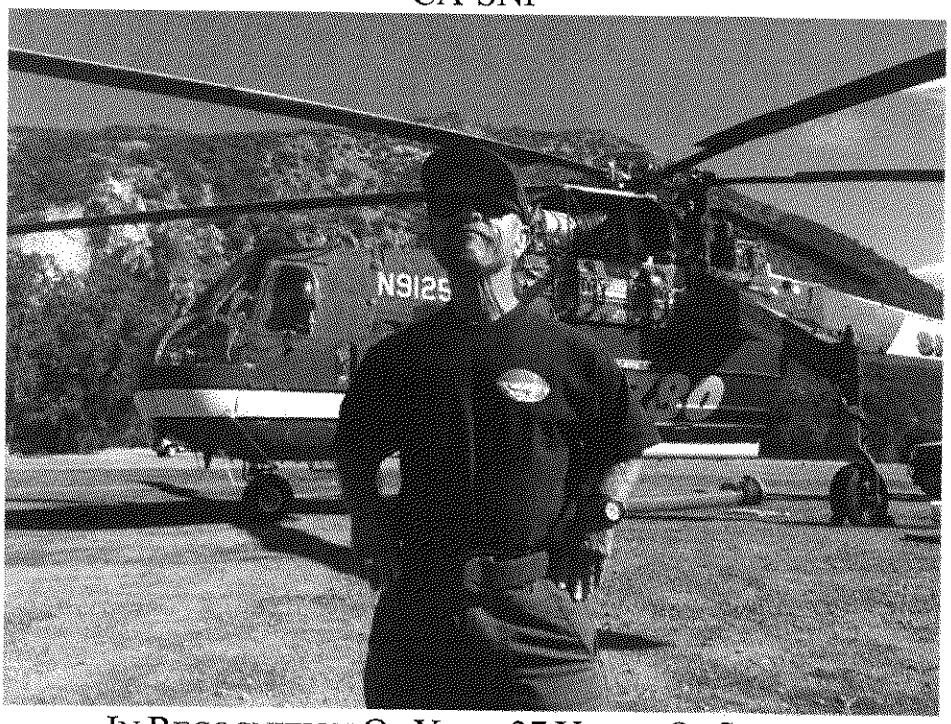
CONGRATULATIONS BRAD NELSON
CA-SNF



IN RECOGNITION OF YOUR 37 YEARS OF SERVICE
1979 - 2016

OPERATIONAL PERIOD

SATURDAY-SUNDAY, SEPTEMBER 24-25, 2016
0700-0700 HOURS

Maps **Fire Weather** **RAWS**

INCIDENT OBJECTIVES	1. Incident Name	2. Date	3. Time
	Soberanes	09/23/2016	2200

4. Operational Period

DAY / NIGHT September 24-25, 2016 **0700 - 0700 Hours**

5. General Control Objectives for the Incident (include alternatives)

Management Objectives

- Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations.
- Reduce firefighter exposure by only engaging fire assignments with the highest probability of success.
- Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests.
- Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations.
- Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information.
- Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy.
- Manage incident costs effectively for the values at risk through regular and ongoing cost analysis.

Control Objectives

Keep Fire

- East of the Coast Ridge Road.
- North of Nacimiento-Fergusson Road.
- West of Carmel Valley and Reliz Canyon.
- South of current containment lines in Branches I, II and IX.

6. Weather Forecast for Operational Period

- A significant warming and drying trend will begin today and continue through the weekend as high pressure builds over the west coast. Winds will turn more offshore this weekend over the fire district favoring a decrease in humidity recovery.

7. General Safety Message

- Please be mindful of your driving habits, other drivers, and road conditions. We've had several incidents and near misses along our routes and roadways. Pay attention to current conditions and drive appropriately. Slow down. Avoid distractions....
  Lights on, Belts on, Brains on.

Soberanes Fire Weather Forecast
East Operational Area

Forecast Info & Spot Forecasts

FORECAST NO: 63

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Sat. - 0700 Sun.

UNIT: CA-BEU/LPF MRD

SHIFT DATE: Saturday, Sept 24th, 2016

SIGNED: Jon Bonk / Julia Ruthford
Incident Meteorologists
Jon's Cell (Hunter-Liggett): (240)778-5287
Julia's Cell (Toro): (971) 221-6728

TIME AND DATE ISSUED: 2200 hrs. 9/23/16

***** Warmer and drier period underway *****

WEATHER DISCUSSION: Upper level ridge continues building overhead bringing warming and drying conditions. Sunday and Monday will be the warmest and driest days as light offshore flow prevails. Expect terrain driven winds will dominate the pattern with a possible return to brief and light southwest ridge winds in the afternoons/early evenings beginning Sunday. Otherwise, easterly component ridge winds will prevail. Very strong thermal belts with very poor humidity recovery the next several nights.

WEATHER FORECAST For Today:

WEATHER: Clear.

TEMPERATURES: Highs 74-77 Ridges; 87-92 Lowest valleys near active fire. (8-12 degrees warmer)

HUMIDITY: 10-15% lowest valleys. 15-20% elsewhere (down 2-4%).

20 FT WINDS:
RIDGETOP / UPPER SLOPE – North 7-11 mph with gusts to 18 mph.
LOWER SLOPE / VALLEY – Upslope/upvalley 4-8 mph. Gusts to 15 mph in the afternoon.

Inland Marine Layer: Less than 500 feet...No impact. **Haines:** 4

WEATHER FORECAST For Tonight:

WEATHER: Clear.

TEMPERATURES: Lows 43-48 in the valleys. 60-65 ridges. (5-10 degrees warmer).

HUMIDITY: Ridge/Thermal Belt: 28-33% early falling to 20-25% toward sunrise. Valleys Max 45-50%

20 FT WINDS:
RIDGETOP / UPPER SLOPE – North 8-12 with gusts to 20 mph shifting Northeast 5-8 mph with gusts to 15 mph around 2200 hrs.
LOWER SLOPE/VALLEY – Down slope/valley 3-6 mph.

Inland Marine Layer: Less than 500 feet...no impacts. **Thermal Belt:** 3500 feet.

EXTENDED FORECAST: Strong high pressure continues Sunday through Monday. Sunday and Monday will be the hottest and driest days of the week. The upper ridge starts moving east Tuesday as weak low pressure moves north into the Great Basin and a slow moving upper trough starts moving south from the Gulf of Alaska. Ridge winds remain less than 10 mph sustained through most of the week.

INPUTS

***** Wind Summary *****

DAY: RIDGETOP: 0600 N 7-11mph G18

SLOPE/VALLEY: 0600-0900 Down-valley 5-8mph...
0900-1900 Upslope/Up-valley 4-8mph G15

NIGHT: RIDGETOP: 1800 N 8-12mph G20

SLOPE/VALLEY: 1900-0600 3-16mph G10
Thermal Belt 3500 ft

FIRE BEHAVIOR

GENERAL

LOCAL THRESHOLDS – WATCH OUTS

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
Forecasted	**Ridges**	**7-11mph**	18-25%	77°	**5-8%**
	Valleys	**4-8mph**	**15-20%**	92°	**3-5%**

Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant.

Probability of ignition : Day: Shaded 60% Unshaded 90%

Night: 40%

SPECIFIC

BRANCH III, IV

Today will be a good day for firing operations in Branch IV. Fire should carry well in the continuous fuels. Additional intensity may be needed where the vegetation is sparse. It will still be possible to get short upslope runs to the ridges with any unchecked fire, but should be short lived. Branch III will see creeping and smoldering except where fuels are continuous, align with slope and/or winds. An occasional flare up may be possible in drainages with heavy fuel loading.

Tonight should see a decrease in fire behavior by sunset. Fire will creep and smolder through the night with an occasional flare up. Fire spread will only occur in continuous fuels and where wind and terrain align. Firing operations may be difficult as fire will not spread easily.

AIR OPERATIONS

VFR conditions expected through the operational period.

SAFETY

As fuels dry out watch for indicators that suggest changes in fire behavior. These include numerous trees torching, smoldering fuels picking up, small fire whirls and frequent spot fires.

.

Soberanes Fire Weather Forecast
West Operational Area

FORECAST NO: 63
PREDICTION FOR: 0700 Sat - 0700 Sun

NAME OF FIRE: Soberanes
UNIT: CA-BEU/LPF MRD

Forecast Info &
Spot Forecasts

SHIFT DATE: Saturday Sept 24th, 2016

SIGNED: Jason Clapp

TIME AND DATE
FORECAST ISSUED: 2000 9/23/16

Incident Meteorologist
Jason Clapp – Cell 530-383-4839 (West-Molera)

WEATHER DISCUSSION: ***** Warmer & Drier *****

High pressure builds over the area through the weekend with increasing temperatures. Minimum RH lowers considerably over the weekend with terrain-driven slope winds and breezy ridge winds. Greater chances of marine layer clouds impacting the coast increase next week as the high pressure breaks down.

WEATHER FORECAST For Today:

WEATHER: Upper ridge builds in over fire with slightly weaker afternoon northeasterly ridge winds today, but still gusty. Expect lower afternoon humidity and poorer overnight recovery tonight. Clear along coast with minimal marine layer cloudiness this morning and no impacts to aviation.

TEMPERATURES: Highs 79-83...highest on lower slopes. (Up 9-12 degrees)

HUMIDITY: 10-14% Lower slopes... 14-17% Coastal Ridge (Down 2-3%).

20 FT WINDS:
RIDGETOP – NNE 10-12 mph, gusting 18 mph.
SLOPE/VALLEY – Downslope 3-5 mph through 0900, then upvalley/upslope 6-8 mph. Gusts 12 mph in the afternoon.

Marine Layer Top: 1000 ft marine layer offshore with no impacts. **Haines:** 4

WEATHER FORECAST For Tonight:

WEATHER: Mostly clear as marine stratus should stay just offshore. Remaining breezy NNE over ridges.

TEMPERATURES: Lows 59-62 in the valleys. 62-65 ridges. (Up 5-8).

HUMIDITY: 30-35% in Higgins drainage. 20-25% thermal belt/ridges.

20 FT WINDS:
RIDGETOP – NNE 10-12 mph gusting to 18 mph.
SLOPE/VALLEY – Downcanyon 3-5 mph with gusts 9 mph.

Marine Layer: 1000 ft marine layer with minimal impacts at H-70 & H-71 as it tries form on coast

---

EXTENDED FORECAST:
High pressure continues to build into Sunday with warming temperatures, lower RH, and diurnal wind shifts from SW in the afternoon and NE overnight. Monday and Tuesday will still be hot, but beginning to trend downward. The next frontal system approaches Wednesday and passes through the area Thursday into early Friday. This system will not be as strong as the previous frontal system.

WEST	FIRE BEHAVIOR FORECAST	WEST

FORECAST NUMBER: 63	**TYPE OF FIRE:** Wildfire
FIRE NAME: Soberanes West Operational Area	**OPERATIONAL PERIOD:** Saturday, 9/24/2016 24 Hour Shift
DATE ISSUED: September 23, 2016	**TIME ISSUED:** 2000
UNIT: CA-BEU-LPF-MRD	**SIGNED:** Dan Mindar FBAN

INPUTS

Wind Summary

Day- Ridge Top: NNE 10-12 mph, Gusting 18 mph.

Slope/Valley: Downslope 3-5 mph through 0900, then up valley/up slope 6-8 mph. Gusts 12 mph in the afternoon.

Night- Ridge Top: NNE 10-12 mph Gusting 18 mph.

Slope/Valley: Down Canyon 3-5 mph gusts to 9 mph.

Local Thresholds- Watch Outs

Combinations of any of these threshold factors may greatly increase fire behavior.

Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
Forecast	Ridges	10-12mph	20-25%	79-83°	**3-5%**
	Valleys	6-8mph	**16-19%**	82-84°	**3-6%**

(See Weather Forecast for details)

FIRE BEHAVIOR

Coastal Sage shrub fuel moisture, primarily chamise and button brush are running below seasonal averages. Abundant dead fuels remain from the 1999 Kirk and 2008 Basin fires. Many drainage bottoms did not burn during these previous fires and contain deep duff under timber and brush.

10-hour fuels yesterday 5% Coastal Ridge. We are entering a cycle again of very poor overnight humidity recovery, which will only degrade the already low fuel moistures.

Probability of Ignition: 65-70%

SPECIFIC

Branch VII: Breezy conditions with lower relative humidity will continue to expose new hot spots in Higgins Creek drainage. Any fire that may get established will be capable of rapid upslope runs with flame lengths in excess of 8 feet afternoon and early evening.

AIR OPERATIONS:

No known impacts to aviation.

SAFETY:

During these periods of little fire behavior, complacency sets in and we are often caught off guard by changing fire behavior. Things are changing! We should never be surprised by fire behavior! Take weather observations frequently. Base all actions on current and **expected** fire behavior.

"If you could kick the person in the pants responsible for most of your trouble, you wouldn't sit for a month."
Theodore Roosevelt

6. Control Operations/Work Assignments:

- Coordinate with East Operations on the need to continue any firing operations along indirect containment lines.
- Patrol, mop up and secure containment lines within division where safe to do so.

7. Special Instructions:

- Backhaul all excess equipment off of Division.
- East REMS O-10918 and O-10919 assigned to East Operations,
- SOF2 Rob Hickock is assigned to Divisions CC, GG and Arroyo Seco SDG.
- Please be mindful of your driving habits, other drivers, and road conditions. We've had several incidents and near misses along our routes and roadways.
- Pay attention to current conditions and drive appropriately. Slow down. Avoid distractions.... Lights on, Belts on, **Brains on.**

1. INCIDENT NAME: Soberanes Fire	2. OPS PERIOD DATE: 09/24/2016	START TIME: 0700	END TIME: 2100	SUNRISE: 0656	SUNSET: 1859

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): Track all dipsite locations/number of dips/gallons taken. Track all drop locations/number of drops/gallons dropped.
All GPS data to be collected in **DEGREES, DECIMAL MINUTES** format.
AVOID Aerial Application of Retardant/Foam/Agent within 300' of Waterways, Bodies of Water, etc.
If Retardant/Foam/Agent is dropped within these areas immediately notify the AOBD and provide the following information: Lat/Long, estimated number of gallons and a map detailing the area.
Helitorch Module is located at Tassajara Torch Base.

Fly with Transponder 1255.

Air Attack Briefing 132.0250 AM **AIR/AIR Firing 135.3250 AM A-10003**

For scheduling recon flights contact Ranch HB communications @ 831-659-0220

All rotor wing aircraft will be on the ground at 1900.

TUSI Advisory 126.200 for restricted airspace.

SOBERANES RISK MANAGEMENT MESSAGE

Stop, Think, Talk…Act

"Everyone goes home safely every day."- T. Tidwell

INCIDENT: Soberanes #CA-BEU-003442	DATE: 9-24/25-16 Time: 0700-0700 Day/Night

Take 5 @ 2pm

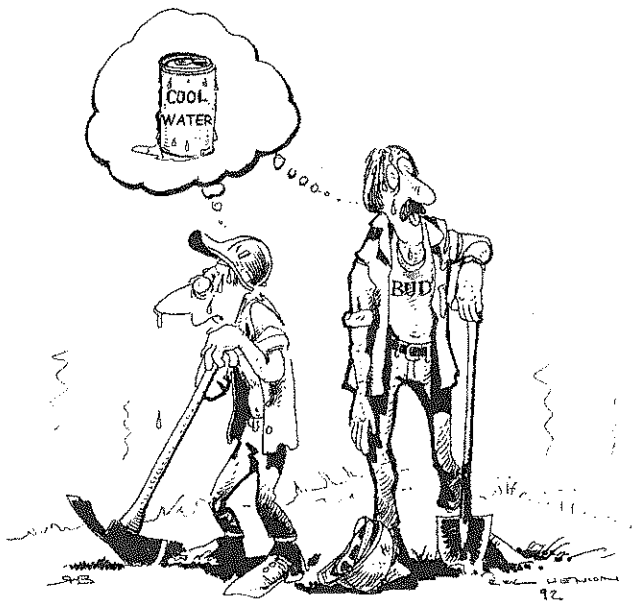
It's 1400…you have been working all morning. How far away have your safety zones become? Safety zones are only good if you can reach them. How long will your escape route take? What is the condition of the crew? How long will it take your slowest member to get there? Are your expectations realistic?

Keep Your Guard Up!

- Maintaining situational awareness takes effort!
- Continue planning to provide for safety, and ***then*** accomplish the mission!
- Watch for complacency in others, and help them stay sharp.
- Watch for signs of fatigue, and take action to address it.
- Be methodical and relentless in your efforts to get the job done safely!

Keep your head in the game

Watch Out Situation of the Day



14.WEATHER IS GETTING HOTTER AND DRIER

Look Up, Look Down,
Look Around

***Fuel Characteristics** – Assess prior to beginning operations.

***Fuel Moisture** – Read daily shift plan and assess on site.

***Fuel Temperature** – Varies with exposure to direct sunlight.

***Terrain & Fuel Accumulations** – Scout prior to beginning operations and continuously during operations.

***Wind** – Measure, observe, feel and notice changes.

***Atmospheric Stability** – Observe.

***Fire Behavior** – Monitor constantly prior to and during operations.

***Safety** – Ask questions in unfamiliar situations. The only dumb question is the one you did not ask.

Prepared by: Team 4 Safety Group

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	• Use caution while driving on all incident roads. • Watch for other vehicles **(Distracted Drivers)**, rocks and debris on the roadway. • Heavy local traffic on Highway 1 & Carmel Valley roads during shift changes. • Drive defensively! Expect the unexpected around every curve. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers when available. • Roads are narrow with steep drop-offs, we're not in a hurry. • **Know that the flagging on the side of Coast Ridge road indicates a false berm/soft shoulder created by a dozer.**
CC, GG	HAND AND AERIAL FIRING OPERATIONS	• Develop a plan and ensure all personnel understand it. • Follow the chain of command in implementing the firing operation. • Know who you are working for and what your job is. • Post lookouts and make sure communications exist. • Make sure all personal know their escape routes and safety zones. • Ensure accountability for all line personnel. • Remember there is "Unburned fuel between you and the fire." • Hazards: Heli-torch, drip torch fuel, firing devices and projectiles. • Refer to Tassajara ignition plan.
ALL	FIRE BEHAVIOR AND WEATHER	• Beware of increasing fire activity. Weather becoming warmer and dryer. • Stay hydrated. Monitor resources for heat related illness. • Watch out for increasing winds in the afternoon hours. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points. • Expect the unexpected with drought stricken fuels at critically low fuel moistures • **Historical trends indicate changes in the fire environment support large fire growth.**
ALL	MOP-UP	• Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue, shorten shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area; what hazards exist, and how can we mitigate those hazards.
ALL	COMMUNICATIONS	• Share your Situational Awareness with those who also have a need. • **Radio Communications may be poor in some areas. Use human repeaters.** • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing, and know who you are working for.
ALL	AVIATION OPERATIONS	• Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical freq. when assigned a specific aircraft. • Use air to ground command freq. to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Maintain good separation between ground forces & water/retardant drops. • Review and Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute here on the Soberanes Fire.
ALL	HEAVY EQUIPMENT OPERATIONS	• Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber increase distance to 2.5 times the height of the tress. • Never work below or behind heavy equipment.
ALL	ENVIRONMENTAL HAZARDS	• Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Ensure all personnel can identify Poison Oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
BR III IV	STRUCTURE PROTECTION	• Review Structure Protection; IRPG pages 12-16. • Do not commit to stay at a structure unless the area around the structure represents an adequate safety zone. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials.

IINCIDENT NAME:

Soberanes Fire

Operational Period: 0700-0700

September 24-25, 2016

DATE AND TIME PREPARED:

September 23, 2016 1200 hours

MEDICAL PLAN ICS 206

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.
Division Supervisor/Operations contacts Communication:

- Division Supervisor/Operations to use **"injury or incident communication protocol"** on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications will contact the Medical Unit Leader on Command channel.
- Medical Unit Leader will:
  1. Have communications dispatch ground/air transport resources
  2. Notify receiving hospital of injury status.
  3. Develop primary and contingency transport plan
  4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

Contact Communications with patient complaint/condition and location, via LOGs Net

- Medical Unit contacts:
  - Safety
  - Logistics
  - Operations
- Medical Unit Leader will:
  1. Contact Communications to dispatch ground/air transport resources
  2. Notify receiving hospital of injury status
  3. Develop primary and contingency transport plan

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long)_____
GPS Format: WGS84 Degrees, Decimal, Minutes
Situation_____

Any special equipment required_____

Number of injured _____ Type of injuries_____

Closest pick up point (DP, Helispot)_____

Level of consciousness _____Resp._____ Pulse _ BP _____Weight _
(alert & oriented x 1-4)

Injury_____Agency (No Names)_____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	*Transport to Med Unit*
Mechanism	*Hit by a falling tree or large branch* *Fall of 10' or more* Insect bite with shortness of breath *Signs of heat stroke (hot, dry, disoriented)* Burn Injury greater than 1% body area	*Minor dehydration* Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	*Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis* *Any Arm or Leg fracture above the Joint*	*Minor blunt trauma* Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	*Disoriented* *Chest Pain or Shortness of Breath* Weak or absent radial pulse Pale, cold and sweating	*Alert and oriented* No shortness of breath Good pulses

If air or ground ambulance is DELAYED:
Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.
The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

Prepared By (Communications Unit)

Sal Bonilla Jr. / Chris Baker COML 4 PHONE 831-484-9674

Incident Location

5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

Human Resources Message

PREVENT SEXUAL HARASSMENT

SEXUAL HARASSMENT at work, including emergency incidents, occurs when gender-based unwelcome conduct adversely affects a person's ability to do his or her job, and contributes to a hostile work environment. Sexual harassment includes, but is not limited to, the following:

- Unwelcome sexual advances
- Requests for sexual favors
- Discussing sexual activities
- Telling off-color jokes
- Unnecessary and unwelcome touching
- Displaying sexually suggestive pictures
- Using demeaning or inappropriate terms
- Using indecent gestures
- Using crude and offensive language
- Commenting on physical attributes

Your HR Specialists at Molera are Shawn Holden, (916) 215-8324, and Cathleen Thompson HRSP(T), (707) 853-4243.
At Rana it is Alan Seago, (707) 315-6537.
At Toro, Deputy IC Scott Vail is performing HR duties.

Archaeological and Historical Sites
Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

1. ***Be on the lookout for prehistoric and historic sites***. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.

2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.

3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.

4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.

5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. ***If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph***. Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.

6. ***If you encounter a burial or human remains, cease work in the area immediately*** and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.

Soberanes Fire
Trainee/Trainer Data Form

Training Specialists:	John Fakehany	818.962.6465
	Shawn Holden	916.215.8324
	Dennis Martin	707.479.8421
	Robert Rivelle	707.498.1761

- All Incident trainees, including those on Firefighting Modules, at your earliest opportunity complete this form and see the Training Specialist. Bring your taskbook and qualification card. One Training Specialist is covering Rana and Fort Hunter Liggett and a drop box has been set up for this Data Form drop off. If you're located at Molera Camp, you can drop this form off with the Training Specialist at the Training trailer. These Camps will forward your Trainee Data Form to Toro ICP.

- As you begin DEMOB at Toro ICP, close your training package. To close your training package bring:
  1) A performance rating from your trainer. (ICS 225)
  2) Your task book that has as many entries as possible by your Trainer.

Trainee Data

Trainee Name: _____ ICS Trainee Position: _____

Request Number (O, C, E):_____ Agency Designator (Example: CA-ANF):_____

Cell # While on Incident: _____ Date Assigned: _____

Training Records Mailed To: (Fire Chief, Training Officer)
