

CHIMNEY INCIDENT

CA-SLU-008948

INCIDENT ACTION PLAN

OPERATIONAL PERIOD

8/24/2016 0700

to

8/25/2016 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">CHIMNEY</p>	2. Operational Period:	Date From: 8/24/2016 Time From: 0700	Date To: 8/25/2016 Time To: 0700
3. Objective(s): <u>Management Objectives:</u> <ul style="list-style-type: none"> • Provide for and maintain public and first responder safety by utilizing the incident safety analysis process. • Minimize damage to structures, private property and other improvements in and around the fire area. • Utilize tactics that promote the protection of sensitive natural and cultural resources. • Ensure that cooperation and collaboration are maintained at all levels of the incident. • Provide for timely and accurate incident information via the media, public meetings, and public contact. • Foster and enhance community and political relationships. • Be financially responsible for all management and fire suppression tactics. • All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of San Luis Obispo and Monterey Counties. 			
<u>Control Objectives:</u> <ul style="list-style-type: none"> •Keep the fire North of Lime Mountain •Keep the fire South of the San Antonio River •Keep the fire West of Lake San Antonio •Keep the fire East of Burnett Creek Road 			
<u>General Situational Awareness:</u> <p>The morning inversion will lift around 14:00, allowing for west winds of 5-10 MPH to develop. Higher gust to 15 MPH will be found on ridgetops.</p> <p>Steep and rugged terrain along with critically dry, cured and drought stricken fuels.</p> <p>Be aware of firefighter fatigue due to extended work assignments and limited resources.</p>

Chimney Fire Weather Forecast

FORECAST NO: 9

NAME OF FIRE: Chimney

PREDICTION FOR: 0700 Wednesday – 0700 Thursday
August 24th – August 25th

UNIT: CA-SLU

SIGNED: *Amanda Graning*

TIME AND DATE

FORECAST ISSUED: 2000 8/23/2016

Incident Meteorologist

Amanda Graning

WEATHER DISCUSSION:

The morning inversion will lift around 1400, allowing for west winds of 5 to 10 mph to develop. Higher gusts to 15 mph will be found on the ridge tops and along west facing slopes. Temperatures will span from the 70s near Hearst Castle, to the upper 90s along and east of the Rocky Butte Truck Trail. Humidity values will fall into the teens across much of the fire, with elevated values west of the Rocky Butte Truck Trail. Expect overnight temperatures to fall into the 50s with good humidity recovery. Winds will become light and variable after sunset with smoke settling in the valleys.

WEATHER FORECAST FOR Wednesday:

WEATHER: Sunny. Smoky.
TEMPERATURES: West of Rocky Butte Trail 75-80 F
East of Rocky Butte Trail: around 95 F

MINIMUM HUMIDITY: West of Rocky Butte Trail: 30-40%
East of Rocky Butte Trail: 10-20%

20 FT WINDS: *****Fire Will Create Localized Stronger & Erratic Winds*****
Below 2000ft, Variable 2-6 mph, becoming upslope 4-8 mph.
Gusts to 12 mph after 1300. Higher winds on west facing slopes.
Above 2000ft: Variable 2 to 5 in the morning, becoming west-northwest 6 to 10 mph. Gusts around 15 mph after 1300.

WEATHER FORECAST FOR Wednesday Night:

WEATHER: Clear. Smoky.
TEMPERATURES: 50 to 60 degrees.

HUMIDITY RECOVERY: 60-80%.

20 FT WINDS: *****Fire Will Create Localized Stronger & Erratic Winds*****
Below 2000ft, Upslope 5-10 mph through 2000, then variable 2-5 mph
Above 2000ft: West-northwest 6 to 10 mph in the evening, becoming variable around 5 mph after 2200.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 010	TYPE OF FIRE: Wildfire
FIRE NAME: Chimney Fire	OPERATIONAL PERIOD: 08/24/16 0700-0700
DATE ISSUED: 08/23/16	TIME ISSUED: 1930
UNIT: CA-SLU-008948	SIGNED: <i>Todd Hopkin</i> Typed/printed: Todd Hopkins (FBAN)

INPUTS

WEATHER SUMMARY: ***See *IMET Chimney Fire Weather Forecast in IAP****

WEATHER: Sunny. Smoky.

TEMPERATURES: West of Rocky Butte Trail 75-80 F
East of Rocky Butte Trail: around 95 F

MINIMUM HUMIDITY: West of Rocky Butte Trail: 30-40%
East of Rocky Butte Trail: 10-20%

20 FT WINDS: ****Fire Will Create Localized Stronger & Erratic Winds****
Below 2000ft: Variable 2-6 mph, becoming upslope 4-8 mph.
Gusts to 12 mph after 1300. Higher winds on west facing slopes.
Above 2000ft: Variable 2 to 5 in the morning, becoming west-northwest 6 to 10 mph. Gusts around 15 mph after 1300.

OUTPUTS

FIRE BEHAVIOR

GENERAL: The fire is burning in a mix of grass and brush with stands of Oak trees and litter that are extremely dry, very drought stressed, and have a heavy fuel loading. The fire spread is being driven by fuel and topography runs with short range spotting. Fire activity will increase as the inversion breaks around 1400. West winds aloft could cast embers to the SE and produce spot fires in receptive fuel beds along east and south flanks. Divisions in higher elevations could see spotting to the east from the forecasted General Wind coming from the west (About 3000' Level).

Probability of Ignition: 89%
100 HRFM: Above 97th Percentile

FDFM: 3%

ERC: Above 97th Percentile
1000 HRFM: Above 97th Percentile

SPECIFIC:

Division D, Division E, Division G

Flame Lengths- Head fire: 4-15 ft. in Grass, 18-35 ft. in Brush, Flanking fire: 5-7 ft. in Grass, 4-12 ft. in Brush

Rate of Spread- Head fire up to 70 ft/min in understory Grass, Up to 240 ft/min in open grass,
Up to 164 ft/min in open Brush field

Spotting Distances- Up to 1/2 mile

Division H, Division J, Division L, Division P

Flame Lengths- Head fire: 4-15 ft. in Grass, 20-35 ft. in Brush, Flanking fire: 6-8 ft. in Grass, 5-14 ft. in Brush

Rate of Spread- Head fire up to 240 ft/min in Grass, Up to 164 ft/min in open Brush field

Spotting Distances- Up to 1/2 mile

Division A, Division M, Division R, Division W, Division Z

No growth expected. Interior islands and heavier fuels will continue to burn out and smolder

AIR OPERATIONS:

Smoky conditions may make visibility difficult for air resources
Fire will create localized stronger & erratic winds
Sunrise: 0629 Sunset: 1941

SAFETY

- NW winds could push fire embers to the SE and start spot fires near the east and south perimeter of the fire
- Don't become complacent! Identify your safety zones and escape routes.

CHIMNEY HEALTH AND SAFETY MESSAGE

We Are ALL Safety Officers !!!

INCIDENT: Chimney Fire CA-SLU-008948

DATE: August 24, 2016 TIME: 0700-0700

Major Hazards and Risks: Fatigue, Extremely Dry, Cured, and Drought Stricken Fuels.

COMPLACENCY

Remind your personnel to keep their heads in the game and to never let their guard down. Nothing should sneak up on you if you are fighting fire aggressively at all times. Maintain Situational Awareness and be attentive at all times.

HYDRATION/ FATIGUE

Drink plenty of fluids throughout the day and eat accordingly. Address dehydration and fatigue concerns immediately upon symptom onset.

DRIVING:

Steep, narrow, dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. Flag unstable roads and other hazards that may be encountered while driving. Repopulation in place, careful of public on roadway. SCHOOL IS IN, CHILDREN IN AREA!

HAZARD TREES

Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow Hazard Tree Safety, pg. 22-23 in your IRPG.

FIRE BEHAVIOR:

Fuels are drought stricken and are receptive to fire spread. A small amount of wind on this dry fuel changes the game dramatically!! Flare-ups generally occur in deceptively light fuels, such as grass and light brush or islands within fire perimeters of unburned or partially burned fuels.

POWERLINE SAFETY:

Use caution when working around powerlines, watch for possible downed lines and treat all lines found as energized until it is confirmed they have been de-energized.

Do more than Manage-Lead!

Emphasize intangibles such as morale, motivation, momentum, emotions, attitudes, atmosphere and timing to stay engaged and work diligently to meet the given objectives SAFELY.

Incident Safety Officer: Anthony Stornetta

Incident Commander: Glenn Patterson

CHIMNEY INCIDENT RISK ANALYSIS (ICS 215A)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FATIGUE/HEAT/DEHYDRATION	Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift. Reassess for fatigue throughout the shift and pace your crews so you can accomplish your objectives.
ALL	DRIVING HAZARDS	Slow Down- School is back in session, watch out for children in the area. Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.
ALL	HAZARD TREES	Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do not take breaks or park under trees. Do Not Fall trees out of your certification level.
ALL	COMPLACENCY	Maintain Situational Awareness at all times. Post experienced Lookouts, stay in the game and fight fire aggressively to maintain attentiveness.
ALL	POWER LINES	Follow Power Line Safety guidelines (IRPG pg.24.) Extinguish all power poles that are on fire before the fall. Communicate power line hazards to supervisor and hazard flag accordingly. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
ALL	LINE CONSTRUCTION	Conduct thorough briefing for all personnel (inside rear cover IRPG). Ensure LCES in place prior to engagement (IRPG p. 6). Establish adequate safety zones (IRPG p.7). Use Downhill Line Checklist (IRPG p. 8). Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 2-3). Utilize Risk Management Process (IRPG p.1). Rolling Debris, steep terrain: watch footing and "maintain your dime"
ALL	AIRCRAFT OPERATIONS	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Only utilize aircraft to insert personnel on the line when necessary.
ALL	HEAVY EQUIPMENT SAFETY	Watch for rolling material. Monitor safe working distances. Avoid working below Dozer. Utilize communication with the operator (radio or hand signals)
ALL	EXTREME FIRE BEHAVIOR	Know your LCES and maintain Situational Awareness. Use experienced Look Outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH when the inversion lifts. Expect rapid rates of spread with long range spotting, have a contingency plan (PACE) with established decision points and safety zones.
ALL	STRUCTURE DEFENSE HAZARDS	Conduct thorough briefing for all personnel (inside rear cover IRPG). Follow Wildland Urban Interface Guidelines (IRPG p. 12-16). EMPOWER your people to conduct safety briefings and cover potential hazards on the line for the operational period.
ALL	ACCOUNTABILITY	TAKE CHARGE of assigned resources. MOTIVATE firefighters with a "can do safely" attitude. DEMONSTRATE INITIATIVE by taking action in the absence of orders. COMMUNICATE by giving specific instructions and asking for feedback. SUPERVISE at the scene of action.

AIR OPERATIONS SUMMARY ICS-220

Incident Name Chimney	Sunrise 629	Startup 730	Cutoff 1910	Sunset 1940
---------------------------------	-----------------------	-----------------------	-----------------------	-----------------------

General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc.
 TRACK ALL DIPSITE LOCATIONS / NUMBER OF DIPS / GALLONS TAKEN.
 TRACK ALL DROP LOCATIONS / NUMBER OF DROPS / GALLONS DROPPED.
 ALL GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES, FORMAT.
 AVOID Aerial Application of Retardant / Foam / Agent within 300' of Waterways, Bodies of Water, etc.
 If Retardant / Foam / Agent is Dropped Within These Areas Immediately Notify the AOB and Provide the Following Information: Lat / Long, Estimated Number of Gallons and a Map Detailing The Area.

Frequency	TX	Tone	RX	Tone	AM / FM

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: AIR GUARD 168.6250 Tone 1

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 - Closest EMS resource
 - Communications Unit
- Communications Unit contacts:
 - Ground or Air ambulance as requested
 - Operations
 - Safety
 - Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY: 619-818-8437 (For In-Camp 911)
Contact Communications for 911 response following local procedures.

- Communications contacts:
 - Medical Unit Leader
 - Crew Supervisor
 - Logistics
 - Comps/Claims
 - Safety

INJURY REPORTING PROCEDURES

NATURE OF INJURY _____
 LOCATION OF PATIENT _____
 POINT OF CONTACT _____
 TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___
 POINT OF PICKUP _____
 LAT _____ LONG _____
 PATIENT UNIT ID _____
 IS AN EMT WITH PATIENT: YES ___ NO ___
 AGE _____
 SEX: MALE ___ FEMALE ___

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

ICS 206 (Rev 03/12) FR	9. PREPARED BY: (Medical Unit Leader) Matt Lathrop (MEDL)/ Justin VanderHulst (MEDL-T)	10. REVIEWED BY: (Safety Officer) 
----------------------------------	---	--

CAL FIRE WUI Guidelines

STRUCTURE DEFENSE TACTICAL ACTIONS

CHECK AND GO

"Check and Go" is a rapid evaluation to check for occupants requiring removal or rescue.
Structure Triage Category – Threatened Non-Defensible

PREP AND GO

"Prep and Go" implies that some preparation of the structure may be safely completed prior to resources leaving the area. Structure Triage Category – Threatened Non-Defensible

PREP AND DEFEND

"Prep and Defend" is a tactic used when a Safety Zone and TRA are present and adequate time exists to safely prepare a structure for defense prior to the arrival of the fire front.
Structure Triage Category – Threatened Defensible

FIRE FRONT FOLLOWING

"Fire Front Following" is a follow up tactic employed when Check and Go, Prep and Go, or Bump and Run tactics are initially used. A tactic used to come in behind the fire front.

BUMP AND RUN

"Bump and Run" is a tactic where resources typically move ahead of the fire front in the spotting zone to extinguish spot fires and hot spots, and to defend as many structures as possible.

ANCHOR AND HOLD

"Anchor and Hold" is a tactic utilizing control lines and large water streams from fixed water supplies in an attempt to stop fire spread. The goal is to extinguish structure fires, protect exposures, and reduce ember production.

TACTICAL PATROL

"Tactical Patrol" is a tactic where the key element is mobility and continuous monitoring of an assigned area.

LEVELS OF ENGAGEMENT

PACE

Implement PACE. prior to engaging in any structure protection action.

P - Primary Plan [Offense]

Is focused on fire fighter safety and mission objectives

A - Alternate Plan [Offense]

A fall back plan that closely supports the Primary Plan

C - Contingency Plan [Defense]

Focused on the firefighter's safety, move to a safety zone or temporary refuge area

E - Emergency Plan [Defense]

Firefighter survival, deployment zones, fire shelters

ALWAYS HAVE A DEPLOYMENT SITE IDENTIFIED!

DRAW-D

D - Defend – Holding actions, protecting priority areas, protect the structures, hold and improve the line

R - Reinforce – Bring more resources to bear, add resources necessary to *advance* or *defend*

A - Advance – Anchor and Flank, Direct or Indirect Attack, Active burnout operations

W - Withdraw – Cease current activities until conditions modify, Abandon an established position or constructed line in response to an increase in fire intensity, Not a stigma, but a decision to move away from a threat

D - Delay – Wait until the situation has modified sufficiently to allow a different level of engagement, Waiting for conditions to meet pre-identified triggers necessary to *advance* or *defend*, not a lack of effort, but a conscious decision to maximize long term effectiveness

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

Attach Firing Operations Checklist to ICS-214

TRAINING SPECIALIST MESSAGE

**All Chimney Incident Trainees
Beat the Rush!!!**

In order to receive documented credit for your training assignment you must register with the incident Training Specialist.

**The Training Specialist is available immediately following the morning Briefing.
Location: Main building next to Check-In.**

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you Demob!!

Bring the following to the “exit interview”

- **A completed and signed ICS 225 Performance Evaluation**
- **A completed Evaluator’s Recommendation**

Forms are available at the Training Office

Remember: No documentation – it didn’t happen!

Claudia Soiza - 949 632-7813
Cory Cisneros - 909 224-1640

Fuels and Fire Behavior Advisory

Southern California GACC

August 22, 2016

Subject: Exceptionally dry fuels, along with significant tree mortality in the Sierra, will create a high potential for extreme fire behavior conditions across much of Southern and Central California.

Discussion: Much of Southern and Central California has been affected by a multiyear severe drought that has caused significant stress to the native vegetation. Recent fires such as the Blue Cut, the Chimney, and the Rey have exhibited extreme fire behavior conditions that have not been observed in many years which underscores how dry the fuels are. Tree mortality in the Sierra continues to grow at an alarming rate with 40-100% mortality in a substantial amount of conifer stands within the Sierra and Sequoia national forests. It is estimated that over 66 million trees have died across California forestland since 2010. Currently, the Cedar Fire burning in the Sequoia national forest presents many safety hazards to firefighters as well as to the general public. For more information about the current tree mortality situation, please visit the Tree Mortality Task Force page at: <http://www.fire.ca.gov/treetaskforce/TreeMortalityMaps>

Difference From Normal Conditions: Live fuel moisture values among the native brush have reached levels that are more typical of late September and early October. Dead fuel moisture in the affected areas is either around the 97th percentile, or is at record levels for this time of year. While there may be periods of slight reprieve from the recent hot and dry weather, no significant improvement in fuel conditions is in sight. In addition, the absence of summertime convection across the mountain areas has left these areas especially dry due to the lack of increased humidity and localized rainfall.

Concerns to Firefighters:

- Due to the abnormally dry fuels, extreme fire behavior such as dangerous rates of spread, torching, crowning, and long range spotting can be expected.
- Fires will burn activity even during benign weather conditions. Active fire behavior can extend well into the night and early morning hours even with moderate humidity recovery.
- Within the tree mortality areas, falling trees and branches along with snags will be a major concern as higher decay rates in dead conifers contribute to an increase in falling material.

Mitigation Measures:

- Local and inbound fire personnel need to be aware of the potential for extreme fire behavior. Local briefings should highlight current weather and fuel conditions, and note any unusual fire behavior that has been observed on recent incidents.
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- **Base all actions on current and expected behavior of the fire.** Augment initial attack resources as incident activity dictates.
- Review pocket cards, the latest fuel conditions, and the fire potential products from Predictive Services. <http://gacc.nifc.gov/oscc/predictive/weather/>

Area of Concern: This advisory is valid for the following PSAs: SC01 – SC04 and SC06 – SC11. For more details, please see a map of the affected areas at this location. http://www.predictiveservices.nifc.gov/fuels_fire-danger/Fuels_FireBehavior_Advisories.png

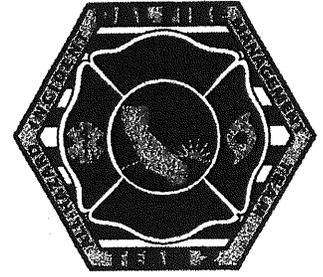

Issued: August 22, 2016 (Note this advisory will be in effect for 14 days and will be reviewed/updated at that time.)

DEMOBILIZATION PLAN

Chimney Fire

CA-SLU-008948

DEMOB PROCEDURES

- CHECK THE DEMOB LIST EACH MORNING. YOU CAN FIND THE DEMOB LIST THROUGH THE “QR” CODE ON THE I.A.P. COVER OR ON LISTS POSTED THROUGHOUT CAMP. **ONLY REPORT TO DEMOB AT YOUR SCHEDULED TIME.** EARLY ADMITTANCE WILL NOT BE ALLOWED.

- PICKUP A DEMOB CHECKOUT FORM (ICS-221) FROM THE DEMOB UNIT, THEN GO TO THE FOLLOWING UNITS TO OBTAIN THE NECESSARY SIGNATURES:
 - ✓ SUPPLY UNIT
 - ✓ COMMUNICATIONS UNIT
 - ✓ GROUND SUPPORT/VEHICLE INSPECTION***
 - ✓ DOCUMENTATION UNIT
 - ✓ TIME UNIT
 - ✓ TRAINING UNIT (IF APPLICABLE)
 - ✓ ACCOMMODATIONS (IF APPLICABLE)

***VEHICLE INSPECTION:

- THE DEMOB UNIT WILL INFORM YOU IF THE VEHICLE NEEDS TO BE INSPECTED.
- YOU MUST HAVE THE ICS-221 DEMOB FORM WITH YOU AT VEHICLE INSPECTION.
- A VEHICLE INSPECTION TIME WILL BE PROVIDED WHEN YOU INITIALLY ARRIVE TO THE DEMOBILIZATION UNIT.
- **DO NOT REPORT FOR VEHICLE INSPECTION PRIOR TO YOUR APPOINTMENT**

RETURN THE COMPLETED ICS-221 FORM TO THE DEMOB UNIT AND TRAVEL HOME SAFE!

CHIMNEY FINANCE MESSAGE

DIVS are responsible for completing hired equipment shift tickets every day!

Use the attached form to track our water usage and turn in to Finance daily.

Off-site feeding is NOT authorized, except for:

- The ECC Support Team (O-12)**
- Those staying in hotels in and south of San Luis Obispo**

If you are staying in the Cal Poly dorms, you MUST eat dinner in the Cal Poly dining hall.

Check in with the TIME unit to start your timekeeping. Vendors bring in your contracts.

**Bill Winter, Finance Section Chief
805-903-3491**

Ground Support:

4735 Airport Dr. Paso Robles

Fuel:

South of Base Camp

(Riverside Ave Cross of 10th)

Gas and Diesel Available 24 hrs.

Also At Station 35

(275 Cypress Mountain Dr.)

Gas and Diesel Available 24 hrs.

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

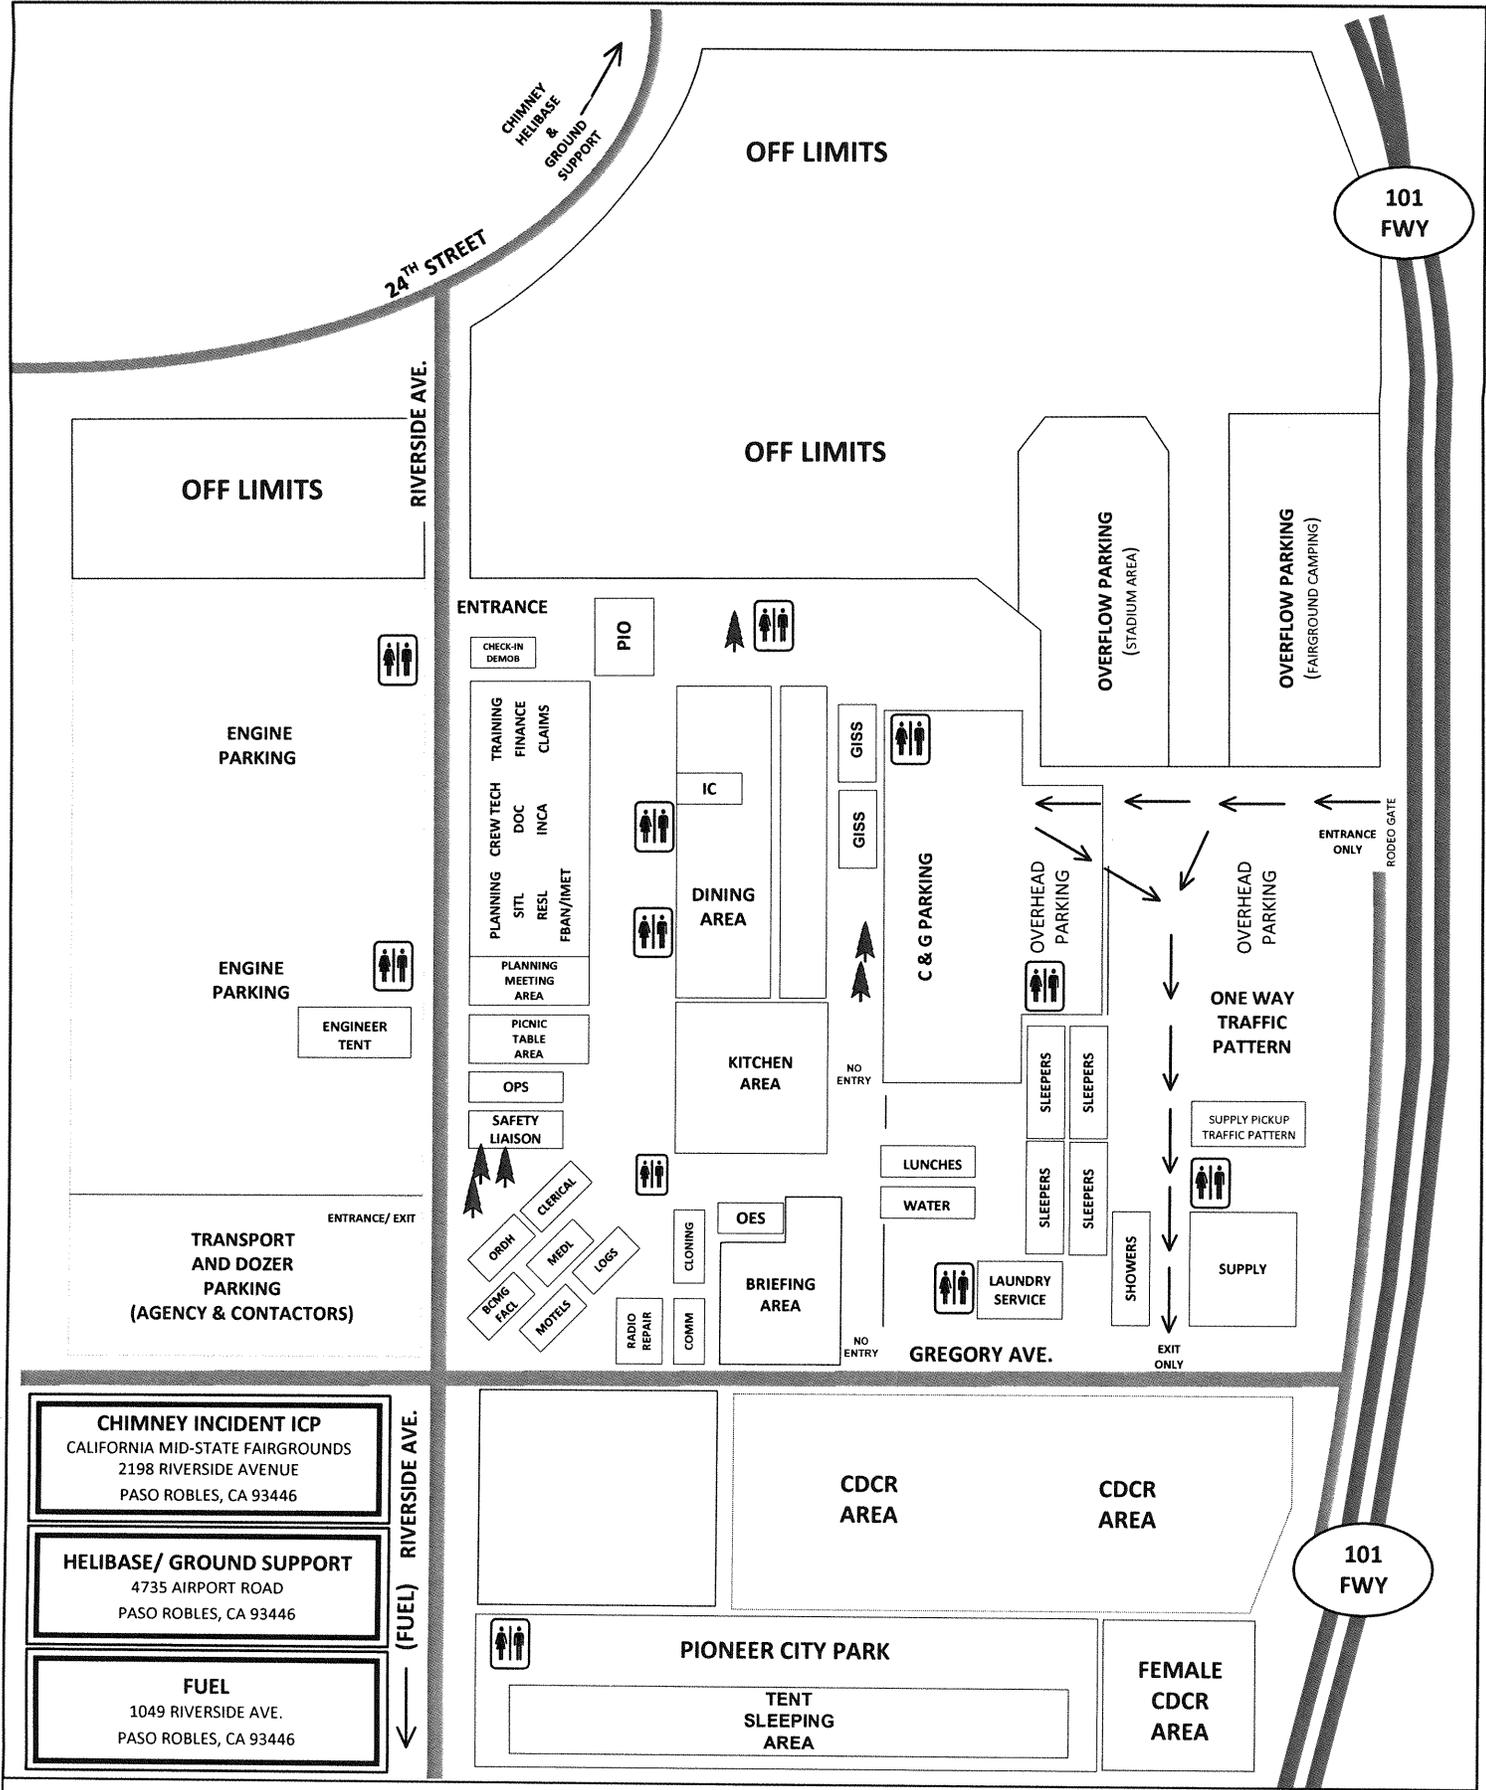

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

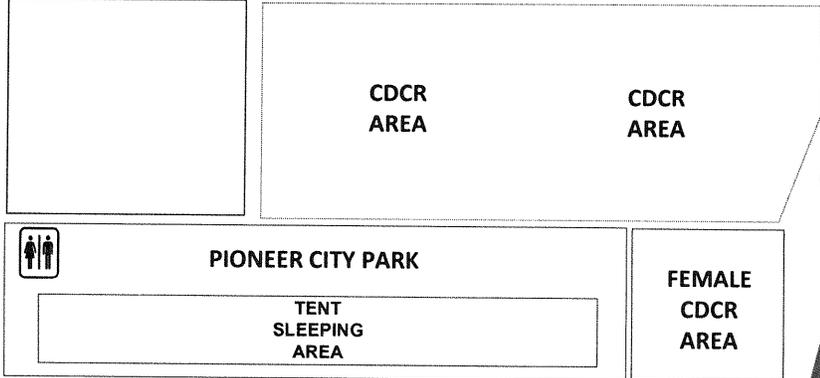

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.
