## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** The fire is burning in a mix of grass and brush with stands of Oak trees that are extremely dry, very drought stressed, and have a heavy fuel loading. This combination will lead to fuel/topography runs with the wind speeds that are forecasted. As fire behavior increases, the fire will create localized stronger and erratic winds that could produce rapid increases in the rate of spread. Fire activity will continue to increase in the late morning to early afternoon and burn active into the late night hours.

Probability of Ignition: 89%

FDFM: 3%

ERC: 97<sup>th</sup> Percentile

### SPECIFIC:

Division A, Division D, Division J, Division Z

Flame Lengths- Head fire: 6-18 ft. in Grass, 20-30 ft. in Brush, Flanking fire: 6-8 ft. in Grass, 7-14 ft. in Brush

Rate of Spread- Head fire up to 80 feet in understory Grass, Up to 210 ft/min in open grass,  
Up to 170 ft/min in open Brush field

Spotting Distances- Up to 0.4 miles

Division M, Division R, Division W

No growth expected. Interior islands and heavier fuels will continue to burn out and smolder.

### AIR OPERATIONS:

Smoky conditions may make visibility difficult for air resources

Fire will create localized stronger & erratic winds

Sunrise: 0625 Sunset: 1946

### SAFETY

- Exceptionally dry fuels warrant a high degree of caution.
- Don't become complacent! Identify your safety zones and escape routes.

## CHIMNEY HEALTH AND SAFETY MESSAGE

We Are ALL Safety Officers !!!

INCIDENT: Chimney Fire CA-SLU-008948      DATE: August 19, 2016      TIME: 0700-0700

**Major Hazards and Risks: Fatigue,  
Extremely Dry, Cured, and Drought Stricken Fuels.**

**Hydration/Nutrition/Fatigue:** Drink plenty of fluids throughout the day and eat accordingly. Address dehydration and fatigue concerns immediately upon symptom onset.

**Fire Behavior:** Fuels are drought stricken and are receptive to fire spread. A small amount of wind on this dry fuel changes the game dramatically!! Be alert to changes in wind direction and expect changes in fire behavior. Flare-ups generally occur in deceptively light fuels, such as grass and light brush or islands within fire perimeters of unburned or partially burned fuels

**Driving:** Steep, narrow, dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. Flag unstable roads and other hazards that may be encountered while driving.

**Weather:** Above average temperatures will continue, reassess your personnel throughout the day. Take rehab breaks, and order sling loads early to stay on top of crew hydration. Be aware of changes in temps and RH's, work at an appropriate pace for conditions presented.

**Communication:** Confirm all personnel have latest clone, test prior to going to line. Utilize human repeaters as necessary. CMD channels are linked, try alternative channels if unsuccessful with primary.

**Resource Accountability:** Maintain prompt communications with your forces, your supervisor and adjoining forces. Give clear instructions and ensure they are understood.

**Hazardous Trees and Snags:** Be alert of snags due to tree mortality and drought. Crews are working in a very hazardous area with numerous dead trees, stay diligent and flag hazardous areas. Avoid taking breaks under trees.

**Heavy Equipment:** Utilize good spacing and watch for rollout and falling debris. Stay visible and work above and not below equipment. Maintain situational awareness at all times

**Incident Within Incident (IWI):**  
Review procedures on 206 at Divisional Breakouts and tailgate safety briefings.

**Complacency:** Stay engaged no matter what your line assignment is, fire conditions could change unexpectedly. Establish Decision Points: when to engage and when to disengage.

**Lookouts, Communication, Escape routes, Safety zones**

## CHIMNEY INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	<b>EXTREME FIRE BEHAVIOR</b>	Know your LCES and maintain Situational Awareness. Use experienced Look Outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH when the inversion lifts. Expect rapid rates of spread with long range spotting, have a contingency plan (PACE) with established decision points and safety zones.
ALL	<b>FATIGUE/HEAT/DEHYDRATION</b>	Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible Drink electrolyte drinks at a 3 water to 1 sport drink ratio.
ALL	<b>STEEP TERRAIN / ROLLING DEBRIS</b>	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris Maintain Situational Awareness.
ALL	<b>HAZARD TREES</b>	Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do Not Fall trees out of your certification level.
ALL	<b>LINE CONSTRUCTION</b>	Conduct thorough briefing for all personnel (inside rear cover IRPG). Ensure LCES in place prior to engagement (IRPG p. 6). Establish adequate safety zones (IRPG p.7). Use Downhill Line Checklist (IRPG p. 8). Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 2-3). Utilize Risk Management Process (IRPG p.1).
ALL	<b>DRIVING HAZARDS</b>	<b>Slow Down!</b> Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.
ALL	<b>AIRCRAFT OPERATIONS</b>	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Only utilize aircraft to insert personnel on the line when necessary.
ALL	<b>DOZER SAFETY</b>	Watch for rolling material. Monitor safe working distances. Avoid working below Dozer. Utilize communication with the operator (radio or hand signals)
ALL	<b>POWER LINES</b>	Follow <i>Power Line Safety</i> guidelines (IRPG pg.24.) Extinguish all power poles that are on fire before the fall. Communicate power line hazards to supervisor and hazard flag accordingly. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
ALL	<b>STRUCTURE DEFENSE &amp; HAZARDS</b>	Conduct thorough briefing for all personnel (inside rear cover IRPG). Follow <i>Wildland Urban Interface Guidelines</i> (IRPG p. 12-16).
ALL	<b>PERFORM TAIL GATE SAFETY MEETINGS</b>	Everyone should be briefed on the conditions and circumstances regarding the fire and their assignments per the IRPG. Ensure all personnel have PPE, food, and water. Remind personnel to stay engaged no matter what's occurring on the fireline. Conditions can change at a moments notice

# CAL FIRE WUI Guidelines

## STRUCTURE DEFENSE TACTICAL ACTIONS

### **CHECK AND GO**

"Check and Go" is a rapid evaluation to check for occupants requiring removal or rescue.  
Structure Triage Category – Threatened Non-Defensible

### **PREP AND GO**

"Prep and Go" implies that some preparation of the structure may be safely completed prior to resources leaving the area. Structure Triage Category – Threatened Non-Defensible

### **PREP AND DEFEND**

"Prep and Defend" is a tactic used when a Safety Zone and TRA are present and adequate time exists to safely prepare a structure for defense prior to the arrival of the fire front.  
Structure Triage Category – Threatened Defensible

### **FIRE FRONT FOLLOWING**

"Fire Front Following" is a follow up tactic employed when Check and Go, Prep and Go, or Bump and Run tactics are initially used. A tactic used to come in behind the fire front.

### **BUMP AND RUN**

"Bump and Run" is a tactic where resources typically move ahead of the fire front in the spotting zone to extinguish spot fires and hot spots, and to defend as many structures as possible.

### **ANCHOR AND HOLD**

"Anchor and Hold" is a tactic utilizing control lines and large water streams from fixed water supplies in an attempt to stop fire spread. The goal is to extinguish structure fires, protect exposures, and reduce ember production.

### **TACTICAL PATROL**

"Tactical Patrol" is a tactic where the key element is mobility and continuous monitoring of an assigned area.

## LEVELS OF ENGAGEMENT

### PACE

Implement PACE. prior to engaging in any structure protection action.

#### **P - Primary Plan [Offense]**

Is focused on fire fighter safety and mission objectives

#### **A - Alternate Plan [Offense]**

A fall back plan that closely supports the Primary Plan

#### **C - Contingency Plan [Defense]**

Focused on the firefighter's safety, move to a safety zone or temporary refuge area

#### **E - Emergency Plan [Defense]**

Firefighter survival, deployment zones, fire shelters

### **ALWAYS HAVE A DEPLOYMENT SITE IDENTIFIED!**

### DRAW-D

**D - Defend** – Holding actions, protecting priority areas, protect the structures, hold and improve the line

**R - Reinforce** – Bring more resources to bear, add resources necessary to *advance* or *defend*

**A - Advance** – Anchor and Flank, Direct or Indirect Attack, Active burnout operations

**W - Withdraw** – Cease current activities until conditions modify, Abandon an established position or constructed line in response to an increase in fire intensity, Not a stigma, but a decision to move away from a threat

**D - Delay** – Wait until the situation has modified sufficiently to allow a different level of engagement, Waiting for conditions to meet pre-identified triggers necessary to *advance* or *defend*, not a lack of effort, but a conscious decision to maximize long term effectiveness

# CAL FIRE INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

## *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

### **Fireline personnel-** (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

### **Public/ Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.

### **Management and Supervision-**

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at <http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1>

**CAL FIRE SOCIAL MEDIA POLICY** – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at <http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf>

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email "*team email*".

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

**MAIL SERVICE** – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.
