Soberanes Fire Weather Forecast

Forecast Information & SPOT Forecasts

FORECAST NO: 74

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Wed - 0700 Thu
SHIFT DATE: Wednesday Oct 5 2016

UNIT: CA-BEU/LPF MRD
SIGNED: Jason Clapp

TIME AND DATE

FORECAST ISSUED: 1900 10/4/16

Incident Meteorologists

Shawn Weagle (Rana Camp) – 503-956-7504
Jason Clapp (Toro ICP) – 530-383-4839

Weather Discussion: Lingering morning clouds on north slopes and ridges of north portion of fire will likely break up by late morning, but still yield a partly cloudy sky over fire into early afternoon with warmer temperatures. Moderate N to NE general winds will mainly affect ridgetop areas with drier conditions through the work week with terrain-driven winds expected to prevail elsewhere. Today will begin a warming and drying trend that will push temperatures above normal Thursday through the weekend. **Expect poor to no ridgetop/upper slope RH recovery the next few nights.**

WEATHER FORECAST for Today:

	Ridgetops / Upper Slope	Valleys / Lower Slopes
Weather	Partly cloudy AM, then mostly sunny	Mostly sunny
Highs	63 – 70 (up 6-8)	73 – 79 (up 6-8)
Min RHs	15 – 25% (down 20-35%)	15 – 25% (down 20%)
20 ft Winds	N-NE 10-14 mph gusting 20 mph. Coastal ridge shifting briefly SW and light in afternoon.	Upslope winds 3-5 mph becoming up-valley 5-8 mph with afternoon gusts 10-15 mph. E-NE winds 10-15 gusting 20 mph lower elevations in Arroyo Seco and Willow Creek.
	Coastal/Molera – NNW 5-9 mph...afternoon increasing 10-15 mph gusting 20-25 mph	

Marine Layer: No marine layer, but morning ridgetop clouds over northern fire.

Haines: 4

WEATHER FORECAST for Tonight: Mainly clear; becoming much drier on ridgetops with little to no RH recovery. RH lowering to 15-20% upper slopes and ridges...otherwise, Max RH 40-60%. Lows mainly 40-50. N-NE winds 6-10 mph with gusts 15 mph, becoming NE 10-15 mph with gusts 20-25 mph ridges and coastal gaps. Otherwise, standard drainage winds.

OUTLOOK for Thursday:

Weather	Sunny and drier as ridge builds into area	
Highs/Lows	72-77 ridges...79-85 valleys	50-55 ridges...45-50 valleys
Min/Max %	Min... 12 to 20% (ridges similar day/night).	Max... 30-40% valleys
20 ft Winds	Winds NE 10-13 mph with gusts 15-18 mph ridges and coastal gaps, becoming SW 5-8 mph gusting to 15 mph in the afternoon on coastal ridge. Otherwise, expect increasing upslope/upcanyon winds 4-8 mph with gusts to 15 mph.	
	Coastal/Molera – NNW 5-8 mph...afternoon increasing 10 mph gusting 15 mph	

EXTENDED FORECAST for Friday through Monday: Warming and drying trend continues through the upcoming weekend with inland valley temperatures likely reaching into the upper 80s to lower 90s. RH will likely get back into the 10-18% range for inland valleys, with poor humidity recovery above thermal belts due to a strengthening subsidence inversion. Light to moderate NE general winds during the night and morning hours through weekend, tending up-slope or SW each afternoon. Early next week will trend cooler with more moist onshore with an approaching upper wave from the west.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 73	TYPE OF FIRE Wildfire
FIRE NAME: Soberanes Fire	OPERATIONAL PERIOD 10-5-2016 24 HOUR SHIFT
DATE ISSUED 10-4-2016	TIME ISSUED 1700 HOURS
UNIT CA-BEU-003422	SIGNED Scott Cones FBAN 

INPUTS

*****Review Weather Forecast for details*****

Warmer with gusty northerly winds expected throughout the day. Predicted RH values between 25% and 35%.

FIRE BEHAVIOR

GENERAL

The probability of active fire spread today is slightly higher than yesterday, but still unlikely. Increasing temps and decreasing RH values will begin to bring the area back into more favorable burning conditions later in the week. Live fuel moistures remain extremely low due to drought conditions and will take time to fully recover.

Optimal Alignment - Peak Burning Conditions

POI = 65% Spotting Distance= up to 1/4. ROS 30-40 ch/h Fine Dead Fuel Moisture = 5 %

LOCAL THRESHOLDS – WATCH OUTS

Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:	20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
--------------------	-----------------------	---------------------	--------------------------	---------------------------

SPECIFIC

- Some creeping and smoldering in the duff and leaf litter along unlined portions of the fire. Heavy fuels will retain heat and may be problematic where close to the fires edge. Expect an increase in the activity of the fire as fuels become available to burn.
- Specific areas of concern include Miller, Pine, and Tassajara canyons due to lack of containment. Expect continued smoke production from the Ventanta Cone area.

AIR OPERATIONS

Expect morning clouds diminishing by mid-morning. Gusty afternoon winds expected over the ridges.

SAFETY

Know what your fire is doing at all times. Keep alert to changing conditions as the weather begins to warm and dry.

AIR OPERATIONS SUMMARY
ICS 220

Prepared By: John Crotty
 AOB

Prepared Date: 10/04/2016
 Prepared Time: 1630

1. INCIDENT NAME: Soberanes Fire	START TIME: 0700	END TIME: 2100	SUNRISE: 0707	SUNSET: 1844
2. OPS PERIOD DATE: 10/05/2016				

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): Track all dipsite locations/number of dips/gallons taken. Track all drop locations/number of drops/gallons dropped. All GPS data to be collected in DEGREES, DECIMAL MINUTES format.
 AVOID Aerial Application of Retardant/Foam/Agent within 300' of Waterways, Bodies of Water, etc. If Retardant/Foam/Agent is dropped within these areas immediately notify the AOB and provide the following information: Lat/Long, estimated number of gallons and a map detailing the area.
Fly with Transponder 1255.
 Air Attack Briefing 132.0250 AM (A-10002)
 For scheduling recon flights contact Ranch HB communications @ 925-407-6353
 All rotor wing aircraft will be on the ground at 1900.
 TUSI Advisory 126.200 for restricted airspace.

4. Helibase Information:
 Name: Ranch Helibase

Provide Tactical Aerial Support

Bucket support requested by Ops, Branch, Division or Air Attack

Type 2 or Type 3 Helicopter as requested

Type 2 or Type 3 Helicopter as requested

Request through ICP Communications & MEDL on Command Repeater. Give location: lat/long if known. Check Medical plan/IAP.

As requested/7AC(3SH) IR mapping.

Request through Air Attack via Initial Air/Ground. Give location and ground contact.

Aircraft to be available for IA within TFR. IA missions within TFR are requested thru OPS or Air Attack. Notify LP Dispatch

Will be requested through LP Dispatch.

Soberanes Fire – Safety Message

INCIDENT #CA-BEU-003422

DATE: 10.5.16

TIME: 0700-1900

Major Hazards

- *Traffic Hazards and Driving*
- *Complacency*
- *Line Construction in Tassajara/Div.CC*
- *Hazard Trees in Fire area and Weakened Trees in both Toro and Rana camps*
- *Working around Heavy Equipment in the suppression repair groups*

COMPLACENCY

A feeling of being satisfied with how things are and not wanting to try to make them better.

At this stage of the fire it's important to stay energized, motivated and focused. It's been a long season and a long fire assignment for many of you. So before you go out today, think of the other people in your life that are counting on you to come home soon and enjoy life with them. Stay alert and take care of each other today and every day.

6 Minutes for Safety

A popular mountaineering test divides the alpinists' hazards into two distinct types: subjective, which one has direct control over (e.g., condition of the equipment, the decision to turn back) and objective hazards which are inherent to the alpine environment (e.g., avalanches, rock fall).

Objective hazards are a natural part of the environment. They cannot be eliminated and either one must not go into the environment where they exist or adhere to a procedure where safety from the hazard is assured.

Similarly, the wildland firefighter's hazards are either subjective or objective. Examples of subjective hazards would be working below a dozer constructing fireline or the use of improper techniques while felling a tree. The fireline supervisor has direct control over these types of hazards.

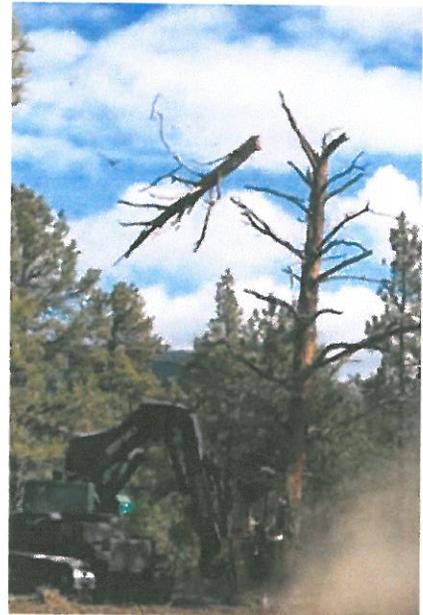

The wildland fire environment has four basic objective hazards; lightning, fire-weakened timber (standing and lying), rolling rocks and entrapment by running fires. When these hazards exist the options are to not enter the environment or to adhere to a safe procedure.

Rick Bertram SOF2 805-471-8076

Tom Zeulner SOF2 805-440-5252

Ron Garcia SOF2 559-392-1045

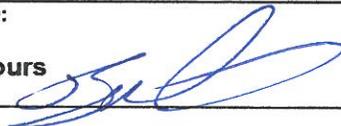

Please be alert around all the heavy equipment in your divisions.

INCIDENT RISK ANALYSIS

SOBERANES FIRE CA-BEU-003422

(ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Use caution while driving on all incident roads, nightly moisture/fog may create slick roads • Drive defensively! Expect the unexpected around every curve. • Watch for other vehicles, distracted drivers, rocks and debris on the roadway. • Beware of heavy local traffic on Carmel Valley Road, Hwy. 68 and Hwy. 1. • Roads are narrow with steep drop-offs. • Flagging on the side of North Coast Ridge road indicates a false berm or soft shoulder created by heavy equipment.
ALL	WEATHER AND FIRE BEHAVIOR	<ul style="list-style-type: none"> • With the increasing winds there is potential for Extreme Fire Behavior. • Winds will test weakened trees, stay alert around snags • Stay hydrated. Monitor resources for heat related illness. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points. • Expect the unexpected with drought stricken fuels at critically low fuel moistures. • Historical trends indicate changes in the fire environment support large fire growth.
Tassajara CC	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Conduct thorough briefings for all personnel involved (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 7). • Establish adequate safety zones (IRPG p.8) and escape routes. • Use Downhill Line Checklist (IRPG p. 9). • Use "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4) • Utilize Risk Management Process (IRPG p.1).
ALL	MOP-UP	<ul style="list-style-type: none"> • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; adjust shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4).
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters. • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing. • Know who you are working for.
ALL	AVIATION OPERATIONS	<ul style="list-style-type: none"> • Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical frequency when assigned a specific aircraft. • Use air to ground command frequency to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Review and follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber, increase distance to 2.5 times the height of the tree. • Never work below or behind heavy equipment.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Ensure all personnel can identify poison oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
ALL	Spike Camps	<ul style="list-style-type: none"> • Watch for dead or drought damaged trees in sleeping areas • Maintain hygiene to avoid camp crud • Sleep only in designated areas • Drive slowly and watch for fellow firefighters while driving (5mph in camp). • Ensure you get a full briefing daily • Check in when off the line to maintain accountability

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY DAY PLAN:

Crew Supervisor to contact Division Supervisor/Operations with patient complaint, condition and location.

Division Supervisor/Operations contacts Communications:

- Division Supervisor or *POC to use "**Medical Incident Report**" worksheet on next page
- Division Supervisor or *POC will run medical emergency on the command channel
- Communications contacts Medical Unit Leader on Command channel or (cell phone, list number)
- Medical Unit Leader position is responsible for:
 1. Go to incident Communications location.
 2. Ensure Communications dispatches appropriate ground/air transport resources.
 3. Notify receiving hospital of injury status.
 4. Develop primary and contingency transport plan
 5. Notify Safety, Logistics, Operations

CAMP MEDICAL EMERGENCY 24 HOUR PLAN

Contact incident Communications with patient complaint, condition and location, via LOGs Net or Command frequency as needed.

- Medical Unit Leader will ensure contacts made to:
 - Safety, Logistics, Operations
- Medical Unit Leader will:
 1. Contact incident Communications to dispatch ground / air transport resources.
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan.

*POC (Point of Contact) and Operations

ICS 206	9. PREPARED BY: (Medical Unit Leader) Devon Haggie MEDL <i>DA</i>	10. REVIEWED BY: (Safety Officer) Rick Bertram SOF2 <i>[Signature]</i>
----------------	--	---

Medical Incident Report

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"
 Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

- **Nature of Injury/Illness** Describe the injury (Ex: Broken leg with bleeding) _____
- **Incident Name** Geographic Name + "Medical" (Ex: Trout Meadow Medical) _____
- **Incident Commander (Division Sup. or designee)** Name of IC _____
- **Patient Care** Name of Care Provider (Ex: EMT Smith) _____

3. INITIAL PATIENT ASSESSMENT: Complete this section for each pt. This is only a brief, initial assessment. Provide additional pt. info after completing this report.

- **Number of Patients:** _____ - **Male / Female:** _____ - **Age:** _____ - **Weight:** _____
- **Conscious?** YES NO = MEDEVAC! - **Breathing?** YES NO = MEDEVAC!
- **Mechanism of Injury** What caused the injury? _____
- **Location, Lat/Long** (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24' _____

4. SEVERITY OF EMERGENCY: TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illness.	Non-Emergency. Evacuation considered Route of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

Helispot Short-haul/Hoist Life Flight Other

Ground Transport:

Self-Extract Carry-Out Ambulance Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

Paramedic/EMT(s) SKED/Backboard/C-Collar Crew(s) Burn Supplies Oxygen

Trauma Bag Medication(s) IV/Fluid(s) Cardiac Monitor/AED

Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

- Run Medical Emergency on Command - Coordinate with air ambulance on CALCORD tone 6

8. EVACUATION LOCATION:

- **Lat/Long** (Datum WGS84) EX: N 40 42.45' x W 123 03.24 ' _____
- **Patient's ETA to Evacuation Location:** _____
- Helispot/Extraction Size and Hazards:** _____

9. CONTINGENCY: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...

REMEMBER: -Confirm ETA's of resources ordered -Act according to your level of training

- If air or ground ambulance is **DELAYED:** Package and transport patient to rendezvous with incoming Ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

Prepared By (Communications Unit) **David Paschke** Kevin Harper COM1 Ph 831-484-9674 **KSIF** Incident Location 5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W" depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Kx and Lx reverse.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

Incident Training Program

Trainee/ Mentor Activities

The following contains information for both trainee and trainer/ evaluator regarding the Incident Training Program. The information is intended to assist you in planning your incident activities.

1. Trainee and Mentor/ Evaluator register with the Training Specialist (TNSP) at the earliest opportunity.
2. It is only necessary to follow up with the TNSP during your assignment if you have any significant issues... ie: Changes in assignment/trainer, problems with the assignment etc.
3. The trainer and evaluator must “close-out” with the TNSP prior to DEMOB. The close out process involves:
 - The Trainer completing an Individual Performance Evaluation (ICS 225 or 226)
 - The Trainee will complete an Exit Interview form. Forms are available at the TNSP desk.
 - The evaluator should have all work completed in the position task book at the time the training assignment close-out including a recommendation as to the outcome of the assignment, ie; recommend certification, needs more assignments.
4. If you reach a point that as much work has been done in the position task book as possible, on this incident, you may perform the close-out process with the TNSP saving you time and a potential wait in line at time of DEMOB.
5. Pay close attention to TNSP IAP messages and briefing announcements concerning time lines and issues regarding the Incident Training Program.

Brad Smith – TNSP 209-770-4809

Dennis Martin – TNSP(t) 707-479-8421

soberanestraining@gmail.com

INCIDENT TRAINEE REGISTRATION FORM

Complete ALL fields and return to Training Specialist or DROP BOX for entry into database.

Remember to close out training packets with the Training Specialist before DEMOB.

TRAINEE'S DATA

Name (PRINT): _____ ICS Trainee Position: _____

Request # (A,C,E,or O): _____ Agency Designator (Ex. CA-MNF): _____

USFS___ State___ BLM___ BIA___ NPS___ FWS___ Local Govt. ___ DOD___ NWS___

Is This A Regional Priority Assignment? Yes No Ordered as a Trainee? Yes No

Date Assigned: _____ Cell Phone: _____

TRAINING RECORDS TO BE MAILED TO: (Chief, Training Officer, ect)

Name: _____ Title: _____

Name of Home Unit: _____

Address: _____

Suppression Repair Treatments

These Suppression Repair Treatments are to be used in conjunction with the Soberanes Suppression Repair Treatment Map.

Dozer Line/ Firebreak

- Use small dozer and/or excavator to rehab line
- Pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak

Wilderness Dozer Line:

- Use small dozer and/or excavator to rehab line
- When line cut through brush: pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed

Non Wilderness Dozer Line Repair:

- If dozer line was a road before fire then maintain roadbed and drainage. Pull in berms and brush along roadside.
- If road was not present before fire then water bar, pull in berms, and disperse cut brush across fire line.

Hand Crew

- Use hand crews to complete rehab work
- Move displaced native material (soil & duff) back onto fire line
- Pull back brush and berms and spread over the width of break
- Leave tops of felled trees attached, this will appear more natural
- Cut water bars diagonal to fire line, where natural drains occur and construct as natural as possible. If possible, at natural drain direct outlet of water into a clump of brush or rocks
- For dozer line: slash and water bars will be hand constructed

Trail Maintenance:

- Use small dozer (e.g., D5) and/or excavator to rehab line
- Pull back brush, berms and rocks
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%).
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak.
- Reestablish hiking trail along road prism
- Repair cross drains where segments of trail have been affected by suppression activities

Jeep Trail Repair:

- Reestablish drainage
- Pull back brush, berms and rocks, and spread over width of jeep road
- Install tank-trap (as per indicated by READ)

Road Maintenance:

- Disperse or chip cut brush away from roadsides
- Maintain pre-existing road drainage

Repair Declined

- Private landowner has indicated that no repair should occur
- Check with Repair Group READS before travelling through this area

Department of Defense Dozer Line:

- No suppression repair
