## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** The fire is burning in a mix of grass and brush with stands of Oak trees that are extremely dry, very drought stressed, and have a heavy fuel loading. 10 hour, 100 hour and 1000 hour fuels are all at critical levels (97<sup>th</sup> percentile) and have been for many days. Fire activity will continue to increase in the early afternoon and burn active into the late night hours.

**Probability of Ignition:** 89%

**FDFM:** 3%

**ERC:** 97<sup>th</sup> Percentile

### SPECIFIC:

#### Division A, Division D, Division J, Division Z

**Flame Lengths-** Head fire: 6-14 ft. in Grass, 10-20 ft. in Brush, Flanking fire: 2-6 ft. in Grass, 6-10 ft. in Brush

**Rate of Spread-** Head fire up to 80 ft/min in Grass, Up to 70 ft/min in Brush

**Spotting Distances-** Up to 0.25 miles in Grass, Brush and 0.5 miles in Leaf Litter

#### Division M, Division R, Division W

No growth expected. Interior islands and heavier fuels will continue to burn out and smolder

### AIR OPERATIONS:

Smoky conditions may make visibility difficult for air resources

Drops on to dead stands of trees could create rollout and widow makers

Sunrise: 0624 Sunset: 1950

## SAFETY

- Expect fire activity to remain active after midnight into early morning hours
- Dead trees could fall at any time, situational awareness is imperative

## CHIMNEY HEALTH AND SAFETY MESSAGE

We Are ALL Safety Officers !!!

INCIDENT: Chimney Fire CA-SLU-008948      DATE: August 18, 2016      TIME: 0700-0700

### **Major Hazards and Risks: Fatigue, Extremely Dry, Cured, and Drought Stricken Fuels.**

**Hydration/Nutrition/Fatigue:** Drink plenty of fluids throughout the day and eat accordingly. Address dehydration and fatigue concerns immediately upon symptom onset.

**Fire Behavior:** Fuels are drought stricken and are receptive to fire spread. A small amount of wind on this dry fuel changes the game dramatically!! Be alert to changes in wind direction and expect changes in fire behavior. Flare-ups generally occur in deceptively light fuels, such as grass and light brush or islands within fire perimeters of unburned or partially burned fuels

**Driving:** Steep, narrow, dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. Flag unstable roads and other hazards that may be encountered while driving.

**Weather:** Above average temperatures will continue, reassess your personnel throughout the day. Take rehab breaks, and order sling loads early to stay on top of crew hydration. Be aware of changes in temps and RH's, work at an appropriate pace for conditions presented.

**Communication:** Confirm all personnel have latest clone, test prior to going to line. Utilize human repeaters as necessary.

**Resource Accountability:** Maintain prompt communications with your forces, your supervisor and adjoining forces. Give clear instructions and ensure they are understood.

**Hazardous Trees and Snags:** Be alert of snags due to tree mortality and drought. Crews are working in a very hazardous area with numerous dead trees, stay diligent and flag hazardous areas. Avoid taking breaks under trees.

**Heavy Equipment:** Utilize good spacing and watch for rollout and falling debris. Stay visible and work above and not below equipment. Maintain situational awareness at all times

# CAL FIRE INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

## *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

### **Fireline personnel-** (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.

- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

### **Private Water Supplies-**

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at <http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1>

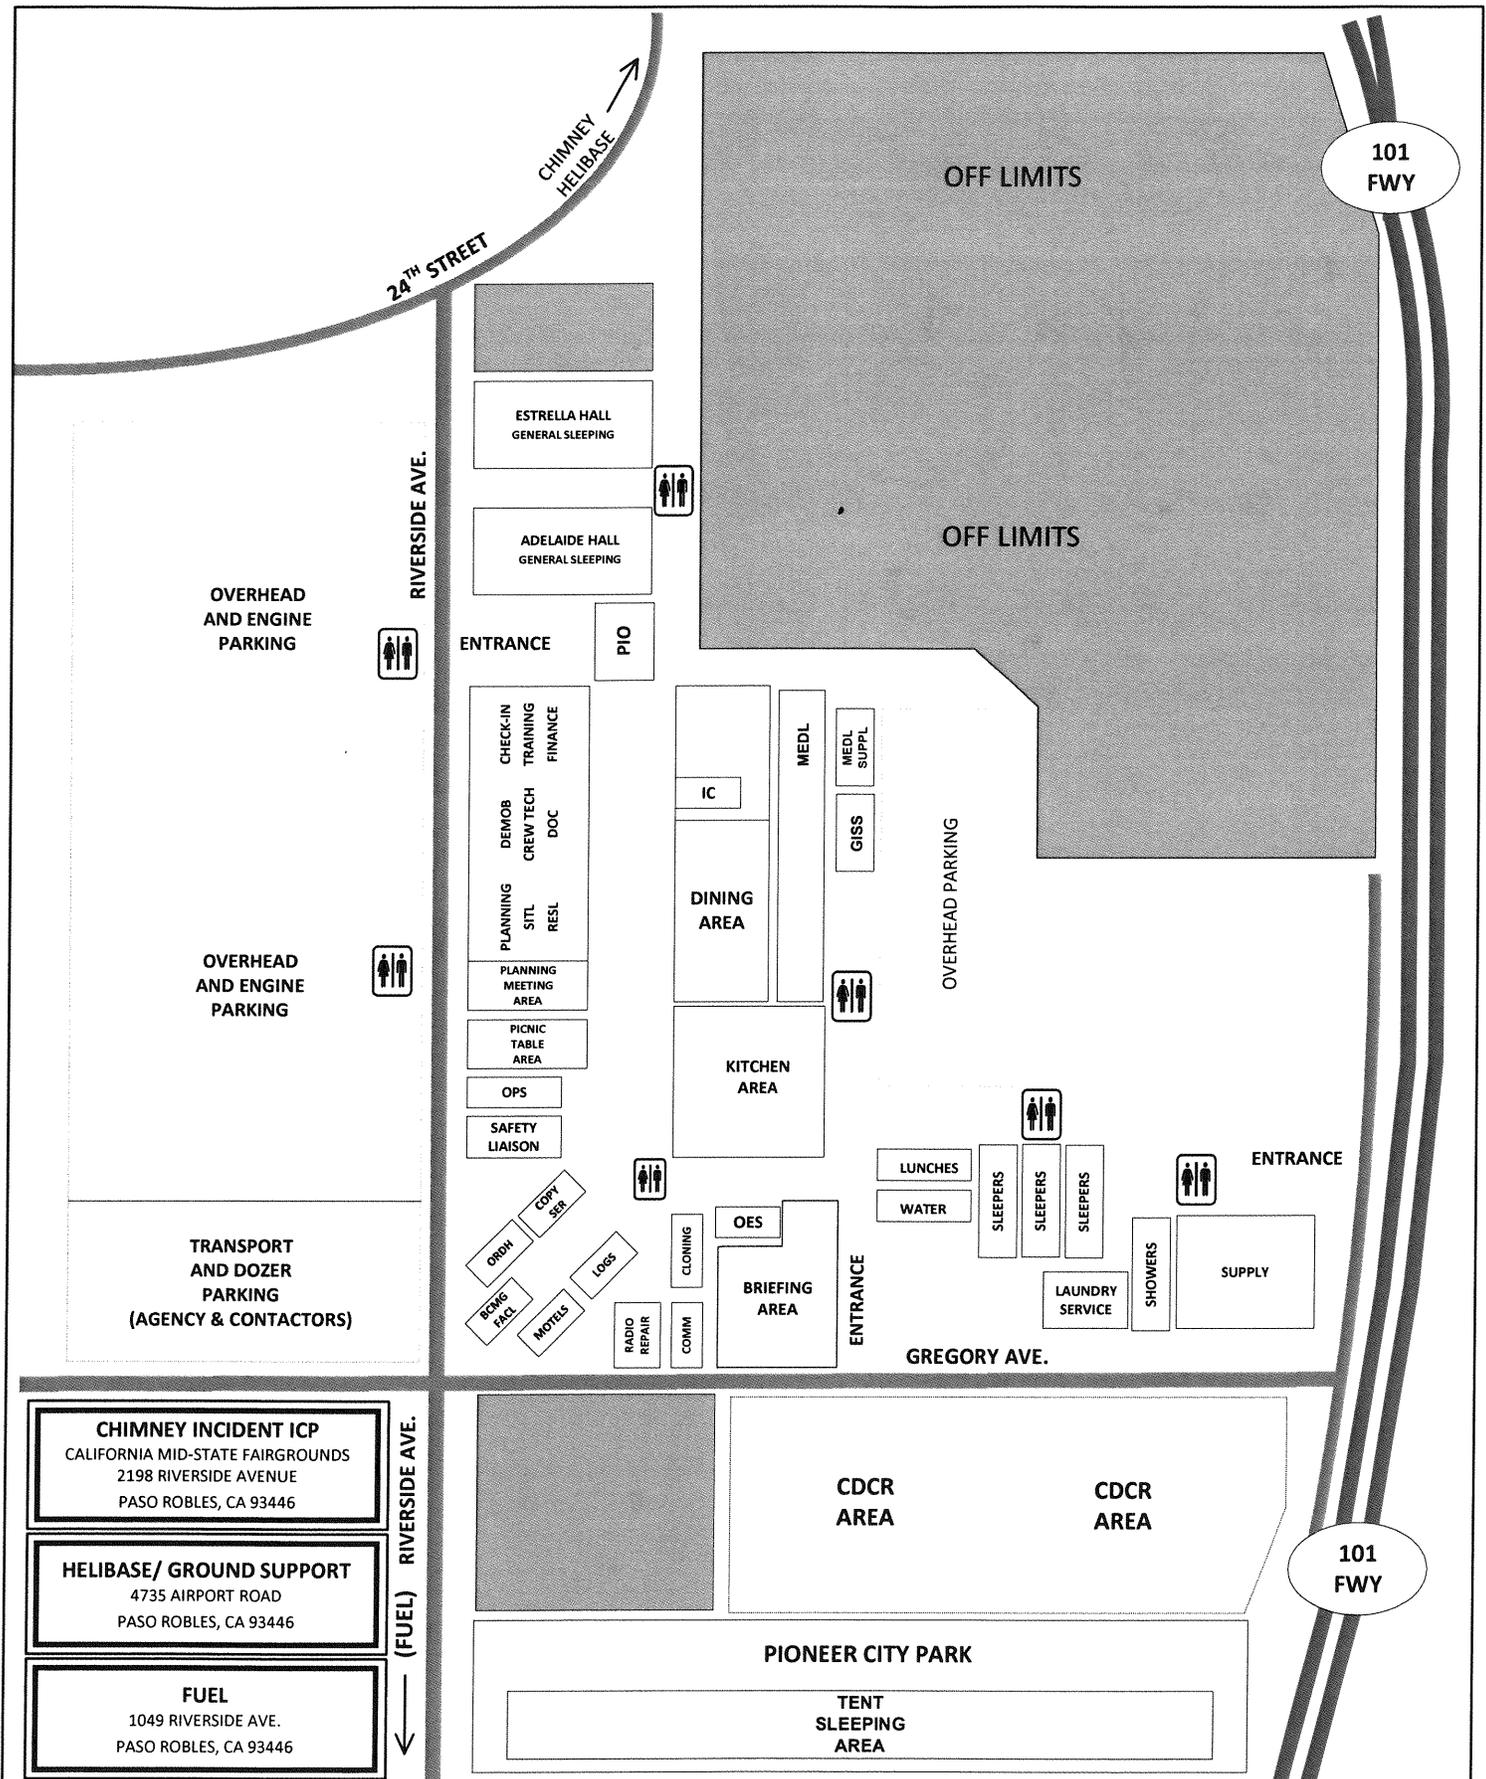

**CAL FIRE SOCIAL MEDIA POLICY** – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at <http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf>

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email "*team email*".

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

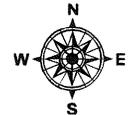

**MAIL SERVICE** – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.
