Soberanes Fire Weather Forecast

Forecast Information & SPOT Forecasts

FORECAST NO: 75

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Thu - 0700 Fri
SHIFT DATE: Thursday, Oct 6 2016

UNIT: CA-BEU/LPF MRD
SIGNED: Jason Clapp

TIME AND DATE

FORECAST ISSUED: 1900 10/5/16

Incident Meteorologists

Shawn Weagle (Rana Camp) – 503-956-7504
Jason Clapp (Toro ICP) – 530-383-4839

** Warmer and Drier – Limited RH Recovery...Possibly Dropping Overnight **

Weather Discussion: Building high pressure with sunny, warm, and dry conditions today. Moderate N to NE general winds will mainly affect ridgetop areas with drier conditions into the weekend with terrain-driven winds expected to prevail elsewhere. Onshore flow will return by Sunday. Very dry air will slowly sink over the next couple days and likely expose ridges to very dry conditions overnight. **Expect poor to no ridgetop/upper slope RH recovery the next few nights...lowest RH could be in AM.**

WEATHER FORECAST for Today:

	Ridgetops / Upper Slope	Valleys / Lower Slopes
Weather	Sunny	Sunny
Highs	67 – 74 (up 4-6)	78 – 85 (up 3-4)
Min RHs	10 – 20% (down 10-15%)	10 – 20% (down 5%)
20 ft Winds	N-NE 8-14 mph, AM gusts 20 mph. Coastal ridge shifting briefly SW 7 gusts 13 mph in PM.	Upslope winds 3-5 mph becoming up-valley 5-8 mph with afternoon gusts 10-15 mph. E-NE winds 8-12 gusting 15-20 mph lower elevations in Arroyo Seco and Willow Creek.
	Coastal/Molera – N 4-7 mph...PM increasing 10 mph gusting 15 mph	

Marine Layer: No marine layer

Haines: 4

WEATHER FORECAST for Tonight: Mainly clear; becoming much drier on ridgetops with little to no RH recovery, or even lower overnight. RH lowering to 5-15% upper slopes and ridges...otherwise, Max RH 35-50%. Lows mainly 50-60. N-NE winds 6-10 mph with gusts 15 mph ridges and coastal gaps. Otherwise, standard drainage winds.

OUTLOOK for Friday:

Weather	Sunny and drier as ridge builds into area	
Highs/Lows	72-76 ridges...78-82 valleys	55-60 ridges...45-50 valleys
Min/Max %	Min... 10 to 20% (ridges similar day/night).	Max...30-45% valleys
20 ft Winds	Winds NE 8-12 mph with gusts 15 mph ridges and coastal gaps, becoming SW 5-8 mph gusting to 13 mph in the afternoon on coastal ridge. Otherwise, expect increasing upslope/upcanyon winds 4-8 mph with gusts to 15 mph.	
	Coastal/Molera – NNW 5-8 mph...afternoon increasing 10 mph gusting 15 mph	

EXTENDED FORECAST for Saturday through Tuesday: Warming and drying trend continues into upcoming weekend with inland valley temps reaching into upper 80s. RH will likely get back into 10-18% range for inland valleys, with poor humidity recovery above thermal belts due to a strengthening subsidence (sinking) inversion. Breezy NE general winds during the night and morning hours through at least Saturday, tending up-slope or SW on coastal ridge each afternoon. Sunday could see return of stronger SW onshore winds. Early next week will trend cooler with more moist onshore winds with breakdown of the ridge.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 74	TYPE OF FIRE Wildfire
FIRE NAME: Soberanes Fire	OPERATIONAL PERIOD 10-6-2016 24 HOUR SHIFT
DATE ISSUED 10-5-2016	TIME ISSUED 1700 HOURS
UNIT CA-BEU-003422	SIGNED Scott Cones FBAN 

INPUTS

*****Review Weather Forecast for details*****

Warmer and drier. Limited RH recovery, possibly dropping overnight.

FIRE BEHAVIOR

GENERAL

The probability of active fire spread today is slightly higher than yesterday. Increasing temps and decreasing RH values will continue. Fuels are becoming available and an increase in activity should be expected. Live fuel moistures remain extremely low due to drought conditions and will take time to fully recover.

Optimal Alignment - Peak Burning Conditions

POI = 80% **Spotting Distance**= up to 1/4. ROS 70-80 ch/h **Fine Dead Fuel Moisture** = 5 %

LOCAL THRESHOLDS – WATCH OUTS

Coastal Sage Scrub fuel, primarily chamise and button brush, have seasonally low live fuel moisture for this time of year. Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further south in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:	20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
--------------------	-----------------------	---------------------	--------------------------	---------------------------

SPECIFIC

- Some creeping and smoldering in the duff and leaf litter along unlined portions of the fire. Heavy fuels will retain heat and may be problematic where close to the fires edge. Expect an increase in the activity of the fire as fuels become available to burn.
- Specific areas of concern include Miller, Pine, and Tassajara canyons due to lack of containment. Expect continued smoke production from the Ventanta Cone area. An increase in activity along previously contained portions of the fires edge near Higgins Creek in Div. UU occurred yesterday.

AIR OPERATIONS

Gusty afternoon winds possible over the ridges.

SAFETY

Common Denominator # 1: On relatively small fires or deceptively quiet areas of large fires. Stay alert.

Division/Group Assignment List (ICS 204 WF)

AIR OPERATIONS SUMMARY
ICS 220

Prepared By: *John Crotty*
 AOBD

Prepared Date: 10/05/2016

Prepared Time: 1630

1. INCIDENT NAME: Soberanes Fire	2. OPS PERIOD DATE: 10/06/2016	START TIME: 0700	END TIME: 2100	SUNRISE: 0708	SUNSET: 1843
----------------------------------	--------------------------------	------------------	----------------	---------------	--------------

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): Track all dipsite locations/number of dips/gallons taken. Track all drop locations/number of drops/gallons dropped. All GPS data to be collected in DEGREES, DECIMAL MINUTES format.
 AVOID Aerial Application of Retardant/Foam/Agent within 300' of Waterways, Bodies of Water, etc.
 If Retardant/Foam/Agent is dropped within these areas immediately notify the AOBD and provide the following information: Lat/Long, estimated number of gallons and a map detailing the area.
Fly with Transponder 1255.
 Air Attack Briefing 132.0250 AM (A-10002)

For scheduling recon flights contact Ranch HB communications @ 925-407-6353

All rotor wing aircraft will be on the ground at 1900.
 TUSI Advisory 126.200 for restricted airspace.

4. Helibase Information:
 Name: Ranch Helibase

Provide Tactical Aerial Support

Bucket support requested by Ops, Branch, Division or Air Attack

Type 2 or Type 3 Helicopter as requested

Type 2 or Type 3 Helicopter as requested

Request through ICP Communications & MEDL on Command Repeater. Give location: lat/long if known. Check Medical plan/IAP.

As requested/7AC(3SH) IR mapping.

Request through Air Attack via Initial Air/Ground. Give location and ground contact.

Aircraft to be available for IA within TFR. IA missions within TFR are requested thru OPS or Air Attack. Notify LP Dispatch

Will be requested through LP Dispatch.

Soberanes Fire – Safety Message

INCIDENT #CA-BEU-003422

DATE: 10.6.16

TIME: 0700-1900

Major Hazards

- *Traffic Hazards and Driving*
- *Complacency*
- *Line Construction*
- *Hazard Trees in Fire area and Weakened Trees in both Toro and Rana camps*
- *Working around Heavy Equipment in the suppression repair groups*

Radio vs. Cell

So why has the fireline environment gone so quiet? Why has radio traffic almost diminished? Well I'm not sure except for the obvious tactical reasons, but I think it's because so many of us use our cell phones for everything. Well, it's not an official watch out but I think we should think twice about not using the radio and instead using a cell. I agree with the saying "if you don't use it you'll lose it". What I mean by that is your communication skills. Basic radio communication is a learned skill. I'm sure you all remember the first time you had to transmit a message. Well in the heat of an intense task on the fireline I would hate to see us stumble trying to explain something over the radio because we hardly use it. Anyways you have spent to many years learning this skill and I wouldn't want to lose it. Just a suggestion.

Your Life is worth more than an acronym.

It's not LCES. It's Lookouts, Communications, Escape Routes and Safety Zones. Each word requires discussion during a briefing. I can think of at least 5 bullet points to discuss for each topic. Don't minimize the importance of each of these topics. It makes me cringe when I read of firefighter website forms that some scanner jockey is telling crews to be safe and remember LCES. They may mean well but it's sterile and of no value kind of like a milk shake with out the ice cream.

Rick Bertram SOF2 805-471-8076

Ron Garcia SOF2 559-392-1045

Please be alert around all the heavy equipment.

INCIDENT RISK ANALYSIS SOBERANES FIRE CA-BEU-003422 (ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Use caution while driving on all incident roads, nightly moisture/fog may create slick roads • Drive defensively! Expect the unexpected around every curve. • Watch for other vehicles, distracted drivers, rocks and debris on the roadway. • Beware of heavy local traffic on Carmel Valley Road, Hwy. 68 and Hwy. 1. • Roads are narrow with steep drop-offs. • Flagging on the side of North Coast Ridge road indicates a false berm or soft shoulder created by heavy equipment.
ALL	WEATHER AND FIRE BEHAVIOR	<ul style="list-style-type: none"> • Higher temps over the next few days. • Winds will test weakened trees, stay alert around snags • Stay hydrated. Monitor resources for heat related illness. • Communicate any observed changes in weather and fire behavior. • Maintain adequate escape routes and safety zones. Set trigger points. • Expect the unexpected with drought stricken fuels at critically low fuel moistures. • Historical trends indicate changes in the fire environment support large fire growth.
All	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Conduct thorough briefings for all personnel involved (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 7). • Establish adequate safety zones (IRPG p.8) and escape routes. • Use Downhill Line Checklist (IRPG p. 9). • Use "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4) • Utilize Risk Management Process (IRPG p.1).
ALL	MOP-UP	<ul style="list-style-type: none"> • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; adjust shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4).
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters. • Ensure all personnel are familiar with the incident communications plan. The Soberanes Fire is using 2 different groups. Ensure you are using the proper one. • Don't be afraid to over communicate. • Ensure everyone gets a proper and thorough briefing. • Know who you are working for.
ALL	AVIATION OPERATIONS	<ul style="list-style-type: none"> • Use risk analysis to determine if any given flight is necessary. • Use air to ground tactical frequency when assigned a specific aircraft. • Use air to ground command frequency to communicate with air attack. • Use concise statements & clock directions when directing aircraft IRPG pg. 57. • Review and follow "Aviation Watch-Out Situations" on page 44, IRPG. • Remember visibility changes minute by minute.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • When in timber, increase distance to 2.5 times the height of the tress. • Never work below or behind heavy equipment.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, cattle, rattlesnakes, bees, and insects. • Watch footing and hand placement around rocks. • Watch for snags, don't rest under oaks, even green ones. They're falling • Ensure all personnel can identify poison oak in work and camp areas. • Identify employees who are highly receptive to poison oak and minimize their exposure. • Utilize line medics at the earliest appearance of allergic reactions.
ALL	Spike Camps	<ul style="list-style-type: none"> • Watch for dead or drought damaged trees in sleeping areas • Maintain hygiene to avoid camp crud • Sleep only in designated areas • Drive slowly and watch for fellow firefighters while driving (5mph in camp). • Ensure you get a full briefing daily • Check in when off the line to maintain accountability

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY DAY PLAN:

Crew Supervisor to contact Division Supervisor/Operations with patient complaint, condition and location.

Division Supervisor/Operations contacts Communications:

- Division Supervisor or *POC to use "**Medical Incident Report**" worksheet on next page
- Division Supervisor or *POC will run medical emergency on the command channel
- Communications contacts Medical Unit Leader on Command channel or (cell phone, list number)
- Medical Unit Leader position is responsible for:
 1. Go to incident Communications location.
 2. Ensure Communications dispatches appropriate ground/air transport resources.
 3. Notify receiving hospital of injury status.
 4. Develop primary and contingency transport plan
 5. Notify Safety, Logistics, Operations

CAMP MEDICAL EMERGENCY 24 HOUR PLAN

Contact incident Communications with patient complaint, condition and location, via LOGs Net or Command frequency as needed.

- Medical Unit Leader will ensure contacts made to:
 - Safety, Logistics, Operations
- Medical Unit Leader will:
 1. Contact incident Communications to dispatch ground / air transport resources.
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan.

*POC (Point of Contact) and Operations

ICS 206	9. PREPARED BY: (Medical Unit Leader)	10. REVIEWED BY: (Safety Officer)
	Devon Haggie MEDL 	Rick Bertram SOF2 

Medical Incident Report

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"
 Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

- **Nature of Injury/Illness** Describe the injury (Ex: Broken leg with bleeding) _____
- **Incident Name** Geographic Name + "Medical" (Ex: Trout Meadow Medical) _____
- **Incident Commander (Division Sup. or designee)** Name of IC _____
- **Patient Care** Name of Care Provider (Ex: EMT Smith) _____

3. INITIAL PATIENT ASSESSMENT: Complete this section for each pt. This is only a brief, initial assessment. Provide additional pt. info after completing this report.

- **Number of Patients:** _____ - **Male / Female:** _____ - **Age:** _____ - **Weight:** _____
- **Conscious?** YES NO = MEDEVAC! - **Breathing?** YES NO = MEDEVAC!
- **Mechanism of Injury** What caused the injury? _____
- **Location, Lat/Long** (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24' _____

4. SEVERITY OF EMERGENCY: TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illness.	Non-Emergency. Evacuation considered Route of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

Helispot Short-haul/Hoist Life Flight Other

Ground Transport:

Self-Extract Carry-Out Ambulance Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

Paramedic/EMT(s) SKED/Backboard/C-Collar Crew(s) Burn Supplies Oxygen

Trauma Bag Medication(s) IV/Fluid(s) Cardiac Monitor/AED

Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

- Run Medical Emergency on Command - Coordinate with air ambulance on CALCORD tone 6

8. EVACUATION LOCATION:

- **Lat/Long** (Datum WGS84) EX: N 40 42.45' x W 123 03.24 ' _____

- **Patient's ETA to Evacuation Location:** _____

Helispot/Extraction Size and Hazards: _____

9. CONTINGENCY: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...

REMEMBER: -Confirm ETA's of resources ordered -Act according to your level of training

- If air or ground ambulance is **DELAYED:** Package and transport patient to rendezvous with incoming Ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

Project # 13 (Communications Unit)
David Paschke Kevin Harper COM1 Ph 831-484-9674
Incident Location
5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Kx and Lx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

Soberanes Fire Human Resource Message October 6, 2016

Leading others effectively encourages those we lead to do great things. Let's remember the value of our leadership while we continue to do the important work we are doing here.

Leaders Who Motivate People:

- Know their job.
- Know the jobs of those they supervise.
- Set the direction.
- Give people the chance to succeed or fail.
- Provide support for the doers.
- Seeks to know “what encourages” each doer
(all people are different and have individual needs to be fulfilled).
- Work with reality and current conditions.
- Enjoy their work and provide a positive work environment.

“To every person there comes a time in life, that special moment, when they are figuratively tapped on the shoulder and offered the chance to do a very special thing, unique to them and fitted to his or her talent. What a tragedy if that moment finds them unprepared or unqualified for the work which would be their finest hour.” -Winston Churchill

Incident Training Program

Trainee/ Mentor Activities

The following contains information for both trainee and trainer/ evaluator regarding the Incident Training Program. The information is intended to assist you in planning your incident activities.

1. Trainee and Mentor/ Evaluator register with the Training Specialist (TNSP) at the earliest opportunity.
2. It is only necessary to follow up with the TNSP during your assignment if you have any significant issues... ie: Changes in assignment/trainer, problems with the assignment etc.
3. The trainer and evaluator must “close-out” with the TNSP prior to DEMOB. The close out process involves:
 - The Trainer completing an Individual Performance Evaluation (ICS 225 or 226)
 - The Trainee will complete an Exit Interview form. Forms are available at the TNSP desk.
 - The evaluator should have all work completed in the position task book at the time the training assignment close-out including a recommendation as to the outcome of the assignment, ie; recommend certification, needs more assignments.
4. If you reach a point that as much work has been done in the position task book as possible, on this incident, you may perform the close-out process with the TNSP saving you time and a potential wait in line at time of DEMOB.
5. Pay close attention to TNSP IAP messages and briefing announcements concerning time lines and issues regarding the Incident Training Program.

Brad Smith – TNSP 209-770-4809

Dennis Martin – TNSP(t) 707-479-8421

soberanestraining@gmail.com

INCIDENT TRAINEE REGISTRATION FORM

Complete **ALL** fields and return to Training Specialist or DROP BOX for entry into database.

Remember to close out training packets with the Training Specialist before DEMOB.

TRAINEE'S DATA

Name (PRINT): _____ ICS Trainee Position: _____

Request # (A,C,E,or O): _____ Agency Designator (Ex. CA-MNF): _____

USFS___ State___ BLM___ BIA___ NPS___ FWS___ Local Govt. ___ DOD___ NWS___

Is This A Regional Priority Assignment? Yes No Ordered as a Trainee? Yes No

Date Assigned: _____ Cell Phone: _____

TRAINING RECORDS TO BE MAILED TO: (Chief, Training Officer, ect)

Name: _____ Title: _____

Name of Home Unit: _____

Address: _____

City: _____ State: _____ Zip Code: _____ Phone: _____

TRAINEE PREREQUISITES

1. Valid Red Card or agency certification card? _____ Yes _____ No

2. Trainee has current position task book issued by home unit? _____ Yes _____ No

Priority Open Tasks in PTB (You Want to Accomplish On This Incident)

1) _____

2) _____

3) _____

TRAINER/EVALUATOR DATA

Trainer/Evaluator Name: _____ ICS position on fire _____

Home Unit: _____ Agency Designator(ex. CA-MNF): _____

Work Address: _____ City: _____

State: _____ Zip Code: _____ Cell Phone: _____

Suppression Repair Treatments

These Suppression Repair Treatments are to be used in conjunction with the Soberanes Suppression Repair Treatment Map.

Dozer Line/ Firebreak

- Use small dozer and/or excavator to rehab line
- Pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak

Wilderness Dozer Line:

- Use small dozer and/or excavator to rehab line
- When line cut through brush: pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed

Non Wilderness Dozer Line Repair:

- If dozer line was a road before fire then maintain roadbed and drainage. Pull in berms and brush along roadside.
- If road was not present before fire then water bar, pull in berms, and disperse cut brush across fire line.

Hand Crew

- Use hand crews to complete rehab work
- Move displaced native material (soil & duff) back onto fire line
- Pull back brush and berms and spread over the width of break
- Leave tops of felled trees attached, this will appear more natural
- Cut water bars diagonal to fire line, where natural drains occur and construct as natural as possible. If possible, at natural drain direct outlet of water into a clump of brush or rocks
- For dozer line: slash and water bars will be hand constructed

Trail Maintenance:

- Use small dozer (e.g., D5) and/or excavator to rehab line
- Pull back brush, berms and rocks
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%).
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak.
- Reestablish hiking trail along road prism
- Repair cross drains where segments of trail have been affected by suppression activities

Jeep Trail Repair:

- Reestablish drainage
- Pull back brush, berms and rocks, and spread over width of jeep road
- Install tank-trap (as per indicated by READ)

Road Maintenance:

- Disperse or chip cut brush away from roadsides
- Maintain pre-existing road drainage

Repair Declined

- Private landowner has indicated that no repair should occur
- Check with Repair Group READS before travelling through this area

Department of Defense Dozer Line:

- No suppression repair
