Management Objectives

- Provide for the safety of all responders and the public by utilizing national Risk Management Standards and the implementation of appropriate mitigations.
- Reduce firefighter exposure by only engaging fire assignments with the highest probability of success.
- Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests.
- Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations.
- Maintain and enhance community, County, State, National Forest and stakeholder relationships through accurate and timely dissemination of information.
- Assess and implement suppression repair needs, where appropriate in coordination with the Resource Advisor following agency policy.
- Manage incident costs effectively for the values at risk through regular and ongoing cost analysis.

Control Objectives

Keep the fire;

- East of Coast Ridge Road.
- North of Nacimiento-Fergusson Road.
- West of Carmel Valley and Reliz Canyon.
- South of Carmel Valley Road.

Soberanes Fire Weather Forecast

FORECAST NO: 71

NAME OF FIRE: Soberanes

Forecast Information & SPOT Forecasts

PREDICTION FOR: 0700 Sun - 0700 Mon
SHIFT DATE: Sunday Oct 2, 2016

TIME AND DATE FORECAST ISSUED: 1900 10/2/16

UNIT: CA-BEU/LPF MRD
SIGNED: Julia Ruthford

Incident Meteorologists
Kurt Van Speybroeck (Rana Camp) – 831-659-0290
Jason Clapp (Toro ICP) - Cell 530-383-4839

Weather Discussion: A strong upper level trough swinging inland well to the north will bring increasing clouds and winds. The associated cold front will cross the fire area around noon with northwest winds increasing in the afternoon and evening. Miller Canyon, Pine Valley, Tassajara Creek and other NW to SE aligned valleys will be favorable for channeling the stronger northwesterly ridge level winds down to lower elevations within these valleys. Breezy winds will continue through the night however humidities will increase rapidly as temperatures cool sharply behind the front. Up-slope clouds will form along ridges overnight with mist and light drizzle possible but accumulating measurable precipitation unlikely.

WEATHER FORECAST for Today:

	Coastal Valleys / Lower Slopes	Ridgetops / Upper Slope	Inland Valleys / Lower Slopes
Weather	Clouds increasing through the morning. Windy in the afternoon.	Mostly sunny with clouds increasing through the morning. Becoming windy in the afternoon.	Sunny early…then increasing clouds until the frontal passage midday. Partly cloudy and windy in the afternoon.
Highs	In the upper 60s	In the lower 60s	In the lower 70s
Min RHs	30 - 40%	Around 30%	25 to 30%
20 ft Winds	North wind 10-15 mph with gusts to 20 mph in the morning becoming NW 20 to 30 mph in the afternoon.	NNW to NE wind 10-15 mph with gusts to 20 mph in the morning becoming NW 20 to 35 mph in the afternoon.	Upslope winds 3-5 mph becoming up-valley 5-8 mph with gusts 10-15 mph in the afternoon. E-NE winds 15-20 mph through lower elevations in Arroyo Seco and Willow Creek. ***NW winds 10 to 15 mph in NW to SE drainages such as Miller Canyon, Pine Valley and Tassajara Creek increasing to 20 to 30 mph in the afternoon.***

Marine Layer: Cooler and moister throughout, but no well-defined marine layer. **Haines:** 3

WEATHER FORECAST for Tonight: Partly to mostly cloudy and colder. Up-slope flow causing clouds to form along ridges and west facing slopes near the coast. Lows in the mid-30s ridges and lower to mid-40s valleys. Max RHs 80% to 90% valleys and near 100% ridges. Northwest winds 20 to 30 mph with gusts 35 to 40 mph in the evening…gradually diminishing overnight. Areas of mist and light drizzle possible along ridges and coastal slopes however, accumulating precipitation is not expected over the fire area.

OUTLOOK for Monday: A second frontal system moving through on Monday will bring a chance of light rain in the afternoon or evening. Any precipitation that does fall will be light with only a couple hundredths of an inch of rain expected. North winds 15 to 20 mph with gusts to 25 mph in the morning will turn northwest in the afternoon and then southwest in the evening and diminish overnight. Highs in the mid-60s ridges to mid-70s valleys. Minimum RHs 40 to 50%. Lows in the upper 30s on ridges to mid to upper 40s in valleys. Nighttime RHs around 80%.

EXTENDED FORECAST for Tuesday through Friday: After diminishing somewhat Monday night, winds will increase again out of the N to NW Tuesday and then become northeasterly Wednesday with conditions warming and drying through the end of the week.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 70	**TYPE OF FIRE** Wildfire
FIRE NAME: Soberanes East/West Operational Area	**OPERATIONAL PERIOD** 10-2-2016 24 HOUR SHIFT
DATE ISSUED 10-1-2016	**TIME ISSUED** 1700HOURS

INPUTS

******Review Weather Forecast for details******

Gusty northerly winds expected throughout the day. RH values will slowly increase into the evening hours as a cold front approaches.

FIRE BEHAVIOR

GENERAL

Increasing cooler temperatures and higher RH values will assist in reinforcing control lines. Surface fuels remain extremely dry due to drought conditions and will take time to fully recover. Areas that appeared to be dormant for several weeks will continue to show themselves throughout the shift. The potential is still there for fire growth, but the probability will diminish as RH values increase

Optimal Alignment - Peak Burning Conditions

POI = 70 - 80% **Spotting Distance**= up to 1/2 Mi. **ROS** 125 ch/h **Fine Dead Fuel Moisture** = 5%

LOCAL THRESHOLDS – WATCH OUTS

Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:	20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%

SPECIFIC

- West Operational area may have some creeping and smoldering.
- East Operational area may have some creeping and smoldering.
- The possibility for active fire behavior in the Pine Valley and Tassajara Drainage will remain through the burning period.
- Active surface fire and occasional runs remain possible in the Ventana Cone areal.

AIR OPERATIONS

Gusty winds will create turbulent flight conditions.

SAFETY

Careful consideration should be given when working around fire weakened timber and in areas where unburned fuels exists between you and the main fire.

Remember, you are the primary value at risk on this fire.

Soberanes Fire – Safety Message

INCIDENT #CA-BEU-003422	DATE:**10.2.16**	TIME: **0700-1900**

Major Hazards

- ***Traffic Hazards and Driving***
- ***Weather and Fire Behavior***
- ***Line Construction in Tassajara/Div.CC***
- ***Hazard Trees in Fire area and Weakened Trees in both Toro and Rana camps***
- ***Hydration and Fatigue:*** Hydration starts PRIOR to the beginning of shift, drink a 2:1 ratio of water to sports drinks. Monitor fatigue levels, and do not exceed the 2:1 work rest ratio.
- ***Working around Heavy Equipment in the suppression repair groups***

Dutch Creek Protocol

The tragic death of Andrew Palmer on the Iron Complex fire in northern California has lead to a safer work environment for wildland firefighters. Andrew was injured by a falling tree and bled to death before he was transported to the Redding, California airport three hours and 20 minutes after the accident. As a direct result of his death the implementation of the 9 Line reporting process among other things has been implemented.

Everyone needs to think about

- What will we do if someone gets hurt?
- How will we get them out of here?
- How long will it take to get them to the hospital?

It amazes me how often I find myself thinking how I am going to accomplish these issues. It all looks good on paper, but in reality not only does the team policy need to be dialed in but the personnel on the line must be ready with quality plans to get this person off the line. Remember air support may be grounded for a number of reasons. Getting someone off the hill is a huge undertaking that could take multiple crews and many hours to carry out. The only way that the victim will have a chance is for the crews to be prepared with a plan in place, prior to emergency. Please take the time to discuss this throughout the day as you move through your divisions.

If there is and injury, getting to this point in a rescue effort is dependent on your preparation. If you are not prepared with plans and options the golden hour will be difficult to meet if not impossible. Train like you fight and fight like you train.

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	• Use caution while driving on all incident roads. • **Drive defensively!** Expect the unexpected around every curve. • Watch for other vehicles, distracted drivers, rocks and debris on the roadway. • Beware of heavy local traffic on Carmel Valley Road, Hwy. 68 and Hwy. 1. • Drive with headlights on; wear seatbelts, use chock blocks, keep windshields clean, look before backing; and use backers when available. • **Roads are narrow with steep drop-offs.** • Flagging on the side of North Coast Ridge road indicates a false berm or soft shoulder created by heavy equipment.
ALL	WEATHER AND FIRE BEHAVIOR	• **With the increasing winds there is potential for Extreme Fire Behavior.** • **With the wind, look for more issues with hazard trees.** • **Stay hydrated. Monitor resources for heat related illness.** • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points. • Expect the unexpected with drought stricken fuels at critically low fuel moistures. • **Historical trends indicate changes in the fire environment support large fire growth.**
Tassajara CC	LINE CONSTRUCTION	• Conduct thorough briefings for all personnel involved (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 7). • Establish adequate safety zones (IRPG p.8) and escape routes. • Use Downhill Line Checklist (IRPG p. 9). • Use "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4) • Utilize Risk Management Process (IRPG p.1).
ALL	MOP-UP	• Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; adjust shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Survey your work area. Assess the hazards and implement appropriate mitigations.
ALL	COMMUNICATIONS	• Share your Situational Awareness with those who also have a need. • **Radio Communications may be poor in some areas. Use human repeaters.** • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing. • Know who you are working for.
ALL	AVIATION OPERATIONS	• Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical frequency when assigned a specific aircraft. • Use air to ground command frequency to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Maintain good separation between ground forces & water/retardant drops. • Review and follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute here on the Soberanes Fire.
ALL	HEAVY EQUIPMENT OPERATIONS	• Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber, increase distance to 2.5 times the height of the tress. • Never work below or behind heavy equipment.
ALL	ENVIRONMENTAL HAZARDS	• Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Ensure all personnel can identify poison oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
ALL	STRUCTURE PROTECTION	• Review Structure Protection; IRPG pages 12-16. • Do not commit to stay at a structure unless the area around the structure represents an adequate safety zone. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials.

Incident Location
5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

Human Resource Message

ATTITUDE

Attitude is more important than facts.

It is more important than the past, than education, than money, than circumstances, than failures, than successes, than what other people think or say or do.

It is more important than appearance, giftedness or skill.

It will make or break a company...a church...a home.

The remarkable thing is we have choice every day regarding the attitude we will embrace for that day.

We cannot change the inevitable.

The only thing we can do is to play on the one string we have, and that is our attitude.

If I am not for myself, who will be for me? If I am not for others, what am I? And if not now, when? *-Hillel-*
