OPERATIONAL PERIOD

WEDNESDAY, SEPTEMBER 28, 2016
0700-1900 HOURS

Maps **Fire weather** **RAWS**

INCIDENT OBJECTIVES	1. Incident Name **Soberanes**	2. Date **09/27/2016**	3. Time **2200**

4. Operational Period

WEDNESDAY September 28, 2016 0700 - 1900 Hours

5. General Control Objectives for the Incident (include alternatives)

Management Objectives

- Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations.
- Reduce firefighter exposure by only engaging fire assignments with the highest probability of success.
- Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests.
- Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations.
- Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information.
- Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy.
- Manage incident costs effectively for the values at risk through regular and ongoing cost analysis.

Control Objectives

Keep Fire

- East of the Coast Ridge Road.
- North of Nacimiento-Fergusson Road.
- West of Carmel Valley and Reliz Canyon.
- South of current containment lines in Branches II and III.

6. Weather Forecast for Operational Period

- Temperatures will cool slightly today as the marine layer begins to deepen but it will still be rather warm over much of the fire area. Relative humidity will continue to be low, falling into the mid teens to upper single digits in the afternoon. Strong thermal belts will form again overnight at mid-slope and higher. Light SE winds will turn SW and increase in the afternoon.

7. General Safety Message

- Maintain focus on the task at hand. Give clear briefings, and conduct daily after action reviews to continually improve your situational awareness.

Soberanes Fire Weather Forecast

Forecast information & SPOT forecasts

FORECAST NO: 67

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Wed - 0700 Thu
SHIFT DATE: Wednesday Sept 28, 2016

UNIT: CA-BEU/LPF MRD
SIGNED: Julia Ruthford

TIME AND DATE
FORECAST ISSUED: 2000 9/27/16

Incident Meteorologists
Julia Ruthford (Toro) – Cell 971-221-6728
Kurt Van Speybroeck (Rana) – Cell 817-771-0741

Weather Discussion: Onshore flow will gradually deepen the marine layer along the coast today as the upper level ridge begins to weaken and shift east. For the fire area, the impacts of the deepening marine layer will be minimal today with temperatures cooling slightly but conditions still remaining warm and dry. Winds along the coast and on ridges will begin the day relatively light and out of the south to southeast then shift to the southwest late morning and increase through the afternoon. Ridge winds will turn northwesterly by late afternoon or early evening. In lower, more protected drainages terrain driven slope and valley circulations will dominate.

WEATHER FORECAST for Today:

East Side Operations	Valley / Lower Slope	Ridgetop / Upper Slope
Weather	Hot, Sunny, Dry.	Sunny. Continued Warm and Dry.
High Temperatures	90-100	80-90
Lowest Humidity	8-11%	10-15%
20 ft Winds	Down drainage 3-5 mph through 0900. Becoming up-valley/up-slope 4 to 7 mph late morning then 8-10 mph gusts to 15-20 mph in the afternoon.	SSE 5-10 mph early…becoming SW 10-15 mph by late morning and gusting to 20-25 mph in the afternoon. Winds becoming NW late afternoon or early evening.

Inland Marine Layer: None. **Haines:** 4

West Side Operations	Valley / Lower Slope	Ridgetop / Upper Slope
Weather	Hot, Sunny, Dry.	Sunny. Continued Warm and Dry.
High Temperatures	85-90	80-85
Lowest Humidity	10-14% increasing to 15 to 20% in the afternoon.	14-17%
20 ft Winds	Down drainage 3-5 mph until 0900. Becoming SW 10-15 mph with gusts 20-25 mph afternoon turning NW.	SE 5-10 mph early. Becoming SW 10-15 mph by mid-morning with gusts 20-25 mph developing around noon. Winds turning NW in the afternoon.

Marine Layer: Around 500 ft in the morning increasing to 1000 ft in the afternoon. **Haines:** 4

WEATHER FORECAST for Tonight: Mostly clear with some low stratus along the coast with the marine layer around 1000 ft. Minimum temperatures 55 to 60 except around 70 along ridges. RHs increasing to 30 to 45% at lower elevations…highest in west side valleys, but remaining or falling back to around 15% from mid-slope to ridges overnight. West wind 10 to 15 mph along ridges in the evening shifting SE 5 to 7 mph overnight. Terrain driven down-slope/down-valley winds 4 – 8 mph lower down.

EXTENDED FORECAST for Thursday through Tuesday: The marine layer will gradually deepen as an upper trough approaches from the northwest gradually cooling temperatures. Increasing humidities will begin influencing the lowest elevations of the fire area Thursday night, although relative humidities mid slope and higher will remain drier in the 15 to 20% range. Winds will become more consistently west to southwest Thursday then turn northwesterly and increase in strength as a dry cold front pushes across the area late in the day Friday. Breezy northwest winds with cooler temperatures and higher relative humidities are expected to continue through this weekend as a series of upper level troughs swing through the Pacific Northwest. Conditions will begin to gradually warm again around Tuesday as an upper level ridge begins building over the Pacific to west of California.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 66	**TYPE OF FIRE** Wildfire

INPUTS

***** Wind Summary *****

EAST **RIDGETOP**: Early SSE 5-10 becoming SW 10-15 Late morning G20-25 in the afternoon.

SLOPE/VALLEY: Down drainage 3-5 through 0800 Becoming up valley/up slope 4-7 Late morning 8-10 G15-20 in the afternoon.

WEST **RIDGETOP**: Early SE 5-10 becoming SW 10-15 By midmorning with G20-25 developing around noon

SLOPE/VALLEY: Down drainage 3-5 through 0900 Becoming SW 10-15 G20-25 in the afternoon.

FIRE BEHAVIOR

GENERAL

LOCAL THRESHOLDS – WATCH OUTS

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:		20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
Forecasted	Ridges	10-15mph	10-15%	90°	4-5%
	Valleys	8-10mph	8-11%	100°	4-6%

Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant.

Probability of ignition: Day: Shaded 60% Unshaded 90%

Night: 60%

SPECIFIC

BRANCH III, IV

Slightly cooler, but still very dry conditions today. Expect to get smokes popping up from isolated heat within the fire perimeter. The potential is still there for large fire growth, but the probability is low due to minimal active fire perimeter.

West Operational area may have some creeping and smoldering within Higgins Creek area where there is still heat.

East Operational area will continue to have smoke pop up where there is heat. Expect creeping and smoldering where there is still scattered heat. Within the Church Ranch area there will be active fire behavior within the fire perimeter between Pine Valley and Tasajara Drainage where the fire continues to burn. There will likely be upslope rapid runs. It is possible for plumes to develop, but they will be short lived. Spotting distances in this area >1/10th mile.

AIR OPERATIONS

VFR conditions expected through the operational period.

Initial Attack Assistance	Varies	0800	Ranch HB	As requested	Will be requested through LP Dispatch.

SOBERANES SAFETY MESSAGE

INCIDENT: Soberanes #CA-BEU-003442 | DATE: 9/28/16 Time: 0700-1900

HAZARD AND RISK

What's the Difference?

HAZARD: is any condition that may cause injury, damage or illness.

RISK: is the combination of severity of injury and the probability of an accident or mishap occurring.

*Think of a leaning snag. That is the hazard. It doesn't present any risk until people or equipment enter the area. What are the current hazards in your work area today? How are you managing **YOUR** risk?*

Stop, Think, Talk…Act

"Everyone goes home safely every day."- T. Tidwell

MY SAFETY

An important aspect of risk management is an individual's responsibility for one's own health & safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety.

- Remain fit for duty.
- Utilize personal protective equipment.
- Follow safe work practices.
- Ensure instructions are clearly understood.
- Maintain situational awareness at all times.

Do not expect someone else to be responsible for your safety. Take it upon yourself to make "My Safety" your number one priority.

DEMOB

- Ensure that you have enough rest to satisfy the 2-to-1 work/rest ratio.
- No single driver will drive more than 10 hours (behind the wheel) within a duty day.
- Multiple drivers in a single vehicle may drive up to the duty-day limitation, provided no driver exceeds the individual driving time limitation of 10 hours.
- A driver shall only drive if they have had 8 consecutive hours off duty before beginning shift.
- If you are tired, stop and take a short break.
- A passenger should remain awake during the hours of darkness to increase the safety factor.
- Before departing, take a minute to ensure the windshield is clean and that the floor of the vehicle is free of possible rolling materials.

Prepared by: Team 4 Safety Group

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	• Use caution while driving on all incident roads. • **Drive defensively!** Expect the unexpected around every curve. • Watch for other vehicles, distracted drivers, rocks and debris on the roadway. • Beware of heavy local traffic on Carmel Valley Road, Hwy. 68 and Hwy. 1. • Drive with headlights on; wear seatbelts, use chock blocks, keep windshields clean, look before backing; and use backers when available. • **Roads are narrow with steep drop-offs.** • Flagging on the side of North Coast Ridge road indicates a false berm or soft shoulder created by heavy equipment.
ALL	WEATHER AND FIRE BEHAVIOR	• **Weather remains hot and dry. Beware of the potential for Extreme Fire Behavior.** • **Stay hydrated. Monitor resources for heat related illness.** • Watch out for increased winds in the afternoon hours. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points. • Expect the unexpected with drought stricken fuels at critically low fuel moistures. • **Historical trends indicate changes in the fire environment support large fire growth.**
Tassajara CC	LINE CONSTRUCTION	• Conduct thorough briefings for all personnel involved (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 6). • Establish adequate safety zones (IRPG p.7) and escape routes. • Use Downhill Line Checklist (IRPG p. 8). • Use "Look Up, Look Down, Look Around" procedures (IRPG p. 2-3) • Utilize Risk Management Process (IRPG p.1).
ALL	MOP-UP	• Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue, adjust shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area. Assess the hazards and implement appropriate mitigations.
ALL	COMMUNICATIONS	• Share your Situational Awareness with those who also have a need. • **Radio Communications may be poor in some areas. Use human repeaters.** • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing. • Know who you are working for.
ALL	AVIATION OPERATIONS	• Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical frequency when assigned a specific aircraft. • Use air to ground command frequency to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Maintain good separation between ground forces & water/retardant drops. • Review and follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute here on the Soberanes Fire.
ALL	HEAVY EQUIPMENT OPERATIONS	• Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber, increase distance to 2.5 times the height of the tress. • Never work below or behind heavy equipment.
ALL	ENVIRONMENTAL HAZARDS	• Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Ensure all personnel can identify poison oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
BR III IV	STRUCTURE PROTECTION	• Review Structure Protection; IRPG pages 12-16. • Do not commit to stay at a structure unless the area around the structure represents an adequate safety zone. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials.

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.

Division Supervisor/Operations contacts Communication:

- Division Supervisor/Operations to use **"injury or incident communication protocol"** on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications will contact the Medical Unit Leader on Command channel.
- Medical Unit Leader will:
  1. Have communications dispatch ground/air transport resources
  2. Notify receiving hospital of injury status.
  3. Develop primary and contingency transport plan
  4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

Contact Communications with patient complaint/condition and location, via LOGs Net

- Medical Unit contacts:
  - Safety
  - Logistics
  - Operations
- Medical Unit Leader will:
  1. Contact Communications to dispatch ground/air transport resources
  2. Notify receiving hospital of injury status
  3. Develop primary and contingency transport plan

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long)_____
GPS Format: WGS84 Degrees, Decimal, Minutes
Situation_____

Any special equipment required_____

Number of injured _____ Type of injuries_____

Closest pick up point (DP, Helispot)_____

Level of consciousness _____Resp._____ Pulse _ BP _____Weight _
(alert & oriented x 1-4)

Injury_____Agency (No Names)_____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	*Transport to Med Unit*
Mechanism	*Hit by a falling tree or large branch* *Fall of 10' or more* Insect bite with shortness of breath *Signs of heat stroke (hot, dry, disoriented)* Burn Injury greater than 1% body area	*Minor dehydration* Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	*Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis* *Any Arm or Leg fracture above the Joint*	*Minor blunt trauma* Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	*Disoriented* *Chest Pain or Shortness of Breath* Weak or absent radial pulse Pale, cold and sweating	*Alert and oriented* No shortness of breath Good pulses

If air or ground ambulance is DELAYED:
Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.
The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

Prepared By (Communications Unit)

Sal Bonilla Jr. COML CIIMT 4 PHONE 831-484-9674

Incident Location

5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

Human Resources Message

THOUGHT FOR THE DAY

FATIGUE

Fatigue affects your physical and emotional state! It can have a negative impact on your concentration, your conduct, and speech.

This can have all sorts of consequences so please make an effort to rest up and get back to a normal productive self!

"In matters of style, swim with the current; in matters of principle, stand like a rock." - Thomas Jefferson

Your HR Specialists:
At Toro: Shawn Holden, (916) 215-8324,
and Cathleen Thompson HRSP(T), (707) 853-4243.
At Rana: Alan Seago, (707) 315-6537.

Soberanes Fire
Trainee/Trainer Data Form

Training Specialists: John Fakehany 818.962.6465
Dennis Martin 707.479.8421
Robert Rivelle 707.498.1761

➢ All Incident trainees, including those on Firefighting Modules, at your earliest opportunity complete this form and see the Training Specialist. Bring your taskbook and qualification card. One Training Specialist is covering Rana and Fort Hunter Liggett and a drop box has been set up for this Data Form drop off. These Camps will forward your Trainee Data Form to Toro ICP.

➢ As you begin DEMOB at Toro ICP, close your training package. To close your training package bring:

1) A performance rating from your trainer. (ICS 225)
2) Your task book that has as many entries as possible by your Trainer.

Trainee Data
Trainee Name: _____ ICS Trainee Position: _____

Request Number (O, C, E):_____ Agency Designator (Example: CA-ANF):_____

Cell # While on Incident: _____ Date Assigned: _____

Training Records Mailed To: (Fire Chief, Training Officer)
Name: _____ Title_____

Name of Agency/Unit: _____

Agency/Unit Address: _____

City: _____ State: _____ Zip Code: _____ Phone: _____

Trainee Prerequisites
1. Possesses valid Red Card or agency certification card? ___Yes ___No
2. Trainee has current position task book issued by home unit? ___Yes ___No

Trainer/Evaluator Data
Trainer / Evaluator Name: _____ ICS position on fire: _____

Home Unit:_____

City: _____ State:_____

Cell # While on Incident: _____
What do you need/want to accomplish on this incident:
