## CHIMNEY HEALTH AND SAFETY MESSAGE

We Are ALL Safety Officers !!!

INCIDENT: Chimney Fire CA-SLU-008948 | DATE: August 20, 2016 | TIME: 0700-0700

### Major Hazards and Risks: Fatigue, Extremely Dry, Cured, and Drought Stricken Fuels.

**Hydration/Nutrition/Fatigue:** Drink plenty of fluids throughout the day and eat accordingly. Address dehydration and fatigue concerns immediately upon symptom onset.

**Hazard trees:** Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow Hazard Tree Safety, pg. 22-23 in your IRPG.

**Fire Behavior:** Fuels are drought stricken and are receptive to fire spread. A small amount of wind on this dry fuel changes the game dramatically!! Flare-ups generally occur in deceptively light fuels, such as grass and light brush or islands within fire perimeters of unburned or partially burned fuels.

**Powerline Safety:** Use caution when working around powerlines, watch for possible downed lines and treat all lines found as energized until it is confirmed they have been de-energized.

**Driving:** Steep, narrow, dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. Flag unstable roads and other hazards that may be encountered while driving.

**Communication:** Confirm all personnel have latest clone, test prior to going to line. Utilize human repeaters as necessary. CMD channels are linked, try alternative channels if unsuccessful with primary.

**Resource Accountability:** Maintain prompt communications with your forces, your supervisor and adjoining forces. Give clear instructions and ensure they are understood.

**L**ookouts, **C**ommunication, **E**scape routes, **S**afety zones

### Standard Firefighting Orders

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected behavior of the fire.
4. Identify escape routes and safety zones and make them known.
5. Post lookouts when there is possible danger.
6. Be alert. Keep calm. Think clearly. Act decisively.
7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.
8. Give clear instructions and insure they are understood.
9. Maintain control of your forces at all times.
- 10. Fight fire aggressively, having provided for safety first.**

### Decision Points

Should be based on measurable factors:

- **RH**
- **Winds**
- **Fire Behavior**
- **Topographical boundaries**
- **Time constraints/Time of day**
- **Time /distance to safety zones**
- **Loss of suppression resources**
- **Fatigue, loss of Lookouts, or Communications.**

## CHIMNEY INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	<b>EXTREME FIRE BEHAVIOR</b>	Know your LCES and maintain Situational Awareness. Use experienced Look Outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH when the inversion lifts. Expect rapid rates of spread with long range spotting, have a contingency plan
ALL	<b>FATIGUE/HEAT/DEHYDRATION</b>	Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible Drink electrolyte drinks at a 3 water to 1 sport drink ratio.
ALL	<b>STEEP TERRAIN / ROLLING DEBRIS</b>	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris Maintain Situational Awareness.
ALL	<b>HAZARD TREES</b>	Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do Not Fall trees out of your certification level.
ALL	<b>LINE CONSTRUCTION</b>	Conduct thorough briefing for all personnel (inside rear cover IRPG). Ensure LCES in place prior to engagement (IRPG p. 6). Establish adequate safety zones (IRPG p.7). Use Downhill Line Checklist (IRPG p. 8). Follow “Look Up, Look Down, Look Around” procedures (IRPG p. 2-3). Utilize Risk Management Process (IRPG p.1).
ALL	<b>DRIVING HAZARDS</b>	<b>Slow Down!</b> Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.
ALL	<b>AIRCRAFT OPERATIONS</b>	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Only utilize aircraft to insert personnel on the line when necessary.
ALL	<b>DOZER SAFETY</b>	Watch for rolling material. Monitor safe working distances. Avoid working below Dozer. Utilize communication with the operator (radio or hand signals)
ALL	<b>POWER LINES</b>	Follow <b>Power Line Safety</b> guidelines (IRPG pg.24.) Extinguish all power poles that are on fire before the fall. Communicate power line hazards to supervisor and hazard flag accordingly. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
ALL	<b>STRUCTURE DEFENSE &amp; HAZARDS</b>	Conduct thorough briefing for all personnel (inside rear cover IRPG). Follow <b>Wildland Urban Interface Guidelines</b> (IRPG p. 12-16).
ALL	<b>PERFORM TAIL GATE SAFETY MEETINGS</b>	Everyone should be briefed on the conditions and circumstances regarding the fire and their assignments per the IRPG. Ensure all personnel have PPE, food, and water. Remind personnel to stay engaged no matter what’s occurring on the fireline. Conditions can change at a moments notice

## STRUCTURE DEFENSE TACTICAL ACTIONS

### **CHECK AND GO**

“Check and Go” is a rapid evaluation to check for occupants requiring removal or rescue.  
Structure Triage Category – Threatened Non-Defensible

### **PREP AND GO**

“Prep and Go” implies that some preparation of the structure may be safely completed prior to resources leaving the area. Structure Triage Category – Threatened Non-Defensible

### **PREP AND DEFEND**

“Prep and Defend” is a tactic used when a Safety Zone and TRA are present and adequate time exists to safely prepare a structure for defense prior to the arrival of the fire front.  
Structure Triage Category – Threatened Defensible

### **FIRE FRONT FOLLOWING**

“Fire Front Following” is a follow up tactic employed when Check and Go, Prep and Go, or Bump and Run tactics are initially used. A tactic used to come in behind the fire front.

### **BUMP AND RUN**

“Bump and Run” is a tactic where resources typically move ahead of the fire front in the spotting zone to extinguish spot fires and hot spots, and to defend as many structures as possible.

### **ANCHOR AND HOLD**

“Anchor and Hold” is a tactic utilizing control lines and large water streams from fixed water supplies in an attempt to stop fire spread. The goal is to extinguish structure fires, protect exposures, and reduce ember production.

### **TACTICAL PATROL**

“Tactical Patrol” is a tactic where the key element is mobility and continuous monitoring of an assigned area.

## LEVELS OF ENGAGEMENT

### PACE

Implement PACE. prior to engaging in any structure protection action.

#### **P - Primary Plan [Offense]**

Is focused on fire fighter safety and mission objectives

#### **A - Alternate Plan [Offense]**

A fall back plan that closely supports the Primary Plan

#### **C - Contingency Plan [Defense]**

Focused on the firefighter’s safety, move to a safety zone or temporary refuge area

#### **E - Emergency Plan [Defense]**

Firefighter survival, deployment zones, fire shelters

### **ALWAYS HAVE A DEPLOYMENT SITE IDENTIFIED!**

### DRAW-D

**D - Defend** – Holding actions, protecting priority areas, protect the structures, hold and improve the line

**R - Reinforce** – Bring more resources to bear, add resources necessary to *advance* or *defend*

**A - Advance** – Anchor and Flank, Direct or Indirect Attack, Active burnout operations

**W - Withdraw** – Cease current activities until conditions modify, Abandon an established position or constructed line in response to an increase in fire intensity, Not a stigma, but a decision to move away from a threat

**D - Delay** – Wait until the situation has modified sufficiently to allow a different level of engagement, Waiting for conditions to meet pre-identified triggers necessary to *advance* or *defend*, not a lack of effort, but a conscious decision to maximize long term effectiveness

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at <http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1>

**CAL FIRE SOCIAL MEDIA POLICY** – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at <http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf>

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email *"team email"*.
