Review and Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute here on the Soberanes Fire.
ALL	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Review Structure Protection, IRPG pages 12-16. • Do not commit to stay at a structure unless the area around the structure represents an adequate safety zone. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Ensure all personnel can identify Poison Oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber increase distance to 2.5 times the height of the tress. • Never work below or behind heavy equipment.

<i>Area Injured</i>	<i>Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint</i>	<i>Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee</i>
<i>Symptoms</i>	<i>Disoriented Chest Pain <u>or</u> Shortness of Breath Weak or absent radial pulse Pale, cold and sweating</i>	<i>Alert and oriented No shortness of breath Good pulses</i>

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an “Incident within the Incident”

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

Prepared By (Communications Unit) 

Incident Location
5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the KX and IX reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

AD Casuals – Interim Payments

Yearend Closing 9/23/16

AD Casuals – Interim Payment Yearend Closing

If you would like a partial payment processed before yearend closing please contact us. The last day we can submit partial payments is September 23rd. They will start disbursing payments again on or after October 3rd.

On-Shift Time

On-shift time includes a combination of actual work, ordered standby, and compensable travel. On-shift time has a specific start and ending time and is recorded as clock hours. Each resource is responsible for ensuring they are meeting their 2/1 Work Rest Ratio and/or getting approval in advance from their supervisor and completing a Work Rest/Mitigation form to be approved by IC if working excessive hours. Submit the finalized document to Finance.

If you have any questions for Finance please call:

UPDATED 9/21/16

Archaeological and Historical Sites Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites.*** Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph.*** Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.

Soberanes Fire 9/22/16

Human Resource Message

Quote of the Day:

The 3 second rule happens to be one of the most powerful communication tools and it's a great tool for meeting new people in any context. The rule requires that if you see someone you're interested in talking to, you have 3 seconds to walk up to them and start a conversation. The reason why it's so effective is because **if you wait any longer than 3 seconds, you'll probably end up over-thinking it and never say anything at all.** With only 3 seconds, you don't have enough time to let anxiety get the best of you. If you see someone you want to talk to, you must immediately go over and talk to them. Stop worrying about what to say. **Anything is better than nothing.** It's very simple, but extremely effective!

INCIDENT ACTION PLAN

CA-BEU-003422 PNKG7Z (1502)

OPERATIONAL PERIOD

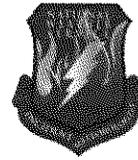

THURSDAY-FRIDAY, SEPTEMBER 22-23, 2016

0700-0700 HOURS

INCIDENT OBJECTIVES	1. Incident Name Soberanes	2. Date 09/21/2016	3. Time 2200
4. Operational Period <p style="text-align: center;">DAY / NIGHT September 22-23, 2016 0700 - 0700 Hours</p>			
5. General Control Objectives for the Incident (include alternatives) Management Objectives <ul style="list-style-type: none"> • Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations. • Reduce firefighter exposure by only engaging fire assignments with the highest probability of success. • Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests. • Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations. • Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information. • Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy. • Manage incident costs effectively for the values at risk through regular and ongoing cost analysis. Control Objectives Keep Fire <ul style="list-style-type: none"> • East of the Coast Ridge Road. • North of Nacimiento-Fergusson Road. • West of Carmel Valley and Reliz Canyon. • South of current containment lines in Branches I, II and IX. 			
6. Weather Forecast for Operational Period <ul style="list-style-type: none"> • RED FLAG WARNING in effect through 9pm. Strong NW winds 20-30 mph with gusts up to 40 mph will impact the fire zone. Low humidity in the 20% to 35% is expected with cooler temperatures from 60 to 70 degrees. 			
7. General Safety Message <ul style="list-style-type: none"> • Driving to and from the Line: Give a briefing on driving hazards prior to every trip. • Hydration and Fatigue: Hydration starts PRIOR to the beginning of shift, drink a 2:1 ratio of water to sports drinks. Monitor fatigue levels, and do not exceed the 2:1 work rest ratio.

Soberanes Fire Weather Forecast East Operational Area

Forecast Info &
Spot Forecasts

FORECAST NO: 61

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Thu. - 0700 Fri.

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Thursday, Sept 22nd, 2016

SIGNED: Jon Bonk / Julia Ruthford
Incident Meteorologists

TIME AND DATE

FORECAST ISSUED: 2100 hrs. 9/21/16

Jon's Cell (Hunter-Liggett): (240)778-5287
Julia's Cell (Toro): (971) 221-6728

**** Red Flag Warning in effect through 2100 hours Thursday ****

WEATHER DISCUSSION: Low pressure will remain over the fire area today bringing much cooler weather but continued strong winds. Morning low clouds banked up in Carmel Valley could bring periods of morning drizzle with ceiling/visibility impacts to Rana Helibase. These clouds should clear by afternoon. Additionally, this stable air will easily channel winds along terrain. Winds will decrease through the night as the upper low moves away.

WEATHER FORECAST For Today:

WEATHER: Clear...except morning low clouds and drizzle below 1500 feet in Carmel Valley.

TEMPERATURES: Highs 58-71 in the active fire area. (15-20 degrees cooler)

HUMIDITY: 25-35% in the morning rising to 35-45% in the afternoon. (much higher)

20 FT WINDS:

RIDGETOP / UPPER SLOPE – Northwest 20-25 mph with gusts up to 35 mph decreasing to 15-20 mph with gusts to 30 mph around 1000 hrs.

LOWER SLOPE / VALLEY – Variable 5-10 mph, except 10-15 mph with gusts up to 30 mph possible given aligned terrain.

Inland Marine Layer: 1500 feet in the morning...impact to Rana Helibase until 1100 hours. **Haines:** 3

WEATHER FORECAST For Tonight:

WEATHER: Clear.

TEMPERATURES: Lows 44-49 (6-8 degrees cooler).

HUMIDITY: Valley bottoms: Max 85-90%. Ridges: 35-45% in the evening, falling to 25-35% overnight.

20 FT WINDS:

RIDGETOP / UPPER SLOPE – North 15-20 mph with gusts up to 30 mph decreasing to 8-12 mph with gusts to 20 mph after 2100.

LOWER SLOPE/VALLEY – Variable winds 5-10 mph, except 8-12 mph with gusts to 20 mph possible given aligned terrain.

Marine Layer: Less than 500 feet...no impacts.

Thermal Belt: None. Shallow valley inversions.

EXTENDED FORECAST: Strong high pressure returns for the weekend with temperatures returning to well above normal. Poor humidity recovery returns Saturday night with extremely poor recoveries next week. Winds will largely follow typical diurnal patterns with southwest ridge winds during the day followed by northeast ridge winds overnight.

INPUTS					
RED FLAG WARNING IN EFFECT					
*** Wind Summary ***					
DAY: RIDGETOP: 0600 NW 20-25mph G35	SLOPE/VALLEY: 0600-0900 Down-valley -10mph... 0900-1900 Upslope/Up-valley 10-15mph G30				
NIGHT: RIDGETOP: 1800 N 8-12mph G20	SLOPE/VALLEY: 1900-0600 8-12mph G20				
FIRE BEHAVIOR					
GENERAL					
LOCAL THRESHOLDS – WATCH OUTS					
Combinations of any of these threshold factors can greatly increase fire behavior:					
Thresholds:	20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%	
Forecasted	Ridges	15-25mph	35-45%	58°	4-9%
	Valleys	10-15mph	25-35%	71°	3-7%
Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant.					
Probability of ignition : Day: Shaded 50% Unshaded 70%					
Night: 40%					
SPECIFIC					
BRANCH III, IV					
Temperatures will be unseasonably cool and humidity will be much higher than we have seen, but winds will still be strong. Winds slowly decrease through the afternoon, but will remain above the critical threshold. Rapid spread and large fire growth potential still exists today. Fuel moistures will be slow to recover. Fire spread rates may be >80ch/hr with long range spotting of ¼ mile or more.					
Winds will continue to decrease through the night operational period. Temperatures will drop and humidity will begin the evening fairly high (around 40%), but will fall into the mid 20% range in the morning hours. Rapid fire spread potential will continue to persist until early Friday morning. Fire spread rates may be > 60ch/hr with spotting of ½ mile or more.					
AIR OPERATIONS					
Strong gusts in the morning through early afternoon may restrict the ability to fly. Low level clouds may impact Rana Helibase in the morning until 1100. VFR conditions expected through the operational period.					
SAFETY					
Standard Order Number 2 is emphasized today: Know what your fire is doing at all times. Pay attention to radio traffic, reports from other Divisions, and Air Attack. Observe the situation personally, or use scouts. The potential for fire growth is great again today.					

Soberanes Fire Weather Forecast West Operational Area

FORECAST NO: 61

NAME OF FIRE: Soberanes

Forecast Info &
Spot Forecasts

PREDICTION FOR: 0700 Thu- 0700 Fri

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Thursday Sept 22th, 2016

SIGNED: Jason Clapp

TIME AND DATE

FORECAST ISSUED: 2100 9/21/16

Incident Meteorologist

Jason Clapp – Cell 530-383-4839 (West-Molera)

WEATHER DISCUSSION: **** RED FLAG WARNING Continues Today thru 21L ****

Cold front has passed, but breezy northerly winds are still over the area with higher RH. Winds weaken tonight and then increase from the NE on Friday with lower RH. Ridging builds back in over the weekend with warming and drying.

WEATHER FORECAST For Today:

WEATHER: A Red Flag Warning is still in effect through 2100 this evening for strong winds and low humidity. Ridge NNW-NNE winds will align with the Higgins drainage and up toward Rodeo Flats today. Marine layer should break along the coast by 1200.

TEMPERATURES: Highs 62-66...highest on lower slopes. (Down 7-10 degrees)

HUMIDITY: 22-25% Lower slopes... 25-30% Coastal Ridge (Up 10-12%).

20 FT WINDS:

RIDGETOP – NNW 15-20 mph, gusting 30 mph.

SLOPE/VALLEY – Downslope battling upslope 4-8mph in Valley below H-15/DP-107. Enhanced upslope/north 10-15 mph gusting to 25 mph in the afternoon toward DP-136 and Rodeo Flats.

Marine Layer Top: 1500 ft cloud tops impacting H-70 & 71. **Haines:** 3

WEATHER FORECAST For Tonight:

WEATHER: Ridge building behind cold front with cooler temperatures, especially in wind sheltered areas. NNE ridge winds will enhance any down-canyon winds within Higgins canyon, especially mid to upper slopes.

TEMPERATURES: Lows 44-48 in the valleys. 48-53 ridges. (Down 9-12).

HUMIDITY: 55-65% in Higgins drainage... 35-40% thermal belt/ridges...falling to 25-35% overnight.

20 FT WINDS:

RIDGETOP – NNE 12-18 mph gusting to 25 mph.

SLOPE/VALLEY – Down-canyon 6-10 mph with gusts 15 mph. Gusting 20- 25 mph forced upslope toward Rodeo Flats.

Marine Layer: Minimal impacts at H-70 & H-71.

EXTENDED FORECAST:

Wind shifts more NE Friday behind the frontal system with breezy ridge winds still in place. High pressure builds into the weekend with warming temperatures, lower RH, and diurnal wind shifts from SW in the afternoon and NE overnight.

Forecast	Ridges	15-20mph	25-30%	62-66°	3-5%													
	Valleys	10-15mph	22-25%	65-68°	4-6%													
(See Weather Forecast for details)																		
FIRE BEHAVIOR																		
Coastal Sage shrub fuel moisture, primarily chamise and button brush are running below seasonal averages. Abundant dead fuels remain from the 1999 Kirk and 2008 Basin fires. Many drainage bottoms did not burn during these previous fires and contain deep duff under timber and brush. 10-hour fuels have remained below 6% for several days now. Energy Release Component (ERC) are at historic highs (Hastings ERC 76). Probability of Ignition: Day: 45-55%, Night: 25-30%																		
SPECIFIC																		
Branch VII: Strong northerly winds today will test black lines. Any fire that gets established has the potential for significant spread as a wind driven fire. Long range spotting is also likely. Winds will taper off somewhat and relative humidity will rise about sunset limiting rapid fire spread. Nighttime humidity recovery will be better than we have seen for several days dampening any nighttime fire activity after sunset.																		
AIR OPERATIONS:																		
Possible Marine impacts along the coast H-70 & H71. Strong winds may limit aerial missions today.																		
SAFETY:																		
Terrain will be a dominant force effecting winds. Expect channeling, eddying and swirling even battling winds as air is forced through and over this complex terrain. Know what your winds are doing at all times, and don't expect winds to be the same at all locations.																		

I dream of a better tomorrow, where chickens can cross the road and not be questioned about their motives

Soberanes Fire – Safety Message

INCIDENT #CA-BEU-003422

DATE: 9-22/23-16 TIME: 0700-0700 Day/Night

Do Basic Things Very Well

- **Fire Behavior:** Follow the Ten Standard Fire Orders in a methodical and thorough way.
- **Hazard/Danger Trees:** Scout work areas, evaluate hazard trees, develop controls, and apply them to mitigate risk.
- **Driving to and from the Line:** Give a briefing on driving hazards prior to every trip.
- **Hydration and Fatigue:** Hydration starts PRIOR to the beginning of shift, drink a 2:1 ratio of water to sports drinks. Monitor fatigue levels, and do not exceed the 2:1 work rest ratio.

A Message From the Chief of the Forest Service

- Everyone, every day, returns home safely.
- Safety is not just a consideration in how we do our work; it is the essence of how we make decisions.
- We assess, analyze, communicate, and share risk before, during, and after incidents.
- We do not accept unnecessary risk or transfer it to our partners or future generations.
- Before, during, and after every fire, we enhance relationships.
- We create a respectful work environment for everyone involved in the fire.
- We learn from every experience and use that knowledge to improve.

Driving

- Drive defensively! Expect the unexpected around every curve.
- **Where operationally feasible, rest drivers one hour before returning to camp.**
- Always fasten seat belts **before** the vehicle is set into motion.
- When driving, keep speed at or **below** the posted speed limit.
- **Stay as far to the right of the road as is safely possible.**
- **Stay away from soft shoulders on the downhill side of roads.**
- Allow opposing heavy vehicle traffic to **pass slowly on the uphill side** of narrow access roads, after ensuring there is adequate room.
- Watch out for debris and wildlife in the roadway.
- **Increase following distance between vehicles in dusty or smoky areas.**
- **Use a spotter** when backing or turning around your vehicle.

Beware of Soft Shoulders

- Many incident roads have **soft shoulders** on the downhill side.
- Wheels may sink into these areas causing the driver to **lose control** of the vehicle.
- **Stay well away** from the downhill side of all roads.
- Allow opposing heavy vehicle traffic to **pass slowly on the uphill side** of narrow access roads, after ensuring there is adequate room.
- Increase following distance to **maintain visibility.**
- **Use a spotter** when backing or turning around your vehicle. Do a walk around if a spotter is not available.

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE BEHAVIOR AND WEATHER	<ul style="list-style-type: none"> • A RED FLAG Warning is still in effect for NW winds gusting to 35-40mph due to a dry, cold frontal passage. • Beware of increasing fire activity. • Watch out for increasing winds in the afternoon hours. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters. • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing, and know who you are working for.
ALL	MOP-UP	<ul style="list-style-type: none"> • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue, shorten shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area; what hazards exist, and how can we mitigate those hazards.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Use caution while driving on all incident roads. • Heavy local traffic on Highway 1 & Carmel Valley roads during shift changes. • Drive defensively! Expect the unexpected around every curve. • Watch for other vehicles, rocks and debris on the roadway. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers when available. • Roads are narrow with steep drop-offs, we're not in a hurry. • Know that the flagging on the side of Coast Ridge road indicates a false berm/soft shoulder created by a dozer.
ALL	FATIGUE & DEHYDRATION	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Get adequate rest, follow the 2:1 work/rest guidelines. • Monitor ALL resources for level of fatigue. • Drink plenty of water at and maintain a 3:1 ratio of water to Gatorade. • Monitor employees for signs of dehydration and heat related illness. • Maintain good hydration and a healthy food intake. • "Camp Crud" may predispose a firefighter to dehydration.
ALL	AVIATION OPERATIONS	<ul style="list-style-type: none"> • Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical freq. when assigned a specific aircraft. • Use air to ground command freq. to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Maintain good separation between ground forces & water/retardant drops. • Review and Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute here on the Soberanes Fire.
ALL	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Review Structure Protection; IRPG pages 12-16. • Do not commit to stay at a structure unless the area around the structure represents an adequate safety zone. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Ensure all personnel can identify Poison Oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber increase distance to 2.5 times the height of the tress. • Never work below or behind heavy equipment.
<p>INCIDENT NAME:</p> <p>Soberanes Fire</p>		<p>Operational Period: 0700-0700</p> <p>September 22-23, 2016</p> <hr/> <p>DATE AND TIME PREPARED:</p> <p>September 21, 2016 1100 hours</p>
