OUTPUTS

FIRE BEHAVIOR

GENERAL:

- 10hr, 100hr, and 1000hr fuels are all at critical levels
- Very heavy fuel loading of oak litter and brush
- Fuels within the entire burn area are drought stressed
- Expect active burning late into the night and early morning

SPECIFIC:

All Divisions:

Flame Lengths- Head fire: 8-16 ft. in Grass,11-25 ft. in Brush, Flanking fire: 2-6 ft. in Grass, 6-10 ft. in Brush

Rate of Spread- Head fire up to 80 ft/min in Grass, Up to 100 ft/min in Brush

Spotting Distances- Up to 0.25 miles in Grass, Brush and Leaf Litter

Probability of Ignition- 93% at the peak of the burn period

AIR OPERATIONS:

Smoky conditions may make visibility difficult for air resources

Sunrise: 0624 Sunset: 1950

SAFETY

Do not rely on aircraft for support!!! Inversion and smoky conditions may make visibility difficult for aircrafts to operate.

If the fire escapes containment lines, do not go through the green to try and extinguish it. Fire can grow rapidly with the exceptionally dry fuels.

Expect Areas Where Wind and Terrain Align to Produce *Surprisingly* Rapid Rates of Spread!

CHIMNEY HEALTH AND SAFETY MESSAGE

We Are **ALL** Safety Officers !!!

INCIDENT: Chimney Fire CA-SLU-008948	DATE: August 17, 2016 TIME: **0700-0700**

Major Hazards and Risks: Fatigue, Extremely Dry, Cured, and Drought Stricken Fuels.

Fire Behavior: Fuels are drought stricken and are receptive to fire spread. A small amount of wind on this dry fuel changes the game dramatically!! Be alert to changes in wind direction and expect changes in fire behavior. Flare-ups generally occur in deceptively light fuels, such as grass and light brush or islands within fire perimeters of unburned or partially burned fuels.

Hazard trees: Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow Hazard Tree Safety, pg. 22-23 in your IRPG.

Personnel: Manage yourself and those around you for fatigue; many have driven long distances or been deployed for extended periods. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and partner.

Limited Resources: With resource needs at a premium, tactics may be adjusted, however, SAFETY must never be compromised.

Hydration: By the time your body tells you it's time to drink – you are already DEHYRATED!!! On a regular basis drink fluids to maintain an appropriate energy level for any expected work assignment. Remember, you are the only one that knows your limitations.

Incident within Incident (IWI) procedures - Review your ICS 206 and know what to do.

Lookouts, **C**ommunication, **E**scape routes, **S**afety zones

Heat Illness Prevention:

- **Drink plenty of fluids:**
  - **Water and Gatorade**
- **Avoid drinking energy drinks**
- **Rest when you can**
- **Find shade when you can**
- **Eat nutritious food regularly**

Trigger Points

Should be based on measurable factors:

- **RH**
- **Winds**
- **Fire Behavior**
- **Topographical boundaries**
- **Time constraints/Time of day**
- **Time /distance to safety zones**
- **Loss of suppression resources**
- **Fatigue, loss of Lookouts, or Communications.**

Incident Safety Officer: **Steve Walker** Incident Commander: **Glenn Patterson**

CHIMNEY INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	**EXTREME FIRE BEHAVIOR**	Know your LCES and maintain Situational Awareness. Use experienced Look Outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH when the inversion lifts. Expect rapid rates of spread with long range spotting, have a contingency plan (PACE) with established decision points and safety zones.
ALL	**FATIGUE/HEAT/DEHYDRATION**	Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible Drink electrolyte drinks at a 3 water to 1 sport drink ratio.
ALL	**STEEP TERRAIN / ROLLING DEBRIS**	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris Maintain Situational Awareness.
ALL	**HAZARD TREES**	Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do Not Fall trees out of your certification level.
ALL	**LINE CONSTRUCTION**	Conduct thorough briefing for all personnel (inside rear cover IRPG). Ensure LCES in place prior to engagement (IRPG p. 6). Establish adequate safety zones (IRPG p.7). Use Downhill Line Checklist (IRPG p. 8). Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 2-3). Utilize Risk Management Process (IRPG p.1).
ALL	**DRIVING HAZARDS**	**Slow Down!** Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.
ALL	**AIRCRAFT OPERATIONS**	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Only utilize aircraft to insert personnel on the line when necessary.
ALL	**DOZER SAFETY**	Watch for rolling material. Monitor safe working distances. Avoid working below Dozer. Utilize communication with the operator (radio or hand signals)
ALL	**POWER LINES**	Follow ***Power Line Safety*** guidelines (IRPG pg.24.) Extinguish all power poles that are on fire before the fall. Communicate power line hazards to supervisor and hazard flag accordingly. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
ALL	**STRUCTURE DEFENSE & HAZARDS**	Conduct thorough briefing for all personnel (inside rear cover IRPG). Follow ***Wildland Urban Interface Guidelines*** (IRPG p. 12-16).
ALL	**PERFORM TAIL GATE SAFETY MEETINGS**	Everyone should be briefed on the conditions and circumstances regarding the fire and their assignments per the IRPG. Ensure all personnel have PPE, food, and water.

Incident Information Line: (805) 543-2444

Incident Media Line: (805) 242-3640

STATUS	
Incident Start Date: August 13, 2016	**Incident Start Time:** 4:03 PM
Incident Type: Wildland Fire	**Cause:** Under Investigation
Incident Location: Chimney Rock Rd & Running Deer Rd, South of Nacimiento Reservoir	**Total Personnel:**
Acreage:	**Containment:**

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1

CAL FIRE SOCIAL MEDIA POLICY – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email *"team email"*.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.
