RAWS

INCIDENT OBJECTIVES	1. Incident Name Soberanes	2. Date 09/26/2016	3. Time 2200									
4. Operational Period <p style="text-align: center;">DAY / NIGHT September 27-28, 2016 0700 - 0700 Hours</p>												
5. General Control Objectives for the Incident (include alternatives) Management Objectives <ul style="list-style-type: none"> • Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations. • Reduce firefighter exposure by only engaging fire assignments with the highest probability of success. • Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests. • Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations. • Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information. • Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy. • Manage incident costs effectively for the values at risk through regular and ongoing cost analysis. Control Objectives Keep Fire <ul style="list-style-type: none"> • East of the Coast Ridge Road. • North of Nacimiento-Fergusson Road. • West of Carmel Valley and Reliz Canyon. • South of current containment lines in Branches II and III. 												
6. Weather Forecast for Operational Period <ul style="list-style-type: none"> • Hot & dry weather continues with daytime high temperatures well into the 90s and relative humidity falling into the single digits and lower teens this afternoon. • Cooler temperatures with some humidity recovery expected Tue night and Wed as marine layer begins to influence the area once again. 												
7. General Safety Message <ul style="list-style-type: none"> • Maintain focus on the task at hand. Give clear briefings, and conduct daily after action reviews to continually improve your situational awareness.

Soberanes Fire Weather Forecast

Forecast information & SPOT forecasts

FORECAST NO: 66

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Tue - 0700 Wed
SHIFT DATE: Tuesday Sept 27, 2016

UNIT: CA-BEU/LPF MRD
SIGNED: Angie Enyedi *AE*

TIME AND DATE
FORECAST ISSUED: 2000 9/26/16

Incident Meteorologists
Julia Ruthford – Cell 971-221-6728 (Toro ICP)
Kurt Van Speybroeck – Cell 817-771-0741 (Rana Camp)

WEATHER FORECAST for Today:

East Side Operations	Valley / Lower Slope	Ridgetop / Upper Slope
Weather	Hot, Sunny, Dry	Hot, Sunny, Dry
Highest Temperatures	90-100	80-90
Lowest Humidity	8-13%	10-15%
20 ft Winds	Down drainage 3-5 mph through 0900. Becoming up-valley/up-slope late morning 6-10 mph gusts to 15-20 mph by midday.	NNE 5-10 mph gusts 15 mph early morning. Becoming NNW 10-15 mph gusts 20-25 mph by afternoon.

East side operations:

Hot and dry as high pressure dominates over the region with temperatures rising into the mid to upper 90s by early afternoon and RHs dip into the single digits to lower teens. NE winds on the ridges will become NNW into the afternoon with increasing speeds. Low level winds will be terrain driven, but up valley flow within the Carmel Valley will likely be stronger given drainage alignment in the afternoon.

Inland Marine Layer: None.
Haines: 4

West Side Operations	Valley / Lower Slope	Ridgetop / Upper Slope
Weather	Hot, Sunny, Dry	Hot, Sunny, Dry
Temperatures (Max)	85-95	80-85
Humidity (Min)	10-15% increasing to 15-20% late afternoon	10-15%
20 ft Winds (mph)	Down drainage 3-5 mph through 0900. Becoming NNW 10-15 mph gusts 20-25 mph afternoon (onshore)	NNE 5-10 mph gusts 15 mph. Becoming NNW 10-15 mph gusts 20-25 mph afternoon.

West side operations:

Continued hot and dry with some late day cooling possible as a shallow marine layer begins to move across the area. Temperatures will warm into the mid 80s to lower 90s through midday along the lower slopes until onshore NW flow develops in the mid to late afternoon which will bring cooler temperatures and some increase in humidity. Low stratus marine layer clouds expected to remain offshore today.

Marine Layer: Less than 500 ft afternoon coast.
Haines: 4

WEATHER FORECAST for Tonight:

East & West Side Operations	Valley / Lower Slope	Ridgetop / Upper Slope
Weather	Mostly Clear. Some low stratus coast.	Mostly Clear
Temperatures (Min)	55-65	60-70
Humidity (Max)	10-20%	10-15%
20 ft Winds (mph)	West Side: NNW 10-15 gusts 20 mph. Becoming offshore NE 5-10. East Side: Down drainage flow 3-5 gusts 8-10.	NNW 10-15 mph gusts 20 mph evening becoming NE overnight 5-10 mph.
Thermal Belt: 2500-4000 ft. Marine Layer: 500 ft.		

Extended Forecast (Wed through Mon):

A cooling trend begins mid-week as the next frontal system approaches from the NW. A more consistent westerly flow develops late Thursday into Friday as the first of a few troughs pivot across the local area into the weekend. Although temperatures will cool with a deepening marine layer ahead of this first trough, RHs will remain low in the 15-20% range in the active fire area. Strong and persistent NW winds are expected this weekend as the upper level trough lingers just east of the local area. Cooler temperatures and waves of RH recovery are expected through early next week.

EAST	FIRE BEHAVIOR FORECAST		EAST
FORECAST NUMBER: 66		TYPE OF FIRE Wildfire	
FIRE NAME: Soberanes East Operational Area		OPERATIONAL PERIOD 9-27-2016 24 HOUR SHIFT	
DATE ISSUED 9-26-2016		TIME ISSUED 2030 HOURS	
UNIT CA-BEU-003422		SIGNED Mike Crook \s\ FBAN	
INPUTS			
*** Wind Summary ***			
DAY: RIDGETOP: 0600 NNE then NNW 6-10mph G20		SLOPE/VALLEY: 0600-0900 Down-valley 3-5mph... 0900-1900 Upslope/Up-valley 6-10mph G20	
NIGHT: RIDGETOP: 1800 NNW then NE 10-15mph G20		SLOPE/VALLEY: 2000-0600 4-8mph G12 Thermal Belt 2500 ft	
FIRE BEHAVIOR			
GENERAL			
<u>LOCAL THRESHOLDS – WATCH OUTS</u>			
Combinations of any of these threshold factors can greatly increase fire behavior:			
Thresholds:		20' wind Over 7mph	RH Less Than 17%
		Temperatures Over 98°	10hr fuel Less than 6%
Forecasted	Ridges	5-10mph	10-14%
	Valleys	6-10mph	8-13%
		90°	4-6%
		100°	3-5%
Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant.			
Probability of ignition : Day: Shaded 70% Unshaded 90%			
Night: 60%			
SPECIFIC			
<u>BRANCH III, IV</u>			
Another cut and paste day. Slightly less wind today than yesterday, otherwise very hot and dry. The potential exists for large fire growth, but the probability is still low. More heat came to life yesterday and that trend will continue into today. Expect the areas around Church Ranch to continue to have active fire behavior with rapid runs. It is possible to get a plume if enough intensity builds. The areas in DIV M and DIV CC will continue to creep and smolder with additional smokes puffing up.			
Tonight will again be dry and warm, especially in and above the thermal belt. Humidity will remain in the teens, possibly reaching 20% in the valleys. Active fire spread is likely in the Church Ranch area through the night. Fire will continue to creep and smolder elsewhere with the occasional flare up.			
AIR OPERATIONS			
VFR conditions expected through the operational period.			
SAFETY			
Common denominators on tragedy fires: Fires that look innocent before flare-ups or blow-ups. In some cases, tragedies occur in the mop-up stage.

Soberanes Fire – Safety Message

INCIDENT #CA-BEU-003422

DATE: 9-27/28-16 TIME: 0700-0700 Day/Night

Hazard Trees

Situational Awareness: Survey your work area for hazard trees (green or black) early in the shift. The longer an area has been burned increases probability for undermined trees.

Flag, Avoid and Notify: Flag any identified hazard trees and notify your supervisor and any potentially impacted fire personnel.

Post Lookouts to help secure high risk areas.

Be alert for changing conditions: Wind increases the hazard. Be aware of local diurnal wind patterns. Avoid working under burned trees if winds increase appreciably.

Make a plan: Make your plan to reposition to a more secure area if wind conditions dictate **PRIOR** to the need arising. Don't wait until the last minute to execute the plan.

Beware of Rolling Material

- Rolling logs, rocks and other debris from above can cause serious impact injury to firefighters.
- Maintain lookouts for rolling material.
- Make sure to call out any rocks or logs that start rolling downhill.
- Avoid creek bottoms beneath the fire if possible.
- Rollout can ignite fuel across the line cutting off your escape route.
- Be aware of crews working above and below you, especially on steep terrain.

Bees and Yellow Jackets

- A lot of bees and yellow jackets are out on the line and in camp.
- Make sure you know who is allergic to bees. If they are, do they have a current epi pen.
- Monitor anyone who has been stung by a bee, even if they are not allergic because anyone can have an allergic reaction.
- Flag off known areas of bee hives and notify others working in the area.
- Insect repellent doesn't affect stinging insects.
- Avoidance and awareness are keys to not being stung.
- Chainsaws can provoke the bees and sometimes cause them to swarm.

Hydration and Heat Stress

- **Drink water before, during and after shifts**
- Carry up to 6 quarts to drink while on the line.
- Drink three quarts of water for each quart of electrolyte replacement.
- Be alert for signs of heat stress in yourself and others.
- Monitor mental status after any stumbling episodes.
- Don't dilute liquid electrolyte replacement drinks with water.
- Take "cool down breaks" as possible.

Team 4 Safety Group

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Use caution while driving on all incident roads. • Watch for other vehicles (Distracted Drivers), rocks and debris on the roadway. • Heavy local traffic on Highway 1 & Carmel Valley roads during shift changes. • Drive defensively! Expect the unexpected around every curve. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers when available. • Roads are narrow with steep drop-offs, WE'RE ARE NOT IN A HURRY. • Know that the flagging on the side of Coast Ridge road indicates a false berm/soft shoulder created by a dozer.
ALL	WEATHER AND FIRE BEHAVIOR	<ul style="list-style-type: none"> • Weather is hot and dry. Beware of increasing fire activity. • Stay hydrated. Monitor resources for heat related illness. • Watch out for increasing winds in the afternoon hours. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points. • Expect the unexpected with drought stricken fuels at critically low fuel moistures • Historical trends indicate changes in the fire environment support large fire growth.
Tassajara CC	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel involved (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 6). • Establish adequate safety zones (IRPG p.7) and escape routes. • Use Downhill Line Checklist (IRPG p. 8). • Use "Look Up, Look Down, Look Around" procedures (IRPG p. 2-3) • Utilize Risk Management Process (IRPG p.1).
ALL	MOP-UP	<ul style="list-style-type: none"> • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue, shorten shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area; what hazards exist, and how can we mitigate those hazards.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters. • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing, and know who you are working for.
ALL	AVIATION OPERATIONS	<ul style="list-style-type: none"> • Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical freq. when assigned a specific aircraft. • Use air to ground command freq. to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Maintain good separation between ground forces & water/retardant drops. • Review and Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute here on the Soberanes Fire.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber increase distance to 2.5 times the height of the tress. • Never work below or behind heavy equipment.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Ensure all personnel can identify Poison Oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
BR III IV	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Review Structure Protection; IRPG pages 12-16. • Do not commit to stay at a structure unless the area around the structure represents an adequate safety zone. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials.

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long) _____

GPS Format: WGS84 Degrees, Decimal, Minutes

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

Level of consciousness _____ Resp. _____ Pulse _ BP _____ Weight _
(alert & oriented x 1-4)

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	<i>Ground or Air Ambulance to Hosp.</i>	<i>Transport to Med Unit</i>
<i>Mechanism</i>	<i>Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area</i>	<i>Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns</i>
<i>Area Injured</i>	<i>Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint</i>	<i>Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee</i>
<i>Symptoms</i>	<i>Disoriented Chest Pain or Shortness of Breath Weak or absent radial pulse Pale, cold and sweating</i>	<i>Alert and oriented No shortness of breath Good pulses</i>

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the KX and IX reversed.

UPDATED 9/25/16

IIBMHB 2016 - PERSONNEL CHAPTER 10

AD Casuals

If casual is assigned to a different position qualification during assignment (as documented on SF-261, CTR), adjust the pay rate to the appropriate rate for that position. Note on Casual Hire Form and OF-288.

Meal Periods (Actual Hours Worked Employees)

Compensable meal periods are the exception, not the rule (5 CFR 551.411 (c) 36 and 29 CFR 785.19 (a))

Personnel assigned to the fireline may be compensated for their meal period if all of the following conditions are met:

- The fire is not controlled, and
- The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and
- The compensable meal break is approved by the supervisor at the next level and it is documented in remarks on the CTR, SF-261.

In those situations where all other incident support personnel cannot be relieved from performing work and must remain at a post of duty, a meal period may be recorded as time worked for which compensation shall be allowed and documented in remarks block on the CTR, SF-261.

For personnel in support positions, and fireline personnel after control of the fire, a meal period of at least 30 minutes must be ordered and taken for each work shift (e.g., a minimum 30 minute break for shifts of 8 hours or more). All meal periods unless justified in remarks must be shown as a 30 minute break.

Local Government responding under CFAA follow their department policy and guidelines regarding hours and meal breaks.

On-Shift Time

On-shift time includes a combination of actual work, ordered standby, and compensable travel. On-shift time has a specific start and ending time and is recorded as clock hours. Each resource is responsible for ensuring they are meeting their 2/1 Work Rest Ratio and/or getting approval in advance from their supervisor and completing a Work Rest/Mitigation form to be approved by IC.

If you have any questions for Finance please call:

HINTS AND GUIDELINES FOR EQUIPMENT MANAGEMENT

Officials responsible for ordering and/or directing the use of the equipment are responsible for ensuring the following tasks are completed on all equipment assigned to the incident.

Rental Equipment Use Record (Shift Ticket): These must be completed in proper increment (hours, miles, days, and off-shift) and turned in daily by the equipment supervisor/manager at the end of the shift. Ask contractor for a copy of their agreement to verify how their equipment is paid and if they don't have a copy then get with Equipment Time Unit in Finance at first opportunity. Sign your name and print your name and title. Indicate in the remarks where/what the assignment was for the day (ie. Initial attack, Division X, Staging)

- Hourly rate – nearest quarter hour.
- Daily rate – by calendar day except for first and last day. Post hours on shift daily.
- Mileage rate – nearest mile. Show hours on shift for person operating.

Management of the Equipment: If no longer needed place equipment off shift or identify as excess through your section chief so they can coordinate with plans and finance to ensure documents are closed out properly. Provide notice to the contractor in writing on a General Msg. Form and have contractor sign as acknowledging notification.

Document operator hours to monitor for Work/Rest compliance. DO NOT request/allow contractor to work a double shift without verifying with Finance to see if they were hired with 1 or 2 operators. If only 1 operator then there needs to be documentation on file to support a rate change to double shift approved by a section chief or above.

TIME UNDER HIRE: If a shift ticket hasn't been started prior to the equipment being assigned to you, begin the initial time from when equipment began travel to the incident. Equipment is under hire from time they began travel to incident and return to point of hire. Verify with ROSS.

Work time is when equipment is actually working, wheels are rolling or main engine is running and a responsible official has ordered the use of. Off shift is when no operator is available, equipment is broken down or is not required for an assignment.

EQUIPMENT HIRED BY THE HOUR with an operator is either on or off shift according to the agreement. For each calendar day equipment is under hire for at least 8 hrs the government will pay not less than the Minimum Daily Guarantee. If equipment is under hire for less than 8 hrs the amount earned for that day will be not less than ½ of the Minimum Daily Guarantee unless agreement specifies differently.

EQUIPMENT HIRED ON A DAILY RATE needs hours under hire recorded on the first and last day of an incident. Payment is made based upon full days or 50% of the daily rate for periods less than 8 hours, which apply only to the first and last day of an incident.

EQUIPMENT HIRED BY THE MILE needs hours under hire recorded on all days to determine the applicable minimum daily payment as well as the number of miles.

AD HIRES are to be tracked on a Crew Time Report for hours worked.

SEE ATTACHED EXAMPLES:

Human Resources Message

FIRE ASSIGNMENT STRESSORS

- **Environment** - climate, altitude, air quality, noise levels and types, new fuel types and topography, different hazards such as bees, snakes, poison oak.
- **People** - different supervisor, different co-workers, change in objectives, change in communications, working with contractors, working with other agencies, not always able to contact home.
- **Physical** - sleeping patterns and conditions, eating patterns, demands of the work, dehydration, acclimatization, change in work schedule.
- **Safety** - crew awareness, communication of hazards, exposure to new fuel types and weather patterns, lack of access to equipment and resources when needed.

S STANDBACK: Look at what's bothering you, take another approach.

T TALK: About what's bothering.

R RELAX: Exercise, take walks and/or deep breaths.

E ESCAPE: Take a break - some time off.

S SCALE DOWN: Reduce amounts of caffeine, nicotine, sugar, etc.

S SENSE OF HUMOR: Laughter is always the best medicine.

Your HR Specialists:

At Toro: Shawn Holden, (916) 215-8324,
and Cathleen Thompson HRSP(T), (707) 853-4243.

At Rana: Alan Seago, (707) 315-6537.

Soberanes Fire Trainee/Trainer Data Form

Training Specialists: John Fakehany 818.962.6465
Shawn Holden 916.215.8324
Dennis Martin 707.479.8421
Robert Rivelle 707.498.1761

- All Incident trainees, including those on Firefighting Modules, at your earliest opportunity complete this form and see the Training Specialist. Bring your taskbook and qualification card. One Training Specialist is covering Rana and Fort Hunter Liggett and a drop box has been set up for this Data Form drop off. If you're located at Molera Camp, you can drop this form off with the Training Specialist at the Training trailer. These Camps will forward your Trainee Data Form to Toro ICP.
- As you begin DEMOB at Toro ICP, close your training package. To close your training package bring:
1) A performance rating from your trainer. (ICS 225)
2) Your task book that has as many entries as possible by your Trainer.

Trainee Data

Trainee Name: _____ ICS Trainee Position: _____
Request Number (O, C, E): _____ Agency Designator (Example: CA-ANF): _____
Cell # While on Incident: _____ Date Assigned: _____

Training Records Mailed To: (Fire Chief, Training Officer)

Name: _____ Title: _____
Name of Agency/Unit: _____
Agency/Unit Address: _____
City: _____ State: _____ Zip Code: _____ Phone: _____

Trainee Prerequisites

1. Possesses valid Red Card or agency certification card? Yes No
2. Trainee has current position task book issued by home unit? Yes No
-

Trainer/Evaluator Data

Trainer / Evaluator Name: _____ ICS position on fire: _____
Home Unit: _____
City: _____ State: _____
Cell # While on Incident: _____

What do you need/want to accomplish on this incident:

Waterbaring:

6 D's of Waterbars!

- ❖ **DISTANCE:** Depending on slope and erosion potential (how much soil a hard rain will carry) the spacing **BETWEEN** the waterbars.

Gradient	Moderate Erosion Hazard Spacing (feet)	High Erosion Hazard Spacing (feet)
1% - 10%	200	150
11% - 25%	150	100
26% - 50%	100	75
>50%	75	50

- ❖ **DIAGONAL:** Dig waterbars at a 45° to 55° to help prevent them from acting as check dams and filling with sediment.
- ❖ **DIRECTION:** Direct them into the **GREEN** if possible, but make sure to follow the natural flow the water will take.
- ❖ **DIVERT:** Move the water **OFF** the fire line so that it does not erode the land.
- ❖ **DISCHARGE:** Make sure there is an **OPENING** at the end of the waterbar.
- ❖ **DISSIPATE:** Drain the water into something that will **BREAK UP ENERGY** flow such as rocks or brush or place debris to prevent erosion off of the fireline.
- ❖ **DURABLE:** Dig the trench deep enough that it will **LAST** at least until the line is revegetated (years not weeks).

Typical Water Bar
